Special Notices.

TUSKALOOSA DIST. CONFERENCE.

The District Conference for the Tuskalooza district will be held at Greensboro, commencing on Thursday, September 22, 1870. All official members of the church are entitled to seats in the conference.

JAS. L. COTTEN, P. E.

CAMDEN DISTRICT CONFERENCE.

The Camden District Conference of the Alabama Conference will be held at Bellville, Alabama, October 6-9. Rev. M. J. Law will preach the opening sermon October 6, at eleven o'clock A. M. All are requested to be present at the opening services.

D. M. HUDSON, P. E.

Rev. D. M. Hudson, of the Alabama Conference, and Elder David Adams, M. D., of the Christian Church, will discuss the Mode and Subjects of Baptism, in Greenville, Alabama, September 1-8, 1870. Debate to commence at ten o'clock A. M.

CLINTON DISTRICT CONFERENCE.

The District Conference for Clinton district, Mississippi Conference, will be held at Jackson, Louisiana, September 29 and 30 (Thursday and Friday) and the Quarterly Meeting for Jackson circuit will be held October 1 and 2, at Salem.

J. NICHOLSON, P. E.

ALEXANDRIA DIST. CONFERENCE.

The District Conference for Alexandria district, Louisiana Conference, will convene in Centerville, Catahoula parish, Louisiana, on Friday, the sixteenth of September, 1870, at eleven o'clock A. M. Local preachers, pastors and stewards will please come prepared to present their reports. Delegates to the Annual Conference will be elected.

J. F. MARSHALL, P. E.

PENSACOLA DIST. CONFERENCE.

The District Conference for the Pensacola district, Alabama Conference, will hold its annual session in Milton, Florida, beginning on Thursday, September 29, at eight o'clock A. M. Opening sermon by Rev. J. A. Pace, on Wednesday night, September 28. Ministers from abroad are expected and invited to attend.

J. A. PARKER, P. E.

NOTICE.

To the Official Members on the Yazoo District, Mississippi Conference:
Failing to secure the co-operation of a sufficient number of tent-holders for the camp meeting at Fletcher chapel, our District Meeting is transferred to Richland, Holmes county, Mississippi, and will begin on Thursday morning before the first Sunday in September, at ten o'clock.

SHIREVEPORT DIST. CONFERENCE.

The District Conference for Shireveport district will meet at Greenwood, Louisiana, on Thursday, September 22. The official members of the respective churches are pressed with the importance of attending.

JOHN PIPES.

CAMP MEETINGS.

A camp meeting will be held at Salem, East Pascagoula and Bay Shore circuit, Mobile district, Mobile Conference, commencing on Thursday night before the second Sunday in October. Ministers and people are cordially invited to attend.

A. J. COLEMAN.

We will have a camp meeting (D. V.) at Frost's Bridge, on the Clark and Shubuta circuit of the late Mobile Conference, embracing the second Sunday in October. Brethren in the ministry, who can do so, are especially invited to attend, and any others who feel interested in this great work. Come over, Mr. Editor, and help us.

WILLI H. LITTLE, Pastor.

A camp meeting will be held on Pleasant Hill and Mammy circuit, at Benham, commencing on Friday evening, the thirtieth of September. Preachers will please note it.

JOHN PIPES.

There will be a camp meeting at China Grove, between the Westville and Ozark circuits of the Mariana district, Alabama Conference, commencing on Friday before the second Sabbath in September. Brethren, come!

W. A. SAMUEY.

T. S. ARMISTEAD.

A camp meeting will be held at Linwood, DeKalb circuit, Macon district, Mobile Conference, commencing on Thursday night before the fourth Sunday in September.

U. L. THOMPSON, P. C.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, SEPTEMBER 3, 1870.

NO. 33.

NEWS OF THE WEEK.

DOMESTIC

St. Louis, Aug. 26.—The express car on the Pacific railroad was captured by disguised men who gagged the messenger, stole \$10,000 and leaped from the car. No clue to the perpetrators.

Chicago, Aug. 26.—The Beaver Dam (Wisconsin) Flouring Mills were burned to-day. Insurance \$35,000.

Atascosa, N. J., Aug. 29.—The Washington express train ran off the track to-day. A brakeman and one German were killed, and several passengers were slightly hurt.

Atascosa, N. J., Aug. 29.—Eight negroes who were prominent in the Louisville riot were arrested to-day in Macon and lodged in jail.

FOREIGN

Paris, Aug. 25.—The Opinion Nationale says that to all who think more than of any other thing than driving the Prussians from the soil of France, it recommends the perusal of the following passage from the published Prussian plan of attack: "Paris will never be ours unless owing to political circumstances or moral reasons, which will oblige the defenders to open to us its gates." Political circumstances, says the Opinion, means revolution, and moral reasons means treachery.

The council of ministers has been in session half of to-day. It has been ordered by the Committee of Defense that on the approach of the enemy, the crops in the environs of Paris shall be destroyed. Great haste is urged on the farmers to store their produce before the enemy seizes it.

A Prussian colonel has written to Emile Girardin, offering a wager Prussians will be in Paris on the fifteenth of September. Girardin publishes a letter accepting the wager.

Rome, Aug. 25.—The Osservatore, Italia's journal, generally favors the Prussian cause, and in consequence has been threatened with violence by the pontifical soldiers unless it speedily alters its tone.

Paris, Aug. 25.—Warning has been given that the ministers will be forced to apply the press laws if certain journals, in spite of representations by the government, continue to publish details of the movements of troops, state of the fortifications, and composition of the armies.

General Trochu reviewed the Garde Mobile. The men made a fine appearance.

The Emperor quitted Courcelles yesterday.

The imperial headquarters are at Châlons.

The grain mills in the valleys of Seine and Marne, with the remaining contents, have been burned. The country people are destroying the roads and doing all they can to impede the march of the Prussians.

Prussian scouts have appeared at Aumame and St. Menchault. The prefect of St. Menchault and the railway officials have left the place.

The camps of the Garde Mobile are formed everywhere. Guns have been distributed on territories corresponding with the grand army corps. In the rest of France, the distribution is nearly completed.

Paris, Aug. 26.—The Opinion Nationale asks why England, whom no one menaces, is in such feverish haste. England, who never spends a pound for any cause not her own, yet she is now spending millions in arms, and the Opinion wants to know what is the object of this unwarranted activity.

The Constitutional denies that the expelled Germans were prevented from leaving when the war began. Those leaving did so on their own accord. Those pretending they were expelled falsely. If, however, Paris is besieged, the authorities will take such measures as the public safety will demand.

The Constitutional wonders why Thiers should refuse to be placed on the Committee of Defense. His great patriotism and knowledge of the construction of the walls of Paris made it natural to select him. It is said Count Daru will be appointed in his place.

New York, Aug. 26.—Cuban advices to the Evening Post state that a Spanish column recently had an engagement with the insurgents in the jurisdiction of South Perita. The Spanish loss was six hundred killed, wounded and missing. Le Vese de Cuba confesses that a detachment of forty Spaniards were surprised and twenty killed. Some accounts say only five escaped.

The Diario says the district of

Sagua has been invaded by the insurgents, under General Ledra. The court of appeals, collector of taxes and schools at Puerto Principe have been closed. This is supposed to be a step toward Spanish evacuation.

Coasting steamers from the North and South arrive daily with sick and wounded.

The yellow fever is very prevalent.

Fighting is incessant throughout the island.

London, Aug. 29.—It is rumored that the French ambassadors have asked the great powers to guarantee the French dynasty.

The Times military articles are attributed to General Burgoyne.

A French frigate is cruising in St. George's channel.

Parisians affect the belief that the Prussians will be caught between two fires and exterminated.

Bismarck's personal train is nearly as heavy as that of King William.

The Times says Paris must and will be saved, but the removal of the seat of government is indispensable, owing to the predominance of vile passions, which are irreconcilable with public order and military movements.

The Times questions McMahon's tactics in moving northeast, when he might at least have threatened the advancing Prussian columns.

M. Thiers asserted at a meeting of the Committee of Defense that the Prussians would never reach Paris without a complete victory over the French army. Even then they would not stay in Paris long.

The Irish war fever is intense. The fund for the wounded rapidly accumulates.

The German bark Texas lately put into a Scottish port for safety.

General Trochu orders all un-naturalized natives, and all enemies of the country, to leave Paris within three days. They must leave France or go behind the Loire.

New York, Aug. 29.—The Evening Telegram's special dispatch from London says a dispatch from Montevideo reports that a great and bloody battle commenced on Sunday evening. The Monseon battle is undecided.

Sixty thousand troops, in excellent order and fine spirits, passed Soissons yesterday to reinforce McMahon.

Madrid, Aug. 29.—The Regent and ministry are in consultation. A coup d'état is daily expected.

Paris, Aug. 29.—A fight has occurred at Lisbon between the French and German citizens, in which many were killed.

Prince Napoleon had a long interview with the Austrian ambassador while at Florence.

London, Aug. 30.—Every German arrested appeals to the American minister, Mr. Washburne, for an examination.

No American has yet been arrested as a Prussian spy. Ten out of every dozen Englishmen are arrested.

The Prussians entered Vonziers on the heels of the retreating French.

King William's route to Paris is by the upper Marne and Meuse.

A French frigate repaired her engines at Lerwick, Scotland. She was notified by the government to leave.

Parisians of all ranks have been enrolled for the defense of the city.

Paris, Aug. 30.—The Patrie says military events of the utmost importance are preparing. Whatever may be the result at Paris, France must redouble her energy and create a third and fourth army. The Germans are active. We must use all our efforts.

Paris, Aug. 30.—Preparations have been made to promptly destroy all bridges and railways around Paris.

Madrid, Aug. 30.—The Carlist bands of North Spain have been defeated and dispersed wherever encountered. Hundreds of them have fled to France, where they have been promptly arrested.

New York, Aug. 30.—Special to the New York Herald:

London, Aug. 30.—A special from Berlin to-day says Austria is secretly arming. Prolonged officers and soldiers are being recalled and other warlike preparations are progressing. The object is unknown.

A Madrid dispatch reports rumors of a disquieting nature regarding Cuban officers. Do Rodas demands twelve thousand reinforcements to supply the losses from sickness. Recruiting progresses slowly.

A special envoy from the French Emperor had an interview with the Regent and Prince yesterday.

A Brussels dispatch says McMahon will make a desperate effort to force his way from Sedan along the line of the Montmedy and Thionville railroads, with the object of attacking, from the north, whatever force may be gathered in the triangle formed by Metz, Verdun and Toul, regardless of their numbers.

McMahon hopes to have a position, at all of these places. The attempt is desperate, as there is no escape from destruction in case of defeat. It is believed the Emperor and son will await the result of this movement at Sedan, and be ready to cross at Bouillon into Belgium in case of defeat at Paris.

London, Aug. 30.—The Prince Imperial was at Sedan on Sunday night, where the Emperor was expected. The nilans at the time were only nine miles south.

Paris, Aug. 30.—The Opinion Nationale says: "War to the last. Let not one German recross the Rhine. For centuries let Germany remember an enemy may enter, but cannot leave France."

New York, Aug. 31.—It is reported that a battle is now going on between McMahon and the fourth Prussian corps, which is doubtless the Prussian body reported to have been interposed between McMahon and Bazaine.

Ten thousand troops from the interior arrive in Paris daily, who are immediately dispatched to reinforce McMahon. His army, therefore, must now number two hundred thousand, composed of the elite of France.

It is rumored that a new Prussian army is marching on Paris. To impede their progress the government is arming the peasants to enable them to harass the approaching army at every step.

The Courier des Etats Unis says editorially:

"A decisive battle is now probably raging. The admirable strategy of McMahon has resulted in isolating the armies of Frederick and Charles. The conflict will be nearly equal, which is almost certain to guarantee French success; but even in the event of defeat the situation will be far from desperate. The entire nation is in arms and two new armies are forming. The fatal hour approaches when the knell of the invaders will be sounded. French rentes are quoted at 59.10. Gold opens at 161.

Noon advices from Liverpool report cotton strong, with sales of twelve thousand bales.—Pittsburg.

London, Aug. 31.—The suffering of the inhabitants of Strasburg is terrible. They are starving and compelled to live in cellars day and night to avoid the increasing fire of the besiegers.

Another fruitless sortie was made by the garrison on Monday.

The Prussian sharpshooters are within five hundred yards of the glacis.

Many houses have been burned; the arsenal at one time was on fire, but the ammunition was safely removed. The fortress continues to resist.

London, Aug. 31.—The courts decide that the Innman steamer City of Boston was not overloaded, and was seaworthy when she left port.

Pasenger travel between England and Calais has been stopped.

The splendid Strasburg library has been destroyed by the bombardment.

VARENNES, Aug. 31.—An official dispatch states that the advance of the twelfth Prussian army corps and a portion of the fifteenth army corps are engaged near Monart. No details received.

The railway between Mezieres and Thionville has been destroyed at two points by the Prussians.

London, Aug. 31.—The Times says McMahon is attempting to retreat upon Soissons, having failed to relieve Bazaine.

Bocazney, Aug. 30, via London, Aug. 31.—The Prussians attacked McMahon's army to-day near Beaumont, defeated it and drove it back upon the Belgian frontier.

The French camp fell into the hands of the Prussians.

The pursuit of the French was continued for a distance of several miles, and was interrupted by the number of cannon and prisoners taken.

The extent of the battlefield is so vast that it is impossible to obtain further details at this moment.

New York, Sept. 1.—The Courier des Etats Unis, of this morning, says:

"No news of a decisive battle has yet been received. Princes Frederick and Charles failed to make a junction, though the latter, in en-

deavoring to do so, left long trains of wounded and stragglers behind.

The conflicts mentioned in the telegraph are only the preliminaries of a great battle. Several serious engagements have occurred on the borders, at Novart, Beaumont and Carignan, of the result of which nothing is officially known. McMahon simply telegraphs that he has succeeded in crossing the Meuse without molestation.

The French cavalry distinguished themselves in three engagements in the front line. Two of these conflicts resulted in victory over Saxon dragoons, whose battery was captured.

The World ridicules the reports of alleged Prussian triumphs, and says that they are great exaggerations to influence the money markets.

New York, Sept. 1.—Metz has been re-provisioned, and is thus prepared for emergencies.

The French Senate has decided that all persons defending their firesides shall be considered as forming part of the Garde Nationale and entitled to soldiers' pensions. This decision is the French response to the Prussian declaration against the right of defense of citizens who are not of the French armies in the field.—Pittsburg.

The offer of Abd-el-Kader to serve against the Prussians has been accepted by the French government. He has been placed at the head of ten thousand Algerine troops. The following is a translation of the letter he addressed to Marshal Le Bon:

"Praise be to God!

"To the most valiant marshal of France, the minister of war.

"Your excellency:

"We have heard by way of rumor that France intends to talk once more, with powder and bullets to her enemies, the Prussians. (May the curse of God and the Prophet rest on their filthy heads!) and that your most mighty sovereign, Napoleon the Third (whom God may favor and protect!) has decided to march at the head of his valorous soldiers, the sons of French Africa.

"He who has fought the French would be the very last of all true believers if he would not place his unsullied sword at the service of his adopted country in this war, and would not claim the honor of marching in the very van against the Prussians.

"Therefore, excellency, the Emir Abd-el-Kader requests you to lay this humble prayer at the glorious throne of Napoleon the Third, to whom God may grant victory!

"From God's humble servant and worshiper,

"ABD-EL-KADER BEN MAH-EDDIN, Benissa, the sixth Rabia el Saoui, in the 127th year of Hegira."

PREACHING AND PAINTING.

We take the following from a recent letter of Dr. Haygood in the Nashville Christian Advocate. The Bishop who is represented as preaching himself to death was, we suppose, recently the rector of one of the Episcopal churches in New Orleans:

Quite a funny paragraph appeared in some Georgia paper recently. One of the Georgia editors, it seems, had been greatly excited by the zeal of a good Bishop of "the church,"

so called, who had averaged five or six sermons a month, besides occasional confirmations. Now, this good Bishop preached twice during one Sabbath, recently, and after the night sermon had a very unpleasant fainting spell. The editor aforementioned recounted his labors and the fainting, and protested that his Bishop was "preaching himself to death." Another editor—somewhat of a wag—forthwith recited the labors of one of Bishop Pierce's tours, with appointments every day, and very gravely declared that upon the last Sunday of that trip he had "preached twice and had not fainted."

DEATH OF THE REV. H. B. COWLES. The Raleigh Episcopal Methodist of August 17 says: "The death of this distinguished minister is announced in the Petersburg Courier of Saturday. He entered the Virginia Conference in 1831, at its session in Newbern, North Carolina, since which time, through a space of nearly forty years, he has been an earnest and constant laborer in the vineyard of his Master, and his labors have been crowned with much fruit."—Nashville Christian Advocate.

Dr. LOMCK PIERCE.—The first direct intelligence we have had from Dr. Pierce, since the accident we have published, beyond what we gathered from the newspaper notice from which we got our intelligence, is by a letter from himself. He wrote from Bishop Pierce's ("Brightside") August 17, and says:

"My railroad injury took place on Tuesday, July 26. It consisted of a fearful crushing of my right foot, and a flesh wound of about four inches in length, immediately above the inner ankle. This has been the source of my great suffering. The injury of my foot is passing off as kindly as could be expected. The flesh wound is also doing well. But how long it will be before I can resume my work is an open question, nor will I dare to say. I hope, however, to be out by the middle of September. My escape from death or permanent disability was a providential care of me, for which let all my friends give thanks to God."

Were proof wanting, the many inquiries made of us respecting the accident—the manner of it, its damage and its results—would be proof sufficient that Dr. Pierce has the sympathy of a host of friends, who will hail with delight his restoration and return to active duty.—Southern Christian Advocate.

A CONSTITUTIONAL QUESTION TO BE SUBMITTED TO THE ANNUAL CONFERENCE.—The following proposition, having received a two-thirds majority (160 to 4) of the General Conference, meeting in Memphis, May 25, 1870, was ordered to be sent round to the several Annual Conferences; and if it receive a three-fourths vote of the same, it is to be inserted in the Discipline, as the end of section 1, chapter 2, "Of the General Conference."

"Provided, That when any rule or regulation is adopted by the General Conference, which, in the opinion of the Bishops, is unconstitutional, the Bishops may present to the Conference which passed said rule or regulation their objections thereto, with their reasons, in writing; and if then the General Conference shall, by a two-thirds vote, adhere to its action on said rule or regulation, it shall then take the course prescribed for altering a restrictive rule; and if thus passed upon affirmatively, the Bishops shall announce that such rule or regulation takes effect from that time."

BISHOP EARLY has been quite ill for a week or two. He went recently to the Lynchburg District Conference, a few miles from home, and preached. He suffered greatly in consequence. The Lynchburg Virginian, of August 17, however, has relieved our anxieties. It says: "We were glad to hear that this venerable gentleman was more comfortable yesterday, and was able to converse with his friends who called to see him."—Nashville Christian Advocate.

The Rev. William Burr writes us: "Rev. John McCurdy, of the Tennessee Conference, died at his residence in Williamson county, Tennessee, on the morning of August 17, in his seventy-first year. I suppose a more extended notice will be furnished." Cannot Brother Burr give us a memoir of this excellent minister?—Nashville Christian Advocate.

BISHOP PAINE writes, Sardis, Mississippi, August 15, 1870: "I have had no rest since the latter part of June. I have just closed my ninth District Conference in so many successive weeks. I have others to hold; am weary, and nearly worn down, but cheered with the hope of doing good."—Nashville Christian Advocate.

Is JESUS IN IT?—The evening meeting was closing. Our pastor, a very discreet man, who never wears us at the last by "long drawn out" remarks, but speaks short and to the point, arose and said: "We have, as you know, in our congregation a little deaf and dumb boy. On Sunday he loves to have his mother find for him the words that we are all singing, though the music never thrills his quiet ear nor touches his little heart. He looks at the hymn, glides his little finger over every word to the end; if he finds 'Jesus' there he is satisfied and absorbed to the close of the singing; but if the word 'Jesus' is not there, he closes the book and will have nothing more to do with it. So should we test the religion of the day—if we find Jesus the central thought of my system of theology it is good, it will do for us; if not, turn away and have nothing to do with it."—Walchman and Reflector.

THE ALABAMA CONFERENCES.—Bp. Paine writes us: "I wrote to you to announce a change of holding the North Alabama Conference from November 16 to December 7. I did so at the urgent solicitation of brethren, and in haste. I now find that the Alabama Conference is to meet then, and it is best the two should not meet at the same time. You will, therefore, please withhold the publication, and if already published try to recall it."—Southern Christian Advocate.

It is quite evident that love must be deformed when it is all on one side.

Tallahassee Circuit, Alabama Conference

Mr. Eason: At Pleasant Grove, in this circuit, God has granted his people a gracious pentecost. Truly, "Jacob rejoices and Israel is glad." The Holy Ghost came upon us, and sat upon each heart as a refiner's fire. The church was built up in faith, filled with love, joy, peace, and quickened in zeal. The lukewarm were restored and backsliders reclaimed. Herein consists the great victory of the meeting (How many laborers would rejoice to record such fat things of their charges! Pray much, brethren, and believe much!) More than twenty sound conversions! Over twenty applied for membership. Of these, twenty choice members were received into fellowship with the Methodist Episcopal Church South, in strict accord with the Discipline; also one by certificate. One of these was a little boy of six years, son of Brother Glenn. He was soundly converted, and resolutely and advisedly joined the church.

The meeting lasted ten days, with a lively interest pending at its close. Brother Shaver, the presiding elder, was present the first two days, holding quarterly conference. The church joins me in thanks to Revs. A. B. Elliott, John S. C. Glenn, John A. Green and Samuel Segrest for labors blessed of the Lord during the meeting. These are of the local ranks. God bless the local preachers! Let me enter here my solemn protest against newspaper war on these men of God. May the Master reward them, their church nourish, the itinerancy love and honor them, and new-born souls rise up all over the land to call them blessed for their abundant labors. Well, this pentecost has set the circuit on fire. Experimental religion is in the ascendant, old style Methodism is prevailing and on the aggressive. Bless God for the triumphs of the gospel! It is enough!

JERE S. WILLIAMS, P. C.

AUGUST 24, 1870.

Centenary College of Louisiana

The session of this college year will begin on the first Monday in October. The tuition for college classes is \$60 per annum, payable semi-annually in advance. Board at \$15 per month. This institution is located at Jackson, Louisiana, twelve miles back of Bayou Sara. It is one of the oldest in the South, and its graduates fill important positions throughout the States of Mississippi and Louisiana.

Students, upon arriving at Jackson, will report to Prof. A. R. Holcomb.

The board and faculty promise the public that nothing shall be wanting on their part to secure the thorough education of the students committed to their care, in both preparatory and collegiate departments.

For general information we state that the repairs necessary to the center building are going forward, and have already been contracted for. The members of the Mississippi and Louisiana Conferences will please do all in their power to send forward students, so that the term may begin with a large list.

J. C. KEENER,

Pres. Board of Trustees.

THE ALABAMA CONFERENCES.—Bp. Paine writes us: "I wrote to you to announce a change of holding the North Alabama Conference from November 16 to December 7. I did so at the urgent solicitation of brethren, and in haste. I now find that the Alabama Conference is to meet then, and it is best the two should not meet at the same time. SATURDAY, SEPTEMBER 3, 1870.

GOD BLESS YOU.

How sweetly fall those simple words
Upon the human heart,
When friends long bound by strongest ties
Are doomed by fate to part.
You sadly press the hand of those
Who thus in love career you,
And soul responsive beats to soul,
In breathing out: "God bless you."

The mother sending forth her boy
To scenes untrod and new,
Lips not a studied, stately speech,
Nor murmurs out "Adieu."
She sadly says, between her sobs:
"Where'er misfortune press you,
Come to thy mother, boy, come back."
Then sadly sighs: "God bless you."

"God bless you," more of expressed love
Than volumes without number,
Reveal we thus our trust in Him
Whose eyelids never slumber.
I ask, in parting, no long speech,
Drawn out in studied measure;
I only ask the dear old words,
So sweet, so sad: "God bless you."

A TEMPERANCE APPEAL.

To the Members of the M. E. Church South within the bounds of the Jackson District, Mississippi Annual Conference:
DEAR BRETHREN: We have been appointed a committee, by the District Conference of the Jackson District, Mississippi Annual Conference, to address you on the subject of temperance. In performing this duty we intend to be brief. We cannot enter upon the discussion of the temperance question on its merits, but design merely to call your attention to the subject, and urge you to that course which your enlightened consciences have long since dictated.

We regret, with emotions of sadness, that there is occasion for such an appeal. But the desolation and death, the physical, mental and moral ruin which ardent spirits are constantly producing demand this at our hands. The inroads which intoxicating liquors are making in the church call loudly for earnest efforts to stay their desolating waves, and protect ourselves from their baneful influence, as well as to rescue our fellow-men from endless ruin.

It is impossible, in a brief address, to portray the evils of intemperance; nor shall we attempt it. It is admitted by all that intemperance is a growing evil; and all thoughtful and considerate persons must acknowledge that within the past few years it has very rapidly increased, and like the besom of destruction, it is sweeping hundreds of thousands of souls, for whom Christ died, to the drunkard's grave. It is astonishingly alarming. What shall be done? What will you do to lessen this great evil? Do you use ardent spirits as a beverage or deal in it as an article of merchandise? If so, can we not persuade you to abandon its use and sale? It cannot be conducive to your health, unless used merely as a medicine, nor to the prosperity of yourself or family. Neither will the blessings of God rest upon such gains as are acquired by its traffic. What can you promise yourself in the future, dear brother, if you continue the use of ardent spirits? You may read your certain destiny in the experiences of those who have fallen around you by the insidious destroyer. It is estimated that one out of every thirteen who drink dies a drunkard. Though you should escape a death so horrid, yet your life will be shortened by the deadly poison. Think of the tears and bitter anguish of that wife, of the stigma upon those children, who must bear the reproach of having had a drunken father, and of the laughing fiends of hell, and drink no more!

We adjure you by the love you have for your wife and children, by the love you have for the church, by your hope of heaven, and by the terrors of the judgment bar, drink no more! Dear brethren, the church bleeds, the cause of God is impeded, and souls are lost because some who are within her pale use ardent spirits, and that, too, to intoxication. Are you thus impeding God's work? Think of the terrible responsibility taken at the sacred altar! The church demands that you give up the use of ardent spirits, and abandon forever the intoxicating cup. To say the most, their

use is but a personal gratification. And can you not make so small a sacrifice for the cause of Christ? If not, where is that love for him which should burn upon the altar of your heart? St. Paul said he would not eat meat while the world stood if it caused his brother to offend. Will you not follow such an example in reference to intoxicating liquors? How noble is this sacrificing spirit—how exalting to humanity, and how beneficial to the world!

When you contemplate the alarming extent to which intemperance has gone, the inroads it is making in the church, and the untold evils which it has brought upon society, and is still bringing upon your dearest friends, how can you aid, by your example, and influence, in a work so destructive, or be indifferent to your responsibility? Look around you. Humanity bleeds, orphanage weeps, the family hearthstone is made desolate, the land is drenched in tears, and thousands of our fellow-men are being wrecked forever. War has slain its thousands, but intoxicating liquors their tens of thousands. Five hundred thousand drunkards in these States, to say nothing of those who are dying by moderate drinking, sink annually beneath the waves of intemperance, to reach a drunkard's destiny. Can you look upon the long procession of your fellow-beings, which moves as a mighty army into the jaws of the destroyer, and not feel that self-denial, total abstinence and earnest exertion are demanded at your hands to diminish this desolating evil, and to save the church from the waves of death. Ask not the question: "Am I my brother's keeper?" You are bound by the sacred ties of a common brotherhood, by the endearing chords of affection which unite you to those you love, by the love of Christ and his dying agencies on the cross, and by every principle of humanity and Christian philanthropy, not only to abandon the use of intoxicating liquors, but to use every possible effort to save your fellow-men. Should you escape, that noble boy, in whom your hopes are centered, may become a victim to intemperance, and that beloved daughter, around whom your affections cluster, may become the wife of a drunkard, and in poverty and misery eke out a wretched existence.

We appeal to you, brethren, upon this subject by the claims of humanity, by the love of kindred, by your professed attachment to the church and the solemn vows you have taken at her altar, by the love of God, and by the thunders of the last judgment. What more can we say? Did we know the chord in your bosoms which should vibrate responsive to this call to duty, we would arouse you to a new life, and put in operation a power and influence which should send a thrill of joy to thousands, and awaken the harps of angels to a new song.

"Life is real, life is earnest." The days of our pilgrimage are few, and here is a great work to be done. You are called upon to act in the eventful present, and, dying, leave the world the better because you have lived in it. You are called upon to aid in the moral reformation of those around you. Commence at once—commence at home. Cast the evil spirit from your dwellings, and row total abstinence from all intoxicating liquors, except as a medicine; for this is the only safe ground upon which you can stand. A new and bright future will dawn before you, and the sunset of life will be tinged with the pleasant and sacred remembrance of having done good. But should you heed not the calls of bleeding humanity, or be indifferent to your responsibilities in this important matter, you may have much to regret, and your departing hour will be saddened by the recollection of neglected duty; and the luster of your crown, if crown you obtain, will be dimmed by the tears of orphanage which you might have prevented.

Dear brethren, you are Methodists, and we call upon you to keep the rule of the church on this subject—keep it for conscience sake. That rule forbids the use of ardent

We urge you, brethren, affectionately but earnestly, to meet the claims of the church of your choice in this respect, as in all others, that you may be benefited and the church at large blessed.

The District Conference—your friends and brethren—makes this appeal to you. Will you heed their entreaties, and henceforth preserve inviolate this rule of the church? For the sake of those you love, for the sake of the church, for the sake of our bleeding Saviour, we affectionately urge you up to this line of duty.

Fraternal, in behalf of the District Conference.

J. M. POOR.

J. T. CURTIS.

CANTON, MISS., July 30, 1870.

PRAECATOR'S SUPPORT.

MR. EDITOR: Some months ago your correspondent, "P. O.," made some good hits. I did not exactly understand him on "building." I think I could have understood him better on "husbandry." But he spoke without a figure when he said: "My observation has been that ministers who have been faithful in their labors have succeeded as well, if not better, than any other class of men." I suppose he meant financially, as that was the subject in hand. If so his observation, I think, has been at fault. But I shall not undertake "to give him a frizzling out," as he puts it; and therefore, so far as I am concerned, the Baltimore and New Orleans Advocates need not be at the trouble to defend him.

I shall only say that the case he gives in proof of the correctness of his observation is an extreme one. "Post Oak circuit" had been run down, I infer, and was prepared to place a high estimate on the labors of such a man as was sent there last year. A revival and a financial rebound were the natural results of such self-sacrificing labors as he describes, under such circumstances. It ought to be remembered that our preachers do not enter the ministry to make money. If any of them do, the sooner they get out of it again the better it will be for them and the church. They are called of God to this work, and enter it from a sense of duty. It can hardly be questioned that almost any of them could make more money—succeed better financially—at almost anything else they might engage in. Our Bishops receive \$3,000 a year, or that is their salary—they do not always get it. The highest salary received by any Southern Methodist minister, I believe, is \$4,000. These are the most talented men in our country, who could amass fortunes at the bar, or in almost any other profession.

I suppose "P. O." is a layman, and I was glad to see the interest he manifested in regard to "the neglect of pastoral work," etc., on the part of the ministry.

I do not hesitate to say that when Methodist preachers "while away their time in the most pleasant company they can find, whether religious or not, and engage in conversation and indulge in anecdotes that cause even worldly people to shake their heads in disgust," and neglect their pastoral duties, and appear in the pulpit on Sunday in a bad "plight," without a well prepared sermon, they do not deserve a support from the church. "The laborer is worthy of his hire," but the idler is not.

The church needs the undivided attention and labors of a zealous and efficient ministry; and she ought to provide a comfortable parsonage in every circuit and station, and give all her faithful ministers a competent support, including means to procure suitable libraries and to educate their children, and to lay up a little along for a rainy day.

But when shall these things be, and what shall be the signs of their coming?

W. B. L.

Be very careful of your promises, and just in your performances, and remember it is better to do and not promise, than to promise and not perform.

You will always be reckoned by the world nearly of the same character of those whose company you

WETUMPKA DIST. CONFERENCE.

MR. EDITOR: The first District Conference for the Wetumpka district was held at Lowndesboro, August 7, 8 and 9. It was presided over by W. S. Turner with great ease and efficiency.

The conference organized for business by electing William A. Edwards secretary, and Robert T. Nabors assistant secretary, and appointing regular committees on all the subjects, as required by the Discipline.

Every pastor in the district was in attendance, and from several churches a full lay representation was present.

On the first day of the meeting the pastors reported the condition of their work, which was listened to with interest, and gave the conference a very clear idea of the condition of the entire district, and furnished the committees facts and data for making out their reports.

We have selected a few items from the reports of the various committees, which we subjoin, as containing the principal action of the conference.

The Committee on the Spiritual State of the Church reported the exact spiritual condition of each charge, and gave reasons why some had been prosperous and a few had not. But they were enabled, with the facts before them, to report some gracious revivals and seasons of grace, with good indications and omens from every quarter; and the result of the report was that the district is now in a good condition. They report: First, an improved attendance on church meetings; second, that the ministry is unusually zealous for the salvation of souls; third, that there has been an increased interest in family prayer since the last district meeting. They recommend: First, a revival of class meetings as a means of grace; second, more fasting, with prayer.

The Committee on Missions reported that some portions of the district were destitute of preaching, and recommended: First, that itinerant and local ministers should, as often as possible, call the people in these destitute places together at private houses and school houses, and preach to them the gospel, and that the laymen of the church co-operate with the ministry in spreading scriptural holiness over the land; second, that the presiding elder request the Bishop, at the ensuing Conference, to appoint a missionary for the northern portion of Antigua circuit, and the destitute territory north of that.

The report of the Committee on Sunday Schools shows that there is an increased effort and interest in that institution of the church, and that quite a large number of Sunday school scholars have this year been converted and joined the church.

The report of the Committee on Finance exhibits the fact that the assessments have been liberal, and that over fifty per cent. has been paid. They recommend a continuation of the system proposed by the Montgomery Conference in 1868 for raising funds for the support of the ministry.

The Committee on Education reported our Conference schools in a good and improving condition. The standard of scholarship is reported as high as any in the country. Many of our youth are attending our own schools, but some of our people will yet send their children beyond the Conference, and even beyond the State, with no apparent advantage. The following accompanied the report:

Resolved, That we express our undiminished confidence in the character and claims of the educational enterprises of the church within the Alabama Conference, and cheerfully commend them to the consideration and patronage of its membership as important auxiliaries in giving permanence and expansion to the church.

The Committee on Church Property reported that the property was in good condition.

The Committee on Church Literature reported the total number of papers and periodicals to be two hundred and twelve. Of this num-

ber one hundred and three are Visitors, twenty-five of the Little Soldier, four of Burke's Weekly, and seventy-four designed for adults.

The following were elected delegates to the Annual Conference: Rev. H. Starnes, Dr. C. M. Howard, Dr. S. P. Smith and Hon. T. M. Williams. Alternates: Hon. William A. Allen, Dr. B. F. Davis, Colonel C. S. G. Doster and R. W. Russell.

The next District Conference will be held at Prattville.

WM. A. EDWARDS,
C. M. HOWARD,
B. F. DAVIS,
Publishing Committee.

DANCING.

Do those who attend balls and dancing parties pray and ask the blessing of God on their dancing? Why not? Do they not contend that it is an innocent and harmless amusement—one in which Christians may engage with propriety and without detriment to their good character and fellowship with God? If this be so, I am sure they might pray and ask God to bless the dance. But who ever heard of a dancer doing such a thing? To do so would be to abandon the dance, because the two acts are so utterly opposed to each other in principle and spirit that to perform the one is to leave the other undone.

But as they insist upon its innocence I shall insist upon their praying before they dance, and asking God to bless them in it. Let us draw near while that young lady kneels to pray before entering the ball room. Do you hear? "O Lord God of purity, who cannot look upon sin with approval, grant me thy blessings in that which I am now about to do in going to the ball and dance. Thy word requires that women should dress plain and simple, and be adorned with shamefacedness and sobriety; but I am adorned with costly array, and gold and pearls and diamonds, and plaited, befrizzled and pomated hair; yet, Lord, bless me in all this. Lord, thy word requires truth in the inward parts, and that one should speak truth to his neighbor; but I expect to-night to jest and fit and deceive by word, and avoid the truth; yet, Lord, bless me in all this. Lord, thy word requires me to be sober, meek and humble; but I expect to be gay, light, frivolous and proud, and to show anything but a meek and quiet spirit; yet, Lord, bless me in all this. Lord, thy word requires me to be pure in heart and life, and to love thee, and my neighbor as myself; but I am running in the ways of sin and corruption, and do not love thy ways, and my heart rankles with hatred when I remember some women who are more beautiful and accomplished and attractive than I am; yet, Lord, bless me in all this. Lord, thou hast made me to glorify thee—even in my body and spirit, which are thine; but I am going to this ball to leave thee out of the question, and to seek the praise of men for my own gratification and glory; yet, Lord, bless me in this. Amen."

What do you think of the prayer? Is it not very appropriate?

WATCHMAN.

FROM OUR BRETHREN IN TEXAS.

WHEREAS, Various rumors are sedulously promulgated, designed to create dissension among our congregations, disastrously hindering the success of the Lord's cause:

Resolved, 1. That we, the members of the German District, Texas Conference, Methodist Episcopal Church South, fully indorse the transactions of our last General Conference, and very especially those which have reference to our German work, and to the result of the proposed union with the Methodist Episcopal Church North.

2. That we herewith express our unfeigned gratitude toward our last General Conference for the manifest promptness in coming to our assistance; that we deem it our imperative duty, and now express our unflinching determination by faithfulness, friendly attachment and urgency in building up our branch of Christ's church to prove the sincerity of our gratitude.

3. That these resolutions be forwarded by Brother Abrams for publication in the New Orleans, Nashville and Texas Christian Advocates, and in the Evangelical Apologist.

J. A. SCHAEFER, P. E.
FR. VORDESMANN, Secy.

CHURCH SCHOOLS.

MR. EDITOR: Allow me to say a few words to the Methodist people on the subject mentioned above.

First. We ought to have good schools under the patronage and control of our own denomination.

Second. We can have them if we will.

The only question is as to how we can have them. A satisfactory answer is given by reference to the example of other churches which are in no better condition than ours to support their schools. The effects of war were no more disastrous to the Methodist than other branches of the church in the South. There is as much vim among our people, engaged in the various business pursuits, as among others. Our people are as enterprising and successful in other departments. Why, then, are we behind in the great educational enterprise? I would not be understood as saying we have no schools, but that we have by no means come up to the measure of our duty in providing for the educational wants of those under our care.

Now consider—we have only one male college (Centenary), the joint property of the Mississippi and Louisiana Conferences. This institution has furnished the church and the country some of the best material for the ministry, and all the other professions, that can be found. But now noble old Centenary College barely has a "name to live."

The Mississippi Conference has one female college, at Brookhaven. We are glad to know this institution is in a prosperous condition. But then there is room for several high schools, academies, etc., that might be auxiliaries to these colleges, and through which they might be supplied with pupils ready to enter advanced classes, and complete a collegiate course in one or two years, with a great saving in the way of expense to parents and guardians. Why not have a church school in every circuit? Why not have a high school or academy in each presiding elder's district? These, with one or two first class colleges for each sex, would afford educational advantages adequate to the wants of our people; and it is the duty of the Methodist Church to educate her own children. I hope some one more competent will stir up the pure minds of our people on this subject. It seems to me that one or two competent men would be profitably employed as agents to travel, lecture and arouse our people, especially in the Mississippi Conference, on the subject.

It is true that, beside Whitworth Female College, there is an excellent school at Port Gibson, under the presidency of Rev. B. Jones, and the Woodville Female Seminary, at Woodville, under the care, I believe, of that most worthy layman, Brother Wailes. But the geographical position of these schools is such that they are not accessible without great expense, except to a very small portion of the Mississippi Conference. Sharon Female College is somewhat more accessible; but this institution is barely able to live. The fact is, our people are not devoted, as they ought to be, to this great interest. They need stirring up, and especially to the support of denominational schools. We pay more, in many places, to the schools of other churches than to our own. They rarely patronize ours. But our exceeding catholicity is the death of all enterprises in this direction among our own people. I only intend some hints, and again express the hope that you, sir, or some one else who is competent, will agitate the subject.

Yours truly,

H****.

A new valve slide for locomotives has been invented which will save twenty per cent. in fuel, and increase the speed of ordinary trains to eighty miles an hour.

Under the recent act of Congress, two women in the Treasury Department at Washington have just been appointed to first class clerkships, with salaries at \$1,200.

ADAM CLARK, when asked by a young preacher how to preach, replied: "Go and study yourself to death, and then pray yourself alive again."

The Christian Advocate.

SATURDAY, SEPTEMBER 3, 1870.

THE BALLAD OF KING CORN.

BY G. H. BARNES.

I passed by a field where the royal Corn
His hundred emerald flags unfurled,
Aglow with the glancing banners of morn,
With the crystal drops of dew imperaled.
And waved them out to the free wind's play;
And tossed his feathered plumes high;
And I heard the monarch proudly say,
In a strain of mystic melody:

"Lo! I am King of the fruitful farm!
I'm rightful lord of the cereal band!
I sway the scepter of my strong arm
In majesty over the fallow land.
The farmer's eye is alight with hope
When his shining plowshare turns the mold;
And the glowing gates of promise open
When he hides in the ground my germ of gold."

"The heart of the husbandman thrills a song
When my green blades pierce the mellow
ground;
He delights to see me, tall and strong,
In the maize-month, cast my shadows
round;
And, watching the August sunbeams fall,
And a matchless elixir to my beauty
bring."

"Behold my stately Saul,
My Corn, over all his brethren King!"
"Ay, I was born to rule in the field;
My banners wave on hillside and plain;
The world, for my glory and bounteous yield,
Proclaims me by right, 'King of the
Grains!'"

I make the laborer's fireside glad
With abundant gifts from my full hand;
And the tolling millstone, hunger-sad,
Would welcome my reign in every land.

"When the cool and soft September days
Bring a ripeness to my golden ears,
I'll fling my flags in the autumn haze,
Unplume my helmet, and drop my spears;
Then, as I bow to the reaper's hand,
In the dewy hours of a harvest morn,
I'll bear the shout of the harvest band:
'Room for the King! the great King Corn!'"

Independent.

THE FIXED STARS.

Although the great majority of the stars which sparkle in the heavens are called *fixed*, and were supposed by the ancients to be attached immovably to numerous crystalline spheres which revolved around the earth once in every period of twenty-four hours, yet astronomers have long been of the opinion that the fixedness of these objects is merely apparent, being due to the immense intervals of space which separate them from us, while they may really be moving through space with velocities equal to those with which the planets perform their orbital revolution around the sun. Now this opinion has been proved to be well founded in fact, and although investigations upon the subject were begun many important results were arrived at before the dawn of the present century, yet in view of the great development of this branch of the science since the year 1800, we are justified in ranking it among the specialties of our own period. By a comparison of the recorded position of the stars made at different times, it is found that they are all constantly, though very slowly, changing their apparent places on the celestial sphere. After making all necessary allowances and deductions for such changes as would be due to the known motion of the earth in its orbit, to the precession of the equinoxes, to nutation, and to the velocity of light, there still remains in the case of each star a certain amount of motion which is independent of any of these known causes. By a still closer examination and more profound analysis it has been discovered that there are numbers of stars which actually revolve around each other; that in fact there are away off in what we may call the outer regions of space systems of worlds analogous to our system, composed of stars revolving in elliptic orbits about their common center of gravity, which is placed at the common focus of each ellipse. The science of mechanics informs us that when bodies are so related to each other as to describe ellipses about their common center of gravity, they can only do so under the action of an original impulsive force combined with that of a constant centripetal or attractive force which varies inversely as the square of the distance, and this we have for two hundred years known to be the law of variation of the attractive force which the planets of our own system exert upon each other. Hence we are forced irresistibly to the conclusion that those distant bodies are subjected to the same forces which sway the planets and keep them in their orbits. But how is this difference to be explained between the solar system and those other systems of which we have been speaking, viz: that while in the former we have a number of bodies circulating about a great self-luminous sun from which they derive their light and heat; in the latter the different components are themselves self-luminous, and are therefore to be classed as suns, so that they form systems of suns revolving around each other? Whether these suns are attended by planets or not must be for the most part a matter of

conjecture. Even if they are so attended it is hardly possible that many of the planets will ever be discovered, seeing that they must be to a greater or less extent lost to view by virtue of the intense brilliancy of their primaries. We may state, however, in this connection, that within a few years past astronomers have been laid to suspect the existence of a dark body in the neighborhood of the well-known star Sirius, and that Mr. Alvan Clark, of Boston, has actually discovered such a body through a telescope of his own manufacture. Whether this body is a genuine planet revolving around Sirius as its sun remains to be determined, and it belongs to the future to discover whether there are any other bodies of a similar character.

In addition to this orbital motion of a few of the stars, it is found that all of the stars situated on one-half of the celestial sphere seem to be slowly moving toward a certain definite point in the heavens, while all of those which are in the other hemisphere are apparently receding from a point diametrically opposite to the former. This apparent movement of all the stars in the heavens is exactly what we should expect were our sun with its system traveling through space. Unconscious of this motion ourselves, we should naturally refer it to the motion of exterior bodies, just as when traveling smoothly along the surface of a river we imagine ourselves to be at rest while the trees and other objects on the land seem to be in motion. Accordingly, just as the rotation of the earth upon its axis was inferred from the apparent diurnal revolution of all the celestial bodies, so from this other apparent displacement of the fixed stars it has been inferred that the whole solar system is sweeping through space, the direction of the motion being toward a point in the constellation Hercules, and the velocity being about one-fourth that of the earth in its motion around the sun. The question naturally arises whether the path which the sun describes in his progress is a straight or curved line. In answer to this question it may be said that the time which has elapsed since the first discovery of the motion has not been sufficient to determine the point. The path may be rectilinear, and in fact that part which the sun has passed over within the past ninety years has not varied perceptibly from a straight line. Analogy, however, would lead us to infer that the orbit is an ellipse or some other of the conic sections, and assuming it to be an ellipse its center must be situated somewhere in a line perpendicular to the direction in which the system is now moving. This line passes very near the well-known group of stars called the Pleiades, and accordingly the celebrated astronomer Madler has suggested that Aleyone, which is the brightest star of this group, is really the center about which our sun is revolving, and may therefore be justly denominated the true central sun. This beautiful theory has much of plausibility about it; but it must be remarked that the reasons which Madler has advanced in support of his suggestion have not been deemed satisfactory by all astronomers, and it is therefore proper that we should wait for further developments before accepting it as an established scientific theory. Granting for the moment that it is true, it clearly shows us that the sun and his system, vast as they are, form but a component part of a still greater system, in comparison with which the sun is what Saturn is to the sun, and throughout every element of which the same great law of gravitation prevails.

This view of the motion of the solar system is strikingly illustrative of the wonderful progress which has taken place in our ideas with respect to the position which the earth holds relative to the objects which surround it. In the opinion of the ancients the earth was immovably fixed in the center of space, and the sun, the moon, the planets and the fixed stars moved around it once every day. This was, as is well known, the established theory until comparatively recent times, and we have all read of the persecution to which the illustrious Galileo was subjected scarce two hundred and fifty years ago for venturing to express a contrary opinion, and for declaring that the earth moved. Next came the theory of Copernicus, according to which the sun was the immovable body about which the earth and the planets revolved in circular orbits. This hypothesis at once divested the earth of the great importance which the old notion had attached to it, and placed it in its true position as only one of the planets. With improved instruments and methods of observation came the next step in the progress of discovery and the corresponding perfection of ideas; which was that the planets revolved about the sun, not in circles but in elliptic orbits, the sun being placed in one of the foci of each ellipse. In the next place came the discovery that while the planets are moving around the

sun as a center, this great body is himself rapidly progressing through space and of course carrying along the planets with him, and finally we have the proof of what has for a long time rested upon analogy alone, viz: the diurnal rotation of the earth upon its axis. What a contrast between the earlier and the later ideas! The earth is fixed! The earth is involved in a labyrinth of motions which it is beyond the power of the human intellect to grasp save by resolving it into its component elements!

Before leaving this part of our subject it may be interesting to note the generally received opinions in regard to the relation which the sun sustains to the other stars which compose the visible universe. A single glance at the heavens will make it apparent that the stars are by no means uniformly distributed over the celestial sphere, but that there is a certain belt throughout which they are so closely packed together as to present the appearance of a continuous strip of faint white light. This belt is familiarly known as the Galaxy or Milky Way. It extends entirely around the celestial sphere, but is broken up into two distinct parts not far from the point where it crosses the equator. If we turn our eyes to the heavens, on either side of the Milky Way, we shall find that the number of stars rapidly diminishes, and at a distance of ninety degrees from this belt they are separated from each other by considerable angular intervals. The best opinion in regard to the Galaxy is that it is composed of two nearly concentric rings of stars with their planes slightly inclined to each other, which would account for the apparent bifurcation above alluded to; and that the thickness of the rings is inconsiderable in comparison with their linear dimensions. That portion of space which the rings occupy is literally packed with stars which are at such immense distances from us that the intervals which separate them from each other are to the naked eye reduced to zero. Our own position in space is in the midst of these rings, but out of their center and rather nearer to the point where they seem to separate than to any other part of the system. When we look, in the direction of the plane of the rings we are looking toward the greatest number of stars, and see them crowded closely together; when we look in a direction at right angles to the former, we see as it were entirely through the thickness of the rings, and of course we then see the smallest number of stars. If we were placed outside of the Milky Way, and at a sufficient distance from it, it would appear as a hollow belt or ring of light entirely isolated from all other objects in the firmament. In the beautiful constellation Lyra there is visible just such a ring, which in the powerful telescope at Parsonstown is entirely resolved into stars. This must beyond a doubt present to the inhabitants of some planet situated far in its interior an appearance entirely similar to that which the Milky Way presents to us.

The form of the Milky Way affords good evidence of the unity of plan which, notwithstanding all the apparent diversity, pervades the whole universe. Our own solar system presents the same form on a diminutive scale, for have we not a belt of asteroids forming a ring around the sun and flanked on each side by an equal number of planets? And in the case of the planet Saturn, do we not have on a still smaller scale just such a belt or ring? We have seen that the solar system is in all probability revolving about a central sun, and though it is not an established scientific fact, yet we may infer by analogy that this central sun is attended by yet other suns and planets revolving around it, and together constituting a ring. Again, we have just seen that the solar system constitutes but one element of a vast system of myriads of stars all conglomerated into a ring, and that there is still another ring in Lyra with which the Milky Way has no evident connection. Who can doubt that in these great ring systems there is plan and design and purpose, and that they are all the offspring of the same All-powerful will?—*Southern Review.*

A man who is young in years may be old in hours, if he have lost no time; but that happeneth rarely. Generally youth is like the first cogitations, not so wise as the second; for there is a youth in thoughts as well as in age; and yet the invention of young men is more lively than that of old, and imagination streams into their minds better, and as it were, more divinely.—*Lord Bacon.*

They who doubt the truth of religion because they can find no Christian who is perfect, might as well deny the existence of the sun because it is not always noonday.

Men will wrangle for religion; write for it; fight for it; die for it; anything but—live for it.

RELIGIOUS INTELLIGENCE.

FOURTEEN million copies of Spurgeon's sermons are reported to have been sold in England and three hundred thousand in America; and Spurgeon is but thirty-six years old.

CARDINAL ANTONELLI has recently married one of his nephews to a Spanish lady of fortune, and has proved himself equal to the occasion by bestowing upon the happy pair a sum equivalent to \$1,000,000.

The Universalist denomination are doing what they can to settle women in the ministry. Miss Hanford, at New Haven, Miss Brown, at Bridgeport, and Miss Clappin, at Grinnell, Iowa, are all reported as successful preachers.

Dr. GRINNESS reports great success in the distribution of the Scriptures in France. The officials interfere no objections; the parish priests are unable, even if inclined, to prevent the work; and the people receive the Bible with avidity.

The (Dutch) Reformed Foreign Mission Board has been running badly in debt, being now \$35,000 behindhand. As the annual receipts are only about \$80,000, this is a serious check. The membership of the Reformed Church is about sixty thousand.

The Moravian corrects some mistakes in regard to the statistics of its church. The present membership is twenty-five thousand, being an increase of about four hundred and twenty five over 1869. Sixty-seven missionaries are employed in the *diaspora*, or European home mission field. Those at work among the heathen number over three hundred.

THE China Inland Mission has not been injured by the excitement in reference to the outrage which took place in August, 1868, at Yang-chau. Probably there is no station connected with the society that now enjoys more peace or spiritual prosperity. The income for the last year was only \$1,480 less than the year before, and larger sums have been sent direct to the missionaries. There are now thirty-two male and female missionaries at thirteen important inland towns.

CHURCHMAN illustrates the fact that our religious progress does not lag behind our industrial and commercial enterprise. With a population of about four thousand, this enterprising little city, the capital of Wyoming Territory, contains five churches—an Episcopal, a Methodist, a Presbyterian, a Congregational, and a Roman Catholic—all erected during the last three years, at an aggregate cost of about \$24,000. Three years ago there was but one house of any kind in the place.

THE Jews are revising their "prayer book." At the late Jewish synod, held at Leipzig, the following was resolved: "No bitter or harsh expression shall be contained in any of the prayers under revision, or to be newly composed; the contents shall embrace all human beings of the universe, and nothing shall be said therein with regard to the chosen people which might in the least offend our brethren of another creed." On the other hand, the new prayers or those under revision shall lay stress upon the religious mission of Israel, the providential guidance in its history, the fundamental Mosaic principles of progressive development, a future universal knowledge of the Almighty's commands, a love of peace, justice and humanity.

Born Episcopals and Presbyterians are organizing churches in Utah Territory. The corner-stone of St. Mark's church was laid in Salt Lake City, by Bishop Tuttle, on July 30. It is to be constructed of stone, and ready for occupancy by the first of October. It will be a free church. Rev. T. E. Bayliss sounds us an appeal, too long for insertion, for a Presbyterian church in the only Gentile city of Utah—Corinne. He is the only resident minister in the place, and the only Presbyterian clergyman between Cheyenne, Wyoming, and Elko, Nevada, a distance of seven hundred and ninety-two miles. In three months' time a Sabbath school of fifty-eight scholars has been called together and a church of ten members has been organized. A church edifice is urgently needed. It will cost \$5,000. It will readily be imagined the ten members cannot erect it themselves.—*Independent.*

ENGLAND is in advance of us. She has established several ministerial "intelligence offices." To these offices any vacant parish may apply for a servant (of the church), and any distressed clergyman for a situation. The price of the market is not high at the time of our writing, if we may judge from the quotations in Chambers Journal. Two hundred clergymen are reported as "out of employment." One man—who, with unconscious self-satire, has described his "views" as moderate—ventures to demand £180 a year. Only seven aspire to £150. A single divine underbids these by £10. Thirty-five ask for £120, and the other one hundred and fifty or so of reverend gentlemen are ac-

tually going—or waiting to go—for £100 a year or less; several asking less than a good butler's wages, and one offering himself for "10s. 6d. a service and his traveling expenses." The whole two hundred could be procured for less than half the price paid for a bishop.

The American Methodists are beginning to find that their China missions are bringing them in fruit for their labors. The Fuh-chun mission was organized in 1847. For nine years it secured not one convert. Seven years later it had one hundred. Now there are seven hundred and fifty members and as many more probationers; also seven well qualified native pastors and forty or fifty helpers. The missionary force is very small now, consisting only of Dr. Muelny and Mr. Sites; but two others will be sent in the fall. The converts are largely in the villages to the southwest of Fuh-chun, and are very ready to accept the gospel. The Kiukiang mission was started in 1867, and occupies the province of Kiangsi, with twenty-six million of population, on the south of the Yangtse river. Mr. and Mrs. Hart are the only missionaries there at present; but re-enforcements will speedily be sent. Though so young a mission, there is a little class of converts. A mission at Peking was started last year, and will have four missionaries.—*Independent.*

THE BRITISH CONFERENCE.—The preparatory committees held their meetings, beginning on July 19. The Education Committee held on that day a long session of six hours.

Fifty students of the second year, and four of the first year, were appointed to schools on Christmas last. Seventy-five candidates were admitted, making the number in residence 144, or ten more than the government number.

The number of Sunday schools is 5,443, increase 115; teachers and officers 105,592, increase 2,151; ditto in society or on trial 78,574, increase 1,624; scholars 622,589, increase 20,788; ditto in society or on trial 38,144, increase 1,772; in select classes 20,976, increase 2,095; young persons in Bible classes by ministers or others 13,434, increase 310.

The one hundred and twenty-seventh session of the Conference opened at Burslem, July 26. About six hundred ministers were present. Ten vacancies were filled, and the Conference proceeded to an election of officers. Rev. John Farrar, who has served in that capacity once before, was chosen president.—*Methodist.*

CONGREGATIONAL CHURCH.—The late Kansas General Association reported a total of sixty churches, only eight of which are vacant; sixty-one ministers, forty-nine of whom are in charge of congregations, and but four of the whole number are engaged in secular pursuits. Fifteen have been added to the ministerial force during the year. One has left the State, and one has deceased. The number of new churches during the year is twelve. To a membership of 1,606 last year, there have been 472 additions, 142 by profession. The churches have raised the past year \$55,323 41, of which \$28,936 20 was for church building, and \$17,647 55 for ministerial support. The church at Enocka, Kansas, recently dedicated a new house of worship, and received five new members. A church of eight members was organized in Hersey, Michigan, on the twenty-fourth ultimo. The Congregationalist says: A lady seventy-five years old, and who is obliged to walk two and a half miles to church, received the prize offered by the superintendent of the Sabbath school in Wellington, Ohio, to the member who should bring in the largest number of new scholars in a specified time.—*Interior.*

THE GREEK CHURCH IN AMERICA.—In a recent issue of the Pacific Churchman is the following announcement, made on what is presumed to be reliable authority:

"We have received news by the last mail that it is determined, by the Holy Synod of Russia at St. Petersburg, that a Greco-Russian church be erected in the city of New York. The plans have already arrived, by which it appears it will be of Byzantine architecture. The Empress of Russia takes a great interest in the matter. About \$5,000 have already been collected there. It is expected that the Greeks of America and other parts of the world will also contribute liberally. New York is expected to be, in time, the seat of a Greek Orthodox Eastern Church. Archdiocesan, and of the Cathedral church of that hierarchy on the American continent, New Orleans and San Francisco to be episcopal seats. Mr. N. L. Bjerring, of Baltimore, who has relations in Chambers Journal. Two hundred clergymen are reported as 'out of employment.' One man—who, with unconscious self-satire, has described his 'views' as moderate—ventures to demand £180 a year. Only seven aspire to £150. A single divine underbids these by £10. Thirty-five ask for £120, and the other one hundred and fifty or so of reverend gentlemen are ac-

sixty million to seventy million souls, of whom forty-nine millions are in Russia and twelve millions in Turkey, are embraced in its communion. Though separated broadly from the Romish Church, it yet retains in its creed many of the absurd notions of the communion it has left—such as the seven sacraments, the mass, monasticism, looking with superstitious veneration upon the Virgin Mary and sundry saints, etc. But the Greek Church has cut loose utterly from Rome—scouts the authority of the tremulous old man of the seven-hilled city, administers the Lord's Supper in both kinds, does not require absolute celibacy in priests, and in various other respects shows that freedom from Romish thralldom has given her progress in the direction of truth.—*Interior.*

NATURE'S SPRING SONG.—The lark gave the signal! Up from the fresh, bright turfs of sweet-smiling grass, through the bright springy air, it briskly, cheerily flew—joy in its heart, lightness in its wings, melody streaming from its throat—and darted forth amid the feathered songsters of the grove; blithely sounding the happy key-note of the sweet spring morn! From a thousand forest trees came the melodious responses; the matin air was gaily filled with the pretty preluding; the morning breezes caught the tune, and murmured it softly and caressingly to the countless leaves quivering on the grand old branches of the stately tree; and the leaves prolonged the full rich strain, and swelled with their soft wild harmonies the beautiful spring song—the rejoicing Pean of the new birth of the vernal and floral year. The cattle on a thousand hills, in mellow concord, full contentment lowed; and the fair faces of happy nature basked in God's benignant smile. The morning hymn of the birds, the breezes, and the myriad leaves of the wood, joined their accordant sounds, and the psalm of nature spread, and rolled, and widened, until it reached the serene and lofty abiding places of the spirits of the mountain tops, whose broad and mighty wings were soon harmoniously freighted with the pleasant strains, and whose majestic voices, in glorious tones, enrich the choral songs with chords sublime, with heavenly tranquil themes of peace and grandeur! And lo! from the mountain bed the bounteous rushing river heareth the joy-abounding tumult, thrills with the weird and many-voiced songs, uplifts his white and foamy crest with pride, to bear his potent part in that fair song, and on his broad and rapid breast, o'er crag and rock, and hamlet, field and town, bears the triumphant song to Ocean's well-pleased ears. And then, from the depths of the vast, murmuring sea, all grandly sound the solemn ponderous bass to make the song complete. The waves of the thunderous anthem swell, and the high cherubim themselves seem to touch their golden harps and add celestial tones unto the earth's first soul of spring.—*Musical Bulletin.*

GENESIS VS. GEOLOGY.—The following story is told of the Rev. Dr. Taylor, the noted New Haven theologian: "Profound in metaphysics, but not versed in science, he was an obstinate defender of the literal interpretation of the six days of creation in the Book of Genesis, as against the idea of six long periods of time, which Prof. Silliman advocated. One day Prof. Silliman took Dr. Taylor into the geological cabinet, and confronted him with several trilobites in rocks of the lower strata, and said: 'Now, Dr. Taylor, how did these once living animals get into this position, except as the rock gradually formed about them in one of those long early periods?' 'Nonsense, nonsense,' answered Dr. Taylor; 'do you think that God, when he made the rocks, couldn't have stirred in the things just as easy as a cook stirs raisins in a pudding or cake?' Prof. Silliman was so disgusted that, perfection of courtesy though he was, he put on his hat without reply, walked straight out of the building, and did not say a word to Dr. Taylor for three weeks." So the story goes.

THE word "rentes" is constantly occurring in foreign dispatches, and their rise and fall seem to constitute the financial barometer of Paris. Rentes are the funded debt of France, not, however, in the form of bonds, but simply loans from the people. These loans are entered to the credit of the lenders on the ledgers, and draw a specified rate of interest. The holders of the debt are called "rentes," and the fluctuations in its value denote popular distrust or confidence in the government.

HE who has struck his colors to the power of an evil habit has surrendered himself to the power of an enemy, bound by no articles of faith, and from whom he can expect only the vilest treatment.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, SEPTEMBER 3, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.
Three Dollars per Annum, in Advance.

Address—REV. LINUS PARKER, 112 Camp Street, New Orleans, La.
Agents—All the members of the patronizing Conference.

CONFERENCE PUBLISHING COMMITTEE.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. B. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. W. SHAPARD.
REV. J. B. COTTRELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To Subscribers.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office Order, Draft, or by Express. If this cannot be done, REGISTER the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

TALK TO OUR FRIENDS.

Now that we have reached September, and are entering upon the season of harvest and activity, we shall look for a large increase of subscribers. At the great religious gatherings during the autumn we hope the friends and agents of the NEW ORLEANS CHRISTIAN ADVOCATE will be specially active and zealous. Our paper represents no private interests. It is the exclusive property of the patronizing Conferences, and is published by them. Every preacher in these Conferences is part owner of the paper, and has as much property interest in it as the editor or the members of the Publishing Committee; and, we may add, gets as much out of it in every way, except in the item of hard work. The Publishing Committee would like to make improvements, but in order to do this we must have more subscribers. To be established upon a prosperous basis the circulation should be doubled. With proper effort we believe that this increase can be secured within the next six months. At any rate, a heroic effort ought to be made this fall to enlarge our subscription list. We appeal to our subscribers, as well as to the preachers, to aid in the work. If each subscriber would get us another the work would be done at once. Turn out, brethren and sisters, and see what you can do for the ADVOCATE! We are trying to make it a good paper, and we have the assistance of several gifted writers, whose contributions adorn and enrich our columns nearly every week. The constant aim is to make it the pastor's assistant, and a religious blessing to the communities and families which it visits. To the preachers we repeat that the NEW ORLEANS CHRISTIAN ADVOCATE is your enterprise, your property, and in working for it you are working for Christ and his church.

THE YELLOW FEVER.—Three or four fatal cases occurred in the Charity Hospital a few days ago. We learn that there is one convalescent case remaining. We cannot hear of any cases in private practice, and there are no present indications of its spreading. At this time the city may be regarded perfectly safe and healthy. We shall keep our readers truthfully advised, and shall not fail to give warning when any danger exists.

Philosophy does not look into genealogies.

HARRY LEE whose habits are his friends.

COMMUNION WITH GOD.

The privilege of divine fellowship is so explicitly declared in Scripture that there is no room for doubt on the subject. Experimental religion comprehends it as the ordinary experience of true believers. In all ages and dispensations it has described the spiritual life in its highest attainments of holiness. Enoch, Abraham and John are represented as walking "with God," as walking "before him," and as enjoying a peculiar and intimate companionship with the divine Being. In the New Testament the trine aspect is exhibited: "Our fellowship is with the Father, and with his Son Jesus Christ," "The communion of the Holy Ghost."

Supposing these words to be taken in their most simple and obvious sense, they bring us at once to the great central doctrine of religious purity. To enjoy the intimate companionship of him who is "glorious in holiness," there must be a correspondence of character in ourselves. The reason of holiness, and the necessity, are in the nature of God. The sum of the argument is contained in the command: "Be ye holy, for I am holy." No further reason need be sought. Without the image of God stamped upon the heart there can be no peace for the soul anywhere in the universe. Holiness is an impossibility without it, and every aspect of a spiritual life supposes it. Likeness to God is implied in communion, and every leading grace. It cannot be without love and faith; neither can it be maintained without the utmost devotion.

This fellowship is a matter of consciousness, so that the possession of it may be clear to the child of God. It is hardly conceivable that it should be otherwise when we reflect upon the wonderful change which it implies. "Without God in the world" is the opposite; and as the sinner may realize his inward desolation, so the believer may have the felt assurance of the divine presence and friendship. This is the inner sanctuary of experience, and the point where the "life is hid with Christ in God." Prayer in this state is more than a form of words, more than a religious habit, it is more than the cry of spiritual destitution; it is the realization of all blessedness and joy, in which the divine fullness completely satisfies the soul. Where this communion exists the comfortable sense of it will be generally present in the midst of our daily cares and business. It will be a source of comfort and strength in the wearying and perplexing affairs of the world; and the soul, amid trials and toil, will be constantly returning to God as its rest.

Nothing is so sensitive to sin as this state of union with God. It cannot abide the least indulgence in evil, and is marred, if not destroyed, by things which the world or a loose Christianity scarcely regard as wrong. What may appear reasonable to the unconverted, and entirely allowable in the judgment of a lower religious experience, may prove perilous, if not destructive. If we would have God's presence we must part company with many things which formal Christians defend as eminently right and consistent. Leaving out special texts and arguments, the appeal is to the effect upon this near and spiritual companionship. Whatever hinders communion with God is to be shunned. It is a sufficient reason for the condemnation of any practice, that it weakens or interrupts our fellowship with God; and that it dims or wholly obscures the assurance of the divine favor. The failure of many to gain this experience is owing to some forbidden indulgence; and it is often lost by giving way to temptation. Real communion with God is exclusive and absorbing. It casts out all objects of spiritual idolatry, breaks up the fellowship of the world and of sin, and leaves the Saviour in full possession of the heart.

The Savannah Republican publishes a letter of General Washington to General Woodford, dated September 26, 1777, the copy of which is still in a good state of preservation, in General Washington's own hand.

Disintegration and Absorption.

The Northwestern Christian Advocate, published at Chicago, takes exception to Dr. Curry's views on this subject. The editor admits that disintegration and absorption, "to some extent, are consequent upon our being there." We suppose he is truly sorry that this should be the incidental though unintentional result. We must give the Northwestern credit for Christly sentiments; but Dr. Curry's "practical method of church unification" is that which the representatives of the Northern Church are pursuing. That they have used every means to this end cannot be denied. They have been mainly engaged in the effort, not to save souls, but to steal both church property and church members. Their persistent labors to proselyte, especially among our German people, and the free use of missionary money to further this object, proves that "disintegration and absorption" are the manifest purpose rather than the incidental consequence. The great show of membership, displayed in their statistical tables, is made up of colored churches and members taken from the Church South, either by military order or by political influences, and the irresistible drawings of missionary greenbacks.

Disintegration and absorption are more than incidental. The love of souls is secondary, while these are the leading objects. There may be an occasional protest against this policy, as in the extract from the Northwestern, but it is nevertheless the policy actually followed. There are some expressions of rather objectionable import: "We had a great work in the South to do for God and our country." We know what country means from that standpoint. "There, too, were souls to be saved, and other work to be done, for which the Church South had no facilities." We hope the other work refers to educational interests, and not to the organization of political clubs. We give all credit, however, for fair statement, and sincerely reciprocate the statements of Dr. Reid concerning our work in the North. We shall not at all be sorry to see the Church North in the South, provided she comes to save souls, and devotes herself exclusively to this great mission of the church of Christ. The following is the extract from the Northwestern:

No one can doubt that "disintegration and absorption" have been words unhappy in their influence at the South. They convey to the ears of the Church South an impression that our first great business there is to destroy them; and upon the ruins rear our own church, a work for which the Methodist Episcopal Church never had, and we trust never will have, a heart. We had a great work in the South to do for God and our country. All over the South were those, both white and colored, who were not at all in sympathy with the Church South or its ministry, and yet were Methodists, many of them actual members of the Methodist Episcopal Church. There, too, were souls to be saved, and other work to be done, for which the Church South had no facilities. It was our duty to enter the field. Moreover, to divide the churches of our land by geographical lines was a civil misfortune that led to secession and war, and is still pregnant with alarming evils. It was well for us to break over the boundaries that slavery had set us, nor are we at all sorry to see the Church South in the North, if she can here find a field. Our work in the South is not "disintegration and absorption," although these to some extent are consequent upon our being there. We should carry on our work in the South, as we do everywhere else, for God and souls, without reference to other churches, save to be courteous, with all proper courtesy. We have our own work to do, and will do it; but if they have a work to do let them do it, either in the South or North.

We are not able to discern the propriety of the order of these watchwords as they are sometimes put. Naturally, as the New York editor has it, it would be "disintegration and absorption" if the two processes apply to the same persons; but do those who change the order of the words mean that some are to be absorbed by the Methodist Episcopal Church, and others to be disintegrated, to go where they will, only so that all Methodists but our own shall be got out of the way? There is a ring to these words that is not pleasant to our ears. It is far more Christly to absorb the disintegrated elements than to leave

them out of the pale of Christian care and responsibility. If we disintegrate, by all means let us absorb; but it is scarcely Christly to aim at either in the case of any genuine sister church of the Lord Jesus.

A WORD TO BUSINESS MEN.

As the business season is about to begin, the time for advertising has arrived. The ADVOCATE is in many respects the very best medium through which to reach a most important class of buyers. Our paper circulates extensively in the country; more particularly throughout the cotton and sugar regions of the South. We endeavor to guard our subscribers from imposition by rejecting all objectionable advertisements. Hence a card in our columns goes out with a most favorable and influential indorsement. Thousands of families in Alabama, Mississippi, Louisiana, Arkansas and east Texas receive our paper every week. Their business relations are chiefly with New Orleans, and they visit the city annually. We do not hesitate, therefore, to affirm that there is no better medium for advertising than the NEW ORLEANS CHRISTIAN ADVOCATE. Beside a choice and extensive circulation throughout the Southern States, as many as three hundred ministers of the gospel are acting as agents for the ADVOCATE. We are confident that no other paper in the Southwest offers so many striking advantages to advertisers.

PULPIT VARIETY.

From the remark of the Master that the scribe or minister is like the householder bringing out of his treasure things new and old, we take it the minister is not only to be conservative in caring for and bringing into use the old, but a man of variety, as he is to bring forth things new also.

Variety is one of the most marked characteristics of the works as well as the word of God. But this variety is evolved from a few simple substances. There are less than seventy simple substances out of which all things on earth are made, as air, water, minerals, vegetables and animals. Variety, then, is the result of combination. Some seem to possess in a very slight degree this combining and evolving talent. I knew an old minister once who had but two sermons, each garnished and illustrated with its particular set of anecdotes and comparisons, inferences and applications. I have heard of another minister (?) who is said by his friends and hearers to have but one sermon. This is a minimum example of pulpit variety. Many of the pulpit giants, fifty, sixty and seventy years ago, had but few sermons—many of them, perhaps, having not more than twenty-five; but as they traversed a wide extent of territory, and were frequently changed from place to place, these narrow pulpit resources very well met their necessities and the needs of the times. Their sermons were generally upon the more important doctrinal and practical points. They knew these sermons extremely well—delivered them with but little effort of memory or waste of nervous energy, and could devote to their delivery the best elocutionary attention. These were certainly great advantages, and were some compensation for much travel and frequent changes. This state of things can still exist, it may be, on the frontier, but nowhere else. Denser population, more varied culture and larger variety of life necessitate more variety than opposite conditions demand.

How, then, is this variety to be secured? We remarked in the outset of our article that God, in creation, had produced immense variety by combination. See, for example, the seven primary colors, out of which, by combination, an immense variety of colors and shades have been produced. Green, for instance, has as many shades as there are trees, shrubs, herbs, vines and grasses. The same law holds in relation to form. There are more than a thousand million of human inhabitants on this earth, all generally alike, but perhaps each one of them particularly, distinguishably unlike. No one face two inches longer, or

shorter, or broader, or narrower than any other face; yet on this small surface, by wonderful combinations, more than a thousand millions of varieties have been produced. There are seven primary notes in music, but by combination there have been made, perhaps, thousands of times, and perhaps as many thousands more will yet be made.

In theology there are a few great principles, facts and duties. These doctrines, facts and duties constitute the materials out of which ministers make their sermons. The variety that marks their ministrations will be in exact proportion to their capacity to combine the colors, shape the forms and touch the notes of inspired truth. This combining power will depend mutually upon versatility and activity. A versatile and active mind will be ever gathering knowledge—will be gathering it from all sides and sources. This fullness and versatility will present inspired truth in many angles and varied points of light.

We must utter what is in us—we can do no more. We can only tell what we know. Some men have but a dozen thoughts, and tell them over, each in its accustomed place, from morn till night, from youth to heary age, and never change their course. Such men can have no variety. Some men seem to pass through the world as if deaf and blind. They hear nothing, see nothing and say nothing, for the simple reason that they have nothing to say. This is more a fault than an incapacity—a mental idleness and inattention that has been allowed to mature into a habit. Against this young and forming minds should most carefully and diligently guard. Cultivate a habit of constant attention; then revelation, human nature, in short all creation, will become your treasury, out of which you may bring things new and old. Do not permit your mind, like a machine, to run in a groove; but rather, like the busy bee, roam everywhere in search of treasures with which to store your mind. You will find that there are few things that cannot be used and some time brought into play in the pulpit. It is thus that useful variety and instructive interest in the pulpit may be secured.

If any preacher is lacking in variety, and wearisomely repeats himself, the fault arises from want of capacity or diligence, and not from the poverty of the "treasury" from which his pulpit wealth is to be drawn; for though the cardinal points in doctrine and practice are not many, yet, like the letters in the alphabet, they are capable of immense combinations—indeed almost endless. Such is the fullness, the richness and suggestiveness of inspired truth that we may take almost any divine utterance and turn it like a finely cut diamond, each of its angles emitting a new light and revealing a new beauty. Scripture biography is a rich and varied field for pulpit culture and exposition. In this department very close personal applications may be secured without the fault of personal offense—a great point, to do good without doing harm. The preacher can say of Abraham, Moses, Joshua, Joseph, Daniel or Paul; they were not so and so—thus plow near the corn without actually plowing up and destroying it. No book so abounds with characters as God's, in all relations, and representing all shades and all moral qualities. It is a great point of interest to realize the characters, histories and scenes in the Bible. It gives a vividness and freshness to the word that it could not otherwise possess. In short, read the Bible much and carefully, and read much about the Bible. Then you will be like a full cask of good wine—no matter where you are tapped, you will yield something good.

CENTENARY MALE INSTITUTE.—The announcement of the opening of this well known school will be found in our advertising columns. It is located at Summerfield, Alabama, and is one of our oldest institutions, as the coming October will witness the beginning of the thirtieth annual session.

SUNDAY SCHOOL LEGISLATION.

The following article is one of a series published in the Western Methodist on "The General Conference of 1870." The entire series is of great interest, and we hope may be published in a more permanent form. Although written over the *nom de plume* of three stars, the hand of a Bishop will be readily recognized:

THE APPOINTMENT OF SUNDAY SCHOOL SUPERINTENDENTS.

The Montgomery Annual Conference sent up a memorial, asking that the Discipline prescribe a method for "organizing and relating the Sunday school to the church." It was referred to the Committee on Sunday Schools, of which a distinguished layman, S. Bobo, was chairman, and said committee reported, on May 13, that "the request be not concurred in by the General Conference."

The Louisiana Conference asked that the Discipline be so changed as to require Sunday school superintendents to be appointed by the quarterly conference. Sundry memorials upon the same subject came in, and were referred to the Committee on Revision, of which Rev. Dr. Hamilton was chairman. That committee reported on the twelfth of May, recommending that the quarterly conference be authorized, "upon nomination by the preacher in charge, to annually elect the superintendent" of the Sunday school.

It is to be regretted that this important report did not get before the General Conference, for action, till the twenty-fifth, when the nearness of adjournment was unfavorable to deliberation. A day might have been spent on this one item. We give the whole proceedings on it from the Daily Advocate:

"Report No. 3 of the Committee on Revision was taken up, item by item.

"The first item was read.
"J. E. Edwards moved to add after the words 'preacher in charge' these words, 'of two or more persons.'

"A. W. Wilson moved to substitute for the whole, 'that it is inexpedient for the quarterly conferences to elect superintendents.'

"C. Long moved to lay the substitute on the table, which motion was lost.

"W. H. Potter moved to lay the whole subject on the table, which motion prevailed."

The reader, who is acquainted with the temper of deliberative bodies, sees in this brief record two things:

The Conference felt that something ought to be done. And it was afraid, in the hurry and pressure of that late hour, of doing something wrong. And so everything was left in statu quo.

The question hinges on the appointment of superintendents. Obviously the church cannot defer much longer a distinct definition of the relation of the religious teachers of her children to their pastor. The Sunday school must be organically related—if you please, subordinated—to the church. Matters, at present, are lying at loose ends, awaiting adjustments. We are glad the General Conference did nothing hastily or rashly. These great, living processes require time for working out and shaping. The church is looking in the right direction, and gradually coming to an accurate statement. Perhaps by 1874 we shall have it, and feel no jar.

We asked an eminent Baptist pastor lately: "Who elects your Sunday school superintendent?" With a smile of hopeless resignation he answered: "The children." And then he enlarged on this anomalous condition of things that the most important post in his church, next to his own, should be at the mercy of chance elections and baby electors. It was as bad as "baby-sprinkling."

We asked the rector of a large parish in the Protestant Episcopal Church: "How do you get a Sunday school superintendent?" He studied on the situation a moment and replied: "The teachers appoint the superintendent." "But who appoints your teachers?" we asked. The immaculate white cravat showed, by contrast, a slight color as he replied: "The superintendent." Our friend went on to say that there was no canon regulating the subject, but the theory of his church vested the control and direction in the rector.

The Methodist Protestant brethren have moved up lately, and taken an advanced position. By their law (we quote from memory) the superintendent is elected by the quarterly conference in circuits, and by a majority of male members in stations.

Among some of the Presbyterians the session—which, as a church court, corresponds nearly to our quarterly conference—appoints the superintendent, or holds the power of approving the appointment.

The Northern Methodists have

gono beyond the somewhat indefinite rule that was held in common by us and them up to 1844. Their Discipline of 1868 has these provisions: "The quarterly conference is to have supervision of all the Sunday schools and Sunday school societies within the bounds of the circuit or station, and to inquire into the condition of each; to approve Sunday school superintendents, and to remove any superintendents who may prove unworthy or inefficient." (P. 42.)

And one of the items, in the detail of quarterly conference business, is: "To approve Sunday school superintendents and trustees."

The section of their Discipline on Sunday schools says:

"It shall be the duty of each presiding elder to bring the subject of Sunday schools before the last quarterly conference of each year; and said quarterly conference shall proceed to appoint a committee of not less than three, nor more than nine, who shall be members of our church, to be called the Committee on Sunday Schools, of which the preacher in charge shall be the chairman, whose duty it shall be to aid the preacher in charge and the officers of the Sunday schools in procuring suitable teachers, in promoting in all proper ways the attendance of children on our Sunday schools and on our regular public worship, and in raising money to meet the expenses of the Sunday schools of the charge."

"It shall be the duty of the preacher in charge, aided by the superintendent and the Committee on Sunday Schools, to decide as to what books shall be used in our Sunday schools." (P. 233.)

But how are the superintendents appointed? This question seems to be answered in the Appendix (p. 295), where we have the "Form of a Constitution for a Sunday School Society" in any place. We quote:

"Art. 3. The officers of this society shall be a superintendent, secretary, treasurer and librarian, who shall be elected annually by ballot."

"Art. 4. Teachers shall be nominated by the superintendent, with the concurrence of the pastor, on their entering the school, and be elected by the society one month subsequently."

This draws the Sunday school very close to the church, and recognizes the pastor. In many respects it is good.

We are not without law on this subject. If quarterly conferences had always exercised the power given them in the promises, and if pastors had quietly kept up with their duties, and maintained their disciplinary and gospel prerogative, there would not now be a call for any additional legislation. But they both (quarterly conference and pastors) have in many places let the matter go by default, and Sunday schools have got away and gone ahead of them. See what our old law says, and the law that now is.

First, as to quarterly conference jurisdiction: "Each quarterly conference shall be deemed a board of managers, having supervision of all the Sunday schools and Sunday school societies within its limits." (Dis., p. 114.)

But the quarterly conferences have not managed the Sunday schools. They have let them alone, beyond receiving and recording a report of their condition. The Sunday school and Sunday school society have enjoyed their autonomy so long that, in many cases, if the quarterly conferences should now lay a controlling hand on them they would kick. The General Conference must come in with a more explicit provision before influential and direct control can be established.

As to the pastor: his normal relation to the church and all its parts and interests settles this question. It will not do to have the grown people under one teacher, and the children under another and independent teacher. The latter might be teaching a different gospel from the former. The shepherd of the sheep is the shepherd of the lambs also, and by consequence.

The initial measures connect the pastor with the Sunday school so naturally and inevitably that no special enactment seems to be necessary to secure his position. Our Discipline says now and has said:

"Let Sunday schools be formed in all our congregations, where ten children can be collected for that purpose. And it shall be the special duty of preachers having charge of circuits and stations, with the aid of the other preachers, to see that this is done; to engage the co-operation of as many of our members as they can; to visit the schools as often as practicable; to preach on the subject of Sunday schools and religious instruction in each congregation; to lay before the quarterly conference, at each quarterly meeting, to be entered on its journal, a written statement of the number and state of the Sunday schools within their respective circuits and stations; and to make a report of the same to their several Annual Conferences."

The quarterly conference has a controlling voice in making preachers, exhorters, stewards and trustees; the pastor in making class leaders; the whole church in making a secretary of the church meeting—and all these officers are members of that important church court. There is one other official person in a quarterly conference, "and none else"—the superintendent of the Sunday school. And shall neither quarterly conference, nor pastor nor church, have a voice in this appointment? Must this important person who superintends the religious instruction of the largest and most impressive part of the congregation; who distributes and selects teachers of classes; who, more than anybody else, determines what sort of books and literature shall be used—must he be a volunteer? or the appointee of the children? or the choice of an irresponsible convention of friends, in and out of the church?

The Sunday school has developed into too vast a power for these questions to remain unanswered.

Two evils, nay three, have already been developed under this state of things.

We have heard of Sunday schools in Methodist churches which the pastor hesitates to report as Methodist Sunday schools. And the inquiry has been raised in Annual and District and Quarterly Conferences, "What determines a Sunday school to be a Methodist Sunday school? The majority of children in it, the books used, the teachers, the superintendent or the house? And for want of the fixed criteria of organic relations the number of 'union' Sunday schools is swelled."

Sometimes you see a modest but conscientious pastor, who would really like to do his duty; but he feels himself a mere visitor, if not an intruder in the Sabbath school of his own church. He has no voice in the teachers employed, or the books used, or in any material arrangement. Perhaps, by courtesy, he is allowed to advise. The machine is run on an independent line.

Again, a pastor spasmodically takes an interest in the children and the Sunday school. He comes in and would upset and reconstruct generally. The earnest and faithful laborers who are working there know what it has cost them to build up that school. It is dear to them. They are not willing to see it put in jeopardy by this new zeal without knowledge. They resist. They see no law defining exactly what the pastor's powers are. He construes for himself, and they construe for themselves. The pastor withdraws in no genial mood; or the contest is carried on, and the strongest wins. The trouble spreads to the church and through the church. So much for undefined relations.

The subject cannot rest as a finally where it is. Our General Conference is well constituted for adjusting it amicably, having ministerial and lay delegates in equal number. We are approaching a solution. In four years we shall be ripe for it; and the measure, we trust, will be forthcoming then which nobody was prepared to offer in 1870. Let us work along peaceably in the direction indicated, and to the objective point. We are not under law, but under grace. Good sense, good temper, mutual respect and forbearance will carry us through this forming era. The Sunday school is, at least in its present importance and activity, so recent a thing that the creeds, canons and disciplines have not been adjusted to it. The Sunday school convention, called by the General Conference, and which meets next year, would do well to take this matter, in some of its aspects, into consideration. May the Shepherd of Israel guide us to a conclusion that shall comport with the responsibility of pastors, the peace and purity of the church, and the right training of the rising generation.

EAST ALABAMA COLLEGE, AUBURN, ALABAMA.—This flourishing institution, located at Auburn, Alabama, has strong claims upon the patronage of the church and the Southern people. There is room for three hundred pupils, and we hope to be able to state in a few months that every place is filled. We observe that Rev. A. D. McVoy has been elected to the Battle professorship of moral science. The chair of modern languages has also been recently filled by Prof. Schindlauer, a graduate of Darmstadt, Germany. For particulars see advertisement in to-day's paper.

SOUTHERN METHODIST HIGH SCHOOL. Prof. Rast opens this school in the basement of the German church on Dryades street, near Felicite, on Monday, September 5. The school is well organized, and all the branches of a high school will be thoroughly taught. Special arrangements have been made for German and French; also for drawing and music. See advertisement in another column.

HOMER COLLEGE.—Let all of our readers, especially in north Louisiana, east Texas and Arkansas, give heed to the advertisement of this institution. It is a Methodist college, belonging to the Louisiana Conference, well located and efficiently conducted. Rev. James E. Cobb is president, and most capable of filling the responsible position. Our friends must rally to the support of this college, and by sending their sons there they will do themselves a service as well as the cause of education in the church.

A GIRL hearing the lady of her house, at dinner, ask her husband to bring "Donkey and Son" with him when he came home to tea, had two extra plates on the supper table for the supposed visitors.

Obituaries.

The following resolutions were adopted by the Franklin street (Methodist) Sabbath school, Mobile, Alabama, on Sunday morning, August 21, 1870:

WHEREAS, In the providence of God the faithful and beloved superintendent of our Sabbath school, WILLIAM B. RILEY, has been taken from our midst by the hand of death; therefore, be it

Resolved, 1. That we, the surviving officers, teachers and scholars of Franklin street Sabbath school, recognize in the death of our late superintendent the removal of one of the most devoted and efficient friends with which our school has ever been blessed.

2. That we will ever cherish, with much affectionate regard, the many virtues of him who has so long passed in and out before us in the conscientious performance of his various and responsible duties.

3. That we deeply sympathize with the entire membership of the church with which he was so long and usefully connected.

4. That we likewise present to the members of his bereaved and stricken family our heartfelt condolence in this their hour of affliction and sorrow.

5. That the foregoing be presented to the NEW ORLEANS CHRISTIAN ADVOCATE for publication, and that a copy of the same be sent to the family of the deceased.

J. BANCROFT, (Pastor),
PROF. A. R. HOLCOMBE,
IRMA W. PORTER,
Committee.

Died, in Boston, July 2, 1870, after an illness of eight days, ROBERT EATON REDWOOD. He was born in James City county, Virginia, May 2, 1805—aged sixty-five years—and was married in Petersburg at the age of twenty-three.

God had endowed him with a noble, generous heart, and he never avoided but always sought opportunities which manifested this heavenly attribute of character. Having known him long and intimately, it is with pleasure that memory recalls so many instances where his open purse and ready hands ministered to the necessities of the poor. Through all the phases of fortune, whether basking in her smiles or heaving with her wintry blasts, he was never dead to the cries of the orphan nor the distress of the widow—visiting them in their afflictions and ameliorating their condition.

During his married life—a term of forty-two years—his home was seldom without a guest. When these connected by ties of consanguinity were not at his hospitable board, there were those whom misfortune had placed there to receive his unasked bounty. Ay, methinks there were many of these to greet him on the other shore, who sang a louder note of joy as they welcomed their earthly benefactor into their midst.

He left New Orleans on the sixteenth of June to spend, as he had hoped, six or eight weeks in his old home in Virginia, surrounded by the sweet associations of his childhood, to enjoy for that short period the society of kindred and friends of long ago. It was a specialty of his character to revere with tenderness these sacred memories; and even before leaving, his loving heart fastened on promised pleasures that awaited him. "Man proposes, God disposes." His hopes were not to be realized.

Taken with chills on the train from Cincinnati to Boston, he was conveyed by strangers to a hotel, from there to the Massachusetts General Hospital, where, though blessed with the best medical skill and nursing, these agencies were impotent to stay the hand of the destroying angel, whose cold and icy fingers closed his eyes in death far from home, amid those gloomy surroundings. No fond wife or affectionate children to smooth his dying pillow or receive his parting blessing! O how he lamented this privilege, and what a higher deep in the cup of their sorrow.

For further information as to terms, etc., apply at the School.

COLLEGIATE INSTITUTE.

HATON BOUGE, LOUISIANA.

The fourteenth annual session will begin OCTOBER 3, 1870.

The best facilities are afforded for the acquisition of a first-rate education, and at less expense than in any other school of high grade, North or South.

Board and tuition, per session, \$200. Day scholars, \$150 in advance, balance on fifteenth of February.

For further information address

W. H. N. MAGUIRE, Principal.

VINEGAR HOW MADE FROM CUMBER.

White, Molasses or Sorghum, in ten hours, without using chills. For circular address

F. L. SMITH,
ad 27 1y Vinegar Maker, Cornwell, Va.

for he was the idol of his family, accustomed to the morning and evening kisses of his children and orphaned grand-children, and to the fervent caresses of these little pets of his old age. Could they have been permitted to stand around his dying bed, imprinted the last fond kiss upon his brow and received his last farewell, how it would have softened the poignancy of their grief! Thank God, they have the consolation remitted from his dying lips: "Tell my family that I am perfectly resigned to death." O what a blessed boon—a bright rainbow of promise athwart the dark troubles of their aching hearts! If we are faithful we shall form an unbroken family circle in heaven.

For many years he was a consistent member of the Methodist Episcopal Church South, and until the war the candle of the Lord burned brightly upon the altar of his heart; but being a philanthropist, the condition of our distracted country caused him so much pain that its light apparently waned, and he seemed not to take so much interest in religious matters as formerly; but it is our happy satisfaction to know that the seed of the kingdom was planted deep in his heart, as was evidenced by his dying testimony. I have no doubt that it now blooms in happy fruition in heaven.

His daughter and grand-son hastened on, upon the receipt of the first telegram informing them of his extreme illness, but only arrived in time to take charge of his remains to convey them to his family, and from thence to Mobile for interment. It was their sad privilege to look upon that dear face in death. To his bereaved family would we tender our heartfelt sympathy, commending them to that God who has promised to be a husband to the widow and a father to the fatherless.

AN OLD FRIEND.

NEW ADVERTISEMENTS.

CENTENARY MALE INSTITUTE,

SUMMERFIELD, ALABAMA.

opens on the FIRST MONDAY of next October.

The school is in good condition. It has had a steady increase every year since it has been in the hands of the present teachers.

The total expenses from October to July will be only \$24 50.

Books will run daily between Summerfield and Selma at the opening of the session.

JOHN MASSEY, Principal.

EAST ALABAMA COLLEGE,

AUBURN, ALABAMA.

The next annual session will open on the FIRST WEDNESDAY in October, with a full faculty.

Boys and young men at every stage of advancement can be received either in the Preparatory, Junior or Senior Departments.

Additional schools of Modern Languages, Civil Engineering, and Commercial Arithmetic and Book-keeping have been established.

Economy, health, efficient faculty, good society, thorough discipline and the best of school privileges are the peculiar advantages of this school.

It is just the place to train Men of Letters, and there is room for three hundred. If every preacher and layman will work for it to secure students we will open with two hundred.

For full information or catalogue address the Secretary of the Faculty.

DAVID CLOTON, President Board of Trustees.

SOUTHERN METHODIST

Male High School, New Orleans.

The exercises of the second session of this institution will commence on MONDAY, the fifth day of September proximo, in the basement of the German Methodist Church, Dryades street, between Felicite and Enterprise.

The Principal, encouraged by the gratifying success of the past session, will in no respect relax his energy in the effort to make the school all that could be desired by its patrons; and to accomplish this end neither pains nor expense will be spared.

To furnish to those who desire it an opportunity to obtain for their sons a systematic course of instruction from the beginning, upon which a thorough education so much depends, Primary and Preparatory Departments have been established in connection with the High School.

In selecting professors and teachers the greatest care will be exercised in regard to not only their mental qualifications, but also their ability to impart instruction.

The rates of tuition have been fixed as low as are consistent with thorough instruction.

For further information as to terms, etc., apply at the School.

D. I. RAST, Principal.

Facility and efficient. Buildings commodious and comfortable. Boarding department home-like.

UNIVERSITY OF MISSISSIPPI.
OXFORD, MISSISSIPPI.
The exercises of this institution will be resumed on OCTOBER 3, 1870, on Friday of October next, under the following corps of instructors in the various departments:

FACULTY OF ARTS AND LAW.
John N. Waddell, D. D., Chancellor, Professor of Moral Science and Christian Evidence.
C. W. Sears, M. A., Professor of Mathematics and acting Professor of Civil Engineering.
J. J. Wheel, D. D., Professor of Greek.
A. J. Quinche, M. A., Professor of Latin and Modern Languages.
S. C. Burney, D. D., Professor of English Literature.
E. W. Hildard, Ph. D., Professor of Chemistry, etc.

L. C. Garland, LL. D., Professor of Astronomy, Hygiene and Astronomy.
Hon. J. A. P. Campbell, Professor Elect of Law and Governmental Science.
James A. Lyon, LL. D., Professor Elect of Metaphysics, Logic and Pol. Science.

George Little, Ph. D., State Geologist.
R. H. Lockridge, Assistant in Chemistry, with such other assistants as may be demanded by the patronage of the institution.

It is the design of the authorities to inaugurate, at the earliest possible period, an entire change in the system of instruction, so as to give to the institution the character of the full University. The advantage of a finished education in special courses of study, as well as in the usual classical course, will be preserved, and students will have the option of such course as they may select, and for every course a degree will be given to such students as shall have been able to pass the required examination. The complete details of this system will be announced as they will be different from those which have been given to induce and organize the system.

For the present the system of Special Schools of Science and Literature is in operation, and students may make a selection of such studies as they may prefer, not less than three in number, in the case of Special Chemistry, which occupies the entire time of the student.

THE CHEMICAL LABORATORY will be open, as heretofore, for the reception of special students in Practical and Analytical Chemistry, and Pharmacy, under the direct instruction of Prof. Hildard. Dissection will be given to those completing the full course, and certificates of proficiency to those pursuing it but partially.

A POPULAR COURSE in Natural Philosophy is also given by Prof. Garland, and students are instructed in the subject by lecture and text-book, illustrated by experiment.

CIVIL ENGINEERING will be taught for the present by the Professor of Mathematics, General Sears.

THE DEPARTMENT OF LAW will be opened at the same time for the reception of students, under Hon. J. A. P. Campbell as professor. The diploma from this school entitles the graduate to practice law in any of the courts of Mississippi.

THE PREPARATORY CLASS, taught by the professors of Latin, Greek and Mathematics, will be continued for the present.

EXPENSES, UNIVERSITY RULES, BOARD, ETC.
Tuition in the classical course, payable in advance, for the entire school year of nine months, \$50 00
Board, fuel and laundry, 18 00
Deposit for damages, refundable if no fault is found, 5 00
Fees for special students in chemistry, \$75; deposit for use of apparatus, chemicals and damages, \$25, 100 00
A fee is also charged for special students in other departments, amounting to a moderate sum, proportionate to number of schools attended.
Board at Stewart's Hall, per month, 18 00
Board in private families in Oxford, 20 00
Board, with tuition, fuel and servant attendance, in Oxford, 25 00
Board, with lodging, fuel and servant attendance and washing, in country, 18 00
Washing, fuel and laundry, separate charge, per month, 2 00
Lights, 50 to 75 cents per month.
Rooms in the dormitories are free of rent; and as two students occupy one room the expense is divided.
Expenses of excursions need not exceed \$25 00.

The plan in operation during the last session, of having the Steward's Hall under the control of the Executive Committee, and employing steward at a fixed salary, is discontinued, and the hall will now be conducted by D. J. H. Farrel on his own responsibility.

FREE STUDENTS.
The free tuition feature has been restored, and gives to the meritorious student of good moral character, and unable to pay, a chance for tuition. Candidates for the ministry of any denomination, properly recommended and certified to be such, are entitled to the same privilege.

The healthfulness of Oxford, the high moral character of the faculty, the excellent facilities afforded here for the study of the sciences, the easiness of access by railway from all quarters, and other advantages, render the University of Mississippi the most attractive institution of learning in the South.

The faculties of Kentucky, Alabama, Tennessee, Louisiana, Texas and Arkansas are invited to continue and enlarge that patronage which they have hitherto extended to us.

For further information and catalogue apply to the Secretary of the Board, Colonel Thomas E. B. Pezner, Oxford, Mississippi, any member of the Faculty, or to the undersigned.

J. N. WADELL, Chancellor.

N. H. Text-books for sale in Oxford.

STONEWALL INSTITUTE,

Thirteen Miles North of Selma, Ala.

This School for Boys opens its sixth annual session OCTOBER 3, 1870.

P. C. H. CONNERY, Principal and Teacher of Languages.

John P. Seamrock, Teacher of Mathematics.

As few schools accomplish as much for its pupils as this does.

It is in the quiet country. Its teachers give instruction five hours per day, including two at night.

The Institute belongs entirely to the Principal.

Two Hundred and Sixty Dollars will cover nine months' board, tuition and washing.

Transportation from Selma to the Institute on every Wednesday and Saturday in October for the first two weeks of the session.

Refer to Bishop J. C. Keener and John M. Bonner, Esq., New Orleans, Louisiana.

For further particulars apply to the proprietor.

D. C. H. CONNERY,

HIWASSEE COLLEGE,

MONROE COUNTY, EAST TENNESSEE.

Having taken charge of this school, I desire to invite the attention of friends in the Cotton States to the excellent location, beautiful climate and cheap board. We are in the best part of East Tennessee, seven miles east of Sweetwater, on the great line of railroad, and two miles from Madisonville, which is our post office.

The college has been in operation for twenty years, and has a boarding arrangement for about fifty students. The steward supplies his table from his own farm, and gives the best that the country affords, well prepared, and furnished rooms, at

Two Dollars and a Half Per Week.
Tuition is \$10 per month. Students will be received at any time, and charged to the end of the term. For circular address

REV. F. M. GAY,

Madisonville, Tenn.

The exercises of this institution will be resumed on OCTOBER 3, 1870, on Friday of October next, under the following corps of instructors in the various departments:

FACULTY OF ARTS AND LAW.
John N. Waddell, D. D., Chancellor, Professor of Moral Science and Christian Evidence.
C. W. Sears, M. A., Professor of Mathematics and acting Professor of Civil Engineering.
J. J. Wheel, D. D., Professor of Greek.
A. J. Quinche, M. A., Professor of Latin and Modern Languages.
S. C. Burney, D. D., Professor of English Literature.
E. W. Hildard, Ph. D., Professor of Chemistry, etc.

L. C. Garland, LL. D., Professor of Astronomy, Hygiene and Astronomy.
Hon. J. A. P. Campbell, Professor Elect of Law and Governmental Science.
James A. Lyon, LL. D., Professor Elect of Metaphysics, Logic and Pol. Science.

George Little, Ph. D., State Geologist.
R. H. Lockridge, Assistant in Chemistry, with such other assistants as may be demanded by the patronage of the institution.

It is the design of the authorities to inaugurate, at the earliest possible period, an entire change in the system of instruction, so as to give to the institution the character of the full University. The advantage of a finished education in special courses of study, as well as in the usual classical course, will be preserved, and students will have the option of such course as they may select, and for every course a degree will be given to such students as shall have been able to pass the required examination. The complete details of this system will be announced as they will be different from those which have been given to induce and organize the system.

For the present the system of Special Schools of Science and Literature is in operation, and students may make a selection of such studies as they may prefer, not less than three in number, in the case of Special Chemistry, which occupies the entire time of the student.

THE CHEMICAL LABORATORY will be open, as heretofore, for the reception of special students in Practical and Analytical Chemistry, and Pharmacy, under the direct instruction of Prof. Hildard. Dissection will be given to those completing the full course, and certificates of proficiency to those pursuing it but partially.

A POPULAR COURSE in Natural Philosophy is also given by Prof. Garland, and students are instructed in the subject by lecture and text-book, illustrated by experiment.

CIVIL ENGINEERING will be taught for the present by the Professor of Mathematics, General Sears.

THE DEPARTMENT OF LAW will be opened at the same time for the reception of students, under Hon. J. A. P. Campbell as professor. The diploma from this school entitles the graduate to practice law in any of the courts of Mississippi.

THE PREPARATORY CLASS, taught by the professors of Latin, Greek and Mathematics, will be continued for the present.

EXPENSES, UNIVERSITY RULES, BOARD, ETC.
Tuition in the classical course, payable in advance, for the entire school year of nine months, \$50 00
Board, fuel and laundry, 18 00
Deposit for damages, refundable if no fault is found, 5 00
Fees for special students in chemistry, \$75; deposit for use of apparatus, chemicals and damages, \$25, 100 00
A

Scientific.

The American Chemist says that one great cause of the poisoning of water in lead pipes is the voltaic action between the lead pipes and the copper boilers used in the kitchen range. These boilers are usually tinned when they leave the copper-smith's shop; but in two cases out of three the tinning lasts but a few months, because not done with pure block tin, but with an alloy of tin and copper, while good tinning will last for years. As soon as the tinning is worn off, a galvanic current, dissolving the lead in the pipes, is set in action. In an experiment tried with a flask of aqueduct water, containing clean lead, an exposure of forty hours produced no dulling of the color and no poisoning of the water; but, when lead and copper in contact were tried, forty hours' exposure covered the lead with a white carbonate of lead, and abundant proofs of the lead were found in the water when tested with sulphureted hydrogen.

Moses G. Fanner, of Boston, has fused the native iridosmine by placing the natural grains, such as are used for tipping gold pens, in a groove in charcoal, and subjecting to the action of a current of voltaic electricity produced by a battery of sixty large Bunsen cells. He obtained in this manner bars of perfectly compact metal, brittle and very hard. The operation, says the American Chemist, was anything but pleasant, owing to the intense heat and the fumes of osmic acid, which attacked the eyes and nostrils, producing symptoms similar to those in rose or hay fever, and affecting the face as if by a sunburn. Mr. Fanner estimates the temperature of fusion at about ten thousand degrees Fahrenheit. His object was to prepare a bar of alloy for electric illumination. He found that when near the melting point a square inch of surface produced light equal to two thousand eight hundred candles, and threw a shadow in broad daylight, and produced excellent photographs.

The number of reptiles is so small in England that there is no temptation for a boy to begin a collection in that department, or for a man to devote himself to the study. Therefore, while Great Britain has produced many botanists, conchologists and ornithologists, she has never produced a single herpetologist. But the state of things is different in Australia, which is the very paradise of snake collectors. From six to ten specimens, belonging to different species, were captured some years ago, under a single stone, not many miles from Sydney; and to go snake-hunting has been for years a pastime with the boys, and the collecting bag often forms a part of the outfit of the hunters, who have not forgotten the tastes of their boyhood. What adds zest to the sport is the fact that two-thirds of the species are fully nine-tenths of the individuals are venomous. About eighty of the species are described and figured in a work on "Australian Snakes," by Mr. Krefft, curator of the Australian Museum.

Dr. PARKES, of London, has been experimenting on a healthy soldier to find the effects of alcohol. He had him first take no alcohol for six days; then for six days he took, in divided doses, from one to eight ounces of pure alcohol; then water for six days; and then for three days twelve ounces of fine brandy, containing forty-eight per cent. of alcohol. The effect in modifying weight was quite inappreciable. Alcohol produced little effect on the temperature of the system, though slightly raising it. The pulse was materially affected, rising from 77.5 before alcohol to 94.7 after the largest doses. Estimating the normal daily work of the ventricles of the heart as equivalent to the lifting of one hundred and twenty-two tons a foot, it was found that during the alcoholic period the heart was compelled to lift an excess of 15.8 tons, and during the last two days of 24 tons. Their conclusion was that it was utterly useless in health, and positively injurious in larger quantities than two ounces daily. There seemed to be indicated an advantage in its use if employed in rousing a feeble appetite, exciting a feeble heart, and accelerating a languid capillary circulation.

DRYAN.—There is a dignity about that going away alone we call dying—that venturing away from home for the first time in our lives. For we are not dead; there is nothing dead to speak of, and we only go off seeking foreign countries not laid down on any map we know about. There must be lovely lands somewhere starward, for none ever return that go thither.

If we would have powerful minds we must think; if we would have faithful hearts we must love; if we must have strong muscles we must labor. These include all that is valuable in life.

HOUSEKEEPERS' DEPARTMENT.

HOW TO CAN FAULT.—People can fruit on a false theory. It is that of driving the air out of a jar by steam. This can be done, and perhaps sometimes is, but I think of no circumstances in which I would attempt it. The true way is to fill the jar absolutely full of boiling liquid, and clap the cover on, leaving the particles of air or steam under it. Now to particularize:

1. Take a glass jar. It is unchangeable, and is as good as new till it breaks. No fruit acts on it. You can see its contents. You need not break it.

2. Heat it till it will bear boiling liquids. This may be done by pouring in water that will not break it, and adding successive portions of boiling water, shaking it after each.

3. Dip in the substance to be canned from a boiling kettle, as deliberately as you please, so that the top does not get so cold that boiling water will break it. Fill to within a half inch of the very brim.

4. Lay a circle of stiff paper on the surface.

5. Pour on a quantity of boiling water, letting it run over the top, till the last particle of foam is washed away. The paper keeps the steam from washing away the substance beneath.

6. Put on a hot glass cover, that will project a little into the top of the jar, with a rubber ring between the mouth of the jar and the shoulder of the cover, so that no air can pass the cover.

7. Put on a clasp or other contrivance to hold the cover and rubber firmly against the top of the jar air-tight. The lid touches the surface of the boiling water, and there is no place for air or steam in the jar. But as it cools the surface of the liquid sinks away from the cover, and it looks as if there were air in it. The more rapidly filled the greater will be the vacuum space.

8. Test the jar when cold. Remove the clasp or other contrivance without disturbing the cover. If now you can remove the cover with your fingers the jar is not sealed. If jar or cover be defective, sealing may be impossible. If all be tight, replace the clasp and rest secure.

Of course with many patterns of jars these directions cannot be followed. Reject all such jars. A jar might fulfill all these conditions, but be unsatisfactory and difficult to open, because air cannot be conveniently let in by passing the point of a knife between the jar and the rubber. The covers of my Hiltons last year left a minute bubble of air beneath them. It did no practical harm. The manufacturers promised to make the under surface of the cover a little convex this year.

I see no reason why jars should not be as good after a use of twenty years as at first. They will keep quicklime, potash, spices, ground coffee, putty, and perhaps paints and varnishes—certainly if the mouth and cover can be kept clean. None of these need a vacuum. Rev. I. F. Hilton, in *Journal of Horticulture*.

The poorest men are those who have nothing to do, and the most unhappy are those who make happiness their chief aim of life. The most ignorant are those who know best of themselves, and the most noble are those who are most honest. The greatest are those who feel themselves to be the least; and the best preacher is he whose life most nearly resembles the life and example of Christ.

RELIGION is a personal business; and if all the rest of the world were to forsake Christ, it would be our duty to follow him.

The greatest curse to ordinary Christians would be to relieve them at once of all earthly cares.

SCHOOLS AND COLLEGES.

WHITWORTH FEMALE COLLEGE,

BROOKHAVEN, MISSISSIPPI,

on the New Orleans, Jackson and Great Northern Railroad, one hundred and twenty-eight miles north of New Orleans, and fifty-eight miles south of Jackson, will reopen on

The 21st of September, 1870.

Thorough instruction in all the branches given. Charge for board, tuition in English, English text books, school-room stationery, washing, fuel, lights, medicine and medical attendance, \$25 for the term of forty weeks. The languages and music, extra. A deduction of \$50 made for pastors of churches. Number of pupils last term, 165. For catalogue address

H. F. JOHNSON, President.

Box 300

ROANOKE COLLEGE, SALEM, VA.

Next Session Begins September 5.

This institution has a full corps of instructors, a thorough course of studies, and thus at a high grade of scholarship. Its superior educational advantages, moderate expenses, healthy location, and excellent mail, traveling and telegraphic facilities, render it well worthy the attention and patronage of the South.

Expenses for session of ten months, about \$210 00. This estimate includes board and tuition, embracing modern languages. A slight advance on the above for students boarding in private families. For further particulars, catalogues, etc., address

REV. D. F. BATTLE, D. D., President of the College.

BOOKS AND STATIONERY.

STANDARD EDUCATIONAL WORKS

PUBLISHED BY

CHARLES SCRIBNER & COMPANY,

651 BROADWAY, NEW YORK.

Guyot's Geographical Text-Books.

"Incomparably superior to anything published."

Introduction to the Study of Geography.

Elementary Geography.

Intermediate Geography.

Common School Geography.

Guyot's System is approved and endorsed by the most distinguished literary and scientific men of our nation, such as Prof. Agassiz, Dana, Tenney, Henry and others; celebrated in science throughout Europe as well as at home.

The fact that over one million (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New System, for no other series of books ever published in America have ever secured so rapid and extensive introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; Cincinnati, Cleveland, Columbus, Springfield, Toledo, Marietta, and most of the other important towns and cities, numbering nine thousand schools in Ohio, and hundreds of towns and cities in the other Western States, while in the Southern States, and California they are being extensively adopted.

Believing that the publication of Professor Guyot's series has marked a new and better era in the presentation of geographical science, that by it the pupils of this generation will obtain a clearer, more definite and extended knowledge of the world on which they live, and that it is so systematized as to render that knowledge more valuable and permanent, we commend it to the attention of all interested in educational improvements and progress.

FELTEN'S POPULAR SCHOOL ARITHMETIC.

First Lessons, (Illustrated.)

Primary Arithmetic, (Illustrated.)

Intellectual Arithmetic.

Intermediate Arithmetic.

Grammar School Arithmetic.

Practical Arithmetic.

PROF. COOLEY'S WORKS ON NATURAL SCIENCE.

A Text-book of Chemistry.

A Text-book of Natural Philosophy.

PROF. SAXBORN TENNEY'S NATURAL HISTORIES.

Natural History of Animals for the Young.

A Manual of Zoology.

Natural History Tablets.

PROF. HENRY S. DAY'S WORKS.

Introduction to the Study of English Literature.

Art of Composition.

Art of Discourse.

Elements of Logic.

American Speller.

PROF. SHIELDON'S WORKS ON OBJECT-TEACHING.

Manual of Elementary Instruction.

Lessons on Objects.

First Reading Book.

Phonetic Reading Charts.

GRAMMAR AND COMPOSITION.

Dalziel's Grammatical Analysis.

Harper's Practical Composition.

PROF. GUYOT'S WALL MAPS FOR SCHOOLS.

Large Series.—Wholesale list price, per set, \$71.

Intermediate Series.—Wholesale list price, per set, \$34.50.

Small Series.—Wholesale list price, per set, \$18.

Classical Series.—Wholesale list price, per set, \$15.

PERCEE'S MAGNETIC GLOBES.

One dozen Magnetic Globes, representing men of different races, ships, steamers, light-houses, and various animals, accompanying each globe, without additional cost.

Lessons on the globe, illustrated by Percee's Magnetic Globes and Magnetic Globes, by Mrs. Mary Howe Smith.

Extra Magnetic Globes for Percee's Globes.

1. Animals of all Climates. 2. National Flags.

Descriptive catalogues and mammoth circulars of testimonials forwarded free of postage to any address. Most favorable terms offered to school boards or teachers desirous of introducing the above Text-books.

Dealers in all descriptions of

MACHINERY AND AGRICULTURAL IMPLEMENTS.

NEW ORLEANS, LOUISIANA.

VICTOR CANE MILLS,

COOK'S EVAPORATORS.

All sizes, for either Southern or Sorgo Cane.

Victor Grain Drills.

Buckeye Thrashers, for Rice, Wheat, Oats, etc., etc.

Ohio Reaping Machines, with Dropper.

These Machines dispense with raking, as they deliver the cut grain ready for binding. They are adapted to all kinds of Grain, Rice, etc., etc.

Warner's Sulky Hay Rakes.

Horse Powers.

Southern Corn Planters.

Sutcliffe Gang Plows.

Corn Shellers.

Stafford Sulky Cultivators.

Corn and Cob Crushers.

Straw and Hay Feed Cutters.

Cider Mills and Presses.

Crawford Garden Cultivators.

Hay Presses and Cotton Presses.

Gutted Steel Hatch Cane Gins.

Portable Steam Engines of all sizes.

Stationary Steam Engines, boilers of all sizes.

Circular Saw Mills and Shingle Machines.

Coleman Corn and Wheat Mills.

Saw Machines and Bolting Cloth.

Shaffling, Bolting, etc.

Sent for special circulars for any articles, or estimates for full sets of Machinery.

THOS. H. BODLEY & CO.,

NEW ORLEANS MARKETS.

From the N. O. Price Current.
We have no improvement to notice in the general market, which continues extremely dull. The new crop of cotton comes forward very slowly, the receipts for the week being confined to ten bales, making the total to date (including the two bales from the Rio Grande) twenty-three bales, against one hundred and three last year. Sugar and Western produce show no material change. The movement in the latter is mostly confined to the local trade, but latterly there has been more animation, in flour, with increased demand for shipment.

The accounts from the country present no new features. From some points we hear of heavy rains, but from others the reports are favorable, and the prospect is more encouraging. The crop is variously reported from ten days to three weeks backward, which will render early frosts disastrous. The apprehensions of worms appear to have been dispelled, but in some localities they have undoubtedly done considerable injury. The favorable accounts are emphatic, but even they admit the backwardness, and that the extent of the yield depends on the weather for the rest of the season.

The river is twelve feet seven inches below high water mark.

Cotton.—The following are the arrivals since the twenty-sixth ultimo:

Louisiana and Mississippi	662
Mobile	130
Texas	1
Total	793

On Saturday, under an improvement at Liverpool and New York, factors generally raised their pretensions, but the sales, which embraced 435 bales, although at fuller prices, especially for the lower grades, showed no quotable advance. On Monday, with a further advance at Liverpool and New York, factors were still more stringent in their pretensions, and 350 bales changed hands at an irregular advance of 1/4 to 1/2c.

On Tuesday the market opened with a fair inquiry, but the movement was checked by the higher pretensions of factors, who predicated their claims to advanced figures on the favorable accounts from Liverpool, but especially the light stock remaining unsold. Later in the day, however, parties came together more freely, and the business summed up 625 bales. On Wednesday 420 bales found purchasers at irregular and easier prices. On Thursday prices were still weaker, but the sales reached 600 bales. On Tuesday the market opened under the depressing influence of the downward tendency of the Liverpool market, and factors were compelled to meet the demand more freely, but were unwilling to submit to any quotable decline. The sales consequently did not exceed 420 bales, and prices closed at about previous rates.

This makes an aggregate for the past three days of 1,440 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 1,140,993 bales, against 796,161 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 701,733 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 479,753 bales to Great Britain, of 124,021 to France, and of 120,132 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary	11 1/2 to 12 1/2
Good ordinary	12 1/2 to 13 1/2
Low middling	13 1/2 to 14 1/2
Middling	14 1/2 to 15 1/2
Strict middling	15 1/2 to 16 1/2

COTTON STATEMENT.

Stock on hand Sept. 1, 1869, bales	770
Arrived past three days	793
Arrived previously	119,583
Made from waste and damaged cotton, samples, etc.	5562-1206185
Total	120,655

Special Notices.

GALDEN DISTRICT CONFERENCE.

The Galdeen District Conference will be held at Spring Creek camp ground, Cherokee county, Alabama, commencing September 29. Opening sermon on the twenty-eighth, at half past seven o'clock P. M. Let every member be present.

A camp meeting will be held in connection with the Conference. Ministers in Alabama and Georgia are cordially invited. Let everybody come. Persons coming by steam will get off at Cedar Bluff; the camp ground is five miles from there. The boat leaves Mobile every Tuesday morning, and Galdeen on Wednesday morning, passing Cedar Bluff at three P. M. and ten P. M.

T. G. SLAYTON, P. E.

TUSKALOOSA DIST. CONFERENCE.

The District Conference for the Tuscaloosa district will be held at Greenvale, commencing on Thursday, September 22, 1870. All official members of the church are entitled to seats in the conference.

JAS. L. COTTEN, P. E.

CAMDEN DISTRICT CONFERENCE.

The Camden District Conference of the Alabama Conference will be held at Bellville, Alabama, October 6-9. Rev. M. J. Law will preach the opening sermon October 6, at eleven o'clock A. M. All are requested to be present at the opening services.

D. M. HUDSON, P. E.

CLINTON DISTRICT CONFERENCE.

The District Conference for Clinton district, Mississippi Conference, will be held at Jackson, Louisiana, September 29 and 30 (Thursday and Friday) and the Quarterly Meeting for Jackson circuit will be held October 1 and 2, at Salem.

J. NICHOLSON, P. E.

ALEXANDRIA DIST. CONFERENCE.

The District Conference for Alexandria district, Louisiana Conference, will convene in Centerville, Ouachita parish, Louisiana, on Friday, the sixteenth of September, 1870, at eleven o'clock A. M. Local preachers, pastors and stewards will please come prepared to present their reports. Delegates to the Annual Conference will be elected.

J. F. MARSHALL, P. E.

PENSACOLA DIST. CONFERENCE.

The District Conference for the Pensacola district, Alabama Conference, will hold its annual session in Milton, Florida, beginning on Thursday, September 29, at eight o'clock A. M. Opening sermon by Rev. J. A. Pace, on Wednesday night, September 28. Ministers from abroad are expected and invited to attend.

J. A. PACE, P. E.

CAMP MEETINGS.

A camp meeting will be held on the road from Greenwood to McNitt, one mile and a half north of Montfort's ferry, commencing on the sixth of October. Preachers and people are invited.

H. WILLIAMSON, P. C.

A camp meeting will be held at Salem, East Pascagoula and Bay Shore circuit, Mobile district, Mobile Conference, commencing on Thursday night before the second Sunday in October. Ministers and people are cordially invited to attend.

A. J. COLEMAN, P. E.

We will have a camp meeting (D. V.) at Frost's Bridge, on the Clark and Shubuta circuit of the late Mobile Conference, embracing the second Sunday in October. Brethren in the ministry, who can do so, are especially invited to attend, and many others who feel interested in this great work. Come over, Mr. Editor, and help us.

WILL. H. LEITH, Pastor.

A camp meeting will be held on Pleasant Hill and Manly circuit, at Bonh, commencing on Friday evening, the thirtieth of September. Preachers will please note it.

JOHN PUGH, P. E.

A camp meeting will be held at Linwood, DeKalb circuit, Macon district, Mobile Conference, commencing on Thursday night before the fourth Sunday in September.

U. L. THOMPSON, P. C.

YAZOO DISTRICT, MISSISSIPPI CONFERENCE.

FOURTH ROUND OF QUARTERLY MEETINGS.

Carroll et al., at Solilo chapel, Sept. 24, 25
Durant et al., at Center Grove, Oct. 1, 2
Richland et al., at Goodman, 8, 9
Yazoo City station, at Yazoo City, 15, 16
Yazoo circuit, at Tranquil, 22, 23
Greenwood and McNitt, 29, 30
Lexington circuit, Nov. 5, 6
Mt. Olivet circuit, Nov. 12, 13
Black Hawk et al., at Black Hawk, 19, 20

Brothers, please have your statistics, reports and records accurate and ready.

W. P. BAILEY, P. E.

Mt. Carmel Dist., Mississippi Conference.

FOURTH ROUND OF QUARTERLY MEETINGS.

Columbia, at Pleasant Vally, Sept. 24, 25
Okolay, at Sharon, Oct. 8, 9
Rankin, 22, 23
Mt. Carmel, at Santee, 29, 30
Gainesville, Nov. 12, 13

H. P. LEWIS, P. E.

Woodville Dist., Mississippi Conference.

THIRD ROUND OF QUARTERLY MEETINGS.

Buffalo, at Mar's Hill, July 16, 17
Moultrie, at Beech Hill, 23, 24
Amite, at Adams, 30, 31
St. Helena, at Synard, Aug. 20, 21
Wilkinson, 27, 28
Liberty, at Liberty, Sept. 10, 11
Woodville, at Woodville, 17, 18
Percy Creek, 24, 25

JAS. A. GODFREY, P. E.

Meridian Dist., Mississippi Conference.

FOURTH ROUND OF QUARTERLY MEETINGS.

Meridian, Sept. 24, 25
Pearce's Springs, at Maunass, Oct. 1, 2
Shubuta and Clarke, Salem, 8, 9
Belmont, at Bruensville, 15, 16
Livingston, 22, 23
Enterprise circuit, at Pleasant Valley, Nov. 5, 6
Gaston, 12, 13
Butler, 19, 20
Bladen Springs, 26, 27

The camp meeting on the Pearce's Springs circuit will embrace the fourth Sunday in September; on the Shubuta and Clarke circuit, the second Sunday in October.

JOSEPH T. HARRIS, P. E.

Alexandria Dist., Louisiana Conference.

THIRD ROUND OF QUARTERLY MEETINGS.

Centerville and Trinity, at Centerville, Sept. 17, 18
Harrisonburg and Sicily Island, at Harrisonburg, 21, 22
Columbia, at Ebenezer, 24, 25
Atlanta, at Liberty chapel, Oct. 5, 6
Rapides, at Alexandria, 8, 9
Alexandria, at Alexandria, 15, 16
Chalazion, at Liberty chapel, 19, 20
Spring Creek, at Laird's chapel, 22, 23
Evergreen, at Big Cauc, 29, 30
Atehalaya, Nov. 5, 6

J. F. MARSHALL, P. E.

Brookhaven Dist., Mississippi Conference.

FOURTH ROUND OF QUARTERLY MEETINGS.

Bogue Chitto et al., at Bogue Chitto, Sept. 10, 11
Summit circuit, at Muddy Springs, 17, 18
Magnolia et al., at Magnolia, 24, 25
Scotland and Brandywine circuit, at Union church, Oct. 8, 9
Martinsville et al., at Providence camp ground, 15, 16
Burton et al., at Zion, 22, 23
Pleasant Valley and Rehoboth, at Rehoboth, 29, 30
Georgetown et al., at Bethesda, Nov. 5, 6
Brookhaven station, 12, 13
Wesson and Beargard, 26, 27
Crystal Springs and Hazlehurst, at Crystal Springs, Dec. 3, 4

Brethren, this being the fourth round, allow me to remind you of the necessity of attending promptly to the following items of business, viz: The Bishops' fund, Conference fund, missionary cause, and reports and statistics. Brethren, please take due notice of the above and govern yourselves accordingly.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, SEPTEMBER 10, 1870.

NO. 34.

NEWS OF THE WEEK.

DOMESTIC.

St. Louis, Sept. 2.—The St. Louis and Iron Mountain Railroad Company have perfected transfer arrangements at Columbus, Kentucky, by which freight will be hereafter shipped between St. Louis and all points in the South without breaking bulk.

Three hundred employees of the Toledo, Wabash and Western railroad stopped the trains on account of arrears. The strikers captured four engines.

Memphis, Sept. 2.—Dr. Knade, who killed John Ward at Hot Springs, Arkansas, about ten days since, has been acquitted on the grounds of justifiable homicide.

A party of assassins rode up to the house of Mr. J. Glover, a planter in Johnson county, Arkansas, a few days since, and shot him and his son-in-law, killing them instantly, and wounding his wife and son dangerously; they then rode off.

Richmond, Va., Sept. 2.—A conflagration occurred here this morning, by which the confectionery establishment of C. Zimmer was totally destroyed, and the stocks of L. Jacobs & Baldwin Bros., dry goods dealers, considerably damaged. Loss \$25,000; fully insured.

San Francisco, Sept. 2.—The American brig *Angelle* and the Mexican schooner *Minerva* were wrecked off Mazatlan, in a gale on the twentieth of August.

New York, Sept. 2.—Arrived: Steamship *Leo*. Arrived out: Steamships *Tarifa* and *City of Dublin*.

Savannah, N. Y., Sept. 7.—On the third ballot Stewart L. Woodford was nominated for Governor. He received 258 votes; Greeley received 105.

Philadelphia, Sept. 8.—Five thousand Protestants are having a procession to-day. A strong police force accompanies the line. No disturbance has occurred.

FOREIGN.

Brussels, Sept. 2.—Prussians who entered Belgium surrendered. The officers of both armies were set at liberty on parole.

New York, Sept. 3.—From the conflicting telegrams we gather the following:

McMahon was moving to the relief of Metz, when he encountered and was driven back by the Germans, who pursued closely.

The pursuit involved serious conflicts. There was serious work at Sedan on Tuesday, when McMahon was perched on the heights of Vaux near Carignan, whither the Emperor came.

On that day thirty thousand of McMahon's troops were attacked between Monzon and Moulins.

This was the battle of Beaumont, in which the French were driven over the Meuse to Monzon.

The encounter on the other bank resulted in driving McMahon from Vaux.

McMahon faced about on Wednesday between Donzy and Bazelles, where a severe engagement took place.

The Prussians here, turned the French right, necessitating their retirement upon Sedan, before which the fight was again renewed on Thursday, when the French were driven into the fortress of Sedan.

Washington, Sept. 3.—King William announced the surrender yesterday of the entire French army at Sedan, including the Emperor.

Berlin, Sept. 3.—The following highly important dispatch has just been made public here:

Before Sedan, France, Friday, Sept. 2, 122 P. M.—From the King to the Queen: A capitulation, whereby the whole army at Sedan are prisoners of war, has just been concluded with General Wimpfel, commanding, instead of Marshal McMahon, who is wounded.

The Emperor surrendered himself to me, as he has no command, and left everything to the Regent at Paris. His residence I shall appoint after an interview with him, at a rendezvous to be fixed immediately.

What a course events, with God's guidance, have taken.

New York, Sept. 3.—The Telegram's special from London says: Dispatches from the seat of war report a brilliant Prussian success.

Twenty thousand French lay dead and wounded on the field.

London, Sept. 3.—The Germans are urging King William to declare himself Emperor of Germany.

Brussels, Sept. 3, noon.—General Faily has been shot. One account says by his own soldiers, others state that it was by order of McMahon.

The Empress ordered Prince Napoleon to return to Paris, which he refused, and a decree was issued stripping him of his rank as Prince and Senator.

The *Etoile* of this city says the French were utterly defeated, and that McMahon and the Emperor are prisoners.

French soldiers massacre their own officers. Many officers escaped into Belgium.

On Thursday he destroyed the Prussian left, driving the Crown Prince back on the hills of the Ardennes.

London, Sept. 3.—There is great excitement and anxiety to learn whether the surrender involves the cessation of hostilities and the unrestricted occupation of Paris.

Paris, Sept. 3.—The Journal *Officiel* of this morning represents every event of the campaign as a success of the Emperor.

London, Sept. 3.—A dispatch from Berlin says: Since Wednesday last Bazaine has sought to escape north, but these attempts were always frustrated.

It is really believed in Paris that McMahon is acting on the offensive.

Washington, Sept. 3.—The Secretary of State has a dispatch from Minister Motley, announcing the surrender of the whole French army at Sedan.

Paris, Sept. 3.—The fortifications are complete. Trochu is virtually dictator. My informants left Paris on the second instant. To-day is the last day of grace.

London, Sept. 3.—A Berlin journal says Europe must familiarize itself with the idea that Prussia, in a spirit of self-protection, seeks to rectify the French frontier.

New York, Sept. 3.—A Herald special, dated Sedan, via Bonillon, September 2, midnight, says: The die is cast so far as McMahon's line army and the fortunes of the empire are concerned. All is over with France.

Thursday, at daylight, showed the French force reinforced and occupying a strong elevated position.

At five o'clock in the morning the Prussians recommenced the battle by making a simultaneous attack on the French front and left flank.

The fighting, at first, was confined to artillery, the French evidently having the weaker force of guns.

At noon the Prussians made a fierce infantry attack with the object of breaking the French center. After tremendous fighting the Prussians fell back. A pause seemed to take place at one o'clock, but it was only a prelude to a fiercer assault.

At two o'clock there was a simultaneous movement all along the Prussian line, the infantry charging the French camps. At three o'clock the French line wavered and immediately thereafter broke, when the battle became a rout. McMahon was seriously wounded in the last attack. The roads now presented a terrible aspect. The French left everything—lying in all directions and throwing away arms.

The Prussians pressed forward resolutely, bent on cutting off a retreat towards Belgium. The Prussians used the bayonet with terrible effect.

The Emperor remained at Sedan throughout the battle. At half-past two o'clock he was advised to fly to Belgium, but was too ill to undertake the journey.

This morning the Prussians prepared to attack Sedan, which was not in a condition to resist.

At twelve o'clock a party of officers, headed by General Wimpfel, left Sedan bearing a flag of truce. They were conducted to Prussian headquarters, where General Wimpfel formally surrendered the French army and fortress to King William.

He bore a letter from Napoleon to King William, stating he desired to surrender himself, not having any command.

The formal capitulation took place at half-past one o'clock.

It is said the Emperor will be sent under a strong escort to Magdeburg, but his destination is a secret.

Paris, Sept. 3.—The Public today says rapid communication between Paris and the armies is still lacking.

From private information, we may state that the Prussian accounts are greatly exaggerated, and in some cases totally false.

Bazaine and McMahon have fought for and maintained favorable positions. They are fully supplied with provisions and arms, and it is supposed the fighting to-day.

Workmen have been incorporated in the Garde National.

The *Moniteur* positively denies

that Humbert, the Prince Royal of Italy, congratulated the Prussians on their triumphs over the French.

Prince de Joinville, writing from Belgium yesterday, to a friend here, says: "The battle continues. We have taken thirty cannon. Bazaine marches toward McMahon. Vive la France."

The *Moniteur* announces that the Alsations are enrolling en masse at Lyons.

A large and effective body of sharpshooters have started for the frontier.

In south France the volunteering is generic. Throughout the country the same sentiment is expressed.

Peace is impossible while a single Prussian stands on French soil.

In the Corps Legislatif, to-day, Count Palikao said, from unofficial news, he concludes that Marshal Bazaine, after a vigorous sortie, was compelled to return to Metz.

Subsequently McMahon was at first victorious, but finally compelled to retire before overwhelming numbers. No junction has been accomplished. The situation is grave, but not desperate.

New York, Sept. 3.—Special to the New York Tribune, London, September 3: The King's headquarters were at Vendres, near Sedan, on Friday.

The battle of Sedan began at six o'clock in the morning, September 1. Two Prussian corps were in position on the west of Sedan, having got there by long forced marches, to cut off the French retreat to Metziers.

To the south of Sedan was the first Bavarian corps, and to the east, across the Meuse, was the second Bavarian corps. The Saxons were on the northeast with the guards. I was with the King throughout the day, on a hill above the Meuse, commanding a splendid view of the valley of the Meuse and of the field.

After a tremendous battle, the Prussians having entered the fortifications of Sedan, the Emperor capitulated at 5:05 P. M. His letter to the King of Prussia said: "As I cannot die at the head of my army, I lay my sword at the feet of your majesty."

Napoleon left Sedan for the Prussian headquarters at Vendres.

At seven o'clock in the morning of September 2 McMahon's whole army, comprising one hundred thousand prisoners, capitulated without condition.

The Prussians had two hundred and forty thousand men, either engaged or in reserve. The French had one hundred and twenty thousand.

The New York Tribune's special correspondent telegraphs from Arlon, Friday afternoon, as follows: Every hotel here is filled with French refugees from across the frontier. The frontier villages are crowded, and it is difficult to obtain anything to eat.

One hundred and fifty French and one hundred German soldiers, while trespassing on Belgian territory, were made prisoners and conducted to Namur.

To-night I also saw some Paris refugees on the train; they are not Germans, but Luxembourgers who were expelled from Paris on account of their poverty.

The Parisians are preparing for a famine by expelling all foreigners who are not possessed of means for their own support.

London, Sept. 3.—A Berlin journal says Europe must familiarize itself with the idea that Prussia, in a spirit of self-protection, seeks to rectify the French frontier.

London, Sept. 3.—The city is wild with delight over the Prussian triumph. The streets are filled with the excited multitudes. Englishmen congratulate each other as if it had been an English victory. Sympathies with Prussia were never so strongly manifested.

The news of the surrender was published here by the Daily News in an extra about half-past ten o'clock this morning. The other papers soon followed. Placards were posted everywhere in the streets, and thousands of dispatches were sent in every direction.

The *Pall Mall Gazette* says the news will be regarded as the finale of the Emperor's hopes, by a hastily patched up peace, to find means to transfer the throne to his son. It is the last and greatest delusion of a life of delusions. He may find it easier to begin than to end a war.

Peace is by no means very certain. There is no government to make peace. Imperialism is dead. An Orleans government or a republic can hardly begin. By the surrender France has for the first time acted; her eyes are for the first time opened.

The Standard says Sedan is the Emperor's "Waterloo." The second empire is now overthrown.

The Standard deprecates exultation and expresses heartfelt sympathy with the fallen sovereign.

The *Echo* says the Emperor's last act does what is possible—to surrender himself, not having any command.

The formal capitulation took place at half-past one o'clock.

It is said the Emperor will be sent under a strong escort to Magdeburg, but his destination is a secret.

New York, Sept. 4.—Cable.—Paris, Sept. 4.—The council of ministers have issued the following proclamation:

"To the French people: Great misfortune has come upon the country. After three days' heroic struggle sustained by the army of Marshal McMahon against three hundred thousand of the enemy, forty thousand men have been made prisoners. General de Wimpfel, who took command of the army in place of Marshal McMahon, being badly wounded, has signed the capitulation. This cruel reverse will not shake our courage.

"Paris is to-day in a complete state of defense. The military forces of the country will be organized. In a few days a new army will be under the walls of Paris, and another army is forming on the banks of the Loire."

"Your patriotism, your union, your energy will save France."

"The Emperor has been made prisoner in the struggle. The government, in accord with the public powers, will take all the measures required by the gravity of events."

(Signed) "Count de Palikao, Chevreton, Rigault de Genodrey, Jules Brame, De La Tour d'Auvergne, Grande Perret, Clement Duvernois, P. Mayne, Buisson Billault, Jerome David, of the council of ministers."

Paris, Sept. 4.—General Trochu, the Governor of Paris, has been appointed member of the government of National Defense, and is installed at the Hotel de Ville. He takes the portfolio of war, and his colleagues have conferred upon him the presidency.

London, Sept. 5.—The officers of the provisional government are distributed as follows: Minister of interior, General Gambetta; foreign affairs, Jules Favre; finance, Pierre Magne; public instruction, Jules Simon; justice, Emmanuel Cremieux; war, General Trochu; president of council, Grevy; secretary, General Andre Laverdun.

Scots have been placed on the doors of the Corps Legislatif.

Paris, Sept. 5.—An officer who attempted to reach the army of Marshal McMahon furnishes the following details to the journals of the surrender of the Emperor:

In the second attack of our armies we understand that all the positions of Marshal McMahon were turned. Bazailles, Souzy, Bolan, Villers, Cernay, Givange, La Chapelle, Fleignux, St. Mange and St. Rigue, to the woods of Duchery, formed an ellipse of fire around Sedan, kept up by four hundred thousand soldiers and nine hundred cannon.

At Sedan, with four hundred thousand men before him, and seriously wounded in the shoulder and groin, and with bombs hurled around him, the marshal turned over his command to General Wimpfel. As regards the Emperor, McMahon's corps covered him on the field of battle and the walls of Sedan for an hour longer.

Floing was the headquarters of the King of Prussia. The Prince Royal and a host of German princes and strangers were at these two points.

Sedan and Floing are a distance of three kilometers one from the other. We went through Sorigny without hindrance, but not without difficulty.

Paris, Sept. 5.—The provisional government is in office, without the slightest disturbance. All the ministers are acting with energy. Orders have been issued for the formation of colossal armies.

The Senate is suppressed. The Corps Legislatif is dissolved.

The provisional government is in permanent session in the Hotel de Ville, under the presidency of General Trochu.

Berlin, Sept. 5.—Congratulatory telegrams from all parts of the world continue to pour in. Nearly all protest against foreign interference with German adjustment of peace.

It is reported that Marshal McMahon is dead.

Paris, Sept. 5.—Early this afternoon the crowds disarmed and broke the swords of the police who

did not respond to the shouts "Vive la Republique."

The boulevards are almost impassable on account of the crowds. The National Guards are keeping order.

Brussels, Sept. 5.—The State of Liege has been selected as the Emperor's place of detention.

Several of the Empress' maids of honor arrived here.

Paris, Sept. 5, 6:30 P. M.—The crowds continue to tear down the signs containing imperial arms and medals. The highest stories were climbed to tear the word "Imperial" from the police are no longer seen on the streets.

Paris, Sept. 7.—The Gaulois says the representatives of all foreign powers received instructions from their governments, even before the receipt of the circular of Jules Favre, which was handed them last night, to ratify what they considered great measures necessary to the equilibrium of Europe and the integrity of French territory.

As the Corps Diplomatic leave Paris in case of a siege, the government will place representatives in towns they select as residences.

Paris, Sept. 7.—Immense defense preparations continue.

The French army is retiring before the Prussian advance, which has reached Soissons.

Trains arrive hourly from the front with artillery, cavalry and infantry.

The rolling stock of the Eastern roads is concentrated here and sent west and south.

There seems but one sentiment among the people—defense of the nation.

Organization is quietly proceeding, and there is no dissent from this necessity of the Republic anywhere.

There is great rejoicing at the removal of the press censorship. War news and details are now published without hindrance.

London, Sept. 7.—The journey of the Imperial Prince was strictly private, his governor prohibiting conversation on account of his health.

Duc de Gramont is here. He escaped via Havre. He converses freely, and says the revolutionary government cannot last. All recent tests, he said, proves its members have not the confidence of the people. The men now in power are those whose efforts have heretofore been directed to embarrass the real government, and thus assure the failure of the war.

The Republican agents were constantly endeavoring to shake confidence and destroy the discipline of the army, and attributes the loss of several battles to this cause. He does not see how foreign governments can recognize the Republic, when to-morrow another batch might get up and declare themselves a provisional government and involve Paris in bloodshed. He considers such a result more than probable if arms are placed in the hands of the lower classes. The first new reverse on the approach of the Prussians before the city might be the signal for the overthrow of the present self-constituted ministry and the creation of another.

Gramont confides in Trochu, but apprehends he will not be permitted to have his own way; he believes that France is fully able to vindicate her honor, and expel the Prussians from her territory. He declines to express an opinion as to the future fate of the Emperor or the dynasty. Gramont had a long interview with Gladstone and Granville.

The instructions to Lord Lyons, English minister, etc., at Paris, are to the effect that he is to recognize the actual authorities, but to avoid, as far as possible, a formal recognition.

The English government, in connection with other neutral powers, are about appealing to Prussia to conclude a treaty of peace on the following basis: French territory shall be inviolate, but France shall pay Germany the expenses of the war. A general disarmament of France and the destruction of the forts in Alsace and Lorraine.

It is believed these terms will be acceptable to the Republic.

New York, Sept. 8.—The United States have recognized the French Republic.

Rumors prevail of an armistice between the belligerents.

It is also rumored that England has dispatched Lord Lyons on a special embassy of mediation to Berlin.

An engagement has occurred before Strasburg, in which the French were victorious. Particulars not yet received.

Washington, Sept. 8.—Under instructions from this government, Minister Washburne yesterday recognized the new government in France, and tendered the President's congratulations on the establishment of a republic.

Paris, Sept. 8.—Jules Favre was much moved when Minister Washburne announced the recognition of the new government of France by the American government. Grasping Washburne's hand, he exclaimed: "I receive the notification with gratitude and profound emotion."

It is reported that Louis Blanc goes to London, Ledru Rollin to Washington, and Dufaure to Vienna, as French ambassadors.

Brussels, Sept. 8.—Count Palikao is at Namur.

London, Sept. 8.—It is rumored that France has made peace propositions to Prussia.

Leading bankers here regard the political outbreak in France as unfavorable. No change has been made in the bank rate, but money is rather active.

The Rev. Thomas F. Brown, of the North Alabama Conference, and preacher in charge of Madison circuit, met with a frightful accident on Tuesday last, on the Memphis and Charleston railroad. He was a passenger on the mail train, and was on his way to this city, for the purpose of attending the annual meeting of the stockholders of that road. The train was very much crowded, and to make room for ladies Bro. Brown gave up his seat, though he was suffering very much with sick headache. Leaving the ladies' car, he found the other cars, and even the platform, crowded with passengers, and everywhere he encountered tobacco smoke, to the effects of which he is very sensitive. So he became quite ill, and was seized with a fit of vomiting. To get away from the throng and the tobacco smoke he mounted to the top of the ladies' car, but was very careful in noticing that his seat on top was not sufficiently high to endanger life or limb. He is quite certain that in this respect his position was perfectly safe. But just as the train was crossing the bridge over Wolf river, near Moscow, his illness became most violent, and in a spasm of great pain he rolled off the car, and fell upon the timbers of the bridge, his right arm being caught and crushed under one of the car wheels, and his head and body also sustaining very serious injuries. Immediately the train was stopped, and Brother Brown was lifted into one of the cars and made as comfortable as could be under the circumstances. Upon reaching the city he was conveyed to the Whitmore House, and as soon as possible Dr. J. H. Erskin, one of our best physicians, was in attendance, and amputated the right arm of the sufferer below the elbow, and likewise cared for his other wounds and bruises, the extent of which we cannot state with precision.—*Western Methodist*.

A NEW CONFERENCE OF COLORED METHODISTS.—Bishop Doggett, of the Methodist Episcopal Church South, has issued a call for a meeting of all colored Methodist preachers, licensed or ordained, favorable to the formation of a Colored Virginia Conference, at Farmville, on Friday, September 20. It is the Bishop's purpose, if practicable, to organize such an annual conference in connection with the Methodist Episcopal Church South, and if deemed proper delegates will be elected, at the time named above, to the Colored General Conference to be held at Jackson, Tennessee, in the month of December next.—*Baltimore Episcopal Methodist*.

PREACHERS ARRIVED.—Rev. William Moore and Rev. George E. Butler, with their families, transferred from the Little Rock Conference, passed through the city last week en route for Los Angeles. Bro. Moore is a preacher of age and experience; Brother Butler, his son-in-law, is a man of education, and several years' experience in the ministry; both will be substantial acquisitions to the Los Angeles Conference. We are tempted to covet that they should remain with us of the Pacific Conference. Wherever their lot may be cast, we bespeak for them a California welcome.—*San Francisco Spectator*.

DETROIT has a boat club of young ladies, who go out rowing twice a week, and are put through a regular course of training.

MALTESE cats in Indiana are trained to fight black snakes, and like it.

The Christian Advocate.

SATURDAY, SEPTEMBER 10, 1870.

THE DAY IS DONE.

BY H. W. LONGFELLOW.

The day is done, and the darkness
Falls from the wings of night,
As a feather is wafted downward
From an eagle in his flight.

I see the lights of the village
Gleam through the rain and the mist,
And a feeling of sadness comes o'er me,
That my soul cannot resist—

A feeling of sadness and longing,
That is not akin to pain,
And resembles sorrow only,
As the mist resembles the rain.

Come read to me some poem,
Some simple and heartfelt lay,
That shall soothe this restless feeling,
And banish the thoughts of day.

Not from the grand old masters,
Not from the bard sublime,
Whose distant footsteps echo
Through the corridors of time.

For like strains of martial music
Their mighty thoughts suggest
Life's endless toils and endeavors—
And to-night I long for rest.

Read from some humbler poet,
Whose songs gush from his heart,
As showers from the clouds of summer,
Or tears from the eyelids start.

Who through long days of labor,
And nights devoid of ease,
Still heard on his soul the music
Of wonderful melodies.

Such songs have power to quiet
The restless pulse of care,
And come like the benediction,
That follows after prayer.

Then read from the treasure volume,
The poem of thy choice,
And lend to the rhyme of the poet
The beauty of thy voice.

And the night shall be filled with music,
And the cares that infest the day
Shall fold their tents like the Arabs,
And as silently steal away.

SUNDAY SCHOOL INSTITUTE,
MONTGOMERY DIST., ALA. CONFERENCE.

Mr. Editor: This institution was organized some two years since, and held its first session in Opelika, Alabama, July 22 and 23, 1868.

It is the offspring of the Montgomery District Meeting, the preliminary steps for organizing the institute having been taken at the District Conference of the previous year by appointing a committee to arrange a programme and call the meeting. Well was the idea conceived and nobly carried out; and I propose, Mr. Editor, to give you some account of this institute—its object, its workings, its results—and I may be permitted to speak freely in just praise of the organizers of this scheme, as I am not a member of that district, but have had the pleasure of attending two of its meetings.

The institute was organized for the benefit of the Sunday school workers in the district—to awaken in them a deeper interest in the Sabbath school cause, to impress them with clearer views of their responsibility in the great matter of bringing the children to Christ, and to develop the best means of securing these results. It is very different from a celebration or a mere gala day. True, it is a very pleasant occasion and a delightful time to those who love the cause of Christ; but its object is to render more effective the workers and workings of the Sabbath school cause.

Its exercises are all arranged for before the institute convenes. A programme of exercises is prepared, embracing those subjects which are thought to be of vital interest, and persons selected to open the discussion of each of these subjects. These persons are notified, some weeks beforehand, of the subjects they are to discuss, that they may have them specially and prayerfully under consideration, and be prepared to bring out their prominent points, and make such suggestions as may be deemed important. After this the subject is open for free discussion by all the members of the institute. Then inquiry is made for experience, observation and facts, as developed in the actual workings of the various Sunday schools throughout the district. Some of the subjects discussed at the last meeting were: "The object and design of Sunday schools," "Uniform lesson system," "How to teach," "Sunday schools in relation to temperance," "Parental obligation as respects the Sunday school," "Sunday school music and how to utilize it," "How

to attain spiritual results." You may readily perceive the aim was the practical, and could you have been present and heard the discussions you would have been convinced that the members of that institute were not seeking vain glory, but how they might best work in the vineyard of the Lord.

Who can estimate the ultimate results of such an institution? Yet some of its immediate results have already been seen and felt. This was the first institute, convention or anything of the kind, that I know of, held in the South. But now they are being held in every direction, and many of them on the same plan of the Montgomery District Institute. Thus an enterprise has been started which, I trust, will find advocates in every State, until all our Sunday school labor shall be wisely directed. Every one who attends these meetings cannot fail to be benefited. His mind will receive enlightenment and his heart be impressed. He will go away with more religion, and with more fixed determination to labor earnestly in the Sabbath school cause. Many argue the inefficiency of such organizations from the fact that those who most need the benefits of these institutions rarely attend them, and consequently are not benefited. This is too true, sadly true. It is greatly to be lamented that any one connected with the Sabbath school should fail to attend them, or at least that any Sabbath school in the district should not be represented. But even then they are not entirely useless. These zealous, earnest workers who do attend need to have their zeal renewed. If they stay at home, surrounded by their cold, lukewarm fellow-laborers, they are likely to have their zeal and energy dampened, and their enterprising spirit weakened. But when they come up to these meetings they are renewed in zeal, quickened in energy, enlarged in views, and often baptized with the Holy Ghost, and return home to reflect secondarily these blessed influences on those who have not life enough to attend these precious gatherings.

I would that every district in the Conference had such an organization, and that the State at large could be represented in some general meeting.

A committee has been appointed to confer with the various district meetings of the Alabama Conference in reference to the organization of a Conference institute, to be held some time during the next year, and we hope, when the subject is brought before them, that they will give it their careful attention.

Wide Prevalence of the Great Falsehood.

Mr. Editor: I was next to show the wide prevalence in the popular mind of the great Romish falsehood. This I have elsewhere characterized as the tap-root of Romanism. Its uncontradicted prevalence among Protestants is alarming. It is as alarming that it is, as strange that it should be so. It is strange, though not unaccountable, that the polemics of the Reformation did not bring this point directly forward, and deny at the threshold that the Saviour or his apostles ever organized or formed a church at all, either this way or that way, with these provisions, or with those or any others. Waiving these reasons, we will merely look at the fact that it was so.

Rome argued that as the church was formed so and so, or as Christ or an apostle said so and so, at the origin, or the primitive church said or did not say so and so, that such and such results follow. And again, in the other direction, a posteriori, as the logicians would say, it was argued that the church authority was derived. We reach back to the source of authority for our authority. No, the Protestants replied, these results, these things we object to, do not necessarily follow; they are surreptitiously brought in, and we prove it by the Scriptures; we go by the Scriptures; the Bible is the religion of Christians. We appeal to the Bible, the Bible, the Bible. And never was a great multifarious question argued more ably

or more successfully. But the point lying snugly and quietly back of all this, that the church originated in that way at all, was, unfortunately, not brought prominently forward.

And to this day Protestants talk of "the church as Christ organized it," "the first church," "the new church," "the church as it stood in its embryo, in the college of apostles," "Jesus Christ organized his church," "the church in its original form in Jerusalem," "the primitive church," and the same idea in direct terms, in oblique terms, and by allusion in a thousand forms of language without a hyperbole.

A congregation is not now shocked when the preacher speaks of "the Christian church, in the very first days of its existence, as it came fresh from its divine Founder," or a reader to read, "Jesus organized his church entirely anew."

It is no reply to say that this same preacher or writer understands that the Christian church is but the continuation of the church before existing. That, as far as it is true, is nothing. The doctrine they inculcate—the belief of the masses, yea, and of many of the scholars—is as I state it. It is well known.

R. ABBEY.

NEWS FROM THE CHURCHES.

HOMER CIRCUIT.

Mr. Editor: The Lord has done great things for us on the Homer circuit, whereof we are glad. We have recently concluded two meetings, at which there were twenty-seven accessions to the church, and about as many conversions. The church, too, has been greatly revived.

Valuable assistance was rendered at one of the meetings by Brothers Gino, Aiken and Clemens, local; at the other by Brother Cravens, of the Conference, and Brothers Williams and Jordan, local; also by Brother Harris, of the Baptist, and Brother Davidson, of the Presbyterian Church. Many thanks to these brethren. To God be the praise! Your brother,

THOS. J. UPTON.

AUGUST 24, 1870.

GADSDEN, ALABAMA.

Mr. Editor: We have had a meeting in progress at this place for three weeks. The church has been spiritually benefited. Several professions and additions to the church. Brother Spangler, our Sunday school agent, spent ten days with me during the meeting, and preached every night with acceptability and power. He also assisted me to raise by subscription \$1,250 for the completion of our new church. I am now trying to increase the subscription to \$1,800, which is the requisite amount to finish it up in good style. Many thanks to Dr. Spangler for the efficient aid he rendered us, thus and otherwise, while he was with us. As a Sabbath school agent he is the right man in the right place. We gave to his enterprise as liberally as we felt able in view of the unfinished condition of our church. We wish we could have done more than we did.

I hear of some good revivals in the bounds of the Gadsden district. Brother Slaughter, our presiding elder, is a good worker.

The crops in this portion of the State are very good.

Mr. Editor, may we hope to see you in attendance upon the session of the North Alabama Conference on the sixteenth of November? Do come up and see this fine country, and let us see you.

Yours in Christ,

R. A. TIMMONS, Pastor,
Gadsden Station, Ala.

AUGUST 31, 1870.

COPENHAGEN, LOUISIANA.

Mr. Editor: We are in the midst of a glorious revival at this place. On the twentieth instant we commenced a protracted meeting at Copenhagen, Columbia circuit. The services were conducted by my son, Rev. R. A. Davis, of the Mississippi Conference, he being on a visit to this place. I am just recovering from an attack of fever, and have not been able to assist much in the exercises; therefore, so far as ministerial help is concerned, the labor of the meeting has fallen almost ex-

clusively on him. But the best of all is that the Lord was with us in convicting, converting and sanctifying power. The entire community, indeed I may say the entire circuit, is under revival influence.

Up to last night there have been forty-five conversions and thirty-four accessions to the church. To God be all the glory! If my health is sufficient to push on the work, I think we will have glorious times this fall on Columbia circuit. I am in the hands of my blessed Master. Whatever strength he gives me I will use in his cause.

The good people are comforting our bodies by sending abundant supplies to the parsonage for the table.

May the glorious work go on till not only every sinner on Columbia circuit is converted, but until the Conference shall be ablaze with the love of God.

J. S. DAVIS, P. C.

AUGUST 30, 1870.

KOSCIUSKO, MISSISSIPPI.

Mr. Editor: In the last two or three numbers of the Advocate we see accounts of glorious revivals, which rejoice us much.

I too, with your permission, will speak of things which the Lord is doing for us in this part of his vineyard. The holy fire began to burn in this district at our District Conference, held at Starkville. I hear that it is spreading throughout the district. Having remained with Brother K. A. Jones a few days, we caught the flame, and brought it over to the Kosciusko circuit. We arrived at Kosciusko late on Saturday evening, and opened the battle the next day at eleven o'clock, from First Timothy, i, 15. The Spirit accompanied the word. God was with us, and "the signs of times" were good. Up to Tuesday at eleven o'clock there was not a penitent, though seriousness prevailed—the whole congregation. Brother C. B. Galloway—the boy preacher, as he is styled—at that hour took his seat among us. Kosciusko is his native place. He left here when a school boy. He returned still a boy, but now a profound expounder of the word of God. His presence was an electric shock, and from that moment the battle began to rage furiously. "Iron sharpeneth iron: so a man sharpeneth the countenance of his friend." It proved so in this case. He was made the instrument in leading many of his former associates to the cross.

The meeting lasted nearly two weeks without abatement. Twenty-six persons were added to the church, and as many found peace with God. The church, which had but little above a name, is now alive. We adjourned on Friday morning with a young people's prayer meeting, to meet the next day at Spring Ridge. There we found all things ready, and with flying colors entered the field. At the end of the third day we had ten recruits and fifteen conversions, when we were reinforced by Brother R. J. Jones, Jr., who did us good service. He is certainly a gospel preacher. The conflict lasted a week, and closed by leaving us twenty recruits and twenty-three converts, and five infants and six adults baptized. All the glory be to God!

Your brother,

P. A. JOHNSTON.

KOSCIUSKO, MISS., SEPT. 2, 1870.

SUNDAY SCHOOLS.—The number of Sunday school scholars in this country in 1828 was estimated to be 350,000. In 1834, 1,000,000. In 1869 Mr. Abbott puts the number at 4,000,000, with 400,000 teachers. A writer in the Chicago Teacher thinks that there are now 6,000,000 scholars and 1,000,000 teachers. This last estimate is probably too high, but statistics are so imperfect that it is impossible to get at the exact truth.

SELF-RIGHTEOUSNESS.—As Doctor Dwight once passed through a region of very poor land he said to a farmer: "Sir, I perceive your land here is not very productive." "No, sir," said the honest farmer, "our land is just like self-righteousness." "Ah, how is that?" "Why, the more a man has of it the poorer he is."

The New York Tribune says: "Children are no longer brought up—they are tumbled up; it's done by machinery."

BIOGRAPHICAL.

REV. ISAAC EASTERLY.

Rev. Isaac Easterly was born in Locke county, East Tennessee, October 20, 1800; dedicated to God in baptism by Rev. James Miller, (Lutheran), August 19, 1817; embraced religion and joined the Methodist Episcopal Church October 7, 1823; was licensed to preach and admitted into the Holston Conference the same year, and placed on the Newperr circuit the remainder of that year.

He left his father's house December 23, 1823, and traveled the Tennessee Valley circuit during 1824; in 1825 the Black Mountain circuit, in North Carolina; ordained deacon the same year. That year was one of the brightest of his life for the conversion of souls and increase of the church. In 1826 he served the Washington mission to the Cherokee Indians; in 1827 the Sequelaha circuit, at the close of which year he was ordained elder; was married to Miss Nancy M. Jones, daughter of Thomas and Elizabeth Jones, November 22; in 1828 traveled the same circuit, at the close of which year he was ordained. He settled in Marion county, Tennessee, where he remained a useful local preacher until 1836, when he removed to Mississippi and settled in a village called Nashville. Thence removed, in 1840, to Octibahaw, where he principally raised his large and respectable family of children, all daughters but one. In 1845 was employed and took charge of Greensborough circuit, at the close of which year he was readmitted into the itinerancy in the Mississippi Conference; in 1846 traveled the same circuit. His labors on this circuit were greatly blessed of God—a very large accession. There were hundreds baptized by households—children and adults. It also resulted in the bringing out of some efficient young men into the ministry—among them the Revs. Allen and Thomas Castle. In 1847 and 1848 he traveled the Louisville circuit.

These were two successful, happy years. Conversions were many; a great many baptized, adults and infants; the accession to church fellowship was about five hundred. In 1849 he traveled the Starkville circuit. For want of support by the church he was compelled to locate, but was a useful, working, acceptable local preacher, and a great defender of our doctrines. In 1858 his wife died, in the full assurance of a blissful immortality. In the fall of the same year he removed to Livingston parish, Louisiana. In 1859 he was married to Mrs. Sallie Jane Smith. In 1865 he was employed and commenced to travel the Livingston mission, but his health failed and he was compelled to give up the work. His health steadily declined. That iron frame and wonderful constitution were so far gone as to leave no hope of much more ability to labor. He was greatly deprived of church privileges. The writer never passed anywhere near but what he made it convenient to ride out of the way to see this lonely pilgrim. I was with him shortly prior to our last Conference; left him happy and cheerful, rejoicing in great hopes that the Bishop would send a preacher to that place—unsupplied for some years; but in a few short days he was attacked with brain fever, was devoid of reason for a week, and fell asleep on the nineteenth of December, 1869. But he was ready, for he had fought the good fight of faith.

The voice at midnight came,
He started up to hear;
A mortal arrow pierced his frame;
He fell, but felt no fear.

J. NICHOLSON.

Nashville Advocate please copy.

REV. JAMES KING.

Rev. James King departed this life, at his residence in Wilcox county, Alabama, January 13, 1870, aged eighty-seven years.

He was born in North Carolina, December 10, 1782; joined the Methodist Church in 1800; was licensed to exhort in 1805, licensed as a local preacher in 1808, and in 1806 was ordained deacon in Wilmington, North Carolina, by Bishop

McKendree—the first ordination ever performed in that city.

His labors in North Carolina, for many years, were extensive, and crowned with the best results. He moved to Alabama in 1819, settled near Philadelphia (now Montgomery), and was the first licensed preacher who ever preached in that place. In 1820 he moved to Conecuh county, Alabama, and in 1822 was ordained elder by Bp. George. Losing his wife in 1830, and his family being then all married, he for the remaining forty years of his life devoted his Sabbaths exclusively to the ministry, preaching not only in Alabama, but in Tennessee, Florida, Mississippi, North and South Carolina, and was the instrument, under God, of great and permanent good. In many respects he was an extraordinary man. After laboring during the week to support a large family of daughters, he would in many instances walk to his appointment on Sunday. It was wonderful how so feeble a man could stand such work for the long term of sixty-five years. But his zeal abated not; his commitment was decisive, his convictions of duty were strong.

His unction in the pulpit was often overwhelming. He abounded in labor—it was his meat and drink. Though he preached over twelve thousand sermons, and performed all other normal and useful ministerial labors in a degree equal as abundant, yet, being only a local preacher, he received but \$200 in the way of pecuniary compensation for this long life's labor.

We would especially solicit the attention of his numerous friends and spiritual children to this poor tribute. Forget him not. Let his name and labors long have a place in your memories. To you such a man was a gracious dispensation from heaven. Do you not recall his form bending beneath the accumulation of years, and hear him in imagination reasoning of righteousness, truth and judgment to come? Can you not almost recall the tones of his voice as it once fell in melting pathos, as it thrilled you with necessary warning or encouraged you with hope? Will you ever forget the spotless demonstration of pure spiritual Christianity which his life and pure life afforded you? He needs no monument to perpetuate his name among you—he has received one in your hearts more imperishable than brass or marble. The native powers of his intellect were superior, though his culture was limited. But his quick perception, close observation, a long and rich experience, association with the most cultivated and refined society contributed in a large degree to compensate for the want of early facilities. He was firm and unwavering in his adherence to right, brave and self-sacrificing in the discharge of duty. Benevolent, gentle, amiable in his disposition, possessing a large fund of material for the social circle, perfect freedom from austerity—all commended to the hearts and affections of the people. Many of his acquaintances felt that in his death they lost theirs were fearfully increased.

He died as he had lived. His testimony at the gates of death cheering. When death came "His sword was in his hand,
Still warm with recent fight,
Ready, the moment of command,
Through rock and steel to smite!"

He wore out in his Master's cause. Physicians ascribe no disease as the cause of his death.

"Soldier of Christ, well done!
Praise be thy new employ;
And while eternal ages run,
Rest in thy Saviour's joy!"

JAMES K. ARMISTEAD.
North Carolina, Nashville and Macon counties please copy.

When Henry the Great of France was advised to proceed with his army against some disaffected towns which had fallen into his hands, he replied: "The gratification which may be derived from revenge is momentary, while the pleasure of forgiveness is everlasting."

When a lawyer dies and leaves few effects, it is quite fair to presume that he has had few cases.

No cloud can overshadow a Christian but the eye of his faith will discern a rainbow in it.

The Christian Advocate.

SATURDAY, SEPTEMBER 10, 1870.

THE TUBEROSE.

Underneath the garden mold,
One sunny day in spring,
A bulb, whose brown and withered cheek
Made it an alien thing
Among the early beauties there,
Already blossoming.

She creeps filled her tender cup
With slay slow, till she drew—
By stealthy shook her perfumed bells
To the strewed them all around;
Till she showed the slender spear
Was seen to pierce the ground.

From her hardened heart she raised
The sudden, burial—
A shower of dazzling gold,
Pearled showers of dazzling gold,
Silvery tides of dew beneath
The moonlight of their rolled.

She hastened not, like meager flowers,
To flaunt above her tomb;
But gathered through the golden hours
Soft treasures of perfume
At last, overcharged, her patient heart
Burst purely into bloom.

Due to the ravished air she breathed
Her odors, soft, intense—
So green and quiet nook became
As Eden to the sense—
The golden bee and butterfly
Reeled, drunk with sweetness, thence.

So she with the poet's heart
Great thoughts he hurried long;
He sees, unmoved, a sprig late host
Of scribbles charm the throng,
Till, overfowing with its sweets,
His soul bursts into song!

METEORS.

We refer to the so-called meteors or shooting stars, whose astronomical relations have been ascertained only within the last few years. It is well known that on every night more or less of these bodies can be seen, and their appearance is too familiar to require any description at our hands. But of the actual number which are visible in the course of a single night we suppose that comparatively few persons have any conception. Whatever they may be supposed to be, they are ordinarily looked upon as only occasional phenomena, while the truth is, as we shall see, that they far exceed in numbers the stars of the Milky Way. The following simple calculation will make this clear: Four persons standing together and facing in such a manner that they may take in at a single glance the entire visible hemisphere of the heavens will see in the course of an hour an average number of thirty meteors. Now it has been calculated that from a single spot only one ten-thousandth part of the entire atmosphere can be seen, so that in the course of an hour three hundred thousand meteors are visible over the whole earth, which would give, as the number visible during an entire day, seven million two hundred thousand. This is the number visible to the naked eye, but the most experienced observers are of the opinion that at least sixty times as many can be seen by the aid of a telescope. We are therefore far within the limits of probability in assuming that in every period of twenty-four hours no less than three hundred and fifty million of these bodies enter our atmosphere; we say enter our atmosphere, for it has been shown that most of them are not more than forty or fifty miles above the earth's surface at the instant of their apparition, and we know that the atmosphere extends at least that elevation. Although the number of shooting stars, which make their appearance every day, is so enormous, yet it is found that the number visible during different hours is very far from uniform, and that while comparatively few are visible at any given place before midnight, the number steadily increases from that hour until daylight. The following explanation of this feature has recently been given by the astronomer Schiaparelli. The direction of the motion of by far the larger number of meteors is what is technically termed *retrograde*—that is, contrary to the direction of the orbital motion of the earth. Now it is well known that the earth rotates on its axis in the same direction which it pursues in its motion around the sun. Consequently that portion of the earth which is turned away from the sun is moving ahead, while the other hemisphere is moving in the opposite direction. Moreover, that side which extends from the line of midnight to the line of noon is in advance, and all points on the line where the sun is just rising are the furthest to the front. It is easy to see that as any given point on the earth's surface passes from the position of midnight to sunrise, it is, so to speak, carried against the meteors which are moving in the opposite direction, and it is plain that as the morning advances the point is borne deeper and deeper into the stream of meteors, and consequently their apparent number will continue to increase up to the instant when their light becomes lost in the superior brilliancy of the solar rays.

Up to the year 1833 but little attention had been given to meteors. They were generally supposed to be atmospheric phenomena, caused by the combustion of gases, or perhaps by electricity. But the magnificent, and even terrible, display which occurred on the morning of November 13 of that year, and which was witnessed simultaneously over a large portion of the earth's surface, excited a great degree of interest, and led to the institution of a new series of investigations in regard to their nature and relations. It was soon ascertained that an extraordinary display about this period of the year was by no means of rare occurrence, and that, in fact, the numbers visible from the twelfth to the fifteenth of November, of each year, are considerably greater than at any other season. The examination of the record of the past led to the discovery that once in every thirty-three years there occurs a genuine shower of shooting stars, and that many of these showers have been equal in magnificence to the great shower of 1833. This apparent periodicity of the phenomenon led to the prediction that another return might be looked for in November, 1866. Accordingly all our astronomers were on the *qui vive*. But they were doomed to disappointment. The nights of the twelfth, thirteenth and fourteenth of November passed by, but there was no extraordinary display of meteors, and the astronomers were ready to give up in despair when the news came from England that a magnificent shower had been witnessed in that country; and thus the prediction was fulfilled. In the two following years there were likewise brilliant exhibitions which were visible in this country.

The periodicity of these displays being fully established, there remained to be constructed a scientific theory which would explain it. This involved a vast amount of numerical computation, the details of which would certainly prove very uninteresting, if not unintelligible, to the majority of readers; we shall, therefore, confine ourselves to the simple statement that the problem has been solved, remarking by the way, that for its solution science is largely indebted to the labors of Prof. H. A. Newton, of Yale College. The result is that the meteors, which we see in such numbers from the twelfth to the fifteenth of November, every year, form part of an immense *orbital ring* of matter surrounding the sun, that this ring stretches from its perihelion near the orbit of the earth to that part of the orbit along which the earth passes in November, to its aphelion beyond the orbit of Uranus, that each body in this ring moves around the sun once in thirty-three years, that the direction of the motion is retrograde, and that the meteors are, in respect to their motion at least, true planetary bodies; and, like the planets, subject to the gravitating power of the sun. The density of the ring is far from uniform, as is manifested by the unequal numbers visible from year to year. In general the density, which of course may be measured by the number of meteors visible in a given time, is not more than two or three times that of the space outside of it, while in that portion, which produces the grand star showers of the thirty-three year period, the meteors are crowded closely together. The thickness of the ring must be considerable, as is proven by the fact that the earth occupies several days in passing through it.

In regard to the physical constitution of these meteors we have no positive knowledge. But it is generally supposed that they are either minute conglomerations of vapor or small particles of solid matter, which become ignited or incandescent by friction with the particles of the atmosphere.

Besides the November meteors there are other groups which make their appearance at different seasons of the year. One of the most familiar of these is the August group, so called from the fact that it makes its appearance annually about the tenth of that month. This group also constitutes an elliptic ring, having the sun in one of its foci; its thickness has been calculated to be at least eight millions of miles, while its periodic time is probably more than one hundred years. Like the November ring, its motion about the sun is retrograde.

Closely allied to the shooting stars are the meteoric stones and fireballs, the former of which reach, and sometimes penetrate, the earth, while the latter explode in the air, often with a noise exceeding that of thunder. The meteoric stones were formerly supposed to be masses which had been ejected from lunar volcanoes, but this opinion has long since been abandoned by scientific men, and careful investigation has made it almost certain that they are planetary bodies, and that they move around the sun in orbits closely related to, if not identical with those of their more minute brethren, the shooting stars. A brief account of some of the most remarkable of these bodies would perhaps not be

uninteresting, but as we are at present limited to the consideration of their astronomical relations, we are forced to omit any description of them. Chemical analysis discloses the fact that their metallic constituents do not differ from those with which we are familiar upon the earth itself, but the elements of which they are composed are combined with each other so peculiarly that an expert mineralogist is almost sure to detect at a single glance their extra-terrestrial origin. Many of them have been found saturated with hydrogen gas, an element which several of our metals are known to possess the power of absorbing, and it is reasonable to infer that somewhere, in their progress through space, these stones have passed through an immense stratum of this gas, which has been absorbed by them and brought down with them to the earth, as if to indicate to us something in regard to the chemical composition of those vaporous masses which, with the eye of the telescope, we see floating about in the far-off regions of space.

Of those fireballs which explode in the upper portions of our atmosphere, and are entirely dissipated by such explosion, nothing is known beyond the fact of their existence; but it has very often happened that after an explosion fragments have descended to the earth in large numbers, and have been collected.

These fragments, upon inspection, are not found to differ from the meteoric stones which reach the earth without previous disruption. It is supposed that the bodies of which they were the constituents have entered the atmosphere with an enormous velocity, and that by friction they have become so intensely heated as to be shattered into fragments by the expansive power of heat, and the sudden elimination of the gases which they had previously absorbed.—*Southern Review.*

OUACHITA DIST. CONFERENCE.

Ma. Editor: The Ouachita District Conference of the Methodist Episcopal Church South convened at Minden, on Wednesday, August 17, and adjourned on the following Saturday. The session was harmonious, and we trust profitable. The preaching, too, was earnest and powerful, as a score of penitents can attest.

The usual business was transacted in the ordinary manner. The claims of the *Advocate* were represented with a "viii" by Brother Evans, chairman of the Committee on Religious Literature. His report, which was unanimously adopted, recommended continued effort in behalf of the *Advocate* until a copy of said paper is placed in the hands of every Methodist in our bounds.

The Committee on the Spiritual Condition of the Church reported favorably—several extensive revivals in the bounds of the district.

The Committee on Sabbath Schools reported a considerable increase in the number of schools and pupils; also in the general interest manifested by the church in behalf of this great auxiliary.

The other subjects were ably represented by their respective committees, and reported upon through their chairmen, whose reports I have not time to write, nor have you room to publish.

The following are the lay delegates elect to the next Annual Conference: Rev. N. M. Skipworth, Rev. John L. Williams, S. C. Standifer and B. B. Guthrie.

The next session is to be held at Trenton, beginning on Wednesday before the third Sabbath in August next.

After the usual complimentary resolutions the conference adjourned with the benediction.

Thos. J. Upton, Sec'y.

P. S.—The meeting is being continued by Brother Cravens, assisted by Brothers Miller, Kimball, Alexander and Medlock, and promises great results.

T. J. U.

TOADS IN THE GARDEN.—A correspondent of the Entomologist, who keeps a large number of toads in his garden for the purpose of destroying insects, says that when first a toad is brought into a garden and set at liberty he will usually strike for some other parts the first night, but a few days pending up seems to attach him to the locality. He may be settled for the season in almost any particular locality by simply penning him up in a temporary inclosure for a few days, and then removing the inclosure without disturbing him.

RELIGIOUS INTELLIGENCE.

The annual report of the American Baptist Missionary Union states the encouraging facts that during the past year six hundred and twenty-eight baptisms are recorded among the Telegos of Southern India, sixty-six among the Garos of the Brahmaputra valley, six hundred and twenty-nine among the Karens of Burmah, ninety-seven among the hard-hearted Burmans themselves, and eighty-one among the Chinamen. Rev. D. L. Brayton, the veteran missionary, who has spent the life of a generation among the Karens, has returned to this country, and says the King of Burmah takes great interest in the establishment of Christian churches—that the great want is missionaries to preach to the churches which the King is willing to build and support.

A great change seems to be coming over Constantinople in the matter of female education, thanks to the efforts of Munif Effendi, who is endeavoring to establish a normal school for the benefit of female teachers. This will doubtless prove an important step toward the deliverance of Turkish women, and the elevation of Turkish domestic life, now so barbarously tyrannical. The idea that women must receive some education has been gaining ground for the last few years, and the example of the successor to the throne will aid its growth. He has just placed one of the ladies of his household in the family of a European physician for mental training, and she has even adopted the European costume.

The South African Missions, within the colonies of the Cape and Natal, and the Dutch Republics, employ sixty-nine missionaries, and report eleven thousand five hundred and twenty-four members, with six thousand one hundred and thirty-four day school children. These missions are so mixed up with the mission of the colonial natives, and with the mission in Kaffirland, the Bechuana country, and Natal, that their statistics cannot be separated. Few missions have been, on the whole, more satisfactory. More than one generation of patient toil has been rewarded by an extraordinary measure of success. The great revival of the last two years has resulted in extensive and permanent good. A native ministry has been raised up, and a native literature is in course of formation.—*Western.*

The wanton massacre of French missionaries by a mob in Tien-Tsin, China, will awaken the indignant feeling of the Christian world. Twenty persons, among them M. Fontanier, the French consul, and his secretary, a French priest, a Russian officer and his wife, and a company of Catholic Sisters of Mercy were put to death—the women with every conceivable circumstance of barbarity. The Chinese Governor of Tien-Tsin was in evident sympathy with the mob, and refused the suffering Christians the protection which they sought at his hands. Fortunately an American merchant ship lay at the quay, and, having a supply of guns, became a refuge for the foreign colony; otherwise all the foreigners in Tien-Tsin would have been murdered. The treaty powers must insist upon the fulfillment of treaty obligations by the empire and the summary punishment of all the participants in this horrible outrage.

RETIREMENT OF DR. WADSWORTH.—The venerable Dr. Wadsworth, one of the prominent members of the British Wesleyan Conference, has just been granted a superannuated relation. He presented his request with much emotion. "He felt an ardent attachment to the Conference, an attachment which had continued for many years, and which commenced much sooner than his ministerial career, for he had loved the Methodist Conference ever since he had been accustomed to hear godly conversation about it in his father's house. [Hear, hear.] He had been engaged in that ministry now for forty-five years. They would not wish an old man to state the ailments and defects which made it needful for him to ask that favor. He begged to say that his doing so was the result of prayerful consideration."

After several had spoken of the great services which Dr. Wadsworth had rendered the church, the resolution placing his name on the retired list was unanimously adopted.

A MEMORIAL TO THE WESLEYS.—The London Watchman reports Rev. Dr. Johnson, ex-president of the British Wesleyan Methodist Conference, as saying to that body during the late session that, having received many favors, he had to solicit a favor from the Conference, which was that he and his friends might be allowed to place in Westminster Abbey, the *mausoleum of the nation*, a monumental memorial for John and Charles Wesley. He would not dwell upon it, but he knew from the highest authority of that venerable pile, who had made it appear what it is, the historic key of England, that a reception of the monument, if pro-

vided, would be generously, and in the religious world. War responds to it as a terrible echo in the social system. War is a scourge of God; but in bringing the chastisement, may it not therefore prepare the remedy? In removing the ancient edifice, may it not clear the ground on which the divine Sponse of the church will constrict the New Jerusalem?

THE McMAHON AND MONROE FAMILIES.
BY REV. ANDREW MONROE.

Ma. Editor: I remember that Rev. William McMahon published some months ago that all his valuable papers had been lost, and now that he is dead it occurs to me that his biographer might be at a loss about his early history; and as I suppose I know more about it, personally, than any other living man of the Church South, I feel it to be a duty as well as a pleasure to give a sketch of his early life. I beg pardon for bringing my own family into notice in this narrative. Both families were from Hampshire county, Virginia. The McMahon family lived on the eastern border of the county, among the pine hills, as it was called. We lived at the western border, and on Nelsly mountain. This locality was mountainous, and the surroundings quite romantic, but an excellent limestone soil, by industry, enabled us to make a comfortable living. In regard to soil we had the advantage of the McMahon family. Each family was large, and our mothers were widows before the children had all reached maturity. They were both pious, sensible women, and gave wholesome example and counsel to their children; and, notwithstanding some of them ran counter for a time, all or nearly all of both families became pious members of the Methodist Church. From those two families the church had nine preachers, of whom the writer of this is the junior and most unworthy. Six were traveling and three were local preachers. Five of them were McMahons—three traveling and two local preachers. All are dead, William being the last survivor. Of the Monroes one was local and three traveling preachers. The three traveling preachers are still in the land of the living. William, of East Baltimore Conference, is eighty-six years old, and has been sixty years a minister; Joshua, of the Pittsburgh Conference, is eighty-four years old, and has been sixty-two years a preacher; Andrew is in his seventy-eighth year, and fifty-five years a member of the Conference.

About the year 1806 or 1807 the McMahon family removed, except William. He was a saddler by trade, and remained in that occupation. Being fond of company and sporting, he laid up nothing. My brother William was also pretty wild, and they were often associates, especially in the race course, which was a very popular vice at that time. Not long after this James Ward came on the district. Under his zealous labors a great revival broke out and soon pervaded the whole country. Hundreds were powerfully converted. It was a wonderful work. All classes were embraced. Brother William was one, and not long after William McMahon. Elder Ward held a camp meeting, and at one of these I first noticed William McMahon's religious exercise. He was active and zealous in the altar work. I remember his powerful prayers, and there was talk of his becoming a preacher. I think he continued at his business in the little town of Springfield till the following spring, when he resolved to go to the West. I suppose when he settled up his business he had very little left—not enough to furnish himself for the journey. But he was going, and if he could not ride he could walk. So, having made himself a handsome knapsack and all things ready, he set out on foot to seek his fortune in the new country. Our house being on his route, on Saturday evening before Easter a young gentleman, genteelly dressed, and of quick step (for he was always a quick man, or, as we say now, he was always a live man,) approached, sack on his back and cane in hand. Who should it be but Brother William McMahon. He had come to rest with us over the Sabbath. All were glad to see him. A heavy snow fell that night, put the road in a bad condition, and he tarried several days. When the roads had dried a little he bid us adieu. The next I remember to have heard of him—perhaps two years or more afterward—he had joined the Western Conference. He was, from his youth, possessed of decision, a strong will, energy and activity, get up and be off. He was possessed largely of humor, wit and fun, and if not curbed by the sanctifying influence of religion, it would have been excessive. I see by the minutes his first appointment was Silver Creek, Indiana; then Kingston, then Jefferson, then Fountain Head, where I followed him. But I must stop this long communication.—*St. Louis Christian Advocate.*

The table of missions in Europe and Africa furnish the following summary: 1,571 stations and out-stations, 311 churches, 382 preachers and coadjutors, and 3,096 baptisms, with a total membership of 26,964. Combining the statistics of the missions in Asia, Europe and Africa, we have an aggregate of 1,919 stations and out-stations, 630 churches, 957 laborers of all classes, 4,609 baptisms, with 46,964 members—showing a gain over the previous year, as reported, of 169 stations and out-stations, 12 churches, 110 laborers, 1,059 baptisms, and 1,315 members.

ROMAN CATHOLIC.—The most remarkable protest which has thus far been uttered against the doctrine of papal infallibility comes from Father Hyacinthe. It is as follows:

"At such a moment as the present every Christian has the right to raise his voice in defense of his faith and that of all. For myself, I feel an interior pressure to accomplish that duty, and, as the prophet says, to deliver my soul: 'Te autem animam tuam libera.' I protest, therefore, against the pretended dogma of the infallibility of the Pope, such as it is formulated in the decree of the Council of Rome. The reason is that I am a Catholic, and that I refuse to admit, as imposing on the creed of the faithful, a doctrine unknown to all ecclesiastical antiquity, disputed even to-day by numerous and eminent theologians, and which implies not a regular development, but a radical change in the constitution of the church and in the immutable rule of its faith. Because I am a Christian and wish to remain so, I protest with all my soul against these almost divine honors awarded to a man who is presented to our faith—I was about to say our worship—as uniting in his person both the domination which is repugnant to the spirit of the gospel of which he is the minister, and infallibility, incompatible with the clay of which he is formed like us. One of the most illustrious predecessors of Pius the Ninth, St. Gregory the Great, rejected, as a sign of anti-Christ, the title of Universal Bishop, which was offered him. What would he have said of that infallible pontiff? On the twentieth of September last I wrote the following lines on the subject of the connotation to meet: 'If fears, which I do not share, should be realized, if the august assembly had no more liberty in its deliberations than it already has in its preparation—if, in one word, it was deprived of the essential character of an Ecumenical Council, I should cry to God and to men to demand another, veritably united in the Holy Spirit, not in the annals of parties, representing really the universal church, not the silence of some and the oppression of others.' At present I raise this exclamation: I appeal to a council really free and ecumenical. Above all, to-day, as then, I appeal to God. Men have been unfaithful to God. Men have been unfaithful to justice; let the Almighty arise and take his cause in hand and judge it. The council, which was to be a work of light and peace, has intensified the darkness and unchained discord

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conference of the M. E. Church South.

SATURDAY, SEPTEMBER 10, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.

Three Dollars per Annum, in Advance.

Address—REV. LINT PARKER, 112 Camp Street, New Orleans, La.

AGENTS—All the members of the patronizing Conference.

CONFERENCE PUBLISHING COMMITTEE.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. B. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. W. SHAFARD.
REV. J. B. COTTRELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINT PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper, can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, whenever practicable, to invest and remit funds in a POST OFFICE ORDER, DRAFT, or by EXPRESS. If this cannot be done, enclose the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

NEW ORLEANS DIST. CONFERENCE.

The New Orleans District Conference will meet at the Carondelet street church on Wednesday, October 5, 1870, at ten o'clock A. M. All the official members of the church within the district are members of the Conference. On Wednesday night it is proposed to have the administration of the Lord's Supper, and on Thursday night to hold a district love-feast.

L. PARKER, P. E.

A WORD TO BUSINESS MEN.

As the business season is about to begin, the time for advertising has arrived. The Advocate is in many respects the very best medium through which to reach a most important class of buyers. Our paper circulates extensively in the country; more particularly throughout the cotton and sugar regions of the South. We endeavor to guard our subscribers from imposition by rejecting all objectionable advertisements. Hence a card in our columns goes out with a most favorable and influential indorsement. Thousands of families in Alabama, Mississippi, Louisiana, Arkansas and east Texas receive our paper every week. Their business relations are chiefly with New Orleans, and they visit the city annually. We do not hesitate, therefore, to affirm that there is no better medium for advertising than the NEW ORLEANS CHRISTIAN ADVOCATE. Beside a choice and extensive circulation throughout the Southern States, as many as three hundred ministers of the gospel are acting as agents for the Advocate. We are confident that no other paper in the Southwest offers so many striking advantages to advertisers.

THE NASHVILLE CHRISTIAN ADVOCATE of the third instant comes out in its new dress—a fine quarto of eight pages, beautifully printed on clear white paper, and abounding in good things from the pen of the accomplished editor and numerous contributors. We congratulate the book agent and the editor. Both are doing their parts well, and the paper is worthy of the connection.

THE EUROPEAN WAR.—For latest news see first page, where the latest telegrams will be found. The reign of Napoleon is at an end, and at present a republic is proclaimed. All the democratic elements of Europe seem to be ready to burst forth in a universal conflagration. Until the Prussians reach Paris it is difficult to tell what course events are likely to take. We hope for speedy peace, but it may be that the war has but just begun.

FRAGMENTS.

Sufficiently wonderful was the miracle of the loaves, but the gathering up of the fragments was calculated more powerfully to impress the disciples. After this they could testify to the creative energy of Christ, and call this exhibition of his care for them to mind. The fragment gathering was the application of the miracle to them. Among other things the Master designed to teach them faith in himself as their provider. It was not then mere economy, but the lesson of the divine care for them, overflowing in resources, and going beyond their present needs. The reason, "that nothing be lost," is not exhausted in the material economy of the transaction. There was danger of an infinitely greater loss in forgetting the higher lesson of trust which the feeding of the multitude should impart. In fact it was forgotten, afterwards, in its import as an exhibition of the divine care, and as a type of the bread which nourishes and sustains the soul.

Like the disciples of old, we need to be reminded of our duty and privilege in gathering up the fragments of God's bounteous gifts. The ordinary and uniform operations of the laws of nature are not miraculous, but they are exhibitions of the same infinite power and wisdom directed to the benefit of man. If any difference exists in this respect it is rather in favor of those processes of ordinary germination, growth and maturity through which we trace the grain until it reaches our tables. To make a loaf in this way, by so many gradual and inexplicable modes, seems rather to draw out and amplify all the creative attributes. To suppose that the creative periods of Genesis embrace myriads of years gives a more impressive view of power and wisdom than their limitation to six natural days. The amazing prescience, the accuracy of plans and purposes stretching through so vast a period, and the exact fulfillment and execution of ends contemplated through the most distant and complicated agencies, are calculated to give the very highest conceptions of the eternal Creator. Christ compressed all the operations of husbandry, of the harvest and of the vintage into a moment; but the creative acts in feeding the multitude, and in converting the water into wine, were not greater than those which are put forth in the familiar phenomena of vegetable life and chemical change. To the thoughtful believer the ordinary course of nature is even more conclusive and impressive than a miracle, as it is the exhibition of the divine attributes on an almost infinitely grander scale. The hand that fed a few thousands on the shore of Tiberias, by miraculous interposition, feeds daily more than a thousand million in the order of providence. There is no room to question which is the grander exhibition of divine power and goodness. The miracle has its value as demonstrating the claims of Jesus and as a branch of Christian evidence, but we are the habitual witnesses and beneficiaries of divine methods which transcend anything miraculous.

If the miracle had its fragments to be gathered, so has the divine providence. And yet we are generally negligent of them, and our hearts are hardened and unbelieving amid the most astonishing manifestations of the divine care and goodness. The lessons of daily mercies are neither recognized nor improved, while in many particulars the overflowing bounties of heaven are wasted. Fragment gathering requires a vigilant eye and a quick hand, and without these the disciples would never have secured their twelve baskets full. In its lowest aspects of temporal economy, this attention to the fragments is often the secret of success and of wealth. Industry and enterprise toil in vain unless they are attended by frugality. The difference between the rich and the poor man lies often in the single circumstance that one has saved where the other has wasted. As may be seen in the miracle of the loaves, the fragments often amount to more than the original stock.

The young man who sets out in life bent on carefulness in reference to the pennies will be the rich man in the end. He who takes care of the small sums need not trouble himself about the larger ones. Time is a most essential and important element of our real capital. To advance in knowledge or to succeed in business the moments must be husbanded, and the opportune hours must be improved. The days, the weeks, the years will take care of themselves if the winged hour and fleeting moment are arrested in their rapid flight.

When we look at the more exclusively religious aspect of the subject, this fragment gathering becomes more important. The feast has its crumbs, and they are likely to be overlooked. How much grace is wasted by the Christian, how much good forever lost for want of careful diligence to gather the overflowings of the divine repast? The full improvement of our gifts in the service of God, the seizure of every available moment for the increase of our personal piety, are in accord with this watchful spirit. There are moments, opportunities, incidental means of grace and usefulness, that we overlook because of their occasional and fragmentary character. It is doubtless true that many believers throw away more than they receive in the spiritual blessings and opportunities which press upon their acceptance. Without the greatest vigilance and the most solemn sense of accountability, the loss from this cause is almost inevitable. Surrounded, as we are, by a profusion of the divine gifts and benefits, and moving amidst the most fearful responsibilities, we must gather up the fragments, "that nothing be lost."

DON'T FORGET THEM.

We mean the widows, orphans and worn-out preachers. God's blessing cannot rest upon us if we do forget them. Their claims upon the church for a support are just. It is due them as a matter of debt rather than of grace. There are many of the aged and infirm ministers who look for their annual stipend, because it is necessary for their comfort. To our certain knowledge there are widows of deceased preachers pinched by destitution, and orphan children deprived of many of the necessities of life, and growing up without education. The amount of claims allowed by the Conferences is a mere pittance—say \$150 to a superannuated minister, as much to a widow or a superannuated wife, and to orphans under fourteen years anything from \$20 up to \$50. In the majority of cases, however, they do not get even this pitiable allowance. The Louisiana Conference last year lacked about \$600 of the amount needed for distribution upon the meager basis we have indicated. Can our well-to-do Methodists, who live in fine houses, realize comfortable incomes, and have all that heart can wish, sleep in peace and keep a good conscience while these things are so? We have in our mind now a widow with five or six helpless children, and actually suffering for bread, clothing and means of education. Let the preachers plead for our widows, orphans and worn-out ministers, and let all the people give liberally.

HEALTH OF THE CITY.—The last report of the Board of Health shows the city to be in a very healthy condition. The total number of deaths, one hundred and nineteen for the week, is unusually small for this season of the year. Only one death from yellow fever in eight days, and no other cases are known to exist. In reference to the fever the board say:

The death from yellow fever, that of Henry Mark, who died at the Charity Hospital on Sunday, August 28, is the only one from that disease which has occurred during the past eight days, and there is not, within the knowledge of this board, a single case of yellow fever existing in this city.

For the present, therefore, we can confidently announce that strangers and unacclimated persons are as safe here as in any part of the country. For the future everything promises the continuance of a healthy season.

Parable of the Unjust Steward.

LUKE XVI, 1-12.

This parable has been regarded as difficult, and has given rise to many theories of interpretation. A German author has written a considerable book on this parable and its various interpretations. Those theories have arisen mainly out of two or three words that have been misunderstood, or that have changed their meaning in the process and lapse of time. We shall consider these in the progress of our article. To many who have not thoroughly considered this parable, it seems to teach that God commands injustice, and advises us so to use ill-gotten gain as to secure everlasting happiness. This view, being at war with scriptural analogy and the revealed character of God, cannot be true. There must be a legitimate method of explaining it more in harmony with Christian doctrine.

The parable was addressed to the general body of the disciples, Pharisees, publicans and sinners who were present, directly to the disciples, and reflectively to the rest. All of these classes were present, and had just heard the parables of "the lost sheep," "the lost pieces of silver" and "the prodigal son."

The "certain rich man," in his character as proprietor, represents him who is "Lord of all." The steward, in his position of responsibility and trust, represents us all, for we are all stewards of the manifold grace of God, and are to occupy until the Master calls us to a reckoning.

The steward in the East takes charge of the estate, and rents the land to tenants, who generally pay the rent in a certain proportion of the products. As the proprietor is often absent, and pays no attention to details, the steward only knows how much the several tenants have produced. It is easy to see how large are his opportunities to commit frauds on the lord of the estate. Some one accused the steward. This is the human side of the parable. So far as God is concerned, he needs not to be told. He knows man, and all that is in him. The lord inquires: "What is this I hear of thee?"—of thee, so trusted and so rewarded. "Give an account"—bring up your books; let me look over your business—"for thou mayst no longer be steward." That is as we understand it, if these reports turn out to be true, for the lord of the steward would hardly turn him off on a mere rumor. The steward seemed for a moment overwhelmed. He paused to consider. He knew his guilt, and was not certain that he could conceal it. "I cannot dig"—he had long led a life of ease. "I am ashamed to beg"—his position had been affluent and luxurious; he could not come down. But he "had wasted his lord's goods"—he had saved nothing. He soon found a solution of the difficulty, and set to work at once. He called on the tenants. To the first he came to be said: "How much owest thou my lord?" He answered: "A hundred measures of oil." "A hundred measures! Surely too much. My lord is rich and in no need, but you are a poor, hard-working man; half that amount is enough. Take thy bill and sit down quickly, and write fifty." To the next he said: "How much owest thou?" "An hundred measures of wheat." Oh, that is quite too much; you must not think of it. "Take thy bill and write fourscore." And thus, no doubt, severally and with all. By making it appear that one owed fifty per cent. and another twenty per cent. less than they really did, he might possibly show that his reports of former crops, as written in his ledger, were much the same as this report; and if the scheme failed, and he lost his place, he would at least have friends whom he might count on to receive him into their houses, or through whose influence he might secure another place. If we make men parties to our crimes, we have a hold upon them through interest and fear. If we help them to prosperity we have a hold upon their gratitude.

The next thing Christ does in the narration is to tell what the lord of the steward thought of the steward.

ard's smartness—for somehow it had come to his ears. "The lord commended the unjust steward." Not that the proprietor commended cheating, especially being cheated himself, but the shrewd and forecasting policy of the steward. This commendation by the lord of the steward is nothing unusual. We often commend a part of an action, or a man's character, without commending all. We commend a quotation from an author whose general sentiments we condemn. We admire the bearing and behavior of a prisoner at the bar, a criminal at the scaffold, but not at all their characters. All readers of Milton's *Paradise Lost* admire the sublime wickedness of the Devil, without, of course, thinking otherwise than that Satan is the worst of beings. The lord of the steward commends him "because he had done wisely," or as Wickliff, in his translation, has it—which all the authorities now think is better—"done prudently."

"Wisdom" and "wisely" in Scripture most always mean moral goodness. It is also stated that "the children of this world are wiser in (or toward) their generation than the children of light." By children of light is not here meant the children of life—the vital, earnest Christian. Wickedness is always folly, and holiness is always wisdom; and so the end demonstrates. These "children of light" are the theoretical servants of God, but who are practically inconsistent, living below their knowledge and responsibilities; while the real man of the world—the mere animal man, who looks upon this world as his all—lives for his "generation," seeks to make of the present all he can. He makes friends, he makes investments, he improves opportunities; in short, is "wise in his generation." But the wisdom of the men of this world is confined to "their generation." They have no hopes beyond the grave, no treasure in heaven.

Here the narrative ends, and our Lord says: "I say unto you, make to yourselves friends of the mammon of unrighteousness." Dr. Hare, our eminent authority, says that the preposition "of" in connection with "unrighteousness," or by the means of "unrighteous mammon, or riches," which is the simple meaning of mammon. For the authority for changing "of" into "by," Hare quotes: "Being warned of God," "being taught of God," meaning, being warned and taught "by God." A stronger quotation is Matthew 1, 22, speaking of the fulfillment of a certain prediction in regard to Christ: "Now all this was done that it might be fulfilled which was spoken of the Lord by the prophet." This does not mean spoken concerning the Lord, but by the Lord, by the mouth of the prophet. In the Old English, as these quotations show, "of" had in many places the meaning we now attach to "by." It considerably changes the meaning and illuminates the obscurity to read it thus—"Make unto you friends by the religious use of riches." And this, we think is the real meaning.

"Riches are called 'mammon' because Mammon was the name of the Syrian god of riches. They are called 'unrighteous' because often so obtained, and because they are 'deceitful' and false, promising more than they realize. 'Make friends' by the wise and religious use of riches is the meaning—not at all that we are to take ill-gotten gain and consecrate that to God, and purchase heaven with it. No; 'God hates robbery for hatred offering.' The true illustration is Matthew xxv, 35-46, where Christ takes these various kindnesses as done to himself—"Ye did it unto me." Not that we are saved by works—always by grace; but works show forth a gracious state, and as such are a declarative righteousness. These righteous acts, the wise use of all gifts, are evidences of our gracious state, and as such are said to receive us into everlasting habitations.

The expression "when ye fail" is a euphemistic or softened expression, meaning "when ye die."

The moral with which our Lord concludes vindicates the parable from all approbation of or conniv-

ance at wrong. We must be faithful in the use of temporal and inferior things before we can claim to be in spiritual and superior things. If not faithful in the little—in that which pertains to earth and time—God will not intrust us with "the true riches." (Here called "true riches" in contrast with the "mammon of unrighteousness"—the false, deceitful riches of earth.)

The single point to which the great Teacher calls attention is the prudent forecast of the steward. Let us use our gifts as wisely, to secure everlasting habitations, as the steward did his to secure habitations during his generation.

By request of a brother I have written the above, hoping it may render the parable to some readers somewhat easier of apprehension.

BRIEF EXCURSION TO TEXAS.

MR. EDITOR: Our German brethren in Texas having determined upon holding a camp meeting in connection with their annual District Conference, at Industry, Anderson county, I gladly embraced the various urgent invitations to attend. My presiding elder and board of stewards as gladly consented to a brief leave of absence—I suppose to get rid of me for a time. And thus I found myself, on the fourth ultimo, in company with J. H. Keller, and William Lieser, of the Dryades street church, who likewise wished to attend the camp meeting, on my way to Galveston. After a very wholesome spell of sea-sickness, I arrived on the island on the following day. How different things here now look from what they did when, during the war, as chaplain in the army, I preached in these regions to our boys in gray!

Three things attracted my attention here very specially. The first is the Christian Advocate office, recently removed to comfortable and elegant quarters. Bro. I. G. John, the able editor of this worthy journal, than whom there is not a more affable Christian gentleman, received me very cordially. I rejoiced to hear from his own lips that the Texas Advocate pays its way, though on account of the wretched mail facilities its obvious success is seriously impaired. Let our preachers in Texas always rally to their organ. The next thing claiming my special attention was St. John church, on West Broadway, now in process of erection. This will be the largest and finest church in the entire Lone Star State. By New Year, I was told, this elegant structure will be ready for divine worship. From this splendid edifice I proceeded to weep over our dilapidated and forsaken German church. It is but a "cottage in a garden of cucumbers." Once a flourishing congregation worshiped where now spiders and bats revel in their glory. Alas! the "candlestick" has been, though I trust not irrecoverably, removed. I hope and trust that at the next Texas Conference Bishop Marva will make arrangements to send a German missionary to this field, to again gather the outcasts in. The Greeks are at your door! Brethren, neglect them not.

On Saturday evening I arrived at Houston, and was heartily welcomed by our venerable collaborator and pastor in charge of our German work at this place, the Rev. John A. Pauly. Everybody knows Brother Pauly. During the war he had charge of our German churches in New Orleans. Then the Northern army came, war's horrors came, and capping the climax, Bishop Ames came with documents from the War Department to possess himself of all our churches. Brother Pauly was called upon to appear before the Bishop, with the demand to join the Church North, and surrender all our church property to its safe keeping. Is the old man at a loss what to do? No. Tears pearl over his wan and haggard cheeks, and he says: "Bishop, do not attempt to disgrace me." In the Methodist Episcopal Church South I was converted and called to preach. In it I preached nearly twenty years. Hundreds have been converted—many have gone to glory. The Methodist Episcopal Church South

has made me, supported me, its preachers were true friends to me. Bishop, would you advise me to desert them in the hour of their calamity? Would you advise me to be false and recreant? Would you advise me to perpetrate this horrible iniquity? The Bishop thereupon told him to go home and preach the gospel—nobody should molest him. After having preached in Houston three times, having previously called on Dr. Kavanaugh, delighted to find that both the German and American churches are in a superlatively prosperous condition, I proceeded, in company with eleven brethren and sisters from New Orleans and Houston, via Hempstead, Chappell Hill and Brenham, to Industry. How my heart beat when I saw the magnificent University building at Chappell Hill! It was here that for three years I labored incessantly to acquire a thorough education. Tears ran over my cheeks when I remembered how kindly Drs. Tolansbee and Halsey assisted me—the bashful, timid Dutchman—encouraging me to overcome all obstacles, and be a hero in the strife. Brethren, I don't forget your favors! At Brenham I met Dr. Mood, the president of Soule University, and rejoiced to hear that the institution is in a prosperous condition. Our people in Texas know how to appreciate a good education. I will right here state that the German district, Texas Conference, Methodist Episcopal Church South, has resolved henceforth regularly to educate two young Germans preparing for the ministry at this institution, defraying one-half of all their expenses. The amount necessary is apportioned among the various congregations of the district. I promise myself great good from this programme.

The camp meeting, as well as the District Conference meeting, was a brilliant success. With two exceptions, all our German preachers were at their post; and on such occasions, as you well know, preachers shoot off their big guns. I never heard more excellent sermons than at this time. Nor was love's labor lost. Repeatedly large numbers crowded the mourners' bench, and not a few professed to have found what the world cannot give nor take away.

Our German work in Texas is in a very healthy condition. We have preachers here who, in point of intelligence and piety, are fully on a par with any of our American brethren. Ecclesiastically they have their eyes wide open; they have found to their sorrow that under wreaths of roses there was hidden a sword. Yours,

J. B. A. ARNOLD.

CHURCH PROPERTY.—The attention of the preachers of the Louisiana Conference is called to the following resolution, passed at the last session, in reference to reports of church property:

Resolved, That it be made the duty of each preacher to furnish the Conference with reports of the church property in the bounds of his work, so that the Conference, as required by the Discipline, may take account of the same, and that the following items be particularly incorporated in said reports, to wit: Number of church edifices, their value, whether titles are secured; number of parsonages, their value, whether titles are secured; other church property, its value, and whether titles are secured.

A CORRECTION.—In the advertisement of the Collegiate Institute, Baton Rouge, the advance payment was put, through mistake, at \$180. It should have been \$150. We cheerfully make the correction, and again call attention to this excellent institution. Prof. Magruder deserves well of the country and of the church. His school is of the very highest order of excellence.

MADISON COLLEGE.—This well known institution, located at Sharon, Mississippi, is now under the presidency of Rev. J. M. Pugh, of the Mississippi Conference. See the advertisement in another column of this issue. Brother Pugh is an experienced teacher and a minister of high character. Boys placed under his care will be in most judicious

CENTENARY COLLEGE OF LOUISIANA.

The session of this college year will begin on the first Monday in October. The tuition for college classes is \$60 per annum, payable semi-annually in advance. Board at \$15 per month. This institution is located at Jackson, Louisiana, twelve miles back of Bayou Sara. It is one of the oldest in the South, and its graduates fill important positions throughout the States of Mississippi and Louisiana.

Students, upon arriving at Jackson, will report to Prof. A. R. Holcombe.

The board and faculty promise the public that nothing shall be wanting on their part to secure the thorough education of the students committed to their care, in both preparatory and collegiate departments.

For general information we state that the repairs necessary to the center building are going forward, and have already been contracted for. The members of the Mississippi and Louisiana Conferences will please do all in their power to send forward students, so that the term may begin with a large list.

J. C. KEENE,
Pres. Board of Trustees.

PERIODICALS.

THE GALAXY FOR SEPTEMBER, 1870. This is the first of the monthlies for September which has come to hand. Contents, as usual, varied and of a high order of merit. The article on "The Inquisition" exhibits Romanism in its true colors. The Galaxy has done, and is still doing, good service against popery.

ARTHUR'S HOME MAGAZINE FOR SEPTEMBER, 1870.—Beautifully illustrated this month. The Sisters' is a very sweet picture indeed. The literature of Arthur's publications is always sound and wholesome. The prize temperance story of Woods' Household Magazine appears in this number. Ladies will find the fashion plates satisfactory.

THE CHILDREN'S HOUR for September is a little gem in its articles and illustrations. Grandma's Stories, by Kate Sutherland, are continued. Among other interesting articles we notice "Bees and Farm," "The Flying Squirrel," "The Worth of Knowledge" and "St. Bernard." The Children's Hour is edited and published by T. S. Arthur, Philadelphia.

THE SOUTHERN FARM AND HOME.—Published by J. W. Burke & Co., Macon, Georgia. This is one of our best agricultural monthlies. It is especially adapted to the Southern States, ably edited and tastefully printed. The present number contains thirty-eight pages of choice reading matter, besides advertisements. Housekeepers, farmers and planters will find it a valuable monthly visitor.

BISHOP WIGHTMAN arrived last Saturday, in time to attend the District Conference at Rockville, on Sunday and Monday. On Tuesday he passed through the city to San Jose, where he preached on Wednesday night, and to-day he sails for Oregon. He is looking quite well, though physically weary from the excess of travel and labor to which he has been subjected. Ever on the alert in the pathway of duty and usefulness, his entire time until Conference is already promised away, much to our disappointment when we put in our plan for a Sunday. Let every one of us, by earnest prayer, be to our Bishop what Aaron and Hur were to Moses, while our Israel is engaged in the open field. *San Francisco Spectator.*

The fourth change in Atlanta, of which the Rev. W. C. Dunlap is the faithful and useful pastor, has been sorrowfully bereaved in the death of Edwin Payne, "who, in many respects," says the pastor, "may be considered the father of Methodism in Atlanta." He had been identified with the church in Atlanta almost from the origin of the city. Faithfully did he "serve his generation by the will of God." He did much for Methodism and religion in that city. *Nashville Christian Advocate.*

Fully one-half the inventive genius of the world belongs to the United States. During one hundred years France and England have each granted about eighty thousand patents; but within the last forty years the United States alone has granted more than one hundred thousand.

Obituaries.

Died, at two o'clock P. M., August 21, after a brief but painful illness, ROSSELLA KAMELON, aged five months.

How blessed is her lot! Washed in the blood of the Lamb, she is taken into paradise untroubled by the guilt of a single transgression. Let us sorrow not, even as others who have no hope; but let us so live that we, too, may sleep in Jesus, and like the little Rosella, see Him face to face who hath said: "Of such is the kingdom of God."

J. G. MILLER.

WILLIAM DALTON died in the city of New Orleans, August 25, 1870, in the seventy-fifth year of his age.

Brother Dalton was born in Berkeley county, Virginia, September 23, 1795. He removed with his parents to Kentucky when six years of age. He was converted at a camp meeting in that State in his seventeenth year. In 1842 he became a citizen of New Orleans, and connected himself with the Methodist Church in this city. He was a member of the St. Mary's street church in Lafayette for several years, and of the Felicity street church since its organization. It will be seen that Bro. Dalton has been connected with our church in New Orleans for twenty-eight years. He was a long sufferer, and very often in feeble health for many years. During my acquaintance with him I have found him attentive to his religious duties, attending the meetings of the church when able, keeping up family prayer, and never allowing a pastoral visit to pass without devotional exercises. For the last four or five years Brother Dalton's piety appeared to grow deeper, and he seemed to be graciously ripening for eternity. In his last hours he testified that he had not a doubt of his salvation, and that he longed to depart and to be with Christ.

LARRY PARKER.

LARRY H. M., youngest child of John M. and S. A. Pope, and wife of James J. Ford, died at the residence of her husband, in Marion county, Mississippi, June 30, 1870, aged seventeen years and sixteen days.

"As softly as shadows fade, and sweetly as music dies, she crossed the margin of the material to the bright company reclining beneath the Tree of Life, on the ever-green shore." For long months, while flushed with health and active with life's duties, she had cherished this tardy hour that was to reunite her with her father, brother and sisters, and open to her the beauties of the heavenly world. She was naturally modest, amiable, self-sacrificing and affectionate to all around her. Larry was an affectionate daughter, a loving sister, a devoted wife and a tender mother. Her afflictions were severe and her sufferings very great. She was sick nine months, and during that time she did not complain or murmur, but bore all with patience, and seemed to be resigned to the will of her heavenly Father, "who worketh all things together for good to them that love the Lord."

The genial, cheerful manner in which she prosecuted her duties was most remarkable. Kindness of heart was a marked characteristic of her nature. When the hour of death approached she had a noble fortitude and a most admirable self-possession. She whispered out directions as to the disposition to be made of her little Willie, and directed about her burial and other matters according to a very accurate and judicious judgment. The ruthless hand of death, removals, and the demoralizing effects of the war left the church in the community where she lived during her womanhood, almost without organization; consequently she was deprived of that influence which the church has on such gentle spirits as hers. She therefore was not formally received into the church, but gave every evidence of her attachment to it by desiring to have her dear Willie dedicated to God in baptism, as she had been in infancy, and by her willingness to go and be received by the great Head of the Church. She gave her little babe, nine months old, to her mother. And thus she passed away. She leaves many friends to mourn her loss; but our loss is her eternal gain.

S. E. Y.

REV. C. J. HALLBERG.

[After our notice of Brother Hallberg's death the following has been received from a member of the Mississippi Conference.—ED. ADVOCATE.]

Died, July 29, 1870, at Etiler's Landing, Issaquena county, Mississippi, Rev. CHARLES J. HALLBERG, a superannuate of the Louisiana Conference.

Knowing little of Brother Hallberg's history, I will only attempt to give those facts of his last years which may aid in the writing of his memorial.

He had been in the itinerancy some twenty years, serving without complaint all the circuits assigned him—sometimes the hardest—when he was disabled by rheumatism from continuing his effective relation to the Conference. At the time this affliction overtook him he was living comfortably in Carroll parish, Louisiana. The Federal troops got possession of the region where he lived, and he being very outspoken as to his Southern sentiments, they transported him to Issaquena county, Mississippi, to have him outside of their lines. He was never able to move from that place. He rented land and tried to plant for two or three years, but it was during those years of "disaster to planters" which succeeded the war, and so resulted in failure.

Soon after the war his fellow-citizens showed their appreciation of him by electing him probate judge of the county, which office he held with credit for several years, and was able with the salary to support his family. In 1868, when all our officers were substituted by military appointees, he was thrown out of the office. So disabled by rheumatism as to be unfit for any ordinary work, with a wife and five children, and no means of support, he again tried to plant—rented land; bought mules and provisions on credit, and hired hands. But his crop was overflooded so late as to prevent replanting. So he returned the mules and was left in debt. Since then he has been most of the time actually confined to his house, not only unable to help his family, but requiring to be helped by them. His heroic wife has supported the family mostly by sewing. But even when perfectly helpless he was always inventing some plan by which he thought he might make a support. There were friends who gladly helped him as they could. Brother Davis visited and served him as a brother in the ministry of Christ. I saw him in the spring, and though almost bent double by rheumatism, he was uncomplaining, even cheerful; and it was indeed a privilege to breathe the atmosphere of his wise and golly companionship.

He must have been a man of ability in the pulpit, and of great activity and faithfulness in his work. For a time he preached after he had to be helped into the church, and to sit while preaching. At the last his mind gave way. I saw a note he wrote the day before his death—the last he ever wrote. It was so incoherent as to be scarcely intelligible. His mind seemed to be burdened with the helplessness of his family's situation. In the close he said he wished he could write in another strain, but must write as he felt. He died the next day. We need no dying words to assure us that he was ready. Far more confidently can we rely on a life of devotion to Christ.

That life, which might have been successfully spent in providing a home and property for his family, was spent for the church. For he was willing to forego the tempting prospect of comfort, competency and independence, and could wear out the strength of his manhood in hard riding, exposure, preaching, separation from his family, and the wasting anxiety that comes from scarcity and pinching and tears at home. This he endured for the church; and what else God only saw. Will the church forget that he has left in her care those who were dearer to him than all things save the church's cause? With a promise of support to which she asks the preacher to commit fully the future care of his family, will she take care of them when he is gone? She has been recreant to the confidence which she has invited; and the pittance which widows and orphans generally get from her would not keep them from actual starvation. When the preacher who was worn out in her service sleeps in his grave his wife and children look in vain even for that minimum appointment which the church has made for them. Who is to blame? Do the preachers fail to present these things? Can members of the church close their hearts against such a plea? Or are both these true? Let us answer this!

NEW ADVERTISEMENTS.

CENTENARY COLLEGE OF LOUISIANA.

The session of this college will begin on the FIRST MONDAY in October next. The session embraces forty weeks.

Collegiate department, per session..... \$60 00
Preparatory department, per session..... 40 00
Incidental expenses..... 5 00
Tuition for five months payable in advance.

Boarding can be had in good families at from \$15 to \$20 per month.

For further particulars address
PROF. A. R. HOLCOMBE,
Jackson, La.

MADISON COLLEGE.

SHARON, MISSISSIPPI.

The nineteenth annual session of this institution will open on MONDAY, the third day of October next.

Trans.—Tuition, per session of ten months, \$30, \$40 and \$50. Contingent fee, \$5.

Board can be had in private families at \$15 per month, exclusive of washing.

For further information address Dr. M. J. McKee, president of the Board of Trustees, or myself.

I offer the tuition of young men preparing for the ministry, the sons of ministers in the regular pastorate, and the orphans of deceased ministers, on application, free of charge.

J. M. PUGH,
President.

STONKWALL INSTITUTE.

THIRTEEN MILES NORTH OF SELMA, ALA.

This school for boys opens its sixth annual session OCTOBER 3, 1870.

D. C. B. CONNERLY, Principal and Teacher of Languages.

JOHN P. SEABROOK, Teacher of Mathematics.

But few schools accomplish as much for its pupils as this does.

It is in the quiet country. Its teachers give instruction nine hours per day, including two at night.

The Institute belongs entirely to the Principal.

Two Hundred and Sixty Dollars will cover the monthly board, tuition and washing.

Transportation from Selma to the Institute on every Wednesday and Saturday in October to the twenty-second, free of charge.

Refer to Bishop J. C. Keener and John M. Bonner, Esq., New Orleans, Louisiana.

For further particulars apply to the proprietor,
D. C. B. CONNERLY,
near Selma, Ala.

CENTENARY MALE INSTITUTE.

SCHMIDT, ALABAMA.

reopens on the FIRST MONDAY of next October.

The school is in good condition. It has had a steady increase every year since it has been in the hands of the present teachers.

The total expenses from October to July will be only \$24 50.

There will cut daily between Schmidt and Selma at the opening of the session.

JOHN MASSEY,
Principal.

EAST ALABAMA COLLEGE.

AUBURN, ALABAMA.

The next annual session will open on the FIRST WEDNESDAY in October, with a full faculty.

Boys and young men at every stage of advancement can be received either in the Preparatory, Junior or Senior Departments.

Additional schools of Modern Languages, Civil Engineering, and Commercial Arithmetic and Book-keeping have been established.

Economy, health, efficient faculty, good society, thorough discipline and the best religious privileges are the peculiar advantages of this school.

It is just the place to train Methodist boys, and there is room for three hundred. If every preacher and layman will work for us to secure students we will open with two hundred.

FOR CHILDREN TEETHING.

greatly facilitates the process of teething by softening the gums, reducing all inflammation; will allay ALL PAIN and spasmodic action, and is

SURE TO REGULATE THE BOWELS.

Depend upon it, mothers, it will give rest to yourselves, and

Relief and Health to Your Infants.

We have put up and sold this article nearly thirty years, and can say in confidence and truth of it what we have never been able to say of any other medicine—NEVER HAS IT FAILED AS A SINGLE INSTANCE TO EFFECT A CURE, when timely used. Nor did we know an instance of dissatisfaction by any one who used it. On the contrary, all are delighted with its operations, and speak in terms of commendation of its magical effects and medicinal virtues. We speak in this matter "WHAT WE KNOW," after years of experience, and pledge our reputation for the fulfillment of what we here declare. In almost every instance where the infant is suffering from pain and exhaustion relief will be found in fifteen or twenty minutes after the Syrup is administered.

Full directions for using will accompany each bottle. Be sure to call for

"Mrs. Winslow's Soothing Syrup,"

having the fac-simile of "CURTIS & PERKINS" on the outside wrapper. All others are base imitations.

Sold by Druggists throughout the world.

The Child's Corner.

WINNIE.
Bless me! here's another baby.
Just as cunning as can be;
Eyes as blue as bonnie bluebells,
Breath as sweet as rosemary,
Smile as tiny, dashing sunbeam,
Hair of purest, fairest gold,
Hands and shoulders full of dimples,
Little Winnie, eight months old.

Making funny, cooling speeches,
"Nobody can understand."
Such a quaint and pretty language,
Only spoke in baby-land.
Should I sing all day about her,
All her sweetness were not told—
She's a bud, a bird, a fairy,
Little Winnie, eight months old.

SEA-SIDE WALKS.

Have you ever been to the sea-side, children? I think I can hear the varying chorus of replies. Some of you—like myself—live far inland, where not even a breath of the ocean can reach us on the wings of a wandering zephyr. Some of you, no doubt, could tell of the marvelous grandeur of mountain heights and distant cloud-capped peaks, and some of broad shining rivers, with their green banks and white gliding sails; some only of green fields and quiet woodland walks; while others—alas! how sorry all of us who live beneath the free country sky feel for such—can tell only of close city streets and breathless nights, with only a narrow strip of cool star-sprinkled heaven above to remind them of the beautiful world which lies boundless and pure beyond the city smoke and heat.

But some there are among you, no doubt, who live all their lives close by the dash and roar of the ceaseless waves, and such, perhaps, will smile at the ignorance of us land people, who come only once in a great while to listen to the music of the waters and battle with the foaming surf. Well, it is not for such as these that we will tell our little sea-side tales, but for our inland friends, to whom it is all as novel and strange as it was to our group of young companions who went with us to the sea-shore a few weeks ago. "Katy and Fred, Lucy and Willie, and little Baby Lou—such a nice group as you seldom see by the sea-shore or anywhere else; at least so they seemed to mamma and Cousin Fanny's eyes as we started out for our first walk. Baby Lou went under nurse's care in her little carriage, for she was not yet three years old, and her little toddling feet could not accomplish much distance. Katy and Lucy came next, walking rather demurely at first, as if somewhat in awe of the mighty ocean whose roar they had heard all night from their comfortable beds, while Fred and Willie had started off at a full run for the beach, and were nowhere to be seen until we rounded the cliff and stood upon the yielding sand. Oh then, what a shouting there was! Even Baby Lou joined in the chorus, clapping her little fat hands, and almost jumping out of the carriage into the water which at that moment came surging up beneath the wheels. How the children all scampered then, and what screams of delight mingled with the dashing of the breakers! Oh, it was grand fun! You have felt the fresh delicious sea air know how inspiring it is, and how delightful it is to wander along as close as possible to the edge of the water and watch the waves coming in at your feet. The girls were soon as wild with joy as the boys, and before long quite as daring in their approach to the waves; in fact, I do not think we elders were much less excited or less ready to take part in the frolic.

The tide was coming up rapidly, so we had no time to linger under the cliffs if we intended to have a walk along the beach, so we speedily took up our line of march. A most irregular line it was, however, for every child must walk so close to the water that each wave which came sweeping up and died away in a long curve on the sand made them rush back screaming and shouting; sometimes with wet boots, which added greatly to the fun. Then, too, it was so funny to see the tracks of so many little feet in the firm sand, and Baby Lou had to be let out of the carriage that we might see her tiny irregular footprints. It was a pretty sight, indeed, to see the group as they stood there, Fred holding Baby Lou until the water came seething up to her little blue shoes, and then running with her just in time before the waves caught them, her golden curls floating out under the white bonnet, the laughing face all aglow with baby glee, and the blue ribbons and white frock streaming in the wind.

Then Willie, Lucy and Katy made a halt before some strange object on the sand; it looked more like a mold of jelly which one of the waiters might have dropped there than anything else. What could it be? The children had provided themselves with sticks, and were turning it over so curiously that they did not notice a wave which came in farther and faster than the others, and sweeping over their feet carried

the mold of jelly, and almost the children too, out to sea.

"Oh, Cousin Fanny," shouted they altogether, as soon as they had recovered from the sudden scamper, "it was just the funniest thing! What could it have been?"

"Nothing but a jelly-fish," said Fred, rather contemptuously. "I've read all about them; you'll find plenty more along the shore."

"Fish," cried the children. "You wouldn't have called it a fish, if you'd seen it; it was nothing but jelly; it couldn't swim, and it hadn't any head at all, or tail either."

"It was a jelly-fish, for all that," said Fred decidedly; "and we will find plenty more after awhile. Just look there now."

A wave had washed in almost to our feet laden with sea treasures, and we all rushed forward with our sticks to examine them. There was first a mass of brown cedar-like seaweed, smelling briny and fresh from some ocean cave, then a mingling of clam-shells and pebbles, and in the midst the struggling bodies of two crabs, who were using all their legs to get back to sea again. Fred and Willie lent the aid of their sticks to push the poor stranded creatures into the deep again, and watched with great pleasure the next foaming wave which lifted them out again as it went back.

We elders would have been willing to wait for hours by the shore while the children went on with their discoveries, and quietly watch the great breakers as they came foaming and surging in, curving over and falling with a heavy roar before they reached the beach, and then rushing on with a seething sound over the sand to our very feet. As the waves chased each other in, every one seemed to have a new charm; and if the children had not recalled us by their constant cries, we might have sat there spell-bound until the tide surrounded us. Yes, it was glorious, this first acquaintance with the great sounding sea; and soon Lucy, with her deep quiet eyes, came to stand by mamma's side, and listen awhile in silence to the grand anthem of the waves.

Lucy's heart was full with the majesty and beauty of the waters, and she soon forgot the wild frolic of the children, for her hand sought mamma's, as it always did when she was thinking or feeling very deeply, and an awed, quiet look settled over the sweet childish face. "Mamma," said she presently, when we had watched a larger than usual wave spend its force with a thundering noise upon the shore, "what is that it says—about the Voice—don't you know? I have been trying to think," and Lucy looked up into mamma's face with her dark, earnest eyes.

"The voice of the Lord is upon the waters," said mamma. "Is not that what you mean, dear? 'The God of glory thundereth; the Lord is upon many waters; the voice of the Lord is powerful; the voice of the Lord is full of majesty.' It does indeed seem as if that was the grand anthem of those mighty waves, a message they proclaim from shore to shore."

Lucy stood silent and gazed out over the waves. She heard the voice, and it spoke to the depth of her awed child-heart. She had heard it before, as a still, small voice which spoke to her in the stillness of the night, but now the whole universe seemed full of the presence and the majesty of the Lord. It seemed almost too much for her sensitive nature to bear, but mamma would not break the spell which bound the child's heart and kept it away from earthly things, and she stood there silent until the approaching tide warned us to return home.

There was no more time for thought when we began to gather in our noisy, merry little group. Willie had found another jelly-fish which he was bent on carrying home to papa, who would be sure to know all about it. Fred had laughed enough at the idea, but had not succeeded in discouraging Willie, who with Katy's aid had lifted the slippery mass between two large shells, and was trying bravely to carry it along. They could hardly have found a more troublesome passenger than that jelly-fish; it was so disagreeable to touch, and yet so hard to keep in place, that after two or three stoppages to pick it up off the sand, Katy's sympathy was exhausted, and she joined with Fred in begging Willie to give it up. But it was always very hard for Willie to give up anything which he undertook, and his whole heart was set on taking that pulpy, slippery thing home to papa. "Couldn't he put it in baby's carriage?" he urged. "Baby wouldn't mind, she's so good, and she loves Brother Willie. Don't you, Baby Lou?"

"Yes, yes, Lou loved Willie, but that was nassy fish." And baby's affection would have gone farther than that of older folks if it would have led her to ride in such company.

"No, no, Willie," said mamma at last, "you must be a reasonable boy

and give it up. Papa will come down here with you this evening, and tell you about all the wonderful things; so do not keep us waiting any longer. Come, my son."

When mamma said "my son" that way, Willie knew the jelly-fish could no longer be considered; so he dropped it with a last look of regret, and marched off with his hands behind his back and the heels of his small boots making deep dents in the sand.

Baby sat rather uneasily in her carriage on the way home, but we were all so interested in watching the waters that we hardly noticed her. She was truly a much-enduring baby, and ready to help the children in any little plan; but we could not wonder at her uneasiness, nor admire her patience enough, when, as we went over a rock, she gave a quick cry, and a large shell came tumbling from between her pink legs.

"What on earth have these children been up to?" cried the nurse, taking Baby Lou out of the carriage, and setting her down on the sand. "If they haven't just filled the blessed little pet's carriage with their dirty trash, and she never complaining a word, the patient angel that she is!"

It was a sight indeed that we could not help laughing at, when the carriage was overturned on the sand, and the children rushed forward to claim their treasures; seaweeds, shells, large and small, and even a large king crab, which Willie was taking home for supper, and which he had smuggled in amid a mass of seaweed. Poor baby! She had borne it all with great patience, so that it was a wonder that she had even objected to the jelly-fish; but even to her patience there was a limit.

There was no time to gather up the scattered treasures, or do anything else now but hurry for the cliffs, for the tide was almost up, and our path was very narrow; so taking the younger children by the hand, mamma and Cousin Fanny hastened on to a place of safety, promising to spend a long afternoon on the beach when the tide was out.

We all paused when we reached the top of the cliff, and looked down upon the thundering breakers. Lucy was quiet still, and the grave, far-reaching look had not left her eyes. It was not the white sail far off against the horizon, which attracted the other children, at which she gazed. She looked far beyond into the blue sky with its fleecy clouds, and her heart was full with the grand thought which came with the sound of the waves: "The voice of the Lord is upon the waters; the God of glory thundereth!"—*Baltimore Christian Advocate.*

The Farm and Garden.

TRANSPORTATION OF EGGS.—R. L. Maitland, Jr., of New Jersey, writes to the Country Gentleman some interesting facts about the hatching of eggs shipped long distances. In 1865 his father imported eggs from Liverpool, England, to which place most of them had been brought by rail. Of these, twelve were eggs of Sebright bantams; none of this lot hatched. Of twenty-four Black Spanish eggs fourteen hatched, of twelve Gray Dorking eggs two were broken and six hatched, while of thirteen game eggs nine hatched. Mr. Maitland last spring imported another lot of eggs from England. Of twenty-four Buff Cochins eighteen hatched. Dorking eggs did poorly.

Mr. Maitland thinks eggs very seldom hatch well after being carried by rail, and says he would never ship eggs by express. He prefers oats to anything else for packing eggs for hatching.

SALTING CABBAGE PLANTS.—G. W. T. Rahway, New Jersey, considers salt necessary to the development of the cabbage, especially in places far from the coast. He finds them more crisp, of better flavor, and to keep better when salt is used than without. He uses it as follows: "A few days after setting out the plants, and when they are damp, either after a rain or when dew is on, I take a small dish of fine salt and walk among the rows, sprinkling a little pinch of salt on the center of each plant when the leaves begin to grow. I repeat the salting; and when the center leaves begin to form the head I apply salt again, scattering it over the leaves. After this I look them over occasionally, and, if I find plants that do not head well or appear diseased, I sprinkle the salt over freely; this will save all such plants. A quart of salt is sufficient for five hundred plants in a season, although more can be used with safety."—*American Agriculturist.*

BEST WAY TO USE WOOD ASHES.—A Southern writer says he has found the most economical application of the unslacked ashes of wood to be in combination with caustic lime slacked, so as to preserve both in a fine dust powder, as follows: Spread the quicklime six or eight inches thick, throw upon the center of the

layer of lime one or more buckets of water, and when slacked then dump a barrel of ashes thereon; now heap up the quicklime, adding a bucket full of water for every bushel. When cold, preserve it in a sharp heat under cover or in barrels, filling each by a shovelful from the center and sides of the pile alternately, and allowing one bushel of ashes to each barrel of slacked lime. For the destruction of all fungi, and especially rust in wheat, a top-dressing for clover, grass or corn, one bushel of lime thus combined is worth any ten bushels of a manure, and may thus not only economize time, but eke out the usual scanty supply of wood ashes on the farm and double its efficiency.

MEDICINE FOR TREES.—The Boston Journal of Chemistry quotes from a scientific journal, which recommends boring holes in the trunks of trees and inserting calomel to destroy insects, and comments thus:

"This idea of endeavoring to force into the circulation of a tree mineral poisons to destroy injurious insects upon the leaves and branches seems to us very vulgar and absurd. We hope no one of our agricultural friends will engage in experiments of this nature; for by so doing we fear they will greatly endanger their fruit trees. The sap in vegetable structures corresponds in many of its functions and characteristics with the blood of animal organisms; and it is well understood among physiologists and surgeons that this fluid is exceedingly sensitive to the presence of foreign agents. No more sudden or effective way can be devised to destroy life than to eject into the circulation any extraneous agent, solid or fluid. Blood will abstract from food or medicine what it requires healthfully to perform its proper work, and can obtain it from no other source; and so with the sap. It will draw from the soil the constituent particles it needs; and any attempt to force an abnormal substance in an abnormal way can but result in irreparable injury to the structure."

ALSKIE CLOVER FOR BEE PASTURE.—Early in the year 1868 I purchased a pound of the seed, which I sowed upon a small piece of land (about a quarter of an acre). Though too much seed for the quantity of land, it germinated well, and, like the red clover, only made a good stand. But in the spring of 1869 it came up well, and on the sixteenth of June it would stand, if erect, twenty to thirty inches high, and was covered with blossoms and bees. Indeed, I have rarely seen bees more numerous on buckwheat blooms than on this clover. I shall sow a lot of buckwheat for fall pasture; but for May and June I think the Alskie clover furnishes more food than any plant I have ever seen. When not too cool or rainy for them to be out, you will find the patch covered with bees pretty well all day, and at times almost in swarms. They have sent forth a goodly number of swarms, and filled the bodies of the hives well with store honey. The Alskie yields an abundant crop of hay; not so much as the red clover, but the sweets furnished to the bees more than make up any difference. The bloom is like that of the white clover, folding back in such a way as to enable the bees to get into every part of it; while on the red clover, coming up in the same patch, you never see one.—*Southern Planter.*

SAGE CONCLUSION.—"The fact is," said an elderly wife, "a man does not know how to straighten up things. He does not know where to commence. I don't wonder," she remarked in conclusion, "that when God made Adam he went right to work and made a woman to tell him what to do."

SCHOOLS AND COLLEGES.

WHITWORTH FEMALE COLLEGE,

BROOKHAVEN, MISSISSIPPI.

On the New Orleans, Jackson and Great Northern Railroad, one hundred and twenty-eight miles north of New Orleans, and fifty-seven south of Jackson, will reopen on

The 21st of September, 1870.

Thorough instruction in all the branches given. Charge for board, tuition in English, English text books, school-room stationery, washing, fuel, lights, medicine and medical attendance, \$200 for the term of forty weeks. The languages and music extra. A deduction of \$50 made for pastors of churches. Number of pupils last term, 165. For catalogue address

H. F. JOHNSON, President.

Jy30 3m

ROANOKE COLLEGE, SALEM, VA.

Next Session Begins September 5.

This Institution has a full corps of instructors, a thorough course of studies, and aims at a high grade of scholarship. Its superior educational advantages, moderate expenses, healthy location, and excellent mail, travel and telegraphic facilities, render it well worthy the attention and patronage of the South.

Expenses for session of ten months, about \$210 00

This estimate includes board and tuition, embracing modern languages. A slight advance on the above for students boarding in private families.

For further particulars, catalogues, etc., address REV. D. F. HITTLE, D. D., President of the College.

MUSICAL INSTRUMENTS.

PHILIP WERLEIN,
Nos. 80 AND 82 BARONNE STREET,
NEW ORLEANS,
Southern Depot of the celebrated and renowned

PIANOS: Marshals & Miltner's, Dumbell & Son's, and J. P. Hale's.
ORGANS: Needham & Son's, Special Gold Medal for Church, School, Lodge and Parlor.

Which are fully equal to any in the world.

MUSICAL MERCHANDISE
OF EVERY DESCRIPTION.

PIANOS TUNED, REPAIRED, RENTED, EXCHANGED, STORED AND SHIPPED.

I desire to call your attention to the fact that I am conducting my business on the most economical principles as regards store rents and expenses, and am enabled to sell Pianos and Organs at from ten to twenty per cent. under current rates, and at bargain.

My large stock cheerfully shown to visitors, and orders promptly filled.

J. P. HALE'S
GREAT PIANO FORTE COMPANY.
Chartered January, 1866.

We are now prepared at our NEW FACTORY, corner of Tenth and Canal Streets, to turn out fifty Pianos per week, from our splendid New Scales, which are pronounced by the best judges to be the most powerful Square Piano that has ever been brought before the public. There is no Piano made that will stand in time like this.

PRICES.

No. 3.—Plain style \$125
No. 34.—7 Octave, front Round Corners, Serpentine Molding 450
No. 4.—7 Octave, four Round Corners, Serpentine Curved Legs 500
No. 5.—7 Octave, four large Round Corners 600

This Company, believing that the public want demands

A GOOD SUBSTANTIAL

SEVEN OCTAVE PIANO FORTE.

embracing all the modern improvements, such as a Rosewood Case, French Grand Action, Harp, Pedal, full Iron Frame, Over-string Bass, etc., at

PRICES WITHIN THE MEANS OF ALL.

now offer such an Instrument at a price lower than any other reliable manufacturer.

These Pianos are made of the best materials, with great care, and by the most skillful workmen, selected from the best factories in this and the old country, and fully warranted to stand in any climate, and to give as good satisfaction as any Pianos sold for \$1,600.

Our terms are set cash in New York; for local orders such terms are equalized to suit all prices.

We want Five Hundred Agents and Teachers to introduce these splendid new Instruments in all parts of the Southern States. All orders must be sent direct to

PHILIP WERLEIN,

THE ARROW TIE.

FOR BALING COTTON THE ARROW TIE

is the most popular, being the best Cotton Tie in use.

Planters and Cotton Pressmen everywhere prefer it to all others.

THE ARROW TIE

was used to cover MORE THAN HALF THE CROP OF 1869, giving entire satisfaction.

The patentee and manufacturer of the celebrated ARROW TIE, J. J. McComb, formerly of New Orleans, now residing in Liverpool, having control of the best and most extensive Rolling-Mills in Europe, is constantly importing large stocks of this popular Tie, manufactured of the very best quality of English iron, to meet the increasing demand for it throughout all the Cotton States.

Planters can buy or order the ARROW TIE of all dealers in Iron Ties, and of country merchants generally, at the lowest market price; and we respectfully solicit the patronage of Planters and Factors everywhere.

H. T. BAILEY AND

H. W. RAYNE,

General Agents for the Arrow Tie,
Jels 1 y 124 Carondelet St., New Orleans.

CARPET AND OIL CLOTH WAREHOUSE.

MISCELLANEOUS.

BROOKS' IMPROVED PATENT

WROUGHT IRON REVOLVING

COTTON SCREW PRESS.

Patented by R. M. Brooks, of Georgia,
April 14, 1863.

It took the first premium at the Louisiana State Fair, at New Orleans, April, 1868, over eleven competitors; also at the Tennessee State Fair, at Memphis; and more recently at the Mississippi State Fair, at Jackson; and again at the recent State Agricultural Fair, at New Orleans, April, 1870. In a contest with fourteen other Presses, embracing the most approved patents from different states of the Union, North and South.

The following is the certificate of some of the principal cotton factors and merchants of New Orleans. In our circulars can be seen the certificates of practical planters and scientific agriculturists from several Southern States in regard to the admirable principle and practical working of this Press.

"We, the undersigned, purchased last season, from Messrs. J. R. Jennings & Co., the Brooks' Revolving Cotton Screw Press for our customers, and, so far as heard from, they have given entire satisfaction."

"Messrs. Greenwell & Son, Warren, Crawford & Co., C. L. Whimsley, Ivey, McDaniel & Co., Frank & Daniel, Campbell & Strong, Camp Bros. & Co., E. F. Giddens & Co., R. S. Walker, Violet, Black & Co., Black Bros., Wright, Allen & Co."

Circulars, giving cuts, with full description, price list, etc., sent by mail on application to J. R. JENNINGS & CO., Proprietors, 14 Union Street, New Orleans.

DRUGS AND TRUSSES.—DR. JOHN C.

ANGELL, informs the medical profession and others that he has constantly on hand and for sale a complete assortment of HANSEN'S TRUSSES, Spinal and Shoulder Braces, and other appliances for the prevention, relief and cure of general debility, vocal weakness and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, spinal weakness and deformity, dyspepsia, nervous affections, constipation and chronic diarrhoea, female derangements and extreme displacements of the womb, RHEUMATISM, PILES, prolapsus-ani, and weakness of the male and female system.

These light, cool and springy auxiliaries are the special favorites of the profession; are intensely common-sense and rational in their action; supply a missing link in treatment; place the weary afflicted in a new and more hopeful light, and give complete cures where medicine can only palliate, any more than it can cure a hernia or dislocated joint.

These appliances are sanctioned by the profession and sufferers. Where necessary, the professional application of the above braces will be under our supervision or that of the family physician.

These valuable appliances are sanctioned by a large number of the medical profession in the United States and Europe, the best adapted to fulfill the purpose for which they are intended, and the Trusses and Braces are adopted by the United States government for the use of the army and navy. Terms cash. Circulars free. Send for your pamphlet. It is better to call.

Office and residence, 152 JULIA STREET, near Camp, New Orleans. Jell 1 y

NOTICE.—NOTICE.

DR. DABOES'

Rocky Mountain Indian Remedy,

FOR THE BLOOD.

This remedy will cure Erysipelas, Gout, and all kinds of diseases of the skin, and every variety of Cutaneous Eruption, from the simplest Rash to the most inveterate scurfy Leprosy, Bores, Blisters, Pimples, Itch, Eczema, Scald-head, Ringworm, Tetter, Ringworm, Itch, Liver Complaints, Kidney and Spinal Affections, Sore Throat and Croup, Sore, Piles, Scrofula and Cancers all yield to its influence in a few applications.

PRICE, \$1 PER BOTTLE.

Within two months this Remedy has created a sensation among the people afflicted with the above diseases. It never fails to cure radically the very worst case; and the demand for the medicine is very great.

DR. DABOES'

Rocky Mountain Indian Salve,

FOR SORES, BURNS AND FULES.

This Indian Salve cures Sores, Burns and Fules in a few applications, and is the best remedy for the treatment of the most inveterate Ulcers, Bores, Blisters, Pimples, Itch, Eczema, Scald-head, Ringworm, Tetter, Ringworm, Itch, Liver Complaints, Kidney and Spinal Affections, Sore Throat and Croup, Sore, Piles, Scrofula and Cancers all yield to its influence in a few applications.

For safety all Druggists, and at FLEMING'S Patent Medicine Depot, corner of Natchez and N. Orleans streets.

General Depot, 25 St. Charles Street, at the office of A. Banchard, New Orleans, La. For testimonials refer to our pamphlet. Country orders promptly attended to. Jell 1 y

REPTILES CURED.

With an experience of more than twelve years' practice in the treatment and cure of RHEUMATISM, GOUT, and all kinds of more or less chronic, acute and security, and a more rapid improvement than can be obtained of any other person or appliance in the South, without regard to the age of the patient or length of time afflicted.

Also instructions for the treatment of every species of human deformity on hand or made to order.

Call on or address, with stamp for circular, Dr. T. ST. C. FERRISS, Office No. 16 St. Charles Street, at the corner of Natchez and N. Orleans streets. Hours from 10 A. M. to 4 P. M. my21 1 y

THE HOPKINS HORSE POWER GIN

GEAR.

This Power is now put up in three different forms—stationary, movable and mounted on wheels, all having the same action and capacity, differing only in peculiar movement and arrangement. It is a simple, powerful and economical machine, and is used by patients and farmers. Models and Patents of the same may be seen by all interested by calling on me at the St. Charles Hotel; and to any one desiring to enter, with a small capital, a new business, which will yield a sure fortune, I will give unobtainable and unparalleled inducements. If immediate application is made.

J. W. HUNTON, M. D.

COOPER'S WELL, HINDS COUNTY, MISSISSIPPI.

The Christian Advocate.

SATURDAY, SEPTEMBER 10, 1870.

HOUSEKEEPERS' DEPARTMENT.

GINGER SNAPS.—One cup of butter, two cups of sugar, one-half cup of milk, one teaspoonful of ginger, one-half teaspoonful of soda; mix quite hard.

LEMON CAKE.—Three cups of sugar, one cup of butter, one cup of sweet milk, five cups of flour, five eggs, one-half spoonful of soda, one grated lemon.

SODA BISCUIT.—Six cups of flour, three cups of sweet milk, two-thirds of a cup of butter, two teaspoonfuls of cream of tartar, one teaspoonful of soda, and a pinch of salt.

WHITE CAKE.—Three cups of sugar, one cup of butter, the whites of twelve eggs, one cup of sweet milk, one teaspoonful of soda, two teaspoonfuls of cream of tartar, five cups of flour.

EXCELLENT BROWN BREAD.—Two pints of corn meal, one pint of flour, a small tablespoonful of soda, one cup of molasses, a little salt, one quart of sour milk. Bake slowly two hours.

SOFT GINGERBREAD WITHOUT EGGS.—One cup of molasses, one-half cup of sour milk, one-half cup of lard or butter, a heaping teaspoonful of soda and a large spoonful of ginger, with flour enough to make it very stiff.

CHEAP SPONGE CAKE.—Three eggs beaten four minutes, add one and one-half cups of sugar, then beat five minutes, one teaspoonful of cream of tartar, one teaspoonful of soda, one-half cup of cold water, and two cups of flour.

WINE-JELLY.—The whites of four eggs, one nutmeg, three ounces of isinglass, two sticks of cinnamon, two quarts of water, one pint of wine, two pounds of sugar, four lemons. Boil twenty minutes and strain through a flannel.

BUNNS.—One cup of yeast, two cups of sweet milk, one cup of sugar. Let it rise. Then add one cup of butter, two cups of sugar, one cup of currants, a little cinnamon and soda. Mix hard enough to roll out and then rise again.

DELICIOUS CAKE.—Beat the whites of three eggs to a froth, add one cup of sugar, four tablespoonfuls of milk, butter the size of an egg, one-half teaspoonful of cream of tartar, one-fourth teaspoonful of soda, one and one-half cups of flour.

FRUIT CAKE No. 2.—Two cups of sugar, two cups of butter, one cup of molasses, four eggs, one cup of milk, six cups of flour, one-half pound of raisins, one-half pound of currants, one-fourth pound of citron, one-half teaspoonful of soda and one spoonful of cream of tartar; add spice to taste.

LILY CAKE.—Two cups of sugar, one cup of butter, one cup of milk, one cup of starch, two cups of flour, the whites of five eggs, one-half teaspoonful of cream of tartar, one-fourth of a teaspoonful of soda; beat the starch, milk, soda and cream of tartar together, and flavor with rose or lemon, or anything you desire.

CUSTARD SUBSTITUTE.—Boil one quart of milk, and while still on the fire, add four tablespoonfuls of maida dissolved in milk, and stir five minutes; then remove from the fire and add one egg, well beaten, still stirring, after which add sugar and salt, and flavor with lemon, nutmeg, etc.; to be eaten cold. It is a very simple, wholesome and palatable article, and if frozen is a good substitute for ice cream.

FRUIT CAKE.—Twelve ounces of brown sugar, thirteen ounces of flour, nine ounces of butter, six eggs, one pound of raisins, one pound of currants, one-half pound of citron, one glass of domestic wine, cinnamon, nutmegs and cloves to the taste. Stir sugar and butter to a cream, and add the eggs well beaten, then stir in the flour and add the fruit and a half teaspoonful of soda. This will make two loaves.

FRUIT CAKE.—Five coffee cups of flour, two and a half teaspoonful of molasses, one and a half cups of butter, one coffee cup of sugar, one-half cup of milk, one teaspoonful of soda, one pound of raisins (stoned), two pounds of currants, one quarter of a pound of citron, four eggs, one heaping teaspoonful each of cinnamon and cloves, two whole nutmegs. Beat the eggs, butter and sugar together about ten minutes, then add all the rest as soon as you please; it is not necessary to beat it any longer than to get it mixed thoroughly. Line your pans with thick letter paper and grease them well with butter; bake in a slow oven from two to three hours. I have kept this cake perfectly good for two years.—*The Householder.*

Charity is never lost. It may be of no service to those it is bestowed upon, yet it ever is a work of beauty and grace upon the heart of the giver.

Scientific.

M. DIDIEJEAN, a red-lead manufacturer in France, found that two of his workmen never were affected by any symptom of lead poisoning. The only peculiarity of their habits, that he could learn, was that they always drank milk at their meals at the works. He then made the use of milk obligatory on the others, and during eighteen months has kept all his men free from lead disease.

PROF. GUMBEL, of Munich, has been examining microscopically the limestones of various ages, including that from the chalk and the Potsdam and Trenton of the Silurian. With those he has compared the deep-sea ooze taken up in the late dredging expeditions. He finds in all these cases the peculiar minute coccoliths and other remains of an extremely simple structure which now exist in the depths of the ocean; so that it seems to be proved that the same sort of ooze existed at the dawn of life on our planet at the bottom of the sea as is now found.

INFUSION OF BLOOD.—A memoir recently published upon the transference of blood from one living subject to another mentions, as the principal points reached in the investigations of the author, first, that blood collected and kept in contact with the air at a medium temperature remains unchanged in its constituent histological condition, and preserves its chemical peculiarities for two or three hours; second, that the red globules, saturated with oxygen, are the actual revivifying principle, the fibrin not being an essential part. On this account, to insure safety, and to prevent the introduction of clots into the circulation, blood deprived of its fibrin is to be preferred to that in its normal condition. Third, the defibrinated blood of any species, transfused into an individual of the same species, can revivify that individual, compensating for loss of blood, fulfilling all the functions of the normal and primitive blood, and being subject to all its physiological laws. In the same way we can combat an alteration of the blood by exchanging it for that which is healthy. Fourth, the blood of animals of one species can revivify, if even in a transitory manner, animals of another species. Such blood is readily decomposed, and if it has been injected in small quantities it may be eliminated; if injected in large quantities, it may produce death. Fifth, transfusion well executed is not a dangerous operation. The practical dangers signified by the author lie in the introduction of foreign bodies with the blood, the formation of clots even in injecting the defibrinated blood, the introduction of air into the circulation, and the precipitation of the injection, and, finally, phlebitis, or inflammation of the inner membrane of the punctured vein.—*Harper's Magazine.*

LAY DELEGATION IN THE BRITISH CONFERENCE.—The question of lay delegation was brought up by the consideration of the address of the French Conference. That paper recommended the district meetings to thoroughly examine the subject of the representation of the laity. The following debate occurred upon it:

Dr. Osborn.—As far as lay delegation goes, I hope we shall forbear at present to give any distinct deliverance on the subject; but we may safely assure our brethren that all their representations will be affectionately and respectfully considered, and that such modifications of their system as they think necessary, and as we feel to be consistent with our duty, we shall be glad to consent to.

Mr. Hocart.—That is all we ask. The ex-president (Dr. Jobson) said that he fully subscribed to what Dr. Osborn had said. The phrase "lay delegation" was employed in reference to Methodism in different parts of the world in a way that was very misleading to some of their friends in this country. He was prepared to show that in the British Conference they had more full lay representation than there was in some other Conferences which made a boast of it. But they had better not raise that question. He would suggest to Dr. Osborn that instead of saying, "We will consent to such and such proposals," it would be better for them to say, "We will consider them."

Dr. Rigg.—If we were to say, "In accordance with the essential principles of Methodism," we should be safe.

Mr. Arthur.—The fact is that one word in two different places means two different things. If you take a Conference in which the laymen have had no official position whatever—no representation of any kind, as in the American Conference, where they have had nothing in the way of lay representation—of course the words "lay delegation" have a very different meaning from what they have here. In our Conference the laymen have a very considerable representation indeed.

BOOKS AND STATIONERY.

STANDARD EDUCATIONAL WORKS.

Gayot's Geographical Text-Books.

"Incomparably superior to anything published."—*Agassiz.*

Introduction to the Study of Geography.

Elementary Geography.

Intermediate Geography.

Common School Geography.

Gayot's System is approved and endorsed by the most distinguished literary and scientific men of our nation; such as Prof. Agassiz, Dana, Tenney, Henry and others, celebrated in science throughout Europe as well as at home.

The fact that one million (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New System, for no other series of books ever published in America have ever secured so rapid and extensive introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; Cincinnati, Cleveland, Columbus, Springfield, Toledo, Marietta, and most of the other important cities, numbering nine thousand schools in Ohio, and hundreds of towns and cities in the other Western States, while in the Southern States and California they are being extensively adopted.

Believing that the publication of Professor Gayot's series has marked a new, and better era in the presentation of geographical science, that it fits the pupils of this generation with a clearer, more definite and exact knowledge of the world on which they live, and that it is so systematized as to render that knowledge more valuable and permanent, we commend it to the attention of all interested in educational improvements and progress.

SCHOOLS AND COLLEGES.

FLORENCE WESLEYAN UNIVERSITY,

FLORENCE, ALABAMA.

W. H. ANDERSON, D. D., PRESIDENT.

This institution of learning, so widely known through the South, will begin its next session on WEDNESDAY, SEPTEMBER 14, 1870.

The Faculty is composed of men of experience and ability. The course of study is comprehensive, and includes the departments of Literature, Department of Biblical Literature and Commercial Department. The advantages of this University are seen in its healthful and attractive location, thorough course of study, excellent discipline, the character and success of its instructors, and the reasonable rates at which board and tuition are furnished.

Lectures in the ministry and sons of ministers are regular work, and admitted in relation on paying the incidental fees.

EXPENSES PER SESSION OF FIVE MONTHS.

Tuition in the University classes.....\$30 00

Tuition in Grammar School.....25 00

Tuition in Law Department.....40 00

Incidental fee.....2 00

(Tuition and incidental fee required in advance.)

Chemical fee, paid once.....5 00

Boarding can be had in the best families at from \$16 to \$20 per month.

For particulars see circular, or apply to the president, Rev. Dr. Anderson, or to Hon. W. H. Wood.

J23 ly GEO. W. FOSTER, President Board of Trustees.

TUSKEGEE FEMALE COLLEGE,

TUSKEGEE, ALABAMA.

The Fifteenth Annual Session begins SEPTEMBER 15, 1870, and continues forty weeks; divided into two equal terms.

REV. GEO. W. F. PRICE, M. A., President.

REV. B. H. ROSS, M. A., Professor of Latin and Mathematics.

DR. S. M. BARTLETT, Director of Music, with Nine Assistants in the various departments of instruction and discipline.

The president calls particular attention to the fact that Rev. B. H. Ross, of the Alabama Conference, has accepted the professorship of Latin and Mathematics in the institution.

Professor Ross is a graduate of Lagrange College, Alabama. He was professor of Mixed Mathematics in that institution for two years. Subsequently he was president of Talladega Female Institute. His classical education, his experience in the practical business of teaching, his acceptable career of liberal service, his many excellent personal traits, all entitle him to the unlimited confidence of our people.

The College has just closed its most successful year. Its prospects are never more flattering. The present organization of the institution combines all the best features for securing the thorough instruction and efficient discipline of its pupils. The Faculty contains none but tried and trained teachers, whose success has been tested by years of service. The boarding arrangements are under the immediate control of the president, who resides in the building, and supervises the social recreations of the students, and the duties of the pupils. The health of the girls is in charge of an experienced matron. The table, kitchen and laundry are in care of a thoroughly trained housekeeper. Miss Shiley, of Talladega, is the governess, and brings to the office high social position, and matured Christian character. The pupils are trained in gymnastic and calisthenic exercises, thereby developing their physical powers, strengthening their constitutions, and accustoming and adapting to their movements. Religion is the basis of the system of education, and girls are taught that "the truth is in Jesus" is the highest attainable wisdom.

NEW ORLEANS MARKETS.

From the N. O. Price Current.
We remarked in our last report that the supply of our leading staple, although limited, afforded some scope to buyers, and that a fair business had been done at stronger prices, showing a decided improvement on the rates current at the close of the old year, since which the course of the Liverpool and New York markets, under the news from the seat of war—showing an advance of $\frac{1}{2}$ to $\frac{1}{4}$ in the former and $\frac{1}{4}$ in the latter—has caused a further advance of $\frac{1}{2}$ to $\frac{1}{4}$. Flour and corn have been in request for Cuba, but with these exceptions the movement in Western produce has been confined to the local trade.

The weather has been clear and fine, and if it has been of a similar character in the country we may expect more favorable accounts. Thus far, however, the reports since the commencement of the year have been decidedly discouraging. From nearly all points come complaints of excessive rains, the lower growth rotting, injury from the boll worm, shedding, etc., to say nothing of damage to the open cotton, and early picking being prevented.

The river is thirteen feet four inches below high water mark.

Cotton.—The following are the arrivals since the second instant:

Louisiana and Mississippi... 1132
Mobile... 12
Texas... 1

Total... 1145

On Saturday the market opened with a fair inquiry, and before the receipt of the foreign news a moderate business was done—embracing a moiety of the whole—at about previous rates, but the subsequent transactions were at an irregular improvement of $\frac{1}{4}$ to $\frac{1}{2}$ and $\frac{1}{4}$ c., ordinary closing at 12 to 13 c., good ordinary at 15 c. to 15 c., and low middling at 17 c. to 17 c. The sales embraced 508 bales. On Monday the inquiry continued fair, and had factors met the demand freely at the previous advance a considerable business would have been done in proportion to the supply offering, but all desirable lists were held more stringently, and the sales did not exceed 466 bales, taken in small lots by seven buyers, at about previous rates. On Tuesday the market opened with a fair inquiry, and as factors met the demand rather more freely, 1,126 bales changed hands, partly at about previous rates, and partly at prices which would have been previously refused, not showing, however, any notable decline. Low middling sold at 17 c., strict low middling at 17 c., and several lots of middling at 18 c.

This makes an aggregate for the past three days of 2,100 bales.

Referring to our remarks above, we quote as follows:

Ordinary... 12 to 13
Good ordinary... 15 to 15
Low middling... 17 to 17
Middling... 18 to 18
Strict middling... 18 to 18

Flour.—Flour has been in good demand for export since our last semi-weekly review, with a scarcity of superfine, double and treble extra. There were sales on Saturday and Monday of 5,500 barrels.

Corn.—The supply is light and the demand is limited, although there is some inquiry for Cuba. The market is firmer, however.

Oats.—The supplies are light and prices are still firmer.

Wheat.—The supply is light and prices are firmer.

Money.—Gold, 113 $\frac{1}{2}$ to 114 $\frac{1}{2}$.

American silver half dollars, 110 $\frac{1}{2}$ to 111.

Mexican dollars nominal.

In bonds we notice sales of \$10,000

City ten per cents, on Monday, at 95,

and \$7,000 new City sevens, June coupon, at 71 $\frac{1}{2}$; and \$13,000 new City

sevens, on Tuesday, on private terms.

The sales of city certificates embrace

\$1,100 Fiscal Agency, on Saturday, at

84 $\frac{1}{2}$; \$700 do., on Monday, at 85, and

\$500 7-30s at 74 $\frac{1}{2}$; and \$2,000 former,

on Tuesday, at 84 $\frac{1}{2}$ to 85. Dealers

buy these in small sums across their

counters at 83 to 84, and City 7-30

certificates at 72 $\frac{1}{2}$ to 73 $\frac{1}{2}$, and sell the

former at 84 to 85, and the latter at 74

to 75. There have been considerable

sales of city securities; particulars all

suppressed.

City Treasury notes are quoted at 19

per cent. discount.

Special Notices.

To the Presiding Elders of the Mobile Conference.

DEAR BRETHREN: I am requested by Bishop McTear to give notice, through you, to all the colored preachers within your bounds, that their Annual Conference will convene at Selma, Alabama, on the twenty-fifth of November, and that they come up prepared with all the statistics, etc. Please interest your selves in this matter, that the Bishop may have a good showing from Alabama.

I would also respectfully request the preachers in charge of our circuits and stations (white) to interest themselves in this matter by informing the colored preachers of the time and place of holding the Conference, and adding them with their reports. The delegates to their Colored General Conference will be elected there.

G. S. FLETCHER, Supt. of Colored Work.

GADSDEN DISTRICT CONFERENCE.

The Gadsden District Conference will be held at Spring Creek camp ground, Cherokee county, Alabama, commencing September 21. Opening sermon on the twenty-eighth, at half-past seven o'clock P. M. Let every member be present.

A camp meeting will be held in connection with the Conference. Ministers in Alabama and Georgia are cordially invited. Let everybody come. Persons coming by steamer will get off at Cedar Bluff; the camp ground is five miles from there. The boat leaves Rome every Tuesday morning, and Gadsden on Wednesday morning, passing Cedar Bluff at three P. M. and ten P. M. T. G. SLAUGHTER, P. E.

TUSKALOOSA DIST. CONFERENCE.

The District Conference for the Tuscaloosa district will be held at Greensboro, commencing on Thursday, September 22, 1870. All official members of the church are entitled to seats in the conference.

JAS. L. COTTON, P. E.

CAMDEN DISTRICT CONFERENCE.

The Camden District Conference of the Alabama Conference will be held at Bellville, Alabama, October 6-9. Rev. M. J. Law will preach the opening sermon October 6, at eleven o'clock A. M. All are requested to be present at the opening services.

D. M. HEDSON, P. E.

PENSACOLA DIST. CONFERENCE.

The District Conference for the Pensacola district, Alabama Conference, will hold its annual session in Milton, Florida, beginning on Thursday, September 29, at eight o'clock A. M. Opening sermon by Rev. J. A. Pace, on Wednesday night, September 28. Ministers from abroad are expected and invited to attend.

J. A. PARKER, P. E.

CAMP MEETINGS.

A camp meeting will be held on the Philadelphia circuit, Mississippi Conference, at Pilgrim's Rest camp ground, twelve miles east of Philadelphia, Neshoba county, Mississippi, commencing on Thursday before the third Sabbath in October next. The preachers of the Brandon district and ministering brethren generally are invited.

The camp meeting is to be conducted on as primitive a style as possible, and all who live within reasonable distance are expected to come with tents or wagons, provided with nations, and to help support the meeting.

H. J. HARRIS, P. E.

N. B.—Ample accommodations for all who cannot come prepared to support themselves.

H. J. H.

A camp meeting will be held on the road from Greenwood to McNutt, one mile and a half north of Muntjoy's ferry, commencing on the sixth of October. Preachers and people are invited.

H. WILLIAMSON, P. C.

A camp meeting will be held at Salem, East Pascagoula and Bay Shore circuit, Mobile district, Mobile Conference, commencing on Thursday night before the second Sunday in October. Ministers and people are cordially invited to attend.

A. J. COLEMAN.

We will have a camp meeting (D. V.) at Frost's Bridge, on the Clark and Shubuta circuit of the late Mobile Conference, embracing the second Sunday in October. Brethren in the ministry, who can do so, are especially invited to attend, and any others who feel interested in this great work. Come over, Mr. Editor, and help us.

WILLIAMS, H. LINTH, Pastor.

A camp meeting will be held on Pleasant Hill and Mauney circuit, at Beulah, commencing on Friday evening, the thirtieth of September. Preachers will please note it.

JAMES PIERCE.

A camp meeting will be held at Linwood, DeKalb circuit, Macon district, Mobile Conference, commencing on Thursday night before the fourth Sunday in September.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, SEPTEMBER 17, 1870.

NO. 35.

NEWS OF THE WEEK.

DOMESTIC.

WASHINGTON, Sept. 8.—Stephen C. Rowan has been appointed vice admiral United States navy, vice Porter, promoted.

A United States steamer passed through the Suez Canal.

WASHINGTON, Sept. 8.—Advices from Australia, New South Wales, report that the iron ship Parleigh Castle is supposed to have foundered at sea, with the loss of all hands.

The government promises to subsidize the present California mail steamship service.

The international conference to invite customs to the union scheme has resolved to urge British protection over the Fejee islands.

Mr. Ashworth is the only survivor of the seven men who attempted to recover gold from the wreck of the ship General Grant. The other six were drowned.

Advices from Melbourne say that Supple, a barrister, has been convicted of murder.

The Parliament of Victoria has been prorogued.

The government refuses to subsidize Webb's line.

Great discoveries of gold have been made in Australia, and immensely rich quartz reefs have been discovered in the northern districts of Colton.

The harvest is large, and the sugar crop satisfactory.

New York, Sept. 13.—The steamship Bienville from Havana has been quarantined. The Board of Health report yellow fever aboard seven vessels, all from Cuban infected ports, at quarantine.

GALVESTON, Sept. 14.—Strict quarantine goes into effect to-day. All vessels leaving New Orleans or Brazos City after three P. M. to-day will be quarantined twenty-five days. The following articles will be allowed to be landed at Quarantine Station without delay: Mail matter, hardware, agricultural implements (not boxed), sugar, coffee, flour, crackers, molasses, liquors, bacon, lard, salted provisions, corn, oats and hay.

FOREIGN.

COPENHAGEN, Sept. 7.—There have been no serious demonstrations by the fleet since the affair at Colberg, where the Prussians hoisted the hospital flag, and many ladies crowded the pier. Hence the admiral refused to fire.

The news of the capitulation and the inauguration of the republic caused some disturbances.

Pantheon's appointment as naval minister was well received, and it imparts a fresh hope. The squadron will now receive practicable orders or be recalled.

Dispatches have been forwarded ordering all squadrons to rendezvous at Langeland, to arrive on Saturday, the tenth, and await instructions.

Since the above was written, it is believed that one division of the fleet has been ordered home, and that it has passed the Straits of Dover.

LONDON, Sept. 8.—Copenhagen advices indicate that the Baltic fleet unanimously accepts the republic.

HAVRE, Sept. 8.—Martial law has been proclaimed here.

PARIS, Sept. 8.—A new corps, called the Guardians of the Peace, has been organized.

Mr. Washburne has written a letter announcing his authorization to recognize the republic, offering the congratulations of the American government and people, who bear with enthusiasm the proclamation of a republic unattended with bloodshed, and their sympathy with the great movement, which is big with results and happiness for France and mankind. The letter, after recalling the traditional friendship of the two countries, congratulates France upon the choice of Jules Favre as her foreign minister.

LONDON, Sept. 10.—Olozaga is tempting vainly to mediate. He insists upon the integrity of French soil.

It is said that Victor Emmanuel's precautions are so perfect that the Pope cannot escape from Rome.

BERLIN, Sept. 10.—The King writing to the Queen, describing his emotions upon meeting the French Emperor, says: "It was overwhelming for a moment. I could not control myself on thus meeting him whom, three years ago, I saw at the summit of grandeur. The Emperor was equally moved."

PARIS, Sept. 12.—Orders have been issued for fortifications at Havre, Marseilles, Dunkirk and other points—French men-of-war to

be fully manned and held ready to sail at a moment's notice.

It is officially announced that M. Thiers departs immediately for London, St. Petersburg and Vienna, on a secret mission.

The Prussians were at Melun last night.

Rumors of an armistice are on the increase.

The diplomatic corps have concluded to defer their departure from the city.

BERLIN, Sept. 12.—There is great sensation about the dispatch from the American government to Minister Baneroft, expressing the hope that there would now be a cessation of the war, in view of the fact that by its aid the dethronement of Napoleon had been accomplished.

The dispatch has been sent to King William by a special messenger.

MANNING, Sept. 12.—Demonstrations of sympathy for the French continue in the northern provinces. The Republicans here have signed an address demanding the convocation of the Cortes.

BERLIN, Sept. 12.—The following, dated Sunday night, was received to-day by the Queen from King William: "The citadel of Laon was exploded after the surrender, just as the Prussians were preparing to enter the city. Three hundred and fifty men were killed, including two hundred of the Garde Mobile. Many of them were shockingly mutilated. There must have been treason."

BURSA, Sept. 12, 4 P. M.—Italy, Austria and Russia have agreed and authorized Russia to ask Prussia for an armistice. A dispatch to this effect has been sent to Berlin. No reply as yet.

LORD LYONS has resigned the task of mediating between France and Prussia in favor of Olozaga, Spanish minister.

LONDON, Sept. 12.—The telegrams from the seat of war in the papers here are a perfect chaos of contradictory statements. The reports forwarded to the New York papers are mainly correct.

Private telegrams are refused in Paris.

The Times says Paris has been

enraged by military dictators.

The Times' Paris correspondent says Paris will certainly make a stubborn resistance if besieged.

Esquires, bearing two corsairs, passed through the Straits of Gibraltar.

Preparations for an attack have been ordered.

Twenty thousand volunteers left here yesterday for Paris.

BERLIN, Sept. 12.—The official report of the capitulation of Sedan states the total number of prisoners to be one hundred and twenty-two thousand.

The number of wounded has been reduced since the reopening of the railways, and all the dead in the fields and around the city buried.

LONDON, Sept. 12.—The latest advices from China state the condition of affairs at Tientsin was unsatisfactory. The Chinese were violent and were concentrating troops there.

The project for laying another telegraphic cable from England to America is announced.

There are no tidings of the crew of the ship which was wrecked on Goodwin Sands last week. Her cargo consisted of tobacco.

LONDON, Sept. 12.—Agents are here from Berlin, seeking to place a Prussian loan on the market.

The incessant brings the news of the loss of the Captain. Before sailing the Captain narrowly escaped destruction by fire. The picking of her feed pipe ignited and the fire had made considerable progress before it was discovered, and was extinguished with difficulty.

During the gale one of her heavy guns got loose, and in consequence of the tremendous rolling of the ship and suddenly swinging around, struck a gunner, killing him instantly.

The Shipping Gazette demands a strict investigation, and says the British government should know how one of her staunchest vessels had foundered in weather which colliers might have outlived.

New York, Sept. 12.—It is believed here, from telegrams from Europe, that the position of the United States is not understood in Europe. The only official dispatch from this government relative to the war was sent on Friday last, addressed to Minister Baneroft, with copies to Ministers Washburne and Motley, the substance of which, ascertained from an altogether reliable source, was this: "While we cannot act in connection with other nations, yet if our good offices were requested by both belligerents, we should be happy to extend them,

with a view of bringing about peace between two great powers with which we have traditional friendship."

"This government will scrupulously abstain from interfering with the affairs of foreign nations, if for no other reason, because it would set an example or afford a pretext for interference hereafter with our own; hence it expresses no opinion as to the merits of the war."

The dispatch to Baneroft was carefully worded, so as to leave no doubt of our carefully abstaining from foreign alliances to belligerents, while we are always ready to exercise the offices of friendship when specially desired by nations at war.

YOKOHAMA, Sept. 12.—The European war is detrimental to business here. The silk market is lifeless.

The steamer City of Yeddo exploded her boiler at Yeddo on the first of August, killing Rev. Edward Barnes, Mrs. Adelia Barnes, Edward D. Barnes, Mary Simmons, V. Cassidy and a number of Japanese, and injuring many others. The jury of inquest found a verdict of gross carelessness of the engineer.

The steamer Higo also exploded her boiler at Osaka, killing four Japanese and wounding fifteen or twenty others.

LONDON, Sept. 13.—Count Beernstorff, Prussian ambassador, has been in consultation with Earl Granville, at Wilmar Castle, since Saturday. Both came to London to-day.

Thiers and Granville are now (3.30 P. M.) consulting at the French embassy.

It is rumored on the streets that Metz has surrendered unconditionally. The Prussian embassy credit the rumor, but have no official advices.

Owing to the unsatisfactory mail arrangements, bills from America are constantly protested. Letters of advice, coming by slower vessels, arrive too late.

The Times says if the terms proposed by M. Thiers are at all reasonable England will back them.

Advices from China, through Russia, are unfavorable. The Chinese are preparing for war, and further outrages have been committed on missionaries.

The ship wrecked on Goodwin Sands is still unidentified. The letter O can be seen on the stern, and tobacco casks marked with letter G in a diamond, with the letter H underneath, have been picked up. The ship was evidently from an American port.

PARIS, Sept. 13.—It is said the main body of the Prussians reached a point within twenty-eight miles of Paris yesterday afternoon.

ROME, Sept. 13.—There are immense posters on the dead walls proclaiming a universal Italian republic. It is signed by the Republican Revolutionary Committee.

LONDON, Sept. 13.—The steamship Napoleon is transferring refugees to England.

Inquiry is now progressing at Paris regarding the distribution of the immense secret service fund under the Emperor.

Queen Isabella and Prince Asturias are in Belgium.

LONDON, Sept. 14.—In the diplomatic circles of this city the mission of Thiers is deemed a complete failure, so far as relates to the application for a stay of hostilities.

BERLIN, Sept. 14.—The catastrophe at Laon increases the ill-feeling against the French. The act is considered barbarous and opposed to all modern warfare, and may lead to similar acts on the part of the Germans.

MONTMORÉAN, Sept. 14.—An engagement between the Uhlans and French tirailleurs took place, during which the former were repulsed with loss.

LONDON, Sept. 14.—Advices from Strasbourg are to the effect that the heroic defense is drawing to a close, and that surrender is imminent, occasioned by the failure of ammunition and provisions.

LONDON, Sept. 14.—The Paris correspondent of the New York Times, writing yesterday, says: I am convinced we shall soon have peace. Republicans now say openly peace must be had at any price. One who has intimate relations with the government tells me to-day that, cost what it may, peace will be made at once, as the only way of saving the republic. Franco-American fraternization is culminating into extravagances. Mr. Washburne is the hero of the hour. The Avenue de l'Impératrice is to be changed to Avenue des Etats Unis.

ROME, via Paris, Sept. 14.—The Pope has decided not to go to Malta. He has protested formally to the diplomatic body against the inva-

sion of Roman territory by the Italian troops.

LONDON, Sept. 14.—If the Prussian plans have been realized, they must have seven army corps before Paris this morning.

The French and German fleets are in sight of each other near the Island of Heligoland.

FLORENCE, September 14.—It has been officially announced that the papal troops evacuated the town of Terricina upon the approach of the Italians, with whom they fraternized.

General Cadornas' advance is at Civita Vecchia.

The Papal Zouaves at Castellana fired upon the Italians. A fight ensued, which lasted an hour; when the Zouaves surrendered.

The papal troops have evacuated Frosinone.

The Italians hold Corneto, twelve miles from Civita Vecchia. The fourth corps is marching upon Rome.

LONDON, Sept. 14.—The Irish mail train, mostly composed of passenger cars, was thrown into the river Trent at Tanworth, Wales, by a misplaced switch. The loss of life was fearful.

NEW YORK, Sept. 15.—Berlin telegrams say that Prussia seeks the restoration of the regency, with which to treat for peace, after the capture of Paris.

Anxiety in government circles in England is increasing, and it is rumored that Parliament will be convened in October.

The gates of Paris were closed last night, and passports are now required.

The work of the destruction of impeding obstacles to military operations in the suburbs and neighborhood of Paris still goes on. The St. Cloud bridge has been destroyed, that at Neuilly has been mined, and many buildings in St. Denis have been burned. Efforts are being made to establish grapevine telegraphs.

Paris will probably be completely surrounded by the Prussians by the end of the current week. All the English and Germans have been ordered to leave the city.

THE TIENTSIN MASSACRE.

MR. EDITOR: For several months rumors have prevailed all through the country to the effect that foreigners are engaged kidnapping children, for the purpose of seeping out their eyes and using them, together with other parts of the body, for the manufacture of some mysterious and stupefying medicines; but not until the twenty-first of June did the popular irritation, which has been so long manifest, ultimate in anything more serious than boisterous threats and anonymous placards, calling upon the people to arise and exterminate foreigners. At the above date, however, the popular excitement reached its climax, and Tientsin became the scene of a most startling and horrible massacre, attended with the destruction, by fire and violence, of every Roman Catholic and Protestant house of worship in the city.

The following is a list of the murdered:

The French consul, who called on the Mandarins for assistance against the mob, and was killed at the Yunnan—cut to pieces. The consul's secretary—remains hardly recognizable. M. Thomasin, secretary of French legation, Peking; he had just arrived the day previous from Shanghai en route to Peking, and was being entertained by the consul—remains presented a horrible sight. Madame Thomasin, wife of the above—skull smashed in. M. Chalmisson, merchant—shockingly mutilated, eyes plucked out. Madame Chalmisson, wife of the above—barely recognizable, horribly cut up. A priest, just recognizable. Ten Sisters of Charity; these were first stripped to see whether they were men or women, their breasts cut off, stomachs ripped up, and their bodies then thrown into the burning house; the remains of only four were recovered, all that remained being heaps of charred flesh and bones. Two priests are missing, whether dead or alive not known. Two Russian gentlemen and one lady were murdered on the public streets, and when found were pure nude. Most of the above were recovered from the river as their bodies floated past the foreign shipping.

We have rumors that other massacres of both foreigners and native converts have taken place some distance back from Tientsin, but hope they will not be verified.

The following is a list of property destroyed:

The French consulate, burned; the Roman Catholic cathedral, burned; the hospital and home of the Sisters, burned; the Roman Catholic school premises, burned; the Jesuit Mission premises, together with all the English and American places of worship in the city, were demolished, but not burned.

From the above you will see that the Roman Catholics were the chief sufferers, which is accounted for by the fact that they were known to have in their charge several thousands of children.

At Nankin, about the same time, there was an attempt to create a similar demonstration against the few foreigners there, but fortunately their purpose was frustrated by the timely appearance of the city of French and English gunboats.

The origin of these troubles (at least intelligent natives, who share no sympathy with the popular view, so explain them in our Chinese newspapers) is as follows: In every city there are hundreds of brothels, the occupants of every one of which have either been purchased direct from their parents or kidnapped. Indeed, between them and the kidnappers there is a flourishing business; hence everywhere these latter may be met with, prosecuting their nefarious work. This every Chinaman knows, and knows it to have been so long before foreigners resided in China at all. But notwithstanding all this, kidnapping is forbidden by law, and any one caught and found guilty is liable to *thung*, or be *stuck to death* in the upright cage, or decapitated. Now, recently several such persons have been captured, and under circumstances so palpable that they could not evade the penalty, except by implicating foreigners, which they were the more encouraged to do because they knew the mandarins would be thrown into a mortal funk thereby, and release them from fear of a collision.

Thenters also encourage a traffic in male children, and great numbers of boys are regularly collected for sale to them, even in the very capital.

Such being the case, and every parent having the right to dispose of his or her children, or purchase others, it is not difficult to discover or understand that such a traffic exists, and that kidnapping flourishes by reason of its more liberal prices, as compared with those demanded by parents.

A four-year old girl, if prepossessing in person, is worth about \$25; a young lady, from \$200 to \$500.

I have already, through the medium of the Chinese newspapers, called the attention of the natives to the fact that the slight estimate set on female children by their parents, and the great facility which exists for disposing of them, not only encourages and sustains prostitution, but promotes slavery. (slaves in China are nearly all female,) and, as a matter of course, kidnapping, which latter is always, though falsely, urged against foreigners as their gravest offense. In the above view I am sustained by numerous intelligent literary and honorable men, who believe that the low estimate in which female children are held by their countrymen is the source of many and widespread evils, indeed a curse to their country.

What will be done toward redress in the matter of the Tientsin massacre is not yet known. The French minister telegraphed immediately, via Mongolia and Russia, to France for instructions, but as yet nothing has transpired. All is now quiet at Tientsin. Immediately on receipt of the above horrible intelligence the instincts of humanity prompted the Protestant clergy and missionaries of Shanghai to address a letter of sympathy to the Catholic Board of Foreign Missions at this place, a copy of which I herewith inclose, together with their reply.

YOUNG J. ALLEN.
SHANGHAI, CHINA, July 11, 1870.

We, the undersigned Protestant clergymen and missionaries residing at Shanghai, lose no time in writing to assure you of our profound and sincere sympathy on the present occasion. At a time like this one unanimous feeling of common sorrow fills our hearts. The loss of the devoted men and women, who have been so barbarously sacrificed at Tientsin, is a loss to all Christendom.

Deep and terrible, however, as is the calamity, we cling to the promise of our Lord Jesus Christ, that he will be with his people to the end of the world; and we are comforted by the teaching of ecclesiastical history, which assures us that "the blood of martyrs is the seed of the church."

We pray that full reparation for the past, and better protection for the future, may be secured for those engaged in the spread of religion throughout the Chinese empire.

SHANGHAI, July 5, 1870.

(Signed) Thomas McClatchie, M. A., canon of St. John's cathedral, Hong-kong, and missionary of the Church Missionary Society.

Charles Henry Butcher, M. A., canon of St. John's cathedral, Hong-kong, British consular chaplain, Shanghai.

William Muirhead, George S. Owen, James Thomas, members of the London mission.

J. W. Lambuth, Young J. Allen, members of the Southern Methodist Episcopal Church mission, U. S. A. J. M. W. Farnham, American Presbyterian mission.

Karl Kreyer, Robert Nelson, Presbyter Am. P. Epis. Miss., Shanghai.

E. W. Syle, Seamen's chaplain.

John Wherry, American Presbyterian mission, Shanghai.

To the Clergymen and Members of the Protestant Missions, residing at Shanghai:

GENTLEMEN: In reply to the letter which you have had the goodness to address to us jointly, yesterday, we have the honor to inform you how far we have been moved by the token of your sympathy, and how far again we have appreciated the high sentiments on your part that prompted it. Your mark of sympathy has been a double pleasure to us, since we had been painfully grieved by some correspondence published in the papers, the character of which is not less to be deplored for the falseness of the recital than for the ill-will displayed and for the insinuations contained. We might have immediately re-established the truth against perversion, and justified innocence over calumny; but trusting to the sound common sense of the public, and feeling sure that truth must come out under any circumstances, we had preferred keeping silence.

However bitter is our sorrow, yet it is no small consolation for us when we reflect that God, who ever knows how to bring good out of evil, knows also how to change for his greatest glory these present lamentable occurrences, so saddening to every upright heart. No doubt the blood of so many innocent victims, so barbarously shed, must rise up to the altar of the Lamb, and cry loud on our behalf, till it obtains for us the sole vengeance we wish for, viz: the better spread of the true light on these people, now living under the shadow of death; the greater freedom for the better exercise of works of charity toward the suffering, and principally toward the little ones who were, for our divine Saviour, objects of such singular affection.

(Signed) A. AYMERI, Pretre Lazariste. H. BASULAT, S. J. E. LEMONNIER, Procureur of Mission Etrangere. Nashville Christian Advocate.

IN HIS address to the candidates for ordination at the recent Wesleyan Conference, Dr. Johnson took occasion to encourage the young men to take time for their preaching. He said:

"I would not have you extend your time when you have nothing to say, or when you must repeat, or iterate platitudes. Stop when you are done. But take time to say what you have to say, if you have anything to say. I never knew a really impressive and powerful preacher who had not times of inspiration and enlargement—making some of his sermons long as to time, but not wearisome in effect. The twenty minutes' or half-hour sermon is often as feeble as it is short. The small, smart, peddling essay, instead of a sermon, is becoming very fashionable in some pulpits. Men are liable, now-a-days, to mistake shallowness for clearness, and obscurity for depth. The preacher's business is to save—and, O, have something to say of Christ, and say it with vigor and from the center of your soul."

SOME of the Chinese in California make money by cutting up silver coin, coloring it yellow, and selling it with gold-dust. The secret lies in the process of coloring the coin to escape detection.

MR. ALBERT DUBUY, son of the French ex-minister of public instruction, has enlisted as a private in the ranks of the Turcos.

PARISIAN women suspend hideous looking toads and frogs and various insects by one leg from their ears and call it ornamental.

The Christian Advocate.

SATURDAY, SEPTEMBER 17, 1870.

WALKING WITH GOD.

How happy he who walks with God
While wandering through this vale of tears!
How brightly gleams the narrow road!
What precious words the pilgrim hears!

God speaks to him in promise sweet;
He talks with God along the way.
As friends in earnest counsel meet,
While peace divinely glides the day.

In trials' hour, in sorrow's night,
He feels a heavenly presence near,
A smile whose luster brings delight,
A hand that wipes each rising tear.

The pilgrim feeds on angels' fare;
He drinks where living waters flow;
When weak is strong, 'mid pain and care,
He feels his heaven begun below.

Death is translation—death is life.
Faith sees the new-dedged spirit rise
Far, far above earth's sin and strife,
To meet her God above the skies.

American Messenger.

THE GLORY OF METHODISM.

MR. EDITOR: It is common to meet the above expression in the deliverances of even great and good men; yet I beg leave to protest—modestly I trust—against it, as frequently used. Doubtless there is something like glory belonging to Methodism, but it is a very questionable thing, as often understood. For instance: "The glory of Methodism is her class meetings," said one; others affirmed her glory to consist in "her grand system of itinerancy;" some have found it in the exceeding cheapness of the gospel she preaches; and others still in something else belonging to her church polity.

Now all this sounds strangely like worldly sentiment; it smacks of politics, armies and the great interests of worldly pleasure and ambition. In nearly everything that is styled "the glory of Methodism" we have, strangely enough, some mean or method of human origin intended only to accomplish something; which something is, with equal strangeness, seldom referred to as having anything to do with Methodist glory!

With due respect to those who, carelessly perhaps, use this expression in this way, I suggest that if Methodism has any glory, it is not in any one or all of these together. Neither the itinerancy, the inexpensive ministerial service, the class, camp or protracted meetings have in them anything to justify all this glorification. They are of human origin—wise, I admit, but still only human—and therefore not a legitimate ground of boast in a Christian church. If mere human plans, however successful, may become the glory of a church, then impartial readers will allow to Romanism a bright and imperishable glory, eclipsing even that of Methodism; for, with the heaviest burdens that a church can bear, she has marched around the world with the tread of a giant, and planted her standard in every land on the globe!

Now I admit that there is a peculiar excellency in Methodism, which now crowns and ever will crown her with a wondrous glory; but that consists in the fact that she has accepted from her Lord, and is earnestly striving to perform the work of carrying the Bible to every mortal she can reach, and thus spreading scriptural holiness over the earth! How she may do this, what means she may use, or what methods adopt, are of secondary importance. The itinerancy, class meetings, revivals, etc., have been, and still are, the divinely blessed methods by which she has accomplished what she has of this great work; and they should be duly prized as such; but they are no more entitled to be considered the glory of Methodism than has the material cross on which the Lamb was offered, to be called the glory of redemption. The means are not the end. Such expressions, however, as those against which I protest, are apt to and certainly do turn our thoughts from the real excellency and work of Methodism; and by fixing too high an estimate on the means, teach us to undervalue and perhaps forget the really glorious end!

Moreover, they tend to exalt the means into such a degree of importance, that, in fearing to innovate upon them, we may incur the dan-

ger—perhaps not now, but ultimately—of sacrificing the end to retain the means! We may become so impressed with the importance and dignity (?) of some one or more of our useful servants, as that we will refuse to replace them with other and more effective ones for the work of the future. I do not say that any of these valuable means should be sacrificed, or even altered, because of any indication of present necessity; nor am I so fond of young Americanism as to lay irreverent and destructive hands on any well-tried principle of church polity simply because it is old. Nay, nay! But while I would guard against the love of change that runs wild, and destroys all it seeks to mend, I would as carefully avoid everything that exalts, or tends to exalt, the means above the end. I would cherish and teach the doctrine that Methodism, having a great end to accomplish, is ready and determined to reach that end by any and all lawful means available, even if the contingencies of the future should necessitate the sacrifice of old means and the adoption of new ones!

If this is cherished as the fixed purpose of the Methodist Church—and I believe it still is by the majority of her communicants—then will she never forget her mission, but will steadily work to that glorious end when, having opened the Bible to every tribe, she shall, by the mercy of God, possess her laurels forever, and enjoy in heaven the imperishable glory of divine approbation.

THE SOUTHERN UNIVERSITY.

COMMENCEMENT EXERCISES.

MR. EDITOR: Some notice of this institution should find a place in your columns. On Sabbath morning, July 3, the commencement sermon was preached by Rev. A. S. Andrews, D. D. At night we heard a sermon from Dr. J. Hamilton, the agent of the University.

On Monday the exercises of commencement, strictly speaking, began. The trustees met to look after the interest of the University. From what we can learn measures were adopted which showed a determination to advance; and from indications they will advance—humanly speaking—in increased patronage, in financial resources, and in securing the approbation of the public. Advance will be made in the various schools of the University, and there will be no falling behind the advancing educational interests of this rapidly developing country.

On Monday, too, the Society of Alumni held its annual meeting. Among other important measures adopted (and one most important to the public—better to say repulsive) was a resolution to the effect that a silver cup be presented by the society to the eldest son of every member of the same; which cup is to be called the "Summers' Cup," in honor of the grandson of Dr. T. O. Summers. This measure is retrospective only so far as specially to include the young gentleman for whom it was named. William Walker, A. M., of New Orleans, was elected alternate to Mr. T. W. Dyer, A. M., of the same city, who is the regularly elected speaker for the next commencement.

On Monday night the Belles Lettres Society exhibited. Four speakers delivered orations, very creditably representing their fraternity.

On Tuesday night the exhibition of the Clariocopic Society came off. There were four speakers. The speeches were not well committed, and repeated reference to the manuscripts detracted much from the interest of the evening. Two of the young gentlemen acquitted themselves satisfactorily to their friends. The students did not succeed in securing suitable music, and dispensed with it altogether. It would have added much to the pleasure of the audience.

On Wednesday morning the graduates delivered orations. After these speeches were delivered several students, who had passed approved examinations on the course of study in particular schools of the University, received certificates of grad-

uation in those schools. Mr. Peterson then received his diploma, and was accredited a bachelor of arts. Rev. T. O. Summers, Jr., who graduated with the A. B. degree three years ago, passed an approved examination on the remainder of the A. M. course a few days before commencement. Mr. Summers and Mr. Jones then received diplomas, and were accredited masters of arts.

Mr. Peterson will remain at the University next session to study theology and to complete the course requisite for the master's degree. After that time he intends entering the itinerancy.

The baccalaureate was then delivered by Dr. Wadsworth, the chairman of the faculty. It was appropriate, and abounded in good sense, good advice and rhetorical finish.

Colonel Joseph W. Taylor, president of the Board of Trustees, made some official announcements respecting the action of the board and the condition of the University. He assured the audience that the Southern University was so solvent that an individual possessing her assets would have an independent fortune. So confident was he of her triumph over all obstacles, and of her complete accomplishment of her mission, that he could most safely affirm: "The Southern University is not dead, and shall not die." The regular exercises of the University will begin on the first Monday in October next, under the same faculty, and with brighter prospects. The appropriate prayers were offered and benedictions pronounced on these several occasions.

On Wednesday the festivities closed with the commencement party, and there was a most magnificent array of Southern beauty, loveliness and intelligence. The table was sumptuously supplied and tastefully arranged. It was in every respect, as is always the case there, elegantly gotten up. And who shall object to such parties? The weather was very favorable during the several days of commencement, and the whole thing was felicitous.

VISITOR.

THE SUNDAY SCHOOLS.

MR. EDITOR: I notice in the last number of the Advocate quite a long article, under the head of "Sunday School Legislation," in regard to the "appointment of Sunday school superintendents."

As this subject is eliciting much interest from our church, and justly demands some satisfactory solution by our church authority, I thought of giving some expression to my views respecting so important a matter. The primary object of all Sunday schools should be to give religious instruction to children; and to that purpose the church should employ the very best material at her command. That upright, exemplary men and women should be teachers of such schools is well; but that a pious, devoted Christian gentleman should be superintendent is of the first importance to the success of all Sunday schools. Such schools should not be independent of church government, but should be closely identified with and controlled by the churches organizing them; in fact they should be a part of and auxiliary to such churches; and in order to make them more effective to that end they should have a superintendent thoroughly acquainted with and deeply devoted to the church controlling such schools. I think the Discipline of the Methodist Episcopal Church South contemplates this view.

Now as to the appointment of a superintendent of a Sunday school in that church, I should prefer to have him nominated by the preacher in charge and elected by the quarterly conference. This seems to me not only the simplest way, but one that will secure for the Sunday school the person best qualified to fill the office of superintendent.

The preacher in charge, by visiting and conversing with the members of his church, can easily ascertain who among them is competent and worthy to be intrusted with the religious training of children; and having a zeal for Christ, he naturally will desire to have "little chil-

dren come unto Him;" and the quarterly conference, sharing with their pastor such feelings, would confer upon the Sunday school the expression of their best wishes, connected with their best efforts, to meet the requirements of the Sabbath school under their charge. Such, Mr. Editor, are my views; but I should like to have those of other members of our church, in order to secure the best method of obtaining for our Sabbath schools the man best qualified to advance the kingdom of our Redeemer upon earth. Yours in the love of Christ,

W. H. WORTHINGTON.

LEOTA, MISS., SEPT. 6, 1870.

YAZOO DISTRICT CONFERENCE.

MR. EDITOR: The Yazoo District Conference, North Mississippi Conference, met at Richland, September 1, 1870. The presiding elder, W. P. Barton, took the chair and organized the conference. On the second day Bishop J. C. Keener arrived, and presided with acceptability to the close of the session.

The various interests of the church were inquired into. Some encouraging reports were made upon class meetings and the other social meetings of the church. Finances and church property are rather gloomy. The pastors of the district generally were present. One was detained on account of family affliction; another from the pressing demands of his work.

The preaching was of a highly intellectual character, and some spiritual power. No revival and no conversions. The love-feast on Sunday morning was a happy season.

The following resolutions were passed:

Resolved, That it is the judgment of this conference that the preachers should exert their utmost energies, and that the laymen should actively co-operate with them, in reviving class meetings and family religion in our charge; and we do hereby pledge ourselves to use our endeavors to re-establish class meetings, prayer meetings and family religion in our respective fields.

Resolved, That we recommend the adoption, by the North Mississippi Conference, of a system of Methodist common schools, under the supervision of the quarterly conferences, which shall appoint three school directors for each pastoral charge, who shall have power to employ and discharge teachers, and provide for their payment out of such funds as they can raise by moderate tuition fees, supplemented, if need be, by an ad valorem tax on the members of the charge in which the school or schools are located.

Resolved, That we recommend the establishment of a district high school, under the direction and control of the District Conference.

Resolved, That the Yazoo District Conference indorse the proposition made by the lay delegation at the Mississippi Annual Conference, held in Jackson, Mississippi, December 8-15, 1869, touching the promotion of educational societies and for the purpose of collecting money for the education of indigent young men for the ministry.

Resolved, That we do hereby return our cordial thanks to the citizens of Richland and vicinity for their kindness and Christian hospitality to us during this session of our District Conference.

Resolved, That the above resolutions be furnished to the NEW ORLEANS CHRISTIAN ADVOCATE and the Western Methodist for publication.

JOS. D. NEWSOM, Secy.

WOODVILLE DIST. CONFERENCE.

MR. EDITOR: At the Woodville District Conference, recently held in Liberty, Mississippi, the following named brethren were elected delegates to the Mississippi Annual Conference, to wit: L. G. Chapman, L. K. Barber, Rev. J. E. Jagers and W. A. Tarver. The reserve are: Rev. John Sample, W. G. Longmire, H. C. Newsom and John Cassels.

JAS. A. GODFREY.

LIBERTY, MISS., SEPT. 5, 1870.

THISTLES IN THE HEART.—Bad habits are the thistles of the heart, and every indulgence in them is a seed from which will spring a new crop of weeds.

A few years ago a little boy told his first falsehood. It was a little solitary thistle seed, and no eye but God's saw him plant it in the lowly soil of his heart. But it sprang up, oh, how quickly, and in a little time another, each in its turn bearing more seed and more thistles. And now his heart is overgrown with this bad habit.

NEWS FROM THE CHURCHES.

SHUBUTA, MISSISSIPPI.

MR. EDITOR: We have been enjoying a season of refreshing from the presence of the Lord at Chapman's school house, on Clark and Shubuta circuit, for nearly a week past. I left about twenty penitents at the altar last night. Great grace rests upon the congregation, and still the blessed work goes on. We anticipate great things at our camp meeting.

Very respectfully,

WILL. H. LEITH, Pastor.

SHUBUTA, MISS., SEPT. 1, 1870.

SOUTH BUTLER, ALABAMA.

MR. EDITOR: The Lord has been doing great things for us over here, whereof we are glad. We have just closed a protracted meeting at Good Hope. The power of the Lord was manifest on every side in the awakening of sinners, in the conversion of mourners, in the reclaiming of many backsliders, and the general building up of the church.

I am not able to tell how many were converted, but thirty joined the church on profession of faith, and three by letter. The meeting was carried on by Brothers T. W. and A. M. L. Douglas, assisted by Brother W. Watson and Brother Graham, all local preachers. Pray that the Lord may continue to bless us. Yours, etc., C. B. P.

SOUTH BUTLER, ALA., AUG. 5, 1870.

MR. EDITOR: We have just closed a very interesting and profitable meeting at Byram station, resulting in the accession of eighteen members to the church and several conversions.

Our third quarterly conference for the circuit came off on the twenty-seventh and twenty-eighth ultimo, and was protracted to the following Thursday evening. Our presiding elder remained with us until Wednesday evening, doing all the preaching during his stay—giving universal satisfaction. This is the third protracted meeting we have held on the work, and will be the last, perhaps, as there are but three appointments on the work now. The result has been grand and glorious, considering the prospect at the beginning of the year. It should be a source of gratification to every lover of Zion. The meeting at Forest Hill, which has already been reported, and the meeting at Spring Ridge, gave an increase of eighty-seven members to the church. At the three appointments there has been an increase of one hundred and ten members during the year, and one hundred and five of these received at our recent revivals. There were ninety-six members on the work when I came to it; now there are two hundred and six. And I think there has been a genuine revival influence at work, which bids fair for a permanent and substantial increase to the church in this community. I think the material mostly good. "The Lord hath done great things for us, whereof we are glad."

JULIUS T. CURTIS.

MISSISSIPPI SPRINGS, SEPT. 5, 1870.

PREYENVILLE CHAPEL, MONROVILLE CIRCUIT, ALABAMA.

MR. EDITOR: I beg a short space in your excellent paper to say, for the encouragement of its many readers, that I have just closed one of the most gracious meetings that I have had the privilege to attend since the close of the war. I have attended meetings where more were added to the church, but I never saw a greater display of God's power in the conversion of souls. It brought to mind the sweet reminiscences of former days—the days of primitive Methodism—yes, the days of my childhood, when people were not afraid nor ashamed to shout. Just twenty years ago I was on this circuit. Many were added to the church then at this chapel; since that time war, dissipation, death and sins of all descriptions have brought the saddest desolation upon the old chapel.

On my return I found but very few of the old veterans of the cross, and they seemed to be care-worn and weather-beaten, almost ready to sink under the weight of years; and when I returned and saw the old tottering pillars who had been faithful and upheld the old chapel so

long, and so nearly ready to give way, I felt greatly alarmed, and went to work in good earnest to get new props, or she would fall, and perhaps forever! And thank God he has blessed my labors, answered my prayers, and sons and daughters have been born unto God, and have rallied to her support.

The meeting commenced on the nineteenth and closed on the twenty-third of August. The presiding elder, D. M. Hudson, was with us on Saturday and Sunday. He held his quarterly conference. He preached with unusual zeal, and regretted he could not remain with us longer.

The meeting resulted in twenty-three conversions and twenty-nine accessions to the church, and the church greatly revived. We feel under many obligations to Brothers William Walker, D. J. Wright and George Watson for their valuable services. May God bless them and their labors. Let us pray for the prosperity of Zion always.

H. J. HUNTER, P. C.

AUGUST 29, 1870.

FIFTY SERMONS A MONTH.

Thomas W. Blanchard, London, has issued the Life of Samuel Bradburn, the Methodist Demosthenes. The Irish Evangelist, in noticing the book, calls Bradburn the foremost man in Methodism in his day as a preacher, and in all probability he would have had the same proud position had his lot been cast in our time. In his day his fame was national. Dr. Clarke, his mean judge, said of him:

"I have never heard his equal. I can furnish you with no adequate idea of his powers as an orator. We have not a man among us that will support anything like a comparison with him. Another Bradburn must be created, and you must hear him for yourself before you can receive a satisfactory answer to your inquiries. Put them all together," said he, referring to several popular men, "he was not like any of them. They would not all of them make such a man. He was like no man but himself. I never knew one with so great a command of language." Notwithstanding his marvelous eloquence, he was familiar with poverty all his days, and complains sadly, and not without reason, in his journal. Mr. Blanchard gives the following items of allowance to ministers from the Bradford Circuit Book for 1770:

The preacher's board, thirteen weeks, at 3s. 6d.	£2 5 6
The preacher's quarters, 3 0 0	3 0 0
The preacher's quarterly for the wife, 1 17 6	1 17 6
Allowed for servant, 0 12 6	0 12 6
Allowed for supplies, 0 6 0	0 6 0
	£5 1 6

Total income of minister in these "good old times" less than £33 per annum! If we suppose the purchasing power of money to have been four times more than in our day, he still was wretchedly poor, and the marvel to us is how he kept body and soul together. Things had somewhat improved in 1781-82, when Bradburn was stationed in Bradford. Yet he says: "I had not above £50 per annum to maintain myself, wife and servant!" And this for the most powerful preacher in England!

In 1776 he was appointed to Ireland; and a few days after his arrival in Limerick he "spent his last shilling." "I am once more," he writes, "agreeably settled, having food and raiment, and amazing congregations." During the month of October he preached fifty-seven times; and on the twenty-ninth of same month he conducted a watch-night service, and "preached, prayed and sung four hours without intermission!" After four months of such labor as this in and around Limerick, he was moved to Dublin, where, as the work was lighter, his health improved. (He broke down in Limerick, and the marvel would have been if he had not.) While in Dublin, at a country place bearing the suggestive name of Rosey Bower, met with a Miss Nangle, who fairly charmed him; and who, after some difficulty and delay, became his wife. Suffice it to say, she was worthy of Samuel Bradburn. The years 1777-78 were spent in Cork, which then included Brandon, where he preached on an average fifty times a month, and his colleague about the same number.

An assistant secretary of the British Astronomical Society, Mr. Williams, has just finished a translation of the Chinese records of eclipses observed for two thousand two hundred and fifty years, ending A. D. 1840. This is the only continuous registry of the kind in existence, and is expected to yield important results hereafter.

A lady in Midland, Michigan, was lately bitten by a potato bug on the neck. The poison is spreading through her system, and fatal results are feared.

The Christian Advocate.

SATURDAY, SEPTEMBER 17, 1870.

MIDSUMMER.

BY JOHN B. MOORE.

The summer fronts on even wing,
Nor sails more far, nor draws more near,
Poised calm between the budding spring
And sweet decline of the year.

In shadowed fields the cattle stand;
The dreaming river scarcely flows;
The sky hangs cloudless o'er the land;
And nothing comes, and nothing goes.

A pause of fulness set between
The sowing and the reaping time;
What is to be and what has been,
Joined each to each, in perfect rhyme.

So comes high noon, 'twixt morn and eve,
So comes full tide, 'twixt ebbs and flow,
Or midnight 'twixt the day we leave
And that new day to which we go.

Full, fruitful hours, by glowing noon;
A restful space 'twixt old and new;
When all there was to do is done,
And nothing yet there is to do.

No days like these, so deeply blest,
That look not backward nor before,
Their large fulfillment, ample rest,
Make life full-time while they are here.

EARLY HOURS.

In reading the account of the Saviour's trial and crucifixion, it must appear singular to one without a knowledge of the habits of the East that so much connected with that occasion should have been accomplished before sunrise or a little later. We find that the Jews and the Romans who took part in the affair were astir on that eventful morning at hours when it would be impossible, under our arrangements for the transaction of business, to secure the attendance of public bodies and magistrates. Some of the things, it is true (I refer to Christ's apprehension, and, perhaps, the interview with Annas), may have been done at an unreasonable time, even as compared with the early hours of the East. But this remark will apply to other parts of the trial. We read, for instance, that a session of the Sanhedrim, fully attended, was held as soon as it was day (Luke xxi, 66, compared with Mark xv, 1); and that Christ's various examinations before that body, and before Pilate and Herod, were all concluded: so that, as Mark states (chap. xv, 25), it was only the third hour—that is, nine o'clock in the morning according to our time—when the Saviour was crucified. Such dispatch, evidently, would be impossible in many countries, and if related as having taken place there, in connection with a similar history, would give to the account an air of improbability. On the other hand, the early activity of the Jews in carrying forward their measures against Christ appears entirely in place when we transfer the occurrence to its proper scene; it serves, indeed, to authenticate the narrative as true.

During a great part of the year in Palestine the heat becomes so great a few hours after sunrise as to render any strenuous labor inconvenient. The early morning, therefore, is the proper time for work; midday is given up, as far as may be possible, to rest or employments which do not require exposure to the sun. The arrangements of life adjust themselves to this character of the climate. It happened to me often to observe how universal was the habit of early rising. Men and women may be seen going forth to their labors in the field, or starting on journeys at the earliest break of day. Frequently companies of muleteers, carrying merchandise from one part of the country to another, encamped at night on the same ground with us. Our usual time for setting off was sunrise; but we found quite invariably that they had risen, packed up and departed before we were ready to move. The night was still struggling with day when I left the menzel at Seleh, but groups of females, equipped with bee and mattock, were already wending their way to the fields to begin their daily toil. Being anxious at Jerusalem to attend the services of a Jewish synagogue, I was summoned to rise for that purpose before it was light. In one instance I went thither at an early hour, as we should call it, but found myself too late; the service was ended, the people gone, and the synagogue closed for the day.

If any one has not attended to this point, he will look into a concordance, he will be surprised to notice how often mention is made of the "early morning" as the time for beginning the labors of the day. Thus, "Abraham rose up early in the morning" when he went to offer Isaac on Moriah (Gen. xxi, 3). "Jacob rose up early in the morning, and set up a pillar" (Gen. xxviii, 18). "Moses rose early in the morning, and built an altar" (Exod. xxiv, 4). When the servant of Elisha "was risen early, and gone forth, behold, a host encompassed the city" (2 Kings vi, 15). "Thou art my God," says the psalmist (Ps. lxxiii, 1); "early will I seek thee." The apostles "en-

tered into the temple early in the morning and taught" (Acts v, 21). Scores of other examples might be added to these.

TEMPER.

Temper in a man answers to temper in edge tools. A man destitute of that heaven-born principle would be as insufficient in the hand-to-hand difficulties that must be encountered as a rock-drill without the correct temper. An ax may be made of the choicest quality of steel, ground to an edge, and polished so beautifully that a chopper can see the color of his eyes in the polished surface. Let him sink such a tool into a stick of green basswood up to the eye, and the bright edge will seem adequate to any requirement; but strike a hemlock knot, and the beautiful edge withers and turns this way and that way, into a doubled and twisted corrugation. Ah! the correct temper is lacking. But thrust the burnished steel into the fire and give the edge a proper temper, and it will walk straight through the gnarly oak and the knotty hemlock, as a warm knife will pass through a roll of frozen butter. But the instrument is the same in both instances. Nothing of an appreciable nature has been added to or taken from the steel. So it is with a man or woman. Correct temper gives efficiency to every word and action. Were it not for the uniform temper of an engineer, the Hoosac mountains could never be tunneled, nor could the Niagara ever have been bridged. A boy without "grit" without "spunk," destitute of temper, might grow up into a feminine imbecile, capable of feeding the chickens, and always requiring a guardian or superintendent.

No man or woman, boy or girl ever inherited too much temper or grit. The great trouble has always been the controlling of it. A noble horse that has not sufficient temper to tear his harness and rend every rein, making kindling wood of the vehicle that he is drawing, when things about him become mustering and out of gear, would be an animal of little value. A horse never possessed too much fire and temper. Wherever there is difficulty it may be attributed to a lack of control of that temper by means of a correct education. So with children and so with adults. In every noble nature, whether animal or human, the all-wise Creator has implanted this wonderful power of resistance, thus rendering each possessor of it efficient—enabling him to battle successfully with the asperities and obstacles of life. A young man or boy, in these perverse days of seduction, intrigue and corruption, needs the grit of emery and the unflinching firmness of the diamond to enable him to meet with unruffled temper the persuasive incentives to dishonesty, crime and popular corruption. The temper must be controlled and educated in childhood, in boyhood, through the critical period of youth, up through the years of riper manhood, and down to hoary age. Temper, firmness, decision, pluck, grit or spunk, by whatever epithetic appellation we may be pleased to name the quality, is one of the most praiseworthy qualities of a noble manhood. Without such a granitic foundation the entire superstructure of character will resemble the soft and yielding edge of the tool destitute of temper. Without this persistent quality everything would be unreliable and as unstable as water on an inclined surface. But this faculty must be controlled.—*Technologist.*

DR. MULLEN has just read an essay on Christianity and Vaudou worship in Hayti. He contends that this so-called Vaudou worship, brought from Africa, is still largely practiced in the island. God Vaudou finds his representatives on earth in snakes, and therefore all serpents are considered sacred. The doctor asserts that Soudoune tolerates this worship, but that Jeffard endeavored to suppress it; and that it consisted of indecent orgies, and dances, and human sacrifices. In 1864 a young girl was sacrificed not far from Port-au-Prince, and eaten. The participants in this tragedy, eight persons, were arrested, condemned to death, and their houses burned, but their sympathizers throughout the island, found in all classes of society, took revenge in numerous conflagrations and violent outrages. Finally, the doctor asserts that the shooting of six thousand persons by Salave proves that heathenism and barbarism have the upper hand, and that the only hope of the island is its annexation to the United States. We hope the doctor will spare us this sad finale.—*Interior.*

A CALIFORNIA editor has been interviewing a cinnamon bear. He describes the conduct of the interviewed as touching in the extreme; so much so that he was constrained to leave with him several locks of hair, his overcoat, and a portion of his right hand, as keepsakes in memory of the occasion.

TOTAL ABSTINENCE.

"I advocate," says the Right Reverend the Lord Bishop of Cork, "I advocate total abstinence upon the Christian principle of self-denial. I say to myself: 'I think I will help to create a more wholesome public opinion, and my own opinion will be of more weight when those who know me know I do that which I recommend others to do.' I do not indulge myself in a glass of wine, and therefore neither my servants nor any one else will say: 'If you take a glass of wine, I will take a glass of porter or of punch.' I have often been applied to by drunken persons when I was a moderate drinker. They said to me: 'Take a glass.' I replied: 'Yes; but I stop when I ought to stop.' But then they said: 'Oh we stop too.' They pleaded cold, fatigue, etc., for drinking. But now, as a teetotaler, I will say: 'If I abstain from drink, and go through cold and labor—mental and physical—very well without wine, much less ardent spirits; if I, an old man, can do without it, I do not see what a young man wants with it.'"

"I know widows who are orphans because of drink; orphans who are orphans because of drink; many hearts that are sad because of drink; many heads that are gray because of it; and families that are desolate and impoverished because of drink; and I am sure that 10s. out of 20s. I am obliged to give away in the year as charity, is in consequence of the poverty and misery brought on by drinking."

"I am glad ladies are taking part in this work. I expect each lady will use her influence in her family, by reasoning and persuasion, and I will let her use a little bit of banter, if she will, to try to persuade the people and create a wholesome public opinion; and I am perfectly satisfied that if you, ladies and gentlemen, will totally abstain from intoxicating liquors, you will have these four advantages: You will have clearer heads, purer consciences, lighter hearts and heavier pockets."

"The Greeks in the State of Sparta used to exhibit to the youth of their country, to prevent them from drinking, a man in a state of intoxication, who looked so hideous that they thought that a youth would abhor that which brought men to such a fearful state; but the spectacle of a drunken man was not more disgusting than the spectacle of a drunken woman."

THE NORMAN FACE.—The beauty of the Normans is a proverb all over the world. Nor has the universal admiration which has been bestowed upon it in the slightest degree exaggerated its lofty and exquisite character. The men, in their way, are as handsome as the women. They have the fine oval face, sedate, bright eyes, and clear complexion of the old race. You look in vain for evidence of their Teutonic descent in these sculptured features, the skin and hair alone suggesting a reminiscence of their Saxon ancestry. The women are remarkable for the natural dignity of their carriage, which harmonizes strikingly with their tall and commanding figures, and the gravity and reserve of their expressions. Like the men, their faces are oval, with the slightly aquiline nose, large flashing eyes and curved lips. Their complexions are peculiarly transparent, the cheeks mantling over with a blush rich in color, but delicate in its diffusion. A smile sits in their eyes, but the most inquisitive observer cannot detect in their looks or manners the slightest indications of levity. A sweet seriousness is their predominant characteristic. It is strange enough to an Englishman to meet groups of these people, men and women, reproducing before his eyes that famous Norman head with which all are so familiar. It carries you back at once to the eleventh century. Wherever he turns he sees, as in a magic glass, William the Conqueror moving up the streets and highways.

HOW A CAMEL GOES THROUGH THE EYE OF A NEEDLE.—The passage from the New Testament, "It is easier for a camel," etc., has perplexed many good men, who have read it literally. In Oriental cities there are, in the large gates, small and very low apertures, called, metaphorically, "needle's eyes," just as we talk of certain windows as bull's eyes. These entrances are too narrow for a camel to pass through them in the ordinary manner, if loaded. When a camel has to pass through one of these entrances it kneels down, its load is removed, and then it shuffles through on its knees. "Yesterday," writes Lady Duff Gordon, from Cairo, "I saw a camel go through the eye of a needle—that is, the low-arched door of an inclosure. He must kneel, and bow his head to creep through; and thus the rich man must humble himself."

The heat in England this summer has been three degrees above the average of the last fifty years.

RELIGIOUS INTELLIGENCE.

The Methodists in Salt Lake City contemplate building a fine church. Liberal donations have been offered them by friends from abroad.

Bishop Mousas has written to a friend in the South that he considers his days of active service over, he having been unable to preach for five years.

A Methodist seminary for children, young men and young women is to be opened at Salt Lake City next month. It will be conducted by the Rev. Erastus Smith and his wife, of Illinois.

The Jews of Boston recently dedicated their eighth synagogue at 174 Hanover street. It is occupied by a newly organized congregation, who hope are long to need larger accommodations.

JAMES ROBERTS, a veteran missionary collector, for upward of fifty-four years a member of the Wesleyan Methodist Society, and a class leader for forty-four years, died in Pontypool, England.

The Rev. Dr. Hedge, at the Harvard commencement dinner, came out boldly for the admission of women to the college as students, and was heartily cheered by the alumni, old and young.

THIRTY-SIX years ago there were only four churches in New London, Connecticut—valued at about \$30,000, including the lots. Now there are ten churches and five chapels, the total value of which, with the lots, will exceed \$500,000.

The report of the yearly meeting of the Society of Friends shows four thousand five hundred members in New England, among whom there have been during the year thirty-four births, seventy-five deaths, and thirty-five admissions.

The New England Conference raised 97 6-10 cents per member for missions the past year. The Provisional Conference raised 81 cents per member. We predict for these Conferences a better showing in their missionary contributions the present year.

The Southern General Synod of the Lutheran Church reports one hundred and sixteen members, one hundred and ninety-four congregations, and seventeen thousand three hundred communicants, distributed in North and South Carolina, Virginia and Tennessee.

The American New Church Congregational Union (Swedenborgian) have adopted a report resolving that the wearing of black as mourning is not expressive of faith in the reality of the brightness of the spiritual world, hence not Swedenborgian, and to be condemned.

The population of the Indian tribes in the United States is 293,034. Of these the whole number reached by Protestant missionaries is 61,137—leaving 231,997 not thus reached. The population of the tribes where the Roman Catholics are laboring is about 17,000.

The German Reformed church of Harrisburg, Pennsylvania, organized six months ago, with ten members, now numbers one hundred and thirty members in its congregation. A lot has been procured, and a church is to be erected, although the members are poor in this world's goods.

The new Methodist church at Portland, Oregon, is to be dedicated by Bishop Ames, September 4. It has a spire one hundred and sixty-two feet high, and cost about \$40,000, of which only \$2,500 remain unpaid. It will be the finest church in Oregon, and among the best in the West.

LAST YEAR was one of prosperity to the Cumberland Presbyterians, some ten thousand new members being added. They now have twenty-five synods, one hundred presbyteries, two thousand churches, one thousand four hundred ministers, and one hundred and fifty thousand communicants.

The Czar of Russia, at the request of M. de Pressensé, the eminent French evangelical preacher, has promised that the Protestants in the Baltic provinces who have been compelled to abjure their own faith and join the Greek Church shall have full liberty to return to their own creed.

The Methodist City Mission Society of New York reports for the month of July as follows: Visits to Sunday schools, 67; missionary and pastoral visits, 3,118; visits to sick, 143; families prayed with, 474; pages of tracts distributed, 8,092; baptisms, 14; funerals attended, 16; receipts, \$2,382 90; expenditures, \$2,405.

The reported statistics of the English Wesleyans show 348,359 members in full connection, 20,407 probationers, 5,758 deaths, 16,188 losses by removal, 5,443 Sunday school, 105,592 teachers, 622,589 scholars, and in the reduction of church debts and newly-erected churches an expenditure of \$1,752,000.

The Presbyterian says: "The Episcopalian now have associations organized to represent every shade of opinion. The Latimer associ-

tion represents the revisionists, the Church Union the ritualists, the Evangelical Union the moderate low church party, and the Conservative Church Union the moderate high churchmen.

The midnight mission of New York (Episcopal) is carried on at a monthly expense of \$700, and has no endowment. The treasurer makes an earnest appeal for funds, which fall off almost altogether in July and August. It appears that the supporters of this society leave the city for the summer, but that the beneficiaries do not.

The union of the two principal Presbyterian Churches in the United States has led to the inauguration of a movement for a union of Presbyterians throughout the Canadas. The movement is yet inchoate, but committees representing the two divisions in the Upper and Lower Canadas are to meet for conference, in October, at Montreal.

DANIEL BRADSHAW, a prominent and useful layman of the Wesleyan Methodist Church, Lowstock Hall, Lancashire, England, died July 11. He was especially distinguished by his numerous liberal gifts to the church. One of his latest acts was the liquidation of the debt on a neighboring chapel. Among his dying utterances were: "I am very happy," "Resting in Jesus."

THE NORTHERN CHURCH AND FOREIGN MISSIONS.—The Philadelphia Presbytery, of August 13, states that the contributions to the Board of Foreign Missions of the Northern Presbyterian Church have fallen off, since the first of May, to nearly \$11,000! At this rate the whole of that branch of the church, with nearly half a million members, would contribute only about \$50,000 in a year for this cause!

The Presbyterian mission in Tungshan, province of Shantung, in northern China, received twenty members by baptism at the communion in March, increasing the entire number to ninety-two. The progress in the missions in the north of China has been slower than in the south, owing partly to what seems to be a less impressibility to moral influences. The southern Chinese are of a better stuff than those in the north.

MINISTERS NEEDED IN MADAGASCAR. Tidings are sent from Madagascar, saying that, in addition to the burning of the heathen idols, churches by hundreds have been erected, and religious services established. In many places, where the people are ignorant, they meet on the Sabbath, and, after sitting for a season in silence, depart without any worship. They are generally anxious to receive instruction.

The work of female education in India is one of the most important features of the work of the Wesleyan mission, and reports recently received speak of encouraging success. The institutions are of various classes, some being boarding schools and others being attended by caste girls. In one way and another nearly every class of the female population is reached. The missionaries' wives labor most devotedly in this service.

BISHOP TUTTLE, of Utah, resides in Salt Lake City, and presides over a mission there. Connected with it is a grammar school, in successful operation, taught by New York ladies, and attended by from fifty to one hundred pupils, of whom not a few are the children of Mormon parents. July 30, the corner stone of a church was laid, which is to be built of stone, designated as St. Mark's, and will be opened on the free seat principle.

GAVAZZI, whose singularly fascinating eloquence electrified so many American audiences a few years ago, has been laboring since that time in Italy for the spread of evangelical Christianity, and with considerable success. There are reported as now in Italy thirty-three Protestant evangelical free churches. Conversions from the Church of Rome are not infrequent. Gavazzi is now lecturing in England in behalf of the Protestant work in Italy.

The Delaware River Baptist Association, in Pennsylvania, opposed to missions and temperance societies, numbered in 1844 eight churches, with five hundred and fifty members. Now it has but four churches, with four hundred members. The Warwick Association in 1826 had eighteen churches, and one thousand four hundred and seven members. It is now reduced to six churches, three of which have no preaching, and numbers only two hundred members.

The city of Bitlis, having a population of thirty-one thousand, and last summer a Protestant church membership of thirteen, is the scene of one of the most marked revivals ever experienced in Turkey. The meetings have been crowded, including the daily sunrise prayer meetings; and from twenty to forty persons take part in every meeting. It is believed that between thirty and forty persons have been converted, and many more have requested prayers for their conversion.

The Presbyterian says: "The

Bishop Cox, of western New York, publishes in the Colonial Church Chronicle of London a remonstrance against a revision of the English Bible by one convocation of the Church of England. He says: "We are threatened with a great evil; and nothing but the timely action of the episcopate and of diocesan synods can effectually meet and avert it. By God's blessing such action may be found equal to the emergency. We can give a world-wide check to a world-wide peril and mischief."

ORDINATION OF MISSIONARIES AT CHICAGO.—The six missionaries recently appointed as reinforcements to the Methodist Episcopal mission work in China were ordained in Chicago on Thursday evening, August 18. The services were held in the Centenary Methodist Episcopal church, which was filled with an audience of over fifteen hundred persons. Bishop Clark officiated, assisted by Rev. Drs. Harris, Reid, Hitchcock, Pilcher, Hawley, Fowler, Dandy and others. The services were deeply interesting.

The war has begotten a new sect—birthplace, Indiana. Its members call themselves Christadelphians. They claim that the European war will soon extend all over the world. Perhaps our readers can get some inkling of what they believe from the following address. We can't. "The Christadelphians will soon chain the kings, emperors and presidents of all nations. Forty years. One thousand years' peace. What is the gospel? Hasten to enter the name of Jesus. The kingdom of God now near at hand. Jesus to arrive at Mount Sinai. The resurrection near at hand."

HON. ISAAC S. DREHL, late United States consul at Java, has been lecturing in Pittsburg on "Bible Lands," Babylon and Nineveh, etc. Many things among the people of those countries, he said, we might well imitate. In all the millions of these Asiatic people drunkenness and rum-shops are unknown. The same is true of swearing. If a man swears, the first duty of any man that hears him is to knock him down. Imagine what would happen if such were the practice in this country! When they want to say anything bad of a man, they say "he is as dirty as a Christian."

THE Missouri Dunkards have just been holding their annual meetings. They have no church buildings of their own, but preach in other churches, or in sheds and barns—in short, wherever they can get a chance. They have no ordained preachers; baptize by immersion, face foremost, and maintain as a religious ceremonial feet washing, the men washing the feet of the women, and the women of the men. The sacrament follows a feast of bread and lamb soup. In dress and daily habit the Dunkards cultivate a severe simplicity, and their honesty and integrity are said to be proverbial.

The American Tract Society is prosecuting vigorously its work of tract distribution among the Chinese of the Pacific coast. It has prepared and is printing at Shanghai a "Primer and Reading Book in English and Chinese," said to be the first book of the kind ever attempted. One of its most effective laborers is himself a converted Chinaman, Chen Chung. It is reported that one thousand two hundred Chinese are already gathered into the mission schools of San Francisco. It is just possible that by a vigorous following up of these efforts we may Christianize the coolies before they heathenize us.

LATEST CONCERNING "INFALLIBILITY."—A dispatch from Europe states that the declaration of papal infallibility has been promptly met by the Austrian government. The ministries on either side of the Leitha are already concerting measures to abolish the Concordat and prohibit the promulgation of the dogma within the limits of the empire.

Archbishop Purcell, who recently returned to Cincinnati from Rome, is represented as declaring that the new dogma will not be regarded as binding in any section of the church until it is officially promulgated by the authorities of that diocese. We fail to see the correctness in this logic. It is evident, however, that the great council has "overdone." We have now the spectacle of a "house divided against itself."

A COURAGEOUS MISSIONARY.—Several Indian chiefs having become open enemies of the gospel, Mr. Eliot, sometimes called the Apostle of the American Indians, when in the wilderness, without the company of any other Englishman, was at various times treated in a threatening and barbarous manner by some of those men. Yet his almighty Protector inspired him with such resolution that he said: "I am about the work of the great God, and my God is with me, so that I fear neither you, nor all the sachems (or chiefs) in the country. I will go on, and do you touch me if you dare." They heard him and shrank away.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, SEPTEMBER 17, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.

Three Dollars per Annum, in Advance.

Address—REV. LINUS PARKER, 112 Camp Street, New Orleans, La.

Agents—All the members of the patronizing Conference.

CONFERENCE PUBLISHING COMMITTEE.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. W. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To Subscribers.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office Order, Draft, or by Express. If this cannot be done, REGISTER the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

A WORD TO BUSINESS MEN.

As the business season is about to begin, the time for advertising has arrived. The ADVOCATE is in many respects the very best medium through which to reach a most important class of buyers. Our paper circulates extensively in the country; more particularly throughout the cotton and sugar regions of the South. We endeavor to guard our subscribers from imposition by rejecting all objectionable advertisements. Hence a card in our columns goes out with a most favorable and influential indorsement. Thousands of families in Alabama, Mississippi, Louisiana, Arkansas and east Texas receive our paper every week. Their business relations are chiefly with New Orleans, and they visit the city annually. We do not hesitate, therefore, to affirm that there is no better medium for advertising than the NEW ORLEANS CHRISTIAN ADVOCATE. Beside a choice and extensive circulation throughout the Southern States, as many as three hundred ministers of the gospel are acting as agents for the ADVOCATE. We are confident that no other paper in the Southwest offers so many striking advantages to advertisers.

CHURCH PROPERTY.—The attention of the preachers of the Louisiana Conference is called to the following resolution, passed at the last session, in reference to reports of church property:

Resolved, That it be made the duty of each preacher to furnish the Conference with reports of the church property in the bounds of his work, so that the Conference, as required by the Discipline, may take account of the same, and that the following items be particularly incorporated in said reports, to wit: Number of church edifices, their value, whether titles are secured; number of parsonages, their value, whether titles are secured; other church property, its value, and whether titles are secured.

A WARNING TO STEWARDS.—It is stated in the Western Methodist that the Arkadelphia District Conference, in view of the low state of finances, passed the following resolution:

Resolved, That the character of no steward be passed who has not made diligent efforts to collect the amount of his assessment list.

DEATH OF RICHARD KEEN.—This old and useful servant of Christ died in Jackson, Alabama, on Sunday, the fourth instant. A sketch of his life and character will appear next week.

RELIGIOUS SPECIALISTS.

It is found in trades and professions that the greatest efficiency is reached by a division of labor. In a gun factory, where one man confines his attention to making screws, another to the springs of the lock, and another to some other minutia, more and better work is done than if each artisan turned out a complete rifle by himself. Pins are made faster and better because some of the operatives do nothing but attend to the heads, while others are exclusively occupied with the points. In law and medicine matters seek an adjustment very much after the same order, and for similar reasons. The field is too broad to be well occupied by a single practitioner. Hence in both of these professions there are specialists who attain to skill and celebrity in some department of their callings. The benefits of this division of duties are offset to some extent by the tendency to narrow the views and to cramp the facilities. What is gained in thoroughness is lost in breadth. Perfection in details is attained at the sacrifice of comprehensiveness. It may be for these reasons, in part, that specialists in the professions are not regarded as the best and highest representatives, and that we naturally expect to find among them the larger proportion of charlatans and impostors. The benefits and the dangers exist together, and what is so obviously commended by many advantages is yet liable to the most serious drawbacks and abuses.

The principle of division of labor is profitably adopted in religious instrumentalities. The ministry, as a divine institution and calling, has this character. It is a specialty among believers and in the church, made so for the purpose of securing the greatest practical effectiveness in the promulgation of the gospel. Circumstances may indicate the Christian's calling to some particular department of duty. The enterprises of the church are now laid off in sections, so that the Christian often finds himself pretty much confined to some one department of religious activity. Hence it comes to pass that there are people who are known as Sunday school men, others as eminently devoted to domestic missions, to the finances or music of the church. There are advantages in this, and it is perhaps best, and also unavoidable, that every Christian should feel greater interest and find himself particularly adapted to some one field of usefulness. The tendency to evil, however, must be guarded. Especially must we watch against undervaluing the work of others, while we unduly exalt our own. We must also guard against the narrowing influences to which all specialists are exposed. Here is a man who thinks the class meeting is everything, and here is another who thinks as much of family religion; and yet another who believes exclusively in the preaching of the gospel as the hope of the world; and here is still another who places the Sunday school above all other means for the salvation of mankind. The kingdom of God embraces all in its manifold activities, but it is the misfortune and vice of specialties that they lead to this narrowness and injustice. Hence, as in the secular professions their host type is not found in the specialist, so in the church of Christ. The highest style of religious character is seen in those whose vision and sympathies are wide enough to embrace all means of usefulness, and who are capable of entering every open door and of doing effective service in all the varied instrumentalities of the church.

Specialists in the ministry are sometimes offensively prominent. There are revivalists, controversialists and evangelists, as distinguished from the regular pastorate, and others whose gifts and graces lie in the direction of agencies. Doubtless there are those who are adapted and endowed for these important duties, and the church does well to recognize and employ them in such work as they are peculiarly qualified to perform. This, however, like all specialties, has its elements of weakness and perversion.

The pastorate is sometimes ruthlessly invaded and the office treated with contempt. Because the man of all work does not allow the brother's particular mission to throw every other good cause into the shade he is perhaps denounced as lukewarm and behind the times. This exclusive attention to a single feature of religious activity is calculated to develop a partial and imperfect character. While we admit the diversity of gifts in the ministry, and the occasional call for a man to give himself wholly to some one department of labor, any needless multiplication in this direction is to be regretted. The highest type of the Christian minister is not found in the specialist, but rather in the man who works in the regular pastoral harness, and who does the whole work of a gospel preacher.

There are also specialists in doctrines, and morals. In the North the doctrine of Christian perfection has been made the exclusive subject of camp meeting preaching and praying, and there is a class of preachers who do little else but profess and preach it. This doctrine has become the watchword and countersign of an extensive and independent organization within the church, and threatens to disturb its peace. The millennium is the all-absorbing idea with some who regard the *parousia* as the central and controlling thought of the gospel. Other instances might be noted, as in the case of those who become monomaniacs on the prophecies, or who, like our Baptist brethren, put forward a sacramental mode as the exponent and *differentia* of a denomination. In almost all cases doctrinal specialists work nothing but weakness and mischief. The doctrines of the gospel are a unit, and should be held and expounded in their harmonious relations to each other. Hence it happens that the perfectionist is often sadly wanting in Christian charity, the adventist gives his brethren over, as outcasts, and the immersionist turns the most of God's children over as reprobates. The doctrinal specialist is likely to be a very imperfect type of the Christian life and character, lacking the soundness and healthy tone which a full and comprehensive view of the truth imparts. In morals there is much justification for the emphasis of particular virtues and the denunciation of certain vices. There is occasion for the elevation of temperance to the dignity of a specific advocacy. Circumstances and times seem to demand that some other virtues be particularly vindicated and enforced. The good, however, is liable to easy perversion, and the whole chain of graces is sometimes forgotten in our devotion to a solitary link. The morality of the Bible is all-embracing, so that "whoever shall keep the whole law, and yet offend in one point, he is guilty of all." The specialist in morals is ever in danger of limited and distorted views, and of violent and unreasonable opinions. He is the father and victim of the worst forms of fanaticism.

ATTENTION is called to the advertisement of Mr. Avery Bill. The works for which he desires agents are of the highest character. McClintock & Strong's Cyclopedia of Biblical, Theological and Ecclesiastical Literature is probably the best work of its kind to be had. The other books mentioned are works of great excellence, and will secure extensive sales in the hands of active agents. Address Mr. Avery Bill, care of Harper & Brothers, New York.

BISHOP McTYRE reached our city on last Friday, safely and in good health. He repaired at once to the St. Louis district camp ground and filled the pulpit on Sabbath morning, preaching, we are informed, a most excellent sermon. On this his first episcopal visitation to the Conferences in Missouri we give him a cordial welcome, and anticipate from it much pleasure and profit. He commences the round of Conferences with the Western, at Leavenworth City, on the eighth instant, and to attend the Missouri Conference, at Columbia, on the fourteenth instant; the St. Louis, at Boonville, on the twenty-eighth instant, and the Illinois, at Kilmory, October 12.—St. Louis Christian Advocate.

CENTENARY COLLEGE.

We do not overrate the advantages of being educated in the State in which one expects to live. It adds greatly to the chances of success in life that a professional man should be surrounded by those who have been trained in the same college. Throughout Louisiana and Mississippi the graduates of Centenary hold important positions. At the bar, in the pulpit and elsewhere may be seen the representatives of this venerable institution. A large proportion of the bar at Clinton, Louisiana, the presiding elders of the Greenville and the Port Gibson districts, Mississippi Conference, as well as the station preachers at Jackson and at Yazoo City, we can refer persons to who may wish to send their sons to college without sending them away from that part of the South in which they expect them to reside. The college opens on the first Monday in October. Tuition, \$60; board, \$15. Students will report to Prof. A. R. Holcombe, acting president.

J. C. KEENER,
Pres. Board of Trustees.

HEALTH OF THE CITY.—For the week ending on the twelfth instant there were nineteen deaths from yellow fever. Of these cases the report of the Board of Health says:

Of the nineteen deaths from yellow fever, nearly all of which originated in the neighborhood of the French market, fifteen were natives of Italy, two of Germany, one of France and one of Ireland.

In view of the quarantine of twenty-five days recently established by the authorities of Galveston, and the alarm prevailing in the country about the safety of unacclimated persons visiting the city, the Board of Health has issued the following card:

OFFICE OF BOARD OF HEALTH,
New Orleans, Sept. 13, 1870.

For the benefit of business men and others who contemplate visiting New Orleans, I would say that from present appearances there is no reason why they cannot come now with as much security as at any time during the year.

The mortality in this city since July 1 has been less than that of any other city of the United States in proportion to population. There is no occasion for the alarming and exaggerated reports which have been circulated concerning the health of the city.

S. C. RUSSELL, M. D.,
Sec. Board of Health.

We learn from reliable sources that there are a number of cases in the hospital, and that new cases are coming in daily. All, however, originate in a single limited locality, and we have every assurance from physicians of extensive practice that the disease prevails nowhere else. What two weeks may disclose we cannot tell; but at present there is little risk to the unacclimated.

THE SOUTHERN UNIVERSITY.

The impression has formerly existed in some quarters that board could not be easily obtained in Greensboro, and pupils may have been kept from the University on this account. Though this has not been true, I am glad to be able to inform our friends and the public that greater facilities for getting reasonable board will be afforded hereafter than have existed heretofore.

A large brick building, belonging to and located near the University, and containing sixteen rooms, is being fitted up, and will be ready for occupancy by the first of October. Here thirty young men can find excellent accommodations; so that there certainly will be no want of room hereafter.

I am glad to say, further, that the prospects for the next session are flattering.
J. HAMILTON.
SEPTEMBER 12, 1870.

WESTERN VIRGINIA CONFERENCE.—We have received the Daily Christian Observer, published at Catlettsburg, Kentucky. The number received contains the first day's proceedings of the Western Virginia Conference, which met at Catlettsburg, September 7. The Conference opened auspiciously, and Bishop Kavanaugh was present and in excellent health.

It is stated that a plan will shortly be promulgated for the uniform spelling of proper names of places in India.

CLASS MEETINGS.

The following extract is from No. 10 of a series contributed to the Western Methodist on the General Conference of 1870.

Brethren, we can't give up class meetings. We must volunteer men. Who will begin the list? We must have this training school for the young, this reunion for the old, this spiritual refreshment for all. Many who stand aloof at first will gladly come in when the Master begins to show himself in your assemblies.

Class meetings and prayer meetings are not native to the human soul. There must be an effort to get them up and to keep them up; and pastors must be foremost in this effort. It is their official business; it is their calling; it is their responsibility. And the law distinctly recognizes this fact.

As learning increases in Methodism, so will the tendency to speculative theology. To offset this we must stress experimental religion. Experience meetings are demanded—no substitute has been found.

Your great Sunday congregation, brother, is no test of spirituality. People like to hear fine talking, elegant discourse; and they will go for it to the hustings, the platform or the pulpit. But it is by the manner in which the minor means of grace are observed that the spirituality of a church is gauged. Nothing draws to these but a conscience of duty or a heavenly mind. The finer fibers feed the root with tender sap; and when the tree dies, these die first.

The order of church-backsliding is about this: The class meeting fails, and so the young converts are not trained, and laborers are not brought forward by its gradual development. Consequently the prayer meeting fails in its turn and time, though not immediately. There is a scarcity of brethren to lead in prayer, and therefore the prayer meeting becomes monotonous. The pastor may save it from a pronounced death by turning it into a "lecture." The week-night lecture drags because it comes in competition with social visiting, or business, or parties, or the "lodge," or the "club," or the concert, or the theater. And in competition with these attractions, in unsustained hearts, its feeble force expires. You are now thrown, for sustenance, upon the Sunday sermon. The big bell rings, the big organ groans, the big congregation gathers—a congregation of dyspeptic souls. And the big sermon follows with a homeopathic admixture of the gospel. Where are you now? And is this the end of the people called Methodists? Is this the result of their mission "to spread scripture holiness over these lands?"

The current on which we have consented to glide gently downward must be stemmed. We must turn it back, or return against it. Effort is required—patient, godly effort. Class meetings will not be restored, where they have been disused, by a notice from the pulpit that at such a time and place Brother A's class or Brother B's class will meet; and then the heedless pastor go on his way. Class meetings have almost died out under that regimen. He must come down to the work, in detail and determinedly. The leader's meeting must be revived, and everywhere the quarterly conferences should make searching inquiry.

Turn us again, O God, and cause thy face to shine; and we shall be saved.

REV. ROBERT SPENCER VINTON.—Another veteran of the old Baltimore Conference has fallen. On Sabbath evening, the thirty-first ultimo, after a protracted illness, Rev. Robert Spencer Vinton died, in his seventy-fourth year. After traveling a circuit, under the direction of the presiding elder, for one year, he was admitted on trial in the Baltimore Annual Conference in the spring of 1818, and continued in the itinerancy till his death, a period of fifty-three years, forty-eight of which he was effective, and four supernumerary. He was ordained deacon in Georgetown, D. C., in 1820, by Bishop George, and elder in Baltimore, in 1822, by the same Bishop.—New York Christian Advocate.

WESLEY CHAPEL, ATLANTA.—We learn that the corner-stone of a new edifice for the Wesley Chapel congregation was laid last week. It is in the angle where two streets meet, near the present chapel. It is to be built in Gothic style, with three towers, the central one hundred and seventy-five feet high, the other two one hundred and twenty feet each. The building is to be one hundred and forty-five feet long—the audience room ninety by sixty. Behind the pulpit a recess of fifteen feet will hold the organ and choir. There is to be a gallery in the front end, and seats in the aisles which may fold up out of the way. The church is to seat fifteen hundred people, and will cost \$50,000.—Southern Christian Advocate.

To the Eastern Members of the Alabama Conference.

BRETHREN: At the last session of the Mobile Conference a resolution was passed unanimously that each member of the Conference should bring up a Conference collection equal to eight per cent. on the salary he received, and if he did not collect it from his charge, he should pay it himself. This resolution was passed understandingly, and was based upon two ideas, viz: That the claimants on this fund needed and deserved this much; and that some members of the Conference, who did not exert themselves to make this collection what it should be, would by this measure be stimulated to greater exertion.

It is presumed that no such measure was adopted by your Conference—I hear of none—and that therefore your collections will be less than ours. In that case, will the brethren expect a common fund to be made at the approaching session of the new Conference, and an equal distribution to be made to all beneficiaries, when equal efforts and sacrifices have not been made by all to raise the fund to a proper point? Or will they now follow the example of the Mobile Conference, and notify their members that the same rule will obtain through the whole Conference? The latter will be the best course, by far; and there is plenty of time to give the notice through the papers and make the collections; and it seems to me that if the preachers will place the matter properly before the people they will respond promptly. I hope the presiding elders will move in this matter at once. As to the connections of beneficiaries, I suppose that as a general rule their cases will take the same direction as these of effective preachers. In cases where the rule would work a hardship, and in some cases with peculiarities, the Conferences will take special action. I make these suggestions that the Conference may not find itself in a dilemma when it meets.
J. HAMILTON.

ADDRESS OF BISHOP MORRIS.

At the recent session of the North Ohio Conference the venerable Bishop Morris made the following address to the preachers. We quote from the Western Christian Advocate:

It is very uncertain what I shall say or how long I shall talk. Among the many points that I might name are the following:

1. Do everything at the right time, not a half hour after the time. If we do not observe this rule we shall be perpetually interfering with the rights and comforts of others. Moreover, if we are behind in one thing we will most likely be behind in another, and so the thing will grow to be a habit with us. Take the subject of reports of statistics. In every Conference there are frequent calls on delinquents. The right place to make up reports is at home, where the records are at hand, and the place to make reports is the first day at Conference. The secretary has to copy these reports, and he ought to have them at the earliest practicable moment.

2. Make preparation to preach. You are to study. You are to study diligently, regularly, prayerfully. No man can succeed who does not study. There are, however, two ways of composing—one on paper, the other mentally. He who composes only on paper can only use his material when everything is favorable; but he who composes in his mind can preach under almost any circumstance—in the parlor, the school house, under the tree, in the street. When we are commanded to go into all the world, I do not understand we are to read, but to preach. Rather than listen to a man read I would prefer to hear him extemporize, though he violated the rules of grammar in every third sentence. In a ministry of fifty years I have never read a single sermon in the pulpit, and tried the use of notes or a brief but three times.

Condensation is a very important thing in a minister. Have something to say, say it, and quit when you are done.

3. But important as preaching is, it is only part of our work. Pastoral visitation is the great duty of the ministry. We are to go from house to house, as Paul did. The children are the hope of the world. They are soon to take our places in both. If you wish to succeed, make friends of the children. If you wish to keep young while your head grows white, be much with the children. Never pass a child without stopping

and shaking hands with him. Ask him his name if you have forgotten it, and about the family and his brothers and sisters. Make him think that you are thinking about him. I think I have said about enough, and I shall stop.

NEW PUBLICATIONS.

FORGIVEN AT LAST. By Jeannette R. Hademann. Philadelphia: J. B. Lippincott & Co. 1870.

A beautifully bound volume of three hundred and thirty-three pages. It is a novel, the scenes of which are laid chiefly in the South. The plot and filling up seem to be clever, but we have not had time to give the work a thorough examination. The story winds up with a negro riot, a conflagration, and a murder in the parish of St. Bernard, Louisiana. We have received the book from the publishers, J. B. Lippincott & Co., Phila., through Mr. J. A. Gresham, bookseller, Camp street, and also from A. Eyre, Canal street, New Orleans.

A MANUAL OF COMPOSITION AND RHETORIC. A text book for schools and colleges. By John S. Hart, LL. D. Philadelphia: Eldridge & Brother. 1870.

We have taken some pains to examine the arrangement and contents of this work, and have reached the conclusion that it is the best as well as the latest on the subjects of which it treats. It is designed as a text book for schools, and both teachers and students will find that it is admirably arranged to facilitate the acquisition of knowledge. The author has had long experience in teaching, and shows in this work the highest qualifications for the undertaking, which we think he has most happily achieved. We are indebted to the publishers for a copy of the work.

PHILIP PHILIPS' SINGING ANNUAL FOR SABBATH SCHOOLS. Published by Philip Philips, New York. 1870.

This little book of sixty-four pages contains twenty-three songs and hymns, set to appropriate music and adapted to the use of Sabbath schools. There are some very beautiful songs, and much excellent music. Philip Philips' publications are in general use everywhere.

PERIODICALS.

THE LITTLE CORPORA.—September, 1870.—This number opens with "The Crickets' Golden Wedding," and contains a large amount of original matter of the choicest quality, in prose and poetry. Those children are peculiarly favored who receive the monthly visits of the Little Corporal.

THE RIVERSIDE MAGAZINE, FOR YOUNG PEOPLE.—The September number is highly embellished, and contains the usual amount of choice reading matter. "The most Extraordinary Thing" is a story by Hans Christian Andersen. "Frank and Lucky" will please the boys immensely, especially if they are fond of fishing. The frontispiece, "Outward Bound," is a delightful picture, and the Little Folks' Songs are gems in their way.

The New Electric Magazine, for September, contains articles of great interest—some of them very profound as the one on "Positivism," and others very sprightly and humorous, as the one "Concerning Dogs." There are two articles devoted to Dickens, besides the continuation of "The Mystery of Edwin Drood." "Mosaic" and "The Green Table" are richly flavored, as usual, and, like a rare dessert, provoke and satisfy the mental appetite.

THE ATLANTIC MONTHLY.—The September number opens with a discriminating article on "The English Note Book of Nathaniel Hawthorne." "Music a Means of Culture" says a great deal for the mission of sweet sounds, and will enable many lovers of the art for once to give a reason for the hope that is in them. Among other articles worthy of special notice we mention "Charles Albert Fechter" and "A Handful of Translations," by Henry W. Longfellow.

THE AMERICAN SUNDAY SCHOOL WORKER is published by J. W. McIntyre, St. Louis, Missouri, at \$1.50 per annum. It is edited by a committee of ministers representing several denominations, and is one of our best Sunday school periodicals.

The August number is replete with interesting and instructive matter. It contains blackboard lessons in a diagram form, and also the uniform lessons of the Bible classes for the month. We hope to see something as good as the American Sunday School Worker published at Nashville after awhile. We welcome this Sunday School Worker, and commend it to the friends of the Sunday school.

We are indebted to Mr. Luther Homes, secretary and treasurer, for a copy of "The Report of the Fourth Grand State Fair, held in the city of New Orleans, April 23, 1870." It is a neat pamphlet, containing the opening addresses, and a full list of premiums and of articles entered for exhibition.

THE ART REVIEW, for September, 1870, is an improvement, and we believe also an enlargement, on the previous number. It is beautifully printed and well stored with information pertaining to art. To artists in particular, and to all who wish to keep posted in the department to which the periodical is devoted, it will prove a most valuable acquisition. The Art Review is published by E. H. Trafton, Chicago.

THE AMERICAN AGRICULTURIST, for September, contains the usual variety of matter on all subjects pertaining to its department. The engravings and illustrations are even more numerous and elegant than usual. This periodical does not meet the wants of our latitude and of the Southern planter altogether, but it will prove of great value and furnish a great deal of information of the most practical character.

We have received Burke's Weekly—the monthly part for August, 1870. It is filled, as usual, with good things for the young. A sound and wholesome literature is furnished to amuse, interest, instruct, and to mold the character of our young people for usefulness. The name of the publisher sufficiently guarantees the moral and religious tone of the Weekly. We have heretofore commended it as the best of our Southern periodicals for the young, and we have no reason to change our opinion of it.

ONE HUNDRED EMIGRANTS BURNED TO DEATH.—A very sad occurrence is reported at Rio de Janeiro, namely, the burning of an emigrant ship, and the consequent loss of over one hundred passengers on board. The details of this terrible catastrophe are given by the captain of the French bark Adele Louise, who succeeded in saving some of the persons from the ill-fated vessel—the Manin Barravino—on its way from Genoa for Monto Video, with one hundred and twenty-eight passengers and twenty-five of a crew. It appears that on the twenty-first of July, about nine o'clock P. M., being abreast of Rio de Janeiro, the Adele Louise sighted the Barravino in flames some distance astern, and at once went to her assistance. What followed is described in the Telegraph Maritime: "The spectacle presented by the burning ship was extremely awful; the cries of passengers, the flames leaping on all sides, the women shrieking frantically, some of them jumping overboard, others holding on by the chains and bow of the vessel, forming a scene of disaster and confusion that baffles description. One boat that was lowered was speedily filled with people crowding into her, and went down. It was almost impossible to render assistance, but the bark succeeded in taking off eight persons, including captain and mate. The schooner Mary, from London to Australia, also happened to pass, and rescued ten more, whom she transferred to the Adele Louise. The remainder, one hundred and twenty-three in number, perished." It seems that the conflagration broke out in the chimney of the cooking galley and spread to a large number of chairs, part of her cargo. The passengers and crew immediately became panic stricken, and in the absence of discipline the captain was unable to take effective measures to suppress the flames, or to save the lives of those on board.

The amount of money which can be saved in every family by buying silver or copper tipped shoes for children will surprise any one who has not tried it. All parents may lessen their shoe bills two-thirds, and at the same time avoid the disagreeable sight of ragged stockings and protruding toes, always seen when shoes are not protected by metal tips.

NEW ORLEANS CHRISTIAN ADVOCATE.—The August number is replete with interesting and instructive matter. It contains blackboard lessons in a diagram form, and also the uniform lessons of the Bible classes for the month. We hope to see something as good as the American Sunday School Worker published at Nashville after awhile. We welcome this Sunday School Worker, and commend it to the friends of the Sunday school.

ANNUAL CONFERENCES.

CONFERENCE.	PLACE.	TIME.	REPORT.
Columbia, S. C.	Dallas	Sept. 7, 8, 9	W. V. Walker

CENSURE is more effectual when mixed with praise. So, when a fault is discovered, it is well to look up a virtue to bear it company.

That alone can be called true refinement which elevates the soul of man, purifying his manners by improving his intellect.

Obituaries.

Died, August 11, 1870, at the residence of her husband, MARIA L. CUMPTON, wife of W. W. Cumpton, and daughter of Charlotte and Jesse Potter, of Pike county, Alabama. She was born April 15, 1826, and was married to Brother W. W. Cumpton July 4, 1850.

She was a member of the church some twenty years, in which she lived a good and consistent member until her death. How sad the dispensation of God in this affliction! But our loss is her eternal gain. She has left a husband and six children to mourn her death. One of her children has gone before to welcome her home. In the church she was a good and consistent Christian—never absent unless detained by some family affliction. The interest of the church was her interest, and lay near her heart. As a neighbor she was kind and obliging to a fault. It seemed that her heart was always open to friendly acts in the neighborhood where she lived. As a companion she was confiding, nurturing, devoted, gentle, affable and kind. To her children it seemed that her life was bound up in them, for she was all that a mother could be. But no more will she go in and out before them. Her kind voice is hushed in death, and in counsel—admonishing, reproving and directing—will be heard no more. To her relations she had not lost the parental teaching to be kind to her brothers and sisters. To the day of her death the fire of love burned in her bosom for those she has left behind to mourn over the loss of a kind sister. But they mourn not as those who have no hope, for they believe that those who die in Christ will be brought with him at his second coming.

Our sister told her husband, a few days before death, that all was right; that death had no terrors for her; that no cloud settled between her and her Saviour; that he had died for her, and that she felt that his blood cleansed her from all unrighteousness; that she was ready to depart and be with Christ, her Saviour. May almighty God sanctify this sad affliction to the great good of the church, her bereaved husband, children and relatives.

CASANDER ANGELINE, widow of Peter E. Green, of the Mississippi Conference, and daughter of J. H. and Temperance Wimbrow, was born December 27, 1842, in Pike county, Mississippi, and in her fourteenth year converted and joined the Methodist Episcopal Church South. In her twenty-first year she was married to Rev. P. E. Green, and died on the twenty-sixth of May, 1870, leaving comfortable testimony to parents and loved ones of a preparation for another and a better state of existence.

I have witnessed the sufferings and death of many, but never have seen one more resigned. Although anxious to recover until three weeks before her death, she never murmured. The great object that seemed to concern her most, was to sink more unreservedly into the will of her heavenly Father. About three weeks before her death she was told that her physician said she could not recover, after which she was never heard to express a desire to recover, but set her house in order for her departure.

A few days before her death she called her two little boys to her bedside—once little under six and the other a little over three years old—and gave them her last maternal instruction.

She told them where their father (who died in 1867) had gone, and that she was passing away, and where she was going; gave them to her mother, with instructions to be obedient to her. This was all done with composure—free from any excitement save that animation which kindles in the countenance of the child of God when hope is buoyant and the heart is warm with divine love. A few days after this she requested to be prayed for. On being asked if there was anything special she wished prayed for, she replied: "Pray that when I die I may be carried straight home to heaven." When her strength had so failed that she was unable to talk much, her mother requested her, when she could not tell us of her feelings, if she saw her way clear, to raise her hand as an evidence of the fact. A few minutes before her last struggle she raised both her hands at arms' length, placed her hands together, and then gently laid them down in token of triumph. In a few minutes she breathed out her life in the arms of her precious Saviour.

Sleep, beloved daughter! Death may unloose the bands of life, but cannot dissolve the arms of Love that embrace thee. You shall awake in the likeness of that precious Saviour, and be satisfied.

J. H. WIMBROW.

THIRTIETH OF MARCH.
LOUISIANA AVE. SUNDAY SCHOOL.
September 11, 1870.

At the regular meeting of the teachers and children, on the first Sabbath after they received the intelligence of the death of their devoted superintendent, the following preamble and resolutions were unanimously adopted:

WHEREAS, God in his wise providence has removed from us our much loved and dearly beloved superintendent, RICHARD KES, who established the school and for many years generously devoted his means, time, and his best energies and talents to promote its prosperity; therefore, be it

Resolved, That while we, as a Sabbath school, bow to it with reverent submission, we recognize in his death a sad bereavement, and a severe if not an irreparable loss both to our school and church; but are assured, from the memorial of his good, pure, upright and devoutly pious life, that our loss is his gain.

Resolved, That we will ever, with gratitude to God, cherish his memory as the form; and for so many years the superintendent of our Sabbath school, and that we will strive to imitate his benevolent, virtuous and holy life, emulating his zeal, piety and devotion to the cause of Christ.

Resolved, That we deeply sympathize with his sorely bereaved family, and tender them our profound condolence, praying that God may sanctify this trying affliction to them and us, so that it may yield the peaceable fruits of righteousness, and work for us a far more exceeding and eternal weight of glory.

FIVE CENTS ADDITIONAL
will buy shoes with Silver or Copper Tips, which will save the buyer the price of a new pair of shoes. Compared with ragged toes and dirty stockings, they are beautiful, to say the least. Parents, try it. Sent 3m.

NEW ADVERTISEMENTS.
BOOK AGENTS WANTED.
The subscriber, having located his Subscription-Book business in the office of HANCOCK & BROTHERS, is now prepared to offer better inducements. It is believed, than any publisher of subscription books. The works for which his Agents are now canvassing are the following:

McCLINTOCK & STRONG'S CYCLOPEDIA OF BIBLICAL, THEOLOGICAL AND ECCLESIASTICAL LITERATURE. A work adapted to the wants of all classes, being a library in itself.

WOMAN'S RECORD, or Biographical Sketches of Distinguished Women. By Mrs. HALE. With more than two hundred portraits. The interest that is now awakened in the public mind in regard to the rights, duties and privileges of women will commend this work to the liberal patronage of both sexes.

THE LAND AND THE BOOK, or Biblical Illustrations drawn from the Manners and Customs, the Scenes and the Scenery of the Holy Land. By W. M. THOMSON, D. D. Twenty-five years a Missionary in Syria and Palestine. With two elaborate Maps of Palestine, an accurate Plan of Jerusalem, and several hundred Engravings.

The above are all beautifully illustrated; and, being works of the highest merit, Agents may feel assured that in offering them for sale they are conferring a favor to the public and benefiting themselves.

Persons now in the business or desiring to engage in it, and meaning business, will address, for full particulars,

AVERY HILL,
807 1111 Care of Harper & Bros., N. Y.

CENTENARY FAIR INSTITUTE.
SUMMERFIELD, ALABAMA.
reopens on the FIRST MONDAY of next October.

The school is in good condition. It has had a steady increase every year since it has been in the hands of the present teachers. The total expenses from October to July will be only \$241.50.

Checks will be paid only between Summerfield and Selma at the opening of the session.

JOHN MASSEY,
Principal.

NEW ADVERTISEMENTS.

J. W. BLACKMAN'S
COMMERCIAL COLLEGE,
61 CAMP STREET,
Corner Commercial Place, N. O.

Open day and evening the entire year. Penmanship, Book-keeping, Mathematics and Languages are practically taught by experienced professors. Persons from twelve to fifty years of age attend. The instruction is private to each student. Persons who have neglected their education can here speedily qualify themselves for good situations in business. Some from the country may obtain board in the family of the principal.

William Walker, a late graduate of the Southern University of Alabama, and son of the Rev. Dr. J. H. Walker, of New Orleans, has charge of the Mathematical department. Terms—Ten to twenty per cent. less than other colleges in this city.

A liberal deduction made when three or more enter together. The principal has been a practical teacher in New Orleans since 1851. For circulars, giving terms, etc., address

J. W. BLACKMAN,
New Orleans.

CENTENARY COLLEGE OF LOUISIANA.

The session of this college will begin on the FIRST MONDAY in October next. The session embraces forty weeks.

EXPENSES.
Collegiate department, per session, \$60.00
Preparatory department, per session, 40.00
Incidental expenses, 5.00
Tuition for five months payable in advance.

Boarding can be had in good families at from \$15 to \$20 per month.

For further particulars address

PROF. A. R. HOLCOMBE,
Jackson, La.

MADISON COLLEGE,

SHARON, MISSISSIPPI.

The nineteenth annual session of this institution will open on MONDAY, the third day of October next.

Expenses—Tuition, possession of ten months, \$30, \$40 and \$50. Contingent fee, \$5.

Board can be had in private families at \$15 per month, exclusive of washing.

For further information address Dr. M. J. McKee, President of the Board of Trustees, or

I offer the tuition of young men preparing for the ministry, the sons of ministers in the regular pastorate, and the orphans of deceased Ministers, on application, free of charge.

J. M. PUGIL,
President.

EAST ALABAMA COLLEGE,

ANNUR, ALABAMA.

The next annual session will open on the FIRST WEDNESDAY in October, with a full faculty.

Boys and young men at every stage of advancement can be received either in the Preparatory, Junior or Senior Departments. Additional schools of Modern Languages, Civil Engineering, and Commercial Arithmetic and Book-keeping have been established.

Economy, health, efficient faculty, good society, thorough discipline and the best religious privileges are the peculiar advantages afforded.

It is just the place to train Methodist boys, and there is room for three hundred. Every preacher and layman will work for us to secure students we will open with two hundred.

For full information or catalogue address the Secretary of the Board.

DAVID CLOTON,
President Board of Trustees.

SOUTHERN-METHODIST

Male High School, New Orleans.

The exercises of the second session of this institution will commence on MONDAY, the fifth day of September proximo, in the basement of the German Methodist Church, Dryad street, between Felicly and Esplanade.

The Principal, encouraged by the gratifying success of the past session, will in no respect relax his energy in the effort to make the school all that could be desired by its patrons; and to accomplish this end neither pains nor expense will be spared.

To furnish to those who desire it an opportunity to obtain for their sons a systematic course of instruction from the beginning, upon which a thorough education so much depends, Primary and Preparatory Departments have been established in connection with the High School.

In selecting professors and teachers the greatest care will be exercised in regard to not only their personal qualifications, but also their ability to impart instruction.

The rates of tuition have been fixed as low as is consistent with thorough instruction.

For further information as to terms, etc., apply at the School.

D. I. RAST, Principal.

REFERENCES.—Bishop J. C. Keener, D. D., Rev. J. M. Parker, D. D., Rev. J. B. Walker, D. D., Rev. J. C. Miller, Messrs. J. P. Harrison, William H. Foster, H. P. Given, John G. Parham, William H. Dameron, W. S. Mount.

PORT GIBSON ACADEMY.

A SCHOOL FOR YOUNG LADIES.

Rev. B. Jones, President.

Faculty full and efficient. Buildings commodious and comfortable. Boarding department home-like.

TERMS.
Board, lights, fuel, washing, English tuition, English text-books, per term of 20 weeks, \$130.00

Full term opens SEPTEMBER 14, 1870.

COLLEGIATE INSTITUTE,
BATON ROUGE, LOUISIANA.

The fourteenth annual session will begin OCTOBER 3, 1870.

The best facilities are afforded for the acquisition of a first rate education, and at less expense than in any other school of high grade, North or South.

Board and tuition, per session, \$300. Payments \$150 in advance, balance on fifteenth of February.

For further information address

W. H. N. MAGRUDER,
Principal.

B. LASSITER,

REAL ESTATE AGENT,

OPELOUSAS, LA.

Also Agent for the McNeely & Molnar WAGON; J. H. Duval & Co.'s Improved

Patent Portable Steam Engines,

and Brooks' Revolving Wrought Iron SCREW PRESS.

References.—Rev. John W. Wilkinson, Sherwood, Louisiana; R. Anon, Canal St., New Orleans; J. M. Cass, 20 Poydras street, New Orleans.

MEMPHIS CONFERENCE FEMALE INSTITUTE, JACKSON, TENN.

This old and popular institution affords all the advantages of a first class Female College, and is steadily improving.

Charges are moderate. Full session begins SEPTEMBER 3, 1870.

For catalogues address the President, or

REV. A. W. JONES, D. D.

CHILDREN TEETHING.

Mrs. WINSLOW'S SOOTHING SYRUP.

FOR CHILDREN TEETHING.

greatly facilitates the process of teething by soothing the gums, reducing all inflammation; it will allay ALL PAIN and spasmodic action, and is

SURE TO REGULATE THE BOWELS.

Depend upon it, mothers, it will give rest to yourselves, and

Relief and Health to Your Infants.

We have put up and sold this article nearly thirty years, and can say in confidence and truth of it what we have never been able to say of any other medicine—NEVER HAS IT FAILED IN A SINGLE INSTANCE TO EFFECT A CURE, when timely used. Never did we know an instance of dissatisfaction by any one who used it. On the contrary, all are delighted with its operations, and speak in terms of commendation of its magical effects and medicinal virtues. We speak in this matter "What we do know," after years of experience, and pledge our reputation for the fulfillment of what we here declare. In almost every instance where the infant is suffering from pain and exhaustion relief will be found in fifteen or twenty minutes after the Syrup is administered.

Full directions for using will accompany each bottle. Be sure to call for

"Mrs. Winslow's Soothing Syrup,"

having the fac-simile of "CURTIS & PEEKINS" on the outside wrapper. All others are base imitations.

Sold by Druggists throughout the world.

ONE DOSE OF DR. SHAFFENBERGER'S

The Child's Corner.

THE BIRD-NIGHTS MEETING.

What birds pecked the cherries on Barnaby's tree?
 "I pecked them for one," said a bold Chickadee.
 "And so did I peck them," said Robin Redbreast.
 "And what's more, the cherries I pecked were his best."

"Didn't he have some red hannel, one day, put up in the tree just to scare me away?"
 "But I'm not afraid of red hannel one bit."
 "And I'm not afraid!" said a little Tomtit.

"Didn't he aim with an old rusty gun, at me?" said a Sparrow. "Oh, wasn't it fun!
 He meant to frighten me; but I didn't care. I just chirped out to him: 'Shoot, if you dare!'"

"Hear me, my brave birds," said a solemn old Crow.
 "This Barnaby I have good reason to know; his faults for many a year I have borne. When peacefully trying to harvest my corn."

"My treatment of him has been civil and fair; I've always been willing to give him a share. I never have grudged him my corn or my beans; but nothing can teach him what gratitude means."

"My friends, I shall soon lay before you a plan to put down this insolent creature called 'man'—a creature that has neither feathers nor wings, yet sets itself up to be very great things."

"I hereby proclaim, in the plainest of words, that henceforth mankind must succumb to the birds. I'm glad that this Barnaby's cherries you pecked; the man has no rights that a bird should respect."

This speech was received with a round of applause.
 "Your cheers," said the crow, "argue well for the cause."
 When next we assemble my plan you shall learn.
 There's Barnaby coming—'tis time to adjourn."

And Clara, in the Nursery.

HOW A LITTLE GIRL PREACHED.

On a fine Sunday afternoon in the month of July, after hearing a short and pointed sermon that a Methodist minister had just preached to a crowd assembled on the beach of one of the most beautiful watering places in Ireland, I listened to a very interesting and delightful juvenile conversation. Two children were sitting together talking in a retired spot on the strand. I was desirous of hearing, unobserved, what they were talking about, and therefore I concealed myself in a clump of trees behind them.

"Julia, Julia, you are always preaching to me! I am not half so bad as the other boys! But tell me what has made you cry so much since we were in the Sunday school."
 "Well, Charles, I am sorry to say that your conduct in the Sunday school pained me so much that I have prayed and cried about you ever since. You paid no attention to your teacher. You continued to throw up your cap, although you were repeatedly and kindly requested to sit in peace. You wore laughing aloud while that strange gentleman was addressing the children. You have torn your book; and, worse than all, you were saying bad words to your cousin."

"If you cry no more I will be a good boy in church this evening," said Charles, in an earnest tone.

Julia, putting her hand on her brother's shoulder, said: "But, Charles, I want you to be a good boy always. Mamma, before her death, told you to be a good boy, and to love Jesus. I pray to Jesus for you. Would not mamma be sorry if she knew you were so naughty?"

Before Julia had finished the last sentence big warm tears were trickling down the rosy cheeks of little Charles. Affectionately he threw his arms round his sister and kissed her. "Julia, Julia," said Charles emphatically, "I will be a good boy; I will obey my teacher; I will love Jesus. Julia, tell Jesus not to let mamma know that I have been a naughty boy."

Julia, clasping her hands and looking up to heaven, uttered this prayer solemnly and earnestly: "Lord Jesus, I thank thee that Charles has promised to be a good boy. Lord Jesus, love Charles, and make him love thee. O, Lord Jesus, tell mamma that Charles is a good boy."

As I walked along slowly, reflecting upon what I had seen and heard, I saw eight stalwart young fellows jumping on a green, and I heard them using blasphemous language. I entered into conversation with them, and endeavored to show them the evil of desecrating Sunday. I succeeded in obtaining their consent to sit down, and I told them several stories illustrating the dreadful consequence of Sunday profanation. I also related to them the juvenile dialogue which I had just heard, and it drew tears from all their eyes. One of them said: "Chums, I remember my old mother

praying for me when she was dying, and asking me to promise to be a Christian; but I forgot my promise, and I have been drinking, swearing and keeping bad company ever since her death. In the name of God I intend to be a Christian, and if you will not be Christians I will abandon your company."

He persuaded them, however, to go to church that evening. It was stated in the last letter I received from that locality that he superintends the school of which Charles and Julia are scholars, and that three of his companions are teachers, and that they are all consistent and useful Christians.—*Christian Advocate.*

WELLINGTON'S LAST WORDS.—When the Duke of Wellington was sick, the last thing he took was a little tea. On his servants handing it to him in a saucer, and asking him if he would have it, the duke replied: "Yes, if you please." These were his last words. How much kindness and courtesy are expressed by them! He who had commanded the greatest armies in Europe, and was long accustomed to the tone of authority, did not despise or overlook the small courtesies of life. "Ah! how many boys do!" What a rude tone of command they often use, to their little brothers and sisters, and sometimes to their mothers! They order so. This is ill-bred and unchristian, and shows a coarse nature and hard heart. In all your home talk remember—"If you please." To all who wait upon or serve you, believe that—"if you please" will make you better served than all the cross ordering words in the whole dictionary. Don't forget three little words, "If you please."

"Speak gently: It is better far To rule by love than fear."

A TIED CHILD.—The Rev. New-

man Hall says: "I know of a little girl in England who loves to pray. But one night she was very tired and sleepy, and was getting into her little bed without saying her prayers. But her mamma told her to kneel down first to pray. So she folded her little hands and said: 'Please, God, remember what little Polly said last night, she's so tired to-night. Amen.' I am sure that the good Jesus hears such a prayer as that."

THE ATHEIST AND THE FLOWER.

When Napoleon Bonaparte was Emperor of France he put a man by the name of Charney into prison. He thought Charney was an enemy of his government, and for that reason deprived him of his liberty. Charney was a learned and profound man, and as he walked to and fro in the small yard into which his prison opened, he looked up to the heavens, the work of God's fingers, and to the moon and stars which he ordained, and exclaimed: "All things come by chance!"

One day, while pacing his yard, he saw a tiny plant, just breaking from the ground near the wall. The sight of it caused a pleasant diversion of his thoughts. No other green thing was within his inclosure. He watched its growth every day. "How came it here?" was the natural inquiry. As it grew, other queries were suggested. "How came these delicate little veins in its leaves? What made its proportions so perfect in every part, each new branch taking its exact place on the parent stock, neither too near another nor too much on one side?"

In his loneliness the plant became the prisoner's teacher and valued friend. When the flower began to unfold he was filled with delight. It was white, purple and rose-colored, with a fine, silvery fringe. Charney made a frame to support it and did what his circumstances allowed to shelter it from pelting rains and violent winds.

"All things come by chance" had been written by him upon the wall, just above where the flower grew. Its gentle reproach, as it whispered: "There is One who made me so wonderfully beautiful, and he it is who keeps me alive," shamed the proud man's unbelief. He brushed the lying words from the wall, while his heart felt that "He who made all things is God."

But God had a further blessing for the erring man through the humble flower. There was an Italian prisoner in the same yard, whose little daughter was permitted to visit him. The girl was much pleased with Charney's love for his flower. She related what she saw to the wife of the jailor. The story of the prisoner and his flower passed from one to another, until it reached the ears of the amiable Empress Josephine. The empress said: "The man who so devotedly loves and tends a flower cannot be a bad man." So she persuaded the emperor to set him at liberty.

Charney carried his flower home, and carefully tended it in his own greenhouse. It had taught him to believe in a God, and had delivered him from prison.—*Zion's Herald.*

China claims to have had life insurance companies three thousand years ago.

The Farm and Garden.

FARM WORK FOR THE MONTH.

Cotton picking is, or should be, the all-absorbing work of the planter during the month of September. Hoping that all readers of the Farm and Home have taken the advice given them in the August number: have had their guns, running gear, packing screws, etc., put in perfect order; have prepared their baskets and wallets, and have done all the jobbing necessary for the fall work in the interval between laying by and cotton picking, they can now apply themselves with all their force to saving their crop. If they begin now and "keep up" with the cotton as it opens, they can do the work well and neatly, but if they allow the cotton to get ahead of their force the picking will be done in a hurry, and the result will be cotton filled with trash, hulls and dirt, which will certainly depreciate the value of the staple. It seems highly probable that when the market opens the "advantages" will be all "in favor of the buyer." The prospect of a heavy crop, the war in Europe, and the machinations of speculators will combine to depress prices and make buyers much more fastidious and discriminating than when cotton is scarce and prices rule high. Those, therefore, who are careful in picking will be sure to have a decided advantage over those who are not, and the increase in price will far more than compensate for the labor. The first pickings should be well-sunned, and if large quantities are stored in bulk, it is well to stir the heaps occasionally and expose them to the air, to prevent damage from heating. A slight heat or sweat, which will extract a portion of the oil from the seed and give a cream color to the lint, is desirable, but it is necessary to be very careful that this be not overdone.

Great care should be taken not to put up in bulk cotton picked in showery weather or early in the morning while the dew is on it, since, if this precaution be not taken, the heap will certainly heat and assume a dark, moldy color, which will largely depreciate the value of the lint.

RYE AND BARLEY.—This is the month to sow rye or barley for pasturage. Rye or barley sown about the middle of the month will be worth double that sown in October. Sow broadly of these admirable grains. You will thereby secure a fine, healthy pasture for your stock during the winter and until the beginning of March, and reap a rich yield of grain besides.

COAX.—Toward the end of the month corn should be gathered on all land intended to be sown in wheat, so that ample time may be given to prepare the soil to receive the seed in October.

PEAS should be gathered as fast as they ripen. In a year like this, when provisions are likely to rule high, and money to rule low (in the pocket), it is important to save all we can for food for man and beast. Save, therefore, we earnestly advise, all the peas that can be made, and after gathering the peas save all the vines for hay. It is excellent food for milch cows.

TURNIPS, if not already sown, may still be sown and yield a good crop. If the seed sown in July and August has failed to bring a good stand sown over again; and if you have found a good spot that you overlooked or forgot in July, and have since prepared well, sow it in turnips by all means. You can hardly have too large a patch in this valuable crop. Depend on it that the more turnips you grow the less corn you will have to buy, and the fatter stock you will have.

We are not sufficiently informed to be able to state how much money has been sent out of Georgia this year to pay for corn and hay purchased and consumed by Georgia farmers, but we venture to assert that the sum would not be very far from \$20,000,000. If we could have kept this sum at home we should not have so many crop-liens outstanding, and we should not be compelled to hurry our cotton to market and sell it at whatever price we can get. Let us therefore plant everything which will furnish good and abundant food for stock, save the corn, and enable us, as far as possible, to use our corn for bread. In this way we may in some measure redeem the error of the past spring, and save ourselves a part of the evil consequences of the "all cotton and no corn" mania.

HAY.—We have been blessed with such copious rains during the greater part of the summer that the crop of crab grass is unusually abundant. Let all be saved that can be gathered. As our fodder stocks will not be too numerous, it will be wise to "help out" with good hay.

CALIFORNIA and scarlet clover should be sown toward the end of this month. About sixteen pounds of clean seed will be sufficient to seed an acre. We confidently recommend their cultivation as most valuable forage plants. The California clover affords an abundance

of succulent food for stock in the early spring, and if not grazed too close will shed enough of seed to secure good crops for several years, although the ground has been used in the summer for the growth of other crops.—*Southern Farm and Home.*

PAPAL INFALLIBILITY.

The following is a translation of the chapter concerning the dogma of papal infallibility recently adopted by the Ecumenical Council:

The Holy Spirit has not, in effect, been promised to the successors of Peter, to publish a new doctrine, according to his revelations, but with his assistance to sacredly preserve them, and sacredly expound the revelation transmitted by the apostles—that is to say, the deposit of faith. All the venerable fathers have embraced and all the holy orthodox doctors have venerated and followed their apostolic doctrine, knowing clearly that this see of Peter remains always exempt from error, according to the divine promise of our Saviour, made to the prince of his disciples: "I have prayed for thee, in order that thy faith fail not; and thou, when thou art converted, confirm thy brother."

This gift of the truth and of the faith which fails not has therefore been divinely accorded to Peter and his successors in the chair; in order that acquitting themselves of their eminent charge for the salvation of all; in order that the flock drawn by them from the baneful pasturage of error, to be nourished by heavenly doctrines; and in order that all cause of schism being removed the church may be conserved entirely in unity and sustained by her foundation, she may maintain herself invulnerable against the gates of hell.

Now, at the epoch we are in, there is more need than ever of the salutary efficiency of the apostolic charge, and so many men are found who seek to reduce its authority, we think that it is entirely necessary to solemnly affirm the prerogative that the only Son of God has designed to join to the supreme pastoral office.

It is because we, holding faithfully to the tradition which ascends to the commencement of the Christian faith, for the glory of God, our Saviour, for the exaltation of the Catholic religion and the salvation of Christian peoples, we teach and define, with the approbation of the Holy Council, that it is a dogma divinely revealed—that the Roman pontiff when speaking *ex cathedra*, that is to say, when fulfilling the charge of pastor and doctor of all Christians, in virtue of his supreme apostolic authority, he defines that a doctrine regarding faith or morals ought to be held by the universal church; enjoys fully, by the divine assistance which has been promised him in the person of the blessed Peter, that infallibility which the divine Redeemer wished his church to have, in defining his doctrine touching faith or morals; and consequently such definitions of the Roman pontiff are unchangeable in themselves and not in virtue of the approval of the church.

If then any one, which may God forbid, have the temerity to contradict our definition, let him be anathema.

There are in the State of Ohio, to be reported in the forthcoming census, three hundred and sixty-two churches of the Campbellite-Christian denomination.

The number of the Newlight Christian churches is not yet ascertained.

The Swedenborgians have in Ohio twenty church organizations and sixteen church edifices.

It has been curiously shown in the French Academy that certain plants are as sensitive to the influence of chloroform as animals.

SCHOOLS AND COLLEGES.

WHITWORTH FEMALE COLLEGE,

BROOKHAVEN, MISSISSIPPI.

On the New Orleans, Jackson and Great Northern Railroad, one hundred and twenty-eight miles north of New Orleans, and fifty-seven south of Jackson, will reopen on

The 1st of September, 1870.

Thorough instruction in all the branches given.

Charge for board, tuition in English, English text books, school-room stationery, washing, fuel, lights, medicine and medical attendance, \$263 for the term of forty weeks. The languages and music, extra. A deduction of \$50 made for pastors of churches.

Number of pupils last term, 163.

THE ARROW TIE.

FOR BALING COTTON THE ARROW TIE

is the most popular, being the best Cotton Tie in use.

Planters and Cotton Press men everywhere prefer it to all others.

THE ARROW TIE

was used to cover MORE THAN HALF THE CROP OF 1869, giving entire satisfaction.

The patentee and manufacturer of the celebrated ARROW TIE, J. J. McComb, formerly of New Orleans, now residing in Liverpool, having control of the best and most extensive Rolling Mills in Europe, is constantly importing large stocks of this popular Tie, manufactured of the very best quality of English Iron, to meet the increasing demand for it throughout all the Cotton States.

Planters can buy or order the ARROW TIE of all dealers in Iron Ties, and of country merchants generally, at the lowest market price; and we respectfully solicit the patronage of Planters and Factors everywhere.

MISCELLANEOUS.

BROOKS' IMPROVED PATENT

WROUGHT-IRON REVOLVING

COTTON SKEW PIERS.

Patented by R. M. Brooks, of Georgia,

April 14, 1868.

It took the first premium at the Louisiana State Fair, at New Orleans, April, 1869, over eleven competitors; also at the Tennessee State Fair, at Memphis; and more recently at the Mississippi State Fair, at Jackson; and at the New Orleans State Agricultural Fair, at New Orleans, April, 1870, in a contest with fourteen Cotton Presses, embracing the most approved patents from different States of the Union, North and South.

The following is the certificate of some of the principal inventors of patents and merchants of New Orleans. In our circulars can be seen the certificates of practical planters and reliable merchants from several Southern States in regard to the admirable principle and practical working of this Press.

"We, the undersigned, purchased last season, from Messrs. J. B. Brooks & Co., the Brooks Revolving Cotton SKEW Press, for our customers, and, so far as heard from, they have given entire satisfaction."

"Messrs. Greenwell & Son, Warren, Crawford & Co., C. L. Wainwright, Ivey, McDaniel & Co., Frank & Daniel, Campbell & Co., Strong, Clapp Bros. & Co., E. F. Gelson & Co., Walker, Violet, Black & Co., Block Bros., Wright, Allen & Co."

Circulars, giving cuts with full description, price list, etc., sent by mail on application to

J. B. BROOKS & CO.,

Proprietors, 14 Union Street,

my21 5m New Orleans.

BRACES AND TRUSSES.—DR. JOHN G. BANGS, D.D., informs the medical profession and others that he has constantly on hand, and for sale at his complete assortment of LININGS, TRUSSES, Spinal and Shoulder Braces, and other appliances for the prevention, relief and cure of general debility, weakness and lameness, of the heart, lungs, and bowels, of the lungs, and of the nervous system, constipation and chronic diarrhoea, female derangements and extreme displacements of the womb, Hypertrophy, Prolapsus, and weakness of the male and female system.

These light, cool and springy appliances are the special favorites of the profession; are intensely common-sense and rational in their action; supply a missing link in treatment; place the above affections in a new and more hopeful light, and often complete cures where medicine can only mitigate more than it can cure a hernia or dislocated joint.

Scientific.

APHIDES, and other plant insects, may be destroyed by discharging upon them, from watering pot or syringe, a liquid compound of seven parts of water, three and a quarter parts of quassia chips, and five grains of the seed of the garden harkspur, the whole to be boiled down to a quantity of five pints.

The Journal of Chemistry warns its readers against the use of galvanized iron pipes for conducting water for culinary purposes. The superficial covering of zinc is rapidly decomposed by the water, and the oxide, carbonate and chloride of zinc are formed, which are of a poisonous character.

Bees make their honey in the dark, for the reason that by the action of light the pure sirup of honey is crystallized, or candied, as the saying is. Were this effect allowed during the process of manufacture, the cells might become sealed-up, and the work stopped. The bees are chemists, as well as geometrical, by instinct.

It is said that the oxidation of zinc is somewhat rapid at first, but it diminishes gradually and ceases in about four years, at which time a coating is formed over the metal that completely protects it from any further atmospheric action. If this be true, then zinc, from its lightness and cheapness, ought to be a most economical material for roofing.

ABSOLUTE CEMENT, made by mixing calcined and finely pulverized magnesite with infusorial earth and stirring in a solution of chloride of magnesium, is said to possess the properties of plasticity and hardness, after it has set, in a wonderful degree. It cannot be used under water, but is highly serviceable for forming ornamental moldings.

Deep sea soundings have discovered a kind of submarine bridge connecting Spitzbergen with Europe. Between Spitzbergen and Greenland, however, is a very remarkable chasm, the depth of which, at some points, is upward of two thousand six hundred fathoms. Even these depths abound in animal life of the most varied character.

The Darien exploring expedition has brought back a not altogether favorable report as to the practicability of a ship canal across that isthmus. Extensive and accurate surveys demonstrate the existence of physical obstacles, which, in the present state of engineering science, advanced as it is, are not easily to be surmounted, though the hope is entertained that they may be, and the enterprise undertaken.

SALT—Its Effect on the Blood.—Dr. Stevens, a French physician and surgeon, saw a butcher killing a pig. He observed that he stirred the blood of the animal, and added a handful of common salt to it while stirring, which immediately made it crimson, and on stirring being discontinued, the blood remained fluid. The change of the color of the blood awakened his curiosity. The butcher could give no explanation of the phenomenon, except that it kept it from jelling and spoiling. Dr. Stevens seized a vessel, caught some blood, and made several experiments by putting salt in it, and found that the blackest blood was instantly changed to a bright vermilion by salt. "Oh," said he, "there is a fact which may lead to a practical rule."

He had observed in cases of yellow fever, in the army, that the blood drawn was very black and fluid, and on adding salt it became vermilion and retained its freshness; whereas putridity of the blood is one of the characteristics of the yellow fever. He therefore abandoned the usual mode of treating it, and gave his patients a mixture of various salts, and in a very short time reduced the mortality of fever in the West Indies from one in five to one in fifty.

A MURDEROUS SEALFOWER.—One of the exquisite wonders of the sea, says the Scientific American, is called the opelot, and is about as large as the German aster, looking indeed very much like one. Imagine a very large double aster with ever so many long petals of a light green, glossy as satin, and each one tipped with a rose color. These lovely petals do not lie quietly in their places like those of the aster in your garden, but wave about in the water, while the opelots generally cling to a rock. How innocent and lovely it looks on the rocky bed! Who would suspect that it could eat anything grosser than dew or sunshine? But those beautiful waving arms, as you call them, have another use besides looking pretty. They have to provide food for a large open mouth, which is hidden deep among them, so well hidden that one can scarcely find it. Well do they perform their duty, for the instant that a foolish little fishlet touches one of the rose lips he is struck with poison as fatal to him as lightning. He immediately becomes numb, and in a moment stops struggling, and then the other beautiful arms wrap themselves around him, and he is drawn into

the huge, greedy mouth, and he is seen no more. Then the lovely arms uncloset and wave again in the water, looking as innocent and harmless as though they had never touched a fish.

HOUSEKEEPERS' DEPARTMENT.

A CHEAP FILTER.—The Manufacturer and Builder gives the following directions for a simple filter to purify cistern water: Place on the perforated bottom of a box a piece of flannel, and on this some coarsely powdered charcoal, then coarse river sand, and cover the whole with sandstone broken into small pieces.

RYE AND INDIAN BREAD.—Three quarts of corn meal, scalded with two and a half quarts of boiling water, one tablespoonful of salt, one ten-ounce of molasses; let it cool a few minutes, and add one quart of rye flour, and one quart of buttermilk with a heaping teaspoonful of saleratus stirred into it. Bake four or five hours.

AROMATIC BLACKBERRY SIRUP.—A correspondent of the Traveler furnishes the following: Take of blackberry juice two pints; sugar, one pound; grated nutmegs, No. 6; powdered cinnamon, one-quarter ounce; powdered cloves, one-quarter ounce; powdered allspice, one-quarter ounce; brandy, one pint. Steep the spices in the brandy forty-eight hours; filter, and after making a sirup of the juice and sugar add it to the sirup, when it will be ready for use. Dose for an adult, one tablespoonful; for a child, one teaspoonful occasionally.

PICKLED ONIONS.—White button onion—peel and steep in strong salt and water four days, changing two or three times; wipe quite dry. Pour over them scalding milk, leaving them to cool in it. Drain and dry each on a cloth, then place in jars. Boil white wine vinegar and pour over them. Add small bits of mace (whole blade mace) sparingly, and bits of red pepper. Tie the mouths of the jars with a wet bladder, then leather over it. Keep in a cool place, and you will be sure of approving and enjoying the pickles.

HOW TO WASH SUMMER SUITS.—Summer suits are nearly all made of white or buff linen, pique, cambric or muslin, and the art of preserving the new appearance after washing is a matter of the greatest importance.

Common washerwomen spoil everything with soda, and nothing is more frequent than to see the delicate tints of lawns and percales laid to dark blotches and muddy streaks by the ignorance and vandalism of a landress.

It is worth while for ladies to pay attention to this, and insist upon having their summer dresses washed according to the directions which they should be prepared to give their landresses.

In the first place the water should be tepid; the soap should not be allowed to touch the fabric; it should be washed and rinsed quick, turned upon the wrong side, and hung in the shade to dry, and when starched (in thin boiled but not boiling starch) should be folded in sheets or towels, and ironed upon the wrong side, as soon as possible. But linen should be washed in water in which bay has been boiled, or a quart of bran. This last will be found to answer for starch as well, and is excellent for print dresses of all kinds; but a handful of salt is very useful also to set the colors of light cambrics and dotted lawns; and a little beef's gall will not only set but brighten yellow and purple tints, and has a good effect upon green.—*The Household.*

ORIGIN OF THE WORD SALARY.—Spilling salt was held to be a unlucky omen by the Romans, and the superstition has descended to ourselves. Leonardo da Vinci availed himself of this tradition in his famous picture of the "Lord's Supper," to indicate Judas Iscariot by the salt-cellar knocked over accidentally by his arm.

Salt was used in sacrifice by the Greeks and Romans, and also by the Jews, and is still made use of in baptism by the Roman Catholic clergy. It was an emblem of purity, and of the sanctifying influence on others of a holy life; hence our Lord tells his disciples: "Ye are the salt of the earth."

The salt being spilt after it was placed on the head of the victim was considered a bad omen, being supposed to signify that the sacrifice was not accepted; and hence the superstition.

When we say of a shiftless fellow that he does not "earn his salt," we unconsciously allude to an ancient custom among the Romans. Among them he was said to be in possession of a "salary" who had his "salarium," his allowance of salt-money or of salt wherewith to savor the food by which he lived. Thus salary comes from salt—and in this view of the word, how many there are who do not "earn their salt."

The oat crop of Ireland this year is the heaviest ever known there.

BOOKS AND STATIONERY.

STANDARD EDUCATIONAL WORKS
PUBLISHED BY
CHARLES SCRIBNER & COMPANY,

Guyot's Geographical Text-Books.
"Incomparably superior to anything published."—*Agassiz.*

Introduction to the Study of Geography.
Elementary Geography.
Intermediate Geography.
Common School Geography.

Guyot's System is approved and indorsed by the most distinguished literary and scientific men of our nation; such as Prof. Agassiz, Dana, Penney, Henry and others, celebrated in science throughout Europe as well as at home.

The fact that ONE MILLION (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New System, for no other series of books ever published in America have ever secured so rapid and extensive introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; Cincinnati, Cleveland, Columbus, Springfield, Toledo, Marietta, and most of the other important towns and cities, numbering nine thousand schools in Ohio, and hundreds of towns and cities in the other Western States, while in the Southern States and California they are being extensively adopted.

Believing that the publication of Professor Guyot's series has marked a new and better era in the presentation of geographical science, that by it the pupils of this generation will obtain a clearer, more definite and exalted knowledge of the world on which they live, and that it is so systematized as to render that knowledge more valuable and permanent, we commend it to the attention of all interested in educational improvements and progress.

SCHOOLS AND COLLEGES.

FLORENCE WESLEYAN UNIVERSITY.
FLORENCE, ALABAMA.

H. ANDERSON, D. D., PRESIDENT.

This institution of learning, so widely known through the South, will begin its next session on WEDNESDAY, SEPTEMBER 14, 1870.

The Faculty is composed of men of experience and ability. The course of study is comprised in the Literary Department, Law Department, Department of Biblical Literature and Commercial Department. The advantages of this University are seen in its healthy and attractive location, thorough course of study, excellent discipline, the character and success of its instructors, and the reasonable rates at which board and tuition are furnished.

Students in the ministry and sons of ministers in the South, are admitted to recitation on paying the incidental fees.

EXPENSES PER SESSION OF FIVE MONTHS.

Tuition in the University classes..... \$25 00
Tuition in Grammar School..... 25 00
Tuition in Law Department..... 40 00
Incidental fee..... 2 00
(Tuition and incidental fee required in advance.)

Boarding fee, paid once..... 5 00
Boarding can be had in the best families at from \$10 to \$20 per month.

For particulars see circular, or apply to the President, Rev. Dr. Anderson, or to Hon. W. B. Wood, GEO. W. POSTELL, Jy23 ly President Board of Trustees.

TUSKEGEE FEMALE COLLEGE,
TUSKEGEE, ALABAMA.

The Fifteenth Annual Session begins September 14, 1870, and continues forty weeks; divided into two equal terms.

REV. GEO. W. F. PRICE, M. A., President.
REV. H. B. ROSS, M. A., Professor of Latin and Mathematics.

DR. M. BARTLETT, Director of Music, with Nig Assistants in the various departments of instruction and discipline.

The president calls particular attention to the fact that Rev. B. B. Ross, of the Alabama Conference, has accepted the professorship of Latin and Mathematics in the institution.

Brother Ross is a graduate of Lagrange College, Alabama. He was professor of Mixed Mathematics in that institution for two years. Subsequently he was president of Talladega Female Institute. His classical education, his experience in the practical business of teaching, his acceptable character of liberal service, his many excellent personal traits, all entitle him to the unlimited confidence of our people.

The College has just closed a most successful year. Its prospects were never brighter.

The present organization of the institution combines all the best features for securing the thorough instruction and efficient discipline of its pupils. The Faculty contains none but tried and trained teachers, whose success has been tested by years of service.

The boarding arrangements are under the immediate control of the president, who resides in the building, and supervises the social recreations and the professional duties of the pupils. The health of the pupils is in charge of an experienced matron. The table, kitchen and laundry are in care of a thoroughly trained housekeeper, Miss Shelley, of Talladega, is the governess, and brings to the office high social position, experience, and a teacher liberal education, and a matured Christian character. The pupils are trained in gymnastic and calisthenic exercises, strengthening their constitutions, and imparting grace and dignity to their movements. Religion is the basis of the system of education, and girls are taught that "the truth as it is in Jesus" is the highest attainable wisdom.

CHARGES FOR SCHOLASTIC YEAR OF FORTY WEEKS.

Tuition, according to grade, from \$25 to \$60 00
Tuition in music..... 60 00
Tuition in art, from \$20 to..... 40 00

Use of models in art, free of charge.
Use of instruments for practice, free of charge.

Use of library of reference, free of charge.
No incidental charges of any kind.
Tuition for each term payable in advance.
Address: REV. GEO. W. F. PRICE, President. Jy30 ly

WESLEYAN FEMALE INSTITUTE,
STANTON, VIRGINIA.

will begin its next session September 20, 1870, and close June 22, 1871.

REV. WILLIAM A. HARRIS, President.
With Thirteen Professors, Teachers, etc., etc.

Than this no College for Young Ladies ranks higher. The system of teaching like that of the University of Virginia. French is taught by a native master of the language. Professor in Department of Music has no superior in any school; among others, assisted by the distinguished vocalist, Madam Desha to full. This is one of the healthiest climates in America, and young ladies who come here from the South with feeble constitutions are entirely restored to health. The grounds are large and beautiful; buildings sturdy and elegant, framed by the purest breezes overlooking the entire city, and commanding the most magnificent rural and mountain scenery for thirty miles along the beautiful Valley of Virginia, making it one of the most delightful college homes in the Union.

(From Judge John N. Hendren, M. A., University of Virginia.)

I regard the Wesleyan Female Institute in this regard, under the management of Rev. William A. Harris, as one of the very best and most attractive schools in the State.

(From Hon. John B. Baldwin.)

The Wesleyan Female Institute is surrounded by influences which make it in all respects a most desirable place for the care and education of the daughters of Christian parents.

(From Prof. William E. Peters, LL. D., University of Virginia.)

Young ladies committed to the care of Prof. Harris will enjoy advantages of an intellectual and moral training rarely found.

(From Rev. William E. Munsey, D. D.)

From personal knowledge I believe that as the president of a female college, Rev. William A. Harris has no superior; indeed within the purview of my acquaintance he has no equal.

(From Bishop E. M. Marvin, D. D.)

The Wesleyan Female Institute has honor to the church, and to the cause of education. All the elements of high instruction are offered of a very high order. The most talented professors are employed, and neither pains nor expense are spared to make this department eminent. The school is very prosperous, and deserves to be so.

TERMS FOR THE FIFTY SCHOLASTIC YEAR.
Board and tuition in the Collegiate Course, \$225. Music and other extra studies moderate.

For catalogues address
REV. W. A. HARRIS,
Jy30 ly Stanton, Virginia.

EMORY AND HENRY COLLEGE, VIRGINIA.

The Fall session begins August 18, and closes January 11, 1871.

One hundred and Fifteen Dollars will cover the necessary expenses of the session, including tuition, board, fuel, room, washing, and incidental fees.

For catalogue or for other information address
E. E. WILEY, President,
Jy16 ly Emory Post Office, Va.

SCHOOLS AND COLLEGES.

LOUISIANA STATE UNIVERSITY.
(Name changed from Louisiana State Seminary.)

BATON ROUGE, LOUISIANA.
Founded and supported by the State of Louisiana.

NEW ORLEANS MARKETS.

From the N. O. Price Current.

With the exception of some revival in several branches of the wholesale trade, especially dry goods, we have but little change to notice in the general market since our last report. The supplies of Western produce are too limited to admit of more than a moderate local trade. The stock of flour, in particular, has been nearly exhausted, the remnant remaining on hand consisting mostly of choice extra; but on Tuesday the supply was increased by considerable arrivals, which met a ready sale at full prices. Under scant supplies corn and oats have sold at fuller prices, but we have no material change to notice in any other articles.

The weather has been clear and fine, with occasional indications of showers, but no rain of any consequence; and if it has been of a similar character in the country we may expect more favorable accounts. From some points we receive cheering reports, but most of the accounts within the past week have been decidedly discouraging; and taking a general view, the prevailing opinion among factors appears to be that, in our section at least, no increase can be expected over last year. With a known increase in acreage, all depends upon the weather. If the latter prove as auspicious as last year we may count on a handsome increase, and if we have an average season the receipts will probably show no material variation; but if, on the other hand, the crop be curtailed by the numerous contingencies to which it is yet subject, we may reasonably apprehend a decrease. It must not be overlooked that the backwardness of the crop makes dry weather essential to a liberal yield, and without it all hopes of an increase over last year will be dispelled.

The river is thirteen feet nine inches below high water mark.

CORRUM.—The following are the arrivals since the ninth instant:

Louisiana and Mississippi	2216
Mobile	68
Texas	1
Total	2285

On Saturday only two or three buyers came forward, and the sales were confined to 150 bales. Good ordinary sold as low as 15c; and although the business was too limited to serve as a basis of quotations, yet the general tendency was manifestly to lower rates than Friday's quotations. On Monday there was more demand, and 875 bales changed hands at irregular prices, showing a falling off of from 1/4 to 1/2 c, good ordinary closing at 15 to 15 1/2 c, low middling at 17 to 17 1/2 c, and middling at 17 1/2 to 18 c. On Tuesday the market opened with only a moderate inquiry and evidently increased weakness, caused by the want of competition among buyers and the instructions of planters to sell on arrival at the ruling rates. Under these circumstances, notwithstanding steady markets at Liverpool and New York, prices ruled easier, at least for low middling and the better qualities, which enabled buyers to operate more freely, and the business summed up 1,075 bales. A kind of ordinary variously described as good style and strict sold at 12 1/2 c, very strict good ordinary at 15 1/2 c, low middling, good style, at 17, strict low middling at 16 1/2 to 17 1/2 c, middling at 17 1/2 to 18 c, and strict middling at the same. We heard of no sales of good middling.

This makes an aggregate for the past three days of 2,100 bales.

Referring to our remarks above, we quote as follows:

Ordinary	12 to 12 1/2
Good ordinary	13 to 13 1/2
Low middling	14 to 14 1/2
Middling	15 to 15 1/2
Strict middling	16 to 16 1/2
Stock on hand Sept. 1, 1870, bales	20636
Arrived past three days	2285
Exported previously	5081
Stock on hand and on shipboard	15643

FLLOUR.—Flour has again continued in good demand for Cuba since our last review.

MONEY.—Gold, 113 1/2 to 113 3/4. American silver half dollars, 110 1/2 to 111, and Mexican dollars at 1 1/4 to 2 per cent. premium in gold.

In bonds we noticed sales of \$3,000 new City seven, on Saturday, at a small amount of the same, on Monday, at 71, subsequently resold at 71 1/2, and \$2,000 do. at 71 1/2; and \$800, on Tuesday, at 71 1/2, \$1,100 City ten per cents at 97, and \$1,100 (resale) at 97 1/2.

City Treasury notes are quoted at 20 per cent. discount.

CATTLE MARKET.

Special Notices.

To the Presiding Elders of the Mobile Conference.

DEAN BRETHREN: I am requested by Bishop McTear to give notice, through you, to all the colored preachers within your bounds, that their Annual Conference will convene at Selma, Alabama, on the twenty-fifth of November, and that they come up prepared with all the statistics, etc. Please interest your selves in this matter, that the Bishop may have a good showing from Alabama.

I would also respectfully request the preachers in charge of our circuits and stations (white) to interest themselves in this matter by informing the colored preachers of the time and place of holding the Conference, and aiding them with their reports. The delegates to their Colored General Conference will be elected there.

G. SHAEFFER, Supt. of Colored Work.

GADSDEN DISTRICT CONFERENCE.

The Gadsden District Conference will be held at Spring Creek camp ground, Cherokee county, Alabama, commencing September 29. Opening sermon on the twenty-eighth, at half past seven o'clock P. M. Let every member be present.

A camp meeting will be held in connection with the Conference. Ministers in Alabama and Georgia are cordially invited. Let everybody come. Persons coming by steamer will get off at Cedar Bluff; the camp ground is five miles from there. The boat leaves Rome every Tuesday morning, and Gadsden on Wednesday morning, passing Cedar Bluff at three P. M. and ten P. M.

T. G. SLAGHTER, P. E.

NEW ORLEANS DIST. CONFERENCE.

The New Orleans District Conference will meet at the Carondelet street church on Wednesday, October 5, 1870, at ten o'clock A. M. All the official members of the church within the district are members of the Conference. On Wednesday night it is proposed to have the administration of the Lord's Supper, and on Thursday night to hold a district love-feast.

L. PARKER, P. E.

TUSKALOOSA DIST. CONFERENCE.

The District Conference for the Tuskalooza district will be held at Greensboro, commencing on Thursday, September 22, 1870. All official members of the church are entitled to seats in the conference.

JAS. L. COTTEN, P. E.

CAMDEN DIST. CONFERENCE.

The Camden District Conference of the Alabama Conference will be held at Bolivar, Alabama, October 6-9. Rev. M. J. Law will preach the opening sermon October 6, at eleven o'clock A. M. All are requested to be present at the opening services.

D. M. HUDSON, P. E.

CAMP MEETINGS.

A camp meeting will be held on the Philadelphia circuit, Mississippi Conference, at Pilgrim's Rest camp ground, twelve miles east of Philadelphia, Nashville county, Mississippi, commencing on Thursday before the third Sabbath in October next. The preachers of the Brandon district and ministering brethren generally are invited.

The camp meeting is to be conducted on as primitive a style as possible, and all who live within reasonable distance are expected to come with tents or wagons, provided with rations, and to help support the meeting.

N. R. Ample accommodations for all who cannot come prepared to support themselves.

H. J. HARRIS, P. E.

A camp meeting will be held on the road from Greenwood to McNatt, one mile and a half north of Montjoy's ferry, commencing on the sixth of October. Preachers and people are invited.

H. WILLIAMS, P. E.

A camp meeting will be held at Salem, East Tuscaloosa and Bay Shore circuit, Mobile district, Mobile Conference, commencing on Thursday night before the second Sunday in October. Ministers and people are cordially invited to attend.

A. J. COLEMAN.

We will have a camp meeting (D. V.) at Frost's Bridge, on the Clark and Shubuta circuit of the late Mobile Conference, embracing the second Sunday in October. Brethren in the ministry, who can do so, are especially invited to attend, and any others who feel interested in this great work. Come over, Mr. Editor, and help us.

WILLIE H. LENTH, Pastor.

Woodville Dist., Mississippi Conference.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, SEPTEMBER 21, 1870.

NO. 36.

NEWS OF THE WEEK.

DOMESTIC.

WASHINGTON, Sept. 19.—The Telemachus survey expedition will sail in about two weeks.

The State Bank of Louisiana has been converted into a national bank, with a capital of \$600,000.

New York, Sept. 21.—The steamer Merrimack, from Rio de Janeiro, brings details of a collision, on the Amazon river, of the steamers Paris and Aray. The Paris sunk and one hundred and thirty-one lives were lost. Both pilots, it is reported, were drunk at the time of the collision.

SAN FRANCISCO, Sept. 21.—Late advices from Arizona place the capital of that Territory in a state of siege. A dozen citizens have been killed, and a number of Mexican teamsters and mail riders have been slaughtered, and the mail stations and wagon teams destroyed. Farmers are abandoning their ranches, and the Indians are absolutely free to depredate at pleasure.

FOREIGN.

PARIS, Sept. 19.—Many Prussian scouts have arrived near the walls of Paris.

LONDON, Sept. 19.—Prussia says distinctly that she does not recognize the French government, either imperial or republican, and is reluctant to make peace at present.

TOURS, Sept. 19.—Though it is certain Jules Favre has gone to the Prussian headquarters, no basis for negotiation has been arranged.

BERLIN, Sept. 19.—The North German Gazette says: The republic exists *de facto*, the empire *de jure*. We shall treat with that offering the best conditions.

WASHINGTON, Sept. 19.—Minister Motley telegraphs the State Department that Prussia does not intend to confine negotiations to the Emperor or Regency, but objects to negotiations with the present government, as it is incapable of furnishing absolute guarantees. Bismarck and Favre have had a conference, but the result has not transpired.

PARIS, Sept. 19.—The Red Republicans continue to placard the walls denouncing the new government. Trouble is apprehended. The citizens say they prefer Prussian rule to communism.

The railway to Calais has been cut at Conflans.

MANN, Sept. 19.—Olozaga breakfasted with Prim and Serrano. His prompt recognition of the republic has been explained and fully justified by the production of a dispatch from Sagasta recommending recognition.

LONDON, Sept. 19.—Rome is still unoccupied, though closely invested. The Italian chambers will be soon convened, to hear the result of the plebiscite in papal territory.

PARIS, Sept. 19.—A fight took place yesterday ten miles from Paris, between the advance guard of the Prussian army and a reconnoitering party of the French forces; the latter were driven back, and the Prussians established themselves on the heights which the French had been holding. The Prussians numbered thirty-nine thousand. The fight is said to have been very bloody. The French, though beaten, inflicted heavy losses on the Prussians. The contest raged upward of ten hours.

NEW YORK, Sept. 19.—The London correspondent of the Tribune telegraphs from Berlin, nineteenth, that the American legation has been advised from Paris that the blockade of the Elbe and Weser has been raised, and would not be resumed.

LONDON, Sept. 19.—The Times' correspondent, writing from Paris under date of the seventeenth, says: General Vinay led thirty thousand troops of the line last night to Vincennes, to dispute the passage of the Marne.

The advance of the enemy yesterday was not great. Their troops are massed near the Seine, ready to cross any moment. Crossing the Seine at Villeneuve and St. Georges, they will pass in the vicinity of Longjumeau to the rear of Versailles. Established there, they will push forward by the woods of Meudon to plant their batteries on the heights of Clamart; and if the city is bombarded they will open the fire upon the vanguard from this point. They can greatly damage the city as far as the Boulevard d'Enfer and Mont Parnasse.

The northern army is marching on St. Denis.

Announcement was made that a socialist meeting would be held, at which Victor Hugo, Ledru Rollin, Louis Blanc and Pyl would be

present to protest against moderation of the government. The meeting was probably suppressed.

The Reds are struggling hard for supremacy.

Since morning the enemy has made some progress toward Versailles, fighting at Juvisy and Athis. I saw a dozen wounded men carried to Voldegrace.

LONDON, Sept. 19.—On Friday Grauville made certain suggestions to Thiers, which Thiers might submit, if he saw fit, to the provisional government. From these suggestions results Jules Favre's interview with Bismarck. There are reasons for believing that peaceful results will follow this interview.

The papal negotiations for a compromise before the Italian occupation of Rome have failed.

MANN, Sept. 19.—The raising of the blockade in the Baltic and North Sea is officially announced.

LONDON, Sept. 19.—China advices are more unfavorable to peace. The Governor of Nankin has been assassinated on account of his sympathies for foreigners.

HAVANA, Sept. 19.—The children of all slaves captured since 1854, after serving sixteen years' apprenticeship, have been released by order of De Rodas.

HAVANA, Sept. 19.—The Panama and West India cable was opened to the public this morning. Tariff from the United States to Cuba \$2 50, to Jamaica \$5 for ten words, and twenty-five cents for every additional word to Cuba and fifty cents to Jamaica.

Benbata is reported to have surrendered.

HAVANA, Sept. 19.—The Spanish steamer Santander arrived this morning with five hundred soldiers from Spain for the army operating in Cuba. During the passage the Santander took fire, but the flames were soon extinguished. No one lost. Damage very light.

The filibuster steamer Salvador has been captured between Cienfuegos and Trinidad. She was loaded with arms and war material. The captain and thirty men escaped.

BERLIN, Sept. 20.—The Czar of Russia writes the Prussian Queen, extolling the wonderful ability and soldierly qualities of the Prussians, and congratulates the Queen on the Prussian victories.

It is denied that King William will only treat with Napoleon; but will hold all occupied territory until a stable government guarantees a treaty.

A letter from Bismarck says: Rest satisfied that the safety of Germany is being properly secured and the peace of the world assured. No obstacle will be placed, on the part of Germany, in the way for a termination of the war into which she was unwillingly drawn, but from which she will never retire until the legitimate aspirations of her children are secured, and the integrity of the Fatherland also secured, and the people of Germany rendered safe from future cruel and unnecessary conflicts, the slaughter resulting from which we cannot look upon without horror.

A private letter from Cassel says the decree has been formally revoked by which Eugenie assumed the Regency.

NICE, Sept. 20.—Contrary to the Prussian reports, Nice and Nyon are perfectly tranquil.

LONDON, Sept. 20.—Rumors, to be received with caution, circulate here of local uprisings in France against the Prussians.

The London morning and evening journals of to-day have no news whatever from Paris.

A dispatch was received here tonight from Paris, dated four o'clock this morning, reporting a collision of trains on the railway Plessis, near Tours, in which eleven persons were killed and twenty-five injured.

Thiers had arrived at Tours.

BERLIN, Sept. 20.—The North German Gazette says Bismarck consents to see Favre, promising, however, that Germany is not disposed to intermeddle in the internal affairs of France.

The German States are ready to recognize the republic when they are sure the French people prefer that form of government; but, to protect the military, they recognize in the territory actually occupied the authorities placed in power by the empire. Moreover, it is still unknown whether Bazaine recognizes the republic and government at Paris; indeed, it is reported he expressly disavows both.

FLORENCE, Sept. 20.—The siege of Rome has commenced. Five divisions under Cadorna invest the city. Resistance is a matter of form, and a surrender is expected to-day.

FLORENCE, Sept. 20.—Herr Arnim writes to Cadorna announcing his failure to prevent resistance to Italian occupation. The foreign legationaries defy the Pope's wishes, and consequently the Italians must take by force what cannot be obtained by diplomacy. The Italians are in force on all sides of the city except westward.

The preparations for defense will provide, if possible, for the protection of property, venerable monuments and the lives of non-combatants.

TORUS, Sept. 20.—It is reported, as the result of the meeting between Jules Favre and the King of Prussia, that the hope of a speedy peace is not abandoned.

Prussia is indisposed to grant an armistice. If there is to be peace, all must be settled immediately.

Thiers left here this afternoon, after an interview with Cremieux.

England received Thiers' explanations favorably, and is prepared to act with Russia and Austria, if they also accept Thiers' proposition.

Advices received from Orleans attach great importance to the action at Soissons yesterday. The Prussians suffered much from the artillery, which was hidden in the woods. The battle lasted nearly all day, when the Prussians were compelled to retire.

It is reported the Prussians were badly repulsed in an attempt to storm Fort Mont Valerien, on the west side of Paris.

Two trains collided near here, by which eleven persons were killed, including M. Duval, editor of the Journal des Debates, and twenty-five hurt.

An enormous quantity of stores and munitions which were gathered here have been ordered further south.

LONDON, Sept. 20.—Bietrie, formerly prefect of police of Paris, writes from Wilhelmshoe that it was impossible for the Emperor to conceal the court extravagance by a reinforcement of the civil list; that it is also untrue that the Emperor has ten million francs safely invested at Amsterdam; also untrue that the Emperor borrowed two thousand thalers at S-dan.

Bietrie says his master's misfortunes should protect him from such outrageous publications.

Granville's messenger to Lord Lyons was obliged to travel in a post chaise from Rouen. The mail service from Paris has been cut in all directions.

Prussia is intensely disgusted with England, especially in its publication of confidential memoranda.

The French have constructed earthworks near St. Denis and Clamont.

NEW YORK, Sept. 20.—Special to the Telegram:

LONDON, Sept. 20.—Great spirit animates the soldiers on the Paris ramparts. Sorties are made every day.

LONDON, Sept. 21.—The Tribune's Berlin correspondent telegraphs (giving the American minister as his authority) that he learns that Favre will be received only in his capacity as a citizen, and will be informed by Bismarck that Germany must insist as condition *sine qua non* of peace the surrender of the forts on the Moselle and the Rhine by which Germany was threatened and attacked.

A dispatch received in London from Bismarck, yesterday, says that Jules Favre was cordially received at the King's headquarters.

Favre is at Rothschild's chateau. Two preliminary discussions have been had relative to the time and mode of convening the Constituent Assembly in view of securing a sufficient guarantee for the fulfillment of which the provisional government may yield its consent.

TORUS, Sept. 21.—The repulse of the Prussians at Orleans is confirmed.

The ironclads for the defense of Paris have commenced operations.

General Ripley, an American now in Paris, has tendered his services to the Committee of Defense.

Floating batteries have been constructed to defend the entrances to the French rivers.

A large number of troops and volunteers are reported at Lisle. It is expected that the troops now in the eastern department will soon create a diversion.

FLORENCE, Sept. 21.—The city of Rome has been occupied by Italian troops. There was no bloodshed, which is altogether attributed to the tenderness of the Pope, who forbade any resistance. The Romans received the Italians with great enthusiasm.

NEW YORK, Sept. 21.—The steamship Lafayette, which sailed yesterday, carried one hundred thousand stand of arms and three million cartridges for the use of the French. Also contributions from New Orleans and other cities.

The attempt of the Prussians to cut the Orleans railroad resulted most disastrously to them. They were attacked by the French, and after an engagement of six hours' duration, notwithstanding a reinforcement of twenty thousand fresh troops, were compelled to fall back in great disorder. They were hotly pursued by the French to their main body at Corbeil, which was also compelled to evacuate that place and reconcentrate on Melun. The Prussians lost all their camp equipment, baggage, etc.

The Orleans railroad is now the only means of communication between Paris and the provinces.

The commander at Toul has unconditionally surrendered the city and garrison after sustaining another fierce bombardment. The city was found to have been greatly injured. The walls were breached in many places, and numerous buildings burned.—*Piquette.*

EMMAL, France, Sept. 21.—Toul has again been unsuccessfully attacked.

GREX, Sept. 21.—Reports coming in state that the Prussians who are investing Paris have been defeated with heavy loss in the plains of Mendon and Severes.

NEW YORK, Sept. 22.—A Tribune's special says Bismarck and Favre have met and discussed the time of the assembling of the French Constituent Assembly. This confirms the private information telegraphed the Times, some days ago, that Bismarck was forging the assemblage of a body of representatives from the people, competent to bind France by a treaty.—*New Orleans Times.*

LONDON, Sept. 22.—The Prussian King reports to the Queen that the investment of Paris is now complete, and that a French advance on the north side of Paris was repulsed with a loss of seven guns and two thousand five hundred prisoners.

The Standard this morning says peace negotiations are progressing hopefully at Meux. The general principles have already been arranged by Bismarck and Favre, and the details are now under consideration.

FLORENCE, Sept. 22.—A contingent of each division of the Italian army occupied Rome. The remainder camped outside the walls.

The papal troops laid down their arms and defied before the Italian soldiers, who cheered lustily for Victor Emanuel.

The papal legions have gone to Civita Vecchia to await arrangements to transport them to their respective homes.

The Italian loss before the walls of Rome was trifling.

Diplomatic corps at the Vatican announce their satisfaction with the precautions taken to preserve order.

The people all over Italy are enthusiastic over Italian unity.

The large cities are covered with flags, and fireworks and illuminations attest the general joy over the occupation of Rome by the national troops.

YELLOW FEVER IN MOBILE.—The Board of Health of Mobile, on the twentieth instant, published the following report:

Exaggerated rumors of the presence of yellow fever in the city having got abroad, the Board of Health deem it proper to make the following report, based upon information derived from the medical faculty: There have occurred within the city, in all, only sixteen cases—of these four have died. In order to prevent the disease from becoming epidemic, the best plan in our opinion is to limit as far as possible the material for it to operate on. We therefore advise all unacclimated persons to leave the city, and we warn absentees to remain away until the disease disappears. The physicians of the city are hereby requested to report every evening to this office all new cases that may occur in their practice, stating the locality of each.

The Prussians, it is said, have just driven the poor Baroness de Renmont from her chateau for the third time. They first forced her to fly in 1792, then again in 1814, and now at the age of ninety-four she is once more obliged to abandon her home. The Baroness lives a few miles from Montmedy, at the chateau of Grand Verneuil, where apartments were prepared to receive Louis the Sixteenth during his flight. They were never occupied by the unfortunate monarch, who was stopped at Varese.

WESTERN CONFERENCE.

The first session of the Western Conference of the Methodist Episcopal Church South convened in Leavenworth City, Kansas, at the church southeast corner of Broadway and Seneca streets, September 8, A. D. 1870, at nine o'clock A. M., Bishop H. N. McIntyre presiding.

The Conference was opened with religious services, conducted by the Bishop, reading the fourth chapter of Second Corinthians and singing the hymn, and Rev. S. S. Bryant, of the St. Louis Conference, offering prayer.

Rev. Joab Spencer was appointed secretary *pro tem*.

The Bishop announced the action of the General Conference creating the Conference, as follows: The Western Conference shall include the States of Kansas, Nebraska and Colorado, and the Territories of Wyoming, Montana and Idaho, and any other territory east of the Rocky mountains and west of the Missouri State line not included in other Conferences.

The following clerical and lay members were recognized as composing the Western Conference, viz:

Elders—Learner B. Stetler, William Bradford, Joseph King, Adonijah Williams, William Barnett, James S. Smith, Jacob McEwen, Charles Boles, Joab Spencer and Pryor W. Duncan.

Deacons—Ebenzer G. Frazier and Hugh W. Currin.

On Trial—Eugene R. Hendrix, Thomas C. Downs, Alonzo V. Bayley, George Warren, Edwin J. Stanley and William A. Hanna.

Lay Members—John O. Foreman, local preacher, of St. Joseph district; Lewis N. Lloyd and Preston R. King, of Savannah district; James S. Read, local preacher; Eli Hopkins, George Morris and John A. Tuggle, of the Kansas Mission district.

On call of the roll the following were found present: *Clerical*—Joseph King, Adonijah Williams, William Bradford, James S. Smith, J. McEwen, Charles Boles, J. Spencer, E. G. Frazier, H. W. Currin. *Lay*—J. S. Read, E. Hopkins, G. Morris and J. A. Tuggle.

ADMITTED ON TRIAL.

Berridge Margeson, recommended by the First Church Quarterly Conference, St. Louis Conference; Nathaniel G. Faubion, from Oskaloosa circuit, Missouri Conference; Wileher L. Pendleton, from Wright City circuit, Missouri Conference; Thomas R. Hedgepeth, Troy Mission, Missouri Conference.

RECEIVED BY TRANSFER.

George W. Evans, Little Rock Conference; Oscar Smithson, Illinois Conference; S. J. Catlin, Illinois Conference; William A. Blackwell, Missouri Conference; Charles W. Sanford, Missouri Conference; John S. Frazier, St. Louis Conference.

ORDERS RECOGNIZED.

Rev. John P. Skiles, formerly of the Illinois Conference of the Methodist Protestant Church, and having joined the Methodist Episcopal Church South, as local preacher, was recognized as in elder's orders.

APPOINTMENTS.

LEAVENWORTH DISTRICT.—Joseph King, P. E. Leavenworth station, to be supplied; Leavenworth circuit, William A. Hanna; Wyandotte station, William Barnett; Wyandotte circuit, Thos. C. Downs; Troy circuit, E. J. Stanley; Atchison station, Hugh W. Currin; Oskaloosa circuit, to be supplied; Holton circuit, John S. Frazier; Waukegan circuit, W. L. Pendleton; Waterville circuit, to be supplied.

NEBRASKA DISTRICT.—James S. Smith, P. E. Nebraska City station, Berridge Margeson; Rock Bluff circuit, Adonijah Williams; St. Stephen's circuit, T. R. Hedgepeth; Omaha circuit, to be supplied; Plattsmouth circuit, Oscar Smithson; Beatrice circuit, to be supplied.

SHAWNEE DISTRICT.—C. Boles, P. E. Shawnee circuit, George Warren; Tecumseh circuit, to be supplied; Paola circuit, to be supplied; Mound City circuit, to be supplied; Fort Scott circuit, G. W. Evans; Baxter Springs circuit, Nathaniel G. Faubion; Chitabee circuit, to be supplied; Ottawa circuit, to be supplied.

COUNCIL GROVE DISTRICT.—Jacob McEwen, P. E. Council Grove circuit, E. G. Frazier; Cottonwood Falls circuit, to be supplied; Wichita circuit, to be supplied; Augusta circuit, to be supplied by O. P. Noble; Humboldt circuit, to be supplied; Verdigris circuit, to be supplied; Clarke's Creek circuit, William Bradford; Emporia circuit, to be supplied.

MONTANA DISTRICT.—L. B. Stetler, P. E. Helena station, S. J. Catlin; Diamond City circuit, to be supplied; Gallatin City circuit, William A. Blackwell; Roseman City circuit, to be supplied; Virginia City circuit, Charles W. Sanford; Bannock City circuit, to be supplied; Deer Lodge City circuit, to be supplied.

COLORADO DISTRICT.—William H. Lewis, P. E.

THE COLORED DISTRICT.—Moses White, P. E. Leavenworth, Moses White; Monroe (Mo.), William Meadows; Platte City (Mo.), to be supplied; Atchison circuit, to be supplied; Paola circuit, to be supplied.

Pryor W. Duncan, transferred to St. Louis Conference; E. R. Hendrix, transferred to Missouri Conference; Joab Spencer, superannuated.—*St. Louis Christian Advocate.*

Missionary Plan and Proposition.

We ask special attention to the following proposition:

PARRISAN, MOBILE ST. CHURCH, NEW ORLEANS, Sept. 12, 1870.

REV. J. B. McFERRIN, D. D., MISSIONARY SECRETARY: I regretted not meeting you recently when I passed through Nashville. I feel especially concerned about discharging that incumber, the missionary debt. "Owe no man anything, but to love one another," says our guide-book. I am not aware that the liberal proposition of the Nashville brother has met with a response. I suppose not. I think every itinerant preacher in the church is willing to obligate himself to pay \$5 toward liquidating that debt. Let it be a personal, individual thing. Some of our brethren may be too poor to pay that amount, in which case let them collect it from others. I think that if each itinerant will pay that amount it will be sufficient to meet the claim. Besides, there are a great many of our local brethren and laymen who would accede to the proposition, so that by the close of the forthcoming sessions of our Annual Conference the whole missionary debt would be paid, and we should be free. If the debt is thirty thousand dollars, six thousand preachers at \$5 would meet it. I would suggest that this contribution do not conflict with our regular missionary contributions in our charges. Now let us have six thousand names, and \$5 each, by January 1, 1871. It is mortifying that appeal after appeal should be made from our papers and pulpits for money to pay this debt. Let every one who reads or hears of this proposition consider that he is personally meant, and lay the paper down, and send the money to the secretary instantly. Inclosed find draft on R. J. Harp, 112 Camp street, New Orleans, for \$5 to pay the missionary debt. I consider if the church owes the debt, the preachers are a part of the church, and its representatives in the matter, which makes it well-nigh a personal obligation. A lay member of my charge incloses five dollars, also, toward the missionary debt.

Affectionately, and in hope of liberty,

T. B. WIRTZ.

Nashville Advocate.

ST. LOUIS DISTRICT CAMP MEETING.

The St. Louis district camp meeting was a complete success. The Lord was with his people. The church is greatly revived and strengthened; sinners were convicted and converted. God only can tell the good that will result. We can only state that from very incomplete records—the first two days not having been kept at all—there were over three hundred penitents at the altar. Of that number we have the names of over two hundred who professed conversion, and over one hundred and fifty who joined the church. These figures include seventeen children and thirty-five colored people. We have reason to believe that many more have found peace with God than the number stated above, for at every meeting nearly every penitent was blessed—fully ninety per cent. of those who presented themselves at the altar; but many, after being blessed, went back in the congregation to make room for other mourners, and their names were not obtained.—*St. Louis Christian Advocate.*

JEREMY TAYLOR said: Hasty conclusions are the mark of a fool; a wise man doubteth—a fool rageth, and is confident; the novice saith, I am sure that it is so; the better learned answers, Peradventure it may be so; but I prithe inquire. Some men are drunk with fancy and mad with opinion. It is a little learning, and but a little, which makes men conclude hastily.

The Christian Advocate.

SATURDAY, SEPTEMBER 24, 1870.

NOT LOST.

The look of sympathy, the gentle word
Spoken so low that only angels hear;
The secret act of pure self-sacrifice,
Unseen by men, but marked by angel's eyes;
Those are not lost.

The sacred music of a tender strain
Wrung from a poet's heart by grief and pain,
And chanted timidly, with doubt and fear,
To busy crowds who scarcely pause to hear,
It is not lost.

The silent tears that fall at dead of night
Over soiled robes which once were pure and
white;
The prayers that rise like incense from the
soul,
Longing for Christ to make it clean and
whole;
These are not lost.

The happy dreams that gladdened all our
youth
When dreams had less of self and more of
truth;
The child-like faith, so tranquil and so sweet,
Which sat like Mary at the Master's feet;
These are not lost.

The kindly plans devised for others' good,
So seldom guessed, so little understood;
The quiet, steadfast love that strove to win
Some wanderer from the woeful ways of sin;
These are not lost.

Not lost, O Lord, for in thy city bright
Our eyes shall see the past by clearer light;
And things long hidden from our gaze below
Thou wilt reveal, and we shall surely know
They are not lost.

The Argosy.

FROM AN ITINERANT'S WIFE.

MR. EDITOR: We receive your paper weekly, and read it with much interest. We have a little girl and boy, who are never weary of reading "The Child's Corner," and when the papers grow a little old they beg them, that they may transfer "the beautiful little stories and pieces of poetry to their scrap-books." I trust that we shall be able to rear all our children in the cultivation of a taste for religious literature.

We have a Sabbath school at this place, but not very flourishing. Although our older sons can find nothing new in the library—having read, here and elsewhere, all it contains—they still bring home Sabbath school books and read them regularly, thereby attesting the truth that a good book may be read several times with interest and profit. I think the great lack in our Sabbath schools is religious teachers. Those who are out of the church and out of Christ are not prepared to train the youthful mind for heaven.

The churches in this part of the State are being much strengthened by revivals. The Lord is with his ministers in their efforts to win souls to Christ, and is giving them visible fruits of their labors. At Minden a most gracious work has just closed, which might have been protracted longer with profit if assistance could have been had. The pastor is now in the midst of a refreshing meeting at Flatlick, but his own strength is nearly exhausted, and help cannot be obtained. Every preacher has as much as he can do in his own work, and the great cry is—"Help!" "The harvest truly is great, but the laborers are few."

This is certainly a time of refreshing from the presence of the Lord. It has not been my privilege to be in one of these meetings yet; home duties and the care of a large family have kept me in the background; but my heart and prayers go with "the heralds of the cross" everywhere, especially with that one whose destiny I have shared for so many years. I often have a desire to accompany him during such seasons as the present, and help him in the good work so far as lies in the power of a poor, weak woman; but duty says, "Home is your sphere," and I submit, praying for that "godliness which, with contentment, is great gain;" and often I know that God is not confined to time or place in administering his blessings. In our own family circle, where we have an altar erected to him, he sends into our hearts the still, small voice, which whispers welcome words of comfort and encouragement; and when we rise from our knees I feel like a new round of duties had been presented—instead of the old, monotonous routine—so bright, and encouraging the aspect everything wears. At such times I cast a glance around the old "shabby mansion," and wonder if every home contains as many blessings as ours.

There are those who pity the itinerant's wife in her poverty and privation. A friend said to me: "How can you be so cheerful? It seems to me that I should always be in an ill humor, situated as you are." Ah! it would be far more difficult to tell what the religion of Jesus does not do, than what it can do. How few in the world realize that true happiness may exist in a home where but a small share of the good things of this life are enjoyed. They do not understand that this religion is as an under current, mighty and powerful, animating and encouraging the heart of every true Christian, even in the midst of difficulties which would crush the hearts of the most resolute who are without God and without hope in the world.

You will doubtless hear soon, from the preachers in northwest Louisiana, of the condition of their various charges. May the Lord continue to bless his gospel, that it may have free course and be glorified in converting sinners, in strengthening believers, and in building up our beloved Zion.

AN ITINERANT'S WIFE.

HOMER, LA., September, 1870.

Who Founded the Baptist Church.

MR. EDITOR: I wish to call the attention of all who may feel interested on the subject, that Elder J. R. Graves, on a visit to the Baptist State Convention recently held in the town of Minden, Louisiana, did publicly and positively deny the generally received historic fact that the first Baptist Church in the United States of America was founded by Roger Williams, and asserted that John Clarke, of Newport, was the founder of said church, and that he, J. R. Graves, had been to Newport, and sought out and found in a dilapidated graveyard a tombstone erected to the memory of said John Clarke; and that he, Graves, having removed with his own hands the tall grass which had grown upon the grave and about the tombstone, also the mold and dirt which had settled upon it, read the inscription upon the tombstone, certifying that John Clarke was the veritable founder and father of the first Baptist Church on the American continent.

As the bold and unqualified assertion of J. R. Graves has doubtless misled some, and through their influence may deceive others, and as the gist of the subject is an attempt to establish, through the Clarke line, the dogma of apostolic succession, I have taken the pains to procure an exact copy, punctuation and everything pertaining to said inscription; and I do affirm, and am prepared to prove from authentic documentary testimony now in my possession, that Mr. Graves' assertion is false.

N. M. SKIRWORTH.

MT. LEBANON, LA., Aug. 26, 1870.

CHURCH SCHOOLS.

MR. EDITOR: My attention has been called to an article in your paper of the third instant, on "Church Schools," and I have been requested to write you on the subject. The article contains some expressions calculated, though I presume not intended, to mislead, and perhaps do more harm than good. Their publication and circulation among us is, I think, likely to retard the object the writer of them seems to have had in view.

To speak disparagingly and damagingly of some of our schools is not well calculated either to promote education generally among us or to advance the interests of the two colleges particularly commended. Your correspondent, "H****," is certainly greatly misinformed. His allusions to Sharon Female College, and by implication to Madison College, are particularly unfortunate. It is no disparagement to Whitworth College to say that the former is one of the oldest and best schools in the South, and has probably done more for the religious education of our youth than any other school in the State. As to its being "barely able to live," and to be incidentally mentioned and put at the foot of the list of our Conference schools, it is out of the question. I will not believe that any one connected with Whitworth College has had any hand in such gross misstatements. I am sure President Johnson as much regrets such a publication as I do. Whitworth College does not need better friends than some of us who are connected with the colleges at Sharon.

Your correspondent states, by fair implication, that Madison College has no existence among us even as a school of any kind. This is unfair. Since the ravages of our late war it has been for the most part not much more than a first class high school; but it has at no time touched a point below a high classical school of the very first grade. It is now both looking and working to put on regular college habits and honors; and in a catalogue of "church schools" in the Mississippi Conference it deserves mention. It is certainly one of the oldest and best Methodist schools in the State.

While everything is true that is said by your correspondent, and much more that might be said, of Centenary and Whitworth Colleges, it is inexpedient, I think, to say no more, to attempt to elevate them at the expense of others perhaps equally deserving.

Yours very truly, etc.,

R. ABBEY.

CANTON, MISS., Sept. 12, 1870.

REVIVAL NOTICES.

MR. EDITOR: The most interesting and edifying part of the Advocate is the "News from the Churches," but this is often spoiled by empty phrases, implying what is evidently not felt by the writers. It has got to be fashionable to close revival notices with: "To God be all the glory." Of course we cannot say positively that this is not felt, but judging from the tone in which these notices are sometimes written we are often skeptical. For instance, a brother has a good time at a meeting, sinners are awakened, mourners converted, and many join the church. He must needs give a notice of it in the Advocate, and he writes about as follows:

"Mr. Editor: Say to the friends of Zion that the Lord has done great things for us, whereof we are glad. The fire is burning in this part of God's vineyard. I have caught the flame and am spreading it all over my circuit. I opened the battle against the devil at such a place and time. The conflict lasted two weeks, and resulted in thirty recruits. We were assisted by Bro. so and so, who preached with great power. He is indeed an able minister of the gospel of Christ. To God be all the glory!"

Now I suggest that we try to find another way to close these revival notices, as that phrase has become hackneyed, especially until we learn to "say to the friends of Zion" what we have to say about our revivals with less flourish.

It is encouraging to know that the Lord is reviving his work, and we certainly should not fail to give the church at large the benefit of the good news; but let us deal in facts—simple, unadorned facts. These are more edifying to those for whose benefit the revival notices should be written than rhetorical flourishes and the praise of living ministers, not to say self-praise. I read a revival notice somewhere recently which was about as follows:

"We have just closed a meeting at so and so, which resulted in twenty-five accessions to the church and about as many conversions."

Now that is all anybody cares to know about that meeting, and an article of a column's length could not improve it. So thinks

NEWS FROM THE CHURCHES.

OPELOUSAS, LOUISIANA.

MR. EDITOR: With unfeigned gratitude to God I will inform the church that the work is prospering here. At Bellevue we had a happy meeting, resulting in the conversion of about eighteen souls; at Coulee Crouche (Brother C. A. Frazee's work) as many more; and at Kimball chapel a fine work is progressing now. At the latter place there have been about one hundred and sixty conversions since September 5, 1869. May the Lord sanctify the church for the great work of evangelization. Yours fraternally,

B. F. WHITE.

SEPTEMBER 15, 1870.

MINDEN, LOUISIANA.

MR. EDITOR: I have just closed a very good meeting at Griswold's chapel, on the Farmerville circuit. There were eleven conversions and thirteen accessions to the church. The church was greatly revived. Many praises went up to God from the new converts and from the church. Had my strength been sufficient to have continued, the results would have been much greater, as a fine feeling pervaded the whole congregation. The prospects are good for a general revival throughout the whole work.

ROBERT RANDLE.

SEPTEMBER 14, 1870.

RIVES' CHAPEL, CAYUGA CIRCUIT, MISSISSIPPI CONFERENCE.

MR. EDITOR: On last Sabbath we closed the most interesting meeting at this place that it has ever been my privilege to attend. It lasted nine days. It was a union meeting—the first one of the kind that I have ever attended. Our Presbyterian brethren united with us heartily. Brothers Daniels and Hamard represented the Presbyterian ministry; Brothers Brown, Nixon and myself the Methodist. There were about thirty conversions. There were twenty-two accessions to the Methodist church and fifteen to the Presbyterian. It was indeed a time of refreshing from the presence of the Lord. Praise the Lord!

IRA B. ROBERTSON, P. C.

SEPTEMBER 6, 1870.

HOMER, LOUISIANA.

MR. EDITOR: We protracted the services in our church at Minden four days after the district meeting closed. The church was greatly revived, and twelve persons joined our church by application and one by letter; some fifteen professed to have obtained pardon.

The following Saturday (August 27) we commenced a meeting at Flatlick church. Here our congregation is not large, yet the Lord blessed us greatly. Twelve were added to our church—eight by application and four by letter. Our appointments called us away on Friday noon, but the brethren continued the meeting, and this morning before my arrival at home a messenger came for me, saying the interest in the neighborhood was on the increase. I will return to their assistance in the morning.

Truly, your brother,

N. A. CRAVENS.

SEPTEMBER 5, 1870.

ROCKY MOUNT CIRCUIT, MONTGOMERY CONFERENCE.

MR. EDITOR: God has poured out abundantly of his Holy Spirit upon this field, greatly reviving his people and converting many precious souls. The Lord has done great things for us, whereof we are glad. During the year much attention has been given to Sabbath schools, nine of which have been organized, most of them being in a prosperous condition. Class meetings have been established at all points, and are bringing forth the good fruits for which they were originally founded. There have been revivals at seven different appointments on the circuit—all but one—which have resulted in the addition of about one hundred and eighty members to our connection by profession and about thirty-five by letter, making in all two hundred and fifteen.

At our second quarterly conference Brother R. C. Gibson, a local preacher, was employed to assist me on the work. We have been favored with the co-operation of local brethren Loftin, Rylander and Pannin, who rendered valuable service; and also with seven scriptural, logical, irresistible Holy Ghost sermons by Rev. William Swift, Presbyterian minister. We say with the Psalmist: "The Lord is good to all, and his tender mercies are over all his works. All thy works shall praise thee, O Lord, and thy saints shall bless thee. They shall speak of the glory of thy kingdom and talk of thy power."

W. B. ADAMS, P. C.

SEPTEMBER 12, 1870.

WALNUT GROVE CHURCH, WALNUT GROVE CIRCUIT.

MR. EDITOR: We have just closed our protracted meeting at this church, which lasted nine days, and resulted in nineteen accessions to the church, and about the same number of conversions. It was one of the best meetings it has been my privilege to attend in many years. The Holy Ghost was abundantly poured out upon the church, and many were enabled to shout the high praises of God and the Lamb. Some bright conversions around the family altar and on the way to church. God blessed us in the prayer meeting, in preaching, in singing, in praying, and preachers and people rejoiced together in hope of the glory of heaven. The accessions to the church were of the best material in this community—among them many promising young men and young ladies, and many of them special objects of prayer during the present year. Quite a number of penitents were left at the altar, and some, I think, will join other churches.

Your brother in Christ,

IRVIN MILLER.

BRANDON DIST., MISS. CONF.

September 14, 1870.

WEST PASCAGOULA CIRCUIT, MOBILE DISTRICT.

MR. EDITOR: We have just closed a meeting held at Red Hill church. The power of the Master was clearly manifested in convicting and converting sinners. There were fifteen conversions and eighteen accessions. We could have continued the meeting longer, as interest increased daily, but other appointments far away brought the services to a close with about forty penitents at the altar. I very much doubt the propriety of closing a good meeting to fill other appointments where but little interest is manifested. May God carry on the good work. May the seed sown here bring forth fruits of immortality in that land of pure delight, where saints immortal reign. We have been blessed with the assistance of Brothers Roberts and Flurry, men of zeal and religious experience. We had also to assist, by her prayers and holy presence, Mother Fletcher, a remarkable monument of God's favor. She was converted in the year 1790, and for eighty long years has adorned the noble cause. On the day of her conversion she walked fifty miles to the camp meeting that was in progress near Wilmington, North Carolina, and under the preaching of John Gamewell she was convicted, went to the altar, and just before the dawn of day, without rest or refreshment for her wearied body, she was happily converted. Trembling with the infirmities of age, she still loves to linger around the altar and counsel penitents. We thank God that we ever saw Mother Fletcher. She has been tried in the furnace of religious experience, and can encourage the young. She is now walking beside the waters of the dark river, waiting for the boatman to carry her home. She is ready, and says that she thinks she will attend her next protracted meeting in eternity, where congregations never break up.

U. B. PHILIPS.

SEPTEMBER 17, 1870.

CAMITE, LOUISIANA.

MR. EDITOR: The time set for holding our camp meeting in Springville is past, and in the good providence of God we were permitted to assemble at the appointed time. The doctrines of the gospel were preached in all their purity, and sustained by arguments drawn from reason and revelation. The gospel was proved to be "the power of God and the wisdom of God." The members of the church were greatly revived, and made to rejoice by the

manifest presence of their Saviour. Sinners felt and trembled, but comparatively few of the great number present yielded to the influence of the Spirit.

The welcome which this announcement of our intention to hold a camp meeting met; and the cheerful, liberal spirit manifested by all in preparing for it, led us to hope that there would be a great ingathering of sinners to the Lord. In this we were disappointed; but we do not feel that our meeting was a failure. The first man who presented himself for prayer was converted in a few minutes, and he does not rejoice alone, for others were made to realize that "Jesus hath power on earth to forgive sins."

Only five were received into the church. We are persuaded that a powerful influence for good has been exerted on the community by this coming together of the preachers and people of God. Already, by a special request of some of the most influential persons of another community a little further off from whiskey, we have determined to hold another meeting—a little camp meeting—from which we expect greater results. It is thought by competent judges that the fumes of whiskey which arose from the breath of the idle, and curious, and "bleated" over the altar, militated very seriously against the success of the meeting.

At Pleasant Grove, where we expect to begin another meeting on the ninth of October, we hope to escape this evil.

Fraternally yours,

JESSE FULTON.

SEPTEMBER 7, 1870.

SCOTLAND CT., MISSISSIPPI CONFERENCE.

MR. EDITOR: The good Lord is with us on the Scotland circuit. We have had a revival at every appointment save one, and hope to have one there before the close of the Conference year.

We have just closed a meeting of nine days at Sweetwater church, which resulted in quite a number of conversions and fifteen accessions. The membership had got very cold—some had nearly given up the ship. But nearly all are now rejoicing in God our Saviour. The Spirit of God attended the word in great power. Many came trembling to the altar, earnestly seeking salvation. The meeting broke up on the ninth day, leaving about twenty penitents at the altar. The people were anxious for the continuance of the meeting, but the ministers had to leave to meet other engagements. Many thanks to Brother H. F. Johnson, of Brookhaven, and Brother William Wadsworth, of Pleasant Valley, for valuable service rendered. Brother Johnson is at home in the pulpit as well as at the head of a college.

The meeting at Wright's church only continued five days, as we had but little help. It resulted in five or six conversions and about as many accessions to the church. The altar was crowded with penitents when the meeting closed. The membership was also greatly blessed, and I believe many would have been born of the Spirit had the meeting continued. I am satisfied our protracted meetings break up too soon, especially when there is an opening for doing good. It is much easier to conduct a revival than it is to get one up; and yet the evil is hard to remedy. Other appointments would fall through in consequence of non-attendance; and yet, no doubt, in many cases it would be best to let them go. I believe we ought to labor where and when, in the providence of God, there is an opening for good.

Our meeting at Gallatin was a profitable one, though there were no conversions. The congregation was good and the church was greatly strengthened. To God be all the glory. Yours,

F. W. SHARROBROUGH, P. C.

BROOKHAVEN, MISS., Sept. 8, 1870.

A MILK-WEED grows wild in California, the fiber of which is as strong as manilla hemp, and as fine as linen. It is believed that it can be utilized.

ONE POUND of coal in the hands of a good chemist can by its consumption be made to evaporate, or convert into steam, fourteen pounds of water.

The Christian Advocate.

SATURDAY, SEPTEMBER 24, 1870.

A SUMMER DAY.

There's a quivering rent in the curtain
That longs for a needle and thread;
There's a garment that ought to be finished,
And a book that wants to be read.
There's a letter that ought to be answered,
There are clothes that ought to be washed,
And I know these tasks are waiting,
And ought to be done to-day.

But how can I mend the curtain
While watching this silvery cloud?
And how can I finish the garment
When the robin calls so loud?
And the whistling trees are telling
Such stories above my head
That I can but sit and listen,
And the book is all unread.

If I try to write the letter
I'll sure see one half the words
Will be in the envious language
Of my chattering friends, the birds.
The lilacs bloom in the sunshine,
The roses nod and smile,
And the clothes that ought to be washed
And ironed must wait awhile.

The honey-suckles hum in the clover,
The grasses rise and fall,
As he hears the brown thrush call.
And the birds sing to me softly,
Oh, what could be sweeter than living
This beautiful summer day!

BREAKFAST BY THE SEA.

All the incidents in the Saviour's life are interesting and instructive. They show how good he is, how full of love and tenderness. His life was radiant with generosity in all his mighty acts and in his "little deeds of love." That last meeting by the sea-side illustrates this.

He had been crucified and had risen. Several times he had met and comforted the disciples amid the great trials and perplexities through which they were passing, and still they needed help. They were poor, friendless, pressed with hunger, and in doubt about the future, and must have suffered greatly from fear and anxiety.

To relieve present want they "go a-fishing." All night they toil and catch nothing. The morning comes, and they are hungry, weary and discouraged. Temporal trials affect their faith and hope, and we may well suppose that they are sad and heavy of heart as the morning light breaks upon them. A stranger stands upon the shore and asks: "Have you any meat?" They answer: "No." We can almost hear the sad cadence of that no. There is hunger and discouragement and sorrow, and almost despair in it. But the stranger's voice comes with peculiar cheer, and somehow they feel moved to obey and "cast the net on the right side of the ship." What a surprise! The net is full! John whispers: "It is the Lord." So have disciples often whispered since.

Peter comes impetuously to the shore, the others dragging the net full of great fishes. But this was not all. Jesus had already kindled a fire, broiled some fish, by miracle or otherwise had provided bread, and now asked all to eat. They were surprised, delighted. What a change! The cloud had passed, the sorrow that had filled their hearts was changed to joy. That breakfast was the sweetest, richest they had ever eaten; it was full of love and encouragement. Jesus had prepared it. Jesus had shown them that he still cared for their temporal wants. What a world of fear and anxiety was swept away by that one act! The disciples could never forget that thoughtful provision. They could never drop back again where they were before. Jesus had led them to an advanced, a higher standpoint. They felt safer, happier, stronger from that moment.

Was it not kind in the Saviour to come to them just at that time, when they were so weary, hungry and discouraged? There is a lesson in that. Just so he visits all his people. All do not see and know him at once; but some disciple of lively vision, like John, may whisper in our troubled souls: "It is the Lord." Jesus does not forget our temporal wants. He cooked a breakfast for his hungry servants. His disciples seem to do it, but it is Jesus who moves them.

How often our ministers have been thus served! What generous hospitality prevails among the saints! It is the Saviour in them who doeth the works. Ministers see dark hours sometimes. Let them remember that breakfast on the sea-shore. They are sometimes afraid to venture to their work without calls and contracts for salary. The breakfast on the sea-shore reminds them. Can we not trust Christ? He calls us to seek and save the lost. Let us not delay to

enter upon the work. Remember the breakfast by the sea-shore—*Morning Star.*

ARE THESE THINGS SO?

The Christian Union gives the following as statistics and facts, on the authority of the Northern Christian Advocate:

"The Methodist Episcopal Church, instead of having been supplanted throughout the South by the Methodist Episcopal Church South, is declared by the Northern Christian Advocate to be, in many districts, 'quite as strong in membership, social position, church property, and all other respects, as the Church South.' The entire membership of the Southern Church, according to the figures which we printed some months ago, is 571,241; that of the Northern Church within the limits occupied by its rival is given by the Northern at 289,571. 'About one-half of this membership,' says this journal, 'is white.' We estimate 147,921, though the exact number is not known. Delaware, Washington and Lexington Conferences are exclusively colored; Baltimore, Wilmington, Virginia, West Virginia and Kentucky are exclusively white; Holston, North Carolina, Missouri and St. Louis are mostly white; Alabama, Georgia and Tennessee include a large white membership; South Carolina, Mississippi, Louisiana, and, we suppose, Texas, are mostly colored. The comparative numerical strength of churches divided, as these are, politically, not geographically, is so important that we collate the Northern's returns for the Southern membership of the Northern Church with those we have already printed for the Southern Church."

The statement that "in many districts" of the Southern States the Methodist Episcopal Church is "quite as strong in membership, social position, church property, and all other respects, as the Church South," is sought to be established by statistical reports of the two churches. The writer puts down the total membership of Southern Methodism at 571,241, and that of the Northern Church, within the same limits, 289,571. Of these 147,921 are put down as white. The obvious, we think the sole, intent of the writer was to show the growth of Northern Methodism in the Southern States since the war; and, for the sake of truth, he ought to have restricted his statements and comparisons to those States of the South in which, before the war, Northern Methodism had no foothold. This would have been fair, honest and truthful. But this is not done. His statistics, then, however particularly accurate, are generally fallacious, and do not set forth the facts of history or the facts of Northern Methodist growth in the Southern States. The real facts of the case do not show a growth among the whites of the South—that is, in the States entered by the Northern Methodists—since the war, at all complimentary to their professions, their efforts or their expenditures. We present the facts as they were before, and as they ought to be considered, if truth be the object, since the war.

Before the war the Methodist Episcopal Church had Conferences in the following States: Maryland, Virginia, Kentucky, Missouri—in all five organized and well represented Conferences. These Conferences, according to the tables we are considering, are, with their membership, as follows:

Baltimore..... 29,397

West Virginia..... 26,100

Kentucky..... 19,808

St. Louis..... 17,088

Missouri..... 18,007

Total..... 105,400

In territory occupied by the Methodist Episcopal Church, before the war, there is now a membership of 105,400. Deduct this from the white membership given above, 147,921, it leaves, as the white membership, in the States occupied since the war, a total, on their own calculations and statistics, of 42,521; and these are distributed over Virginia (south of the Potomac and east of the Blue Ridge), North and South Carolina, Florida, Alabama, Mississippi, Tennessee, Louisiana, Arkansas and Texas. Eleven States, with an average in each of less than 4,000. The true comparison between the two churches, as to white members, is that of 42,521 to 571,241, or thirteen and a half to one.

Again, following their own statistics, deducting 147,921 whites from their total 289,571, we have 141,650 colored members in the eleven States entered since the war; an average of less than 13,000 colored members to a State.

Or, taking the membership of these Southern States, in whose bounds they have entered since the war, we have the following result:

Whites..... 42,521

Colored..... 141,650

Total..... 184,172

Now the number of colored members in the Methodist Episcopal

Church South is so small that they are scarcely appreciable in the sum total of our membership. We deduct from the total of 571,241, enough, we think, to cover the last reported membership, say 1,241, leaving a white membership of 570,000. The comparison we are considering, according to the statements of the Northern Christian Advocate, lies between the white rather than the colored membership of the two churches; i. e., as between 42,521 and 570,000. And it is in the light of these facts and figures that we are to judge of the accuracy and credibility of the statement that the Methodist Episcopal Church is "quite as strong in membership, social position, church property, and all other respects, as the Church South." If "figures do not lie," the assertion of the writer as to equality, or anything else correct and reliable in comparison, cannot be true!

We do not deny but we seriously doubt the correctness of the figures or calculations that give the Methodist Episcopal Church a white membership of 42,521 in the Southern States entered since the war. It may be so. We will not contradict the statement. Nor do we desire to say anything to the disparagement of the personal character or social position of the adherents, white or colored, of the Methodist Episcopal Church in these Southern States. If they have been proselyted from Southern Methodism, we do not know it. If they have been gathered from "the world that lieth in the wicked one," and made spiritually better and happier, we rejoice at their success. But, except in the perversion of the colored people once in our church, in the management of political measures, and in carrying out the Stanton-Ames order or principle in church property questions—a clause in the Constitution of Virginia is standing proof and memorial of their measures—we confess that we know very little of their operations; and, besides what we learn from their letters in Northern Methodist papers, seldom hear anything of them in our Southern communities. Their Virginia Conference is put down as, having 36 ministers and 4,682 members. These in the paragraph above are said to be "exclusively white." We are persuaded a very large majority of these are in that part of Virginia lying in "the Old Baltimore Conference," and properly belonging to the classification, before the war, as given above: Since they crossed the old boundaries of the Virginia Conference of Southern Methodism, as existing before the war and since, we have never heard of but one of our ministers and a few of his friends who have left us to unite with them; nor of any successes to evoke the breath of bigotry even the faintest rivalry or dissatisfaction. In fact, we doubt whether any true members of our old, true and historic Virginia Conference ever hear of or meet with these Northern Methodist preachers, except as looking after some outlying property, or as instigators or participants in some political measures to guide or control "the negro vote." We say not these things for disparagement, but as offsets to a course of letter-writing from the South, and of editorializing in the Northern Methodist press that seemingly seeks to make the impression that the Methodist Episcopal Church is filling the Southern States with its conquests, and bids fair to overwhelm, break down and destroy the Methodist Episcopal Church South. As a moral and spiritual organism we are hardly aware of its existence in the South. But as a political organization, to multiply votes, to promote strife, to energize and perpetuate prejudice, and hostility to the white people South, on the part of the blacks—from Whittemore and Mitchell to Phelps and Parnie, the worst types of a shockingly strange class of preachers—we hear much of evil, and very little that is graceful in religion or creditable in the ministry.—*Richmond Christian Adv.*

MEDICAL PROPERTIES OF EGGS.—We find the following in an exchange: "The white of an egg has proved of late the most efficacious remedy for burns. Seven or eight applications of this substance soothe the pain and effectually exclude the burned parts from the air. This simple remedy seems preferable to colloidion, or even cotton. Extraordinary stories are told of the healing properties of a new oil, which is easily made from the yolk of hens' eggs. The eggs are first boiled hard, and the yolks are then removed, crushed and placed over the fire, where they are carefully stirred until the whole substance is just on the point of catching fire, when the oil separates and may be poured off. One yolk will yield nearly two teaspoonfuls of oil. It is in general use among the colonists of South Russia as a means of curing cuts, bruises and scratches.

GENERAL SHERMAN has concluded a treaty with the Apaches of Arizona, who have been at war with the whites for the past six years.

CHURCH INCONVENIENCES.

The Christian Union furnishes these hints:

The fact is, one may have his mind so entirely raised above the world, on Sunday, as to forget a great many little duties quite allied to that benevolence which the gospel inculcates. No Christian may have right to make another person unhappy or even annoy him, through self-indulgence, carelessness or selfish devotion. We may classify the petty inconveniences of church life thus:

1. *Smells.*—Violent perfumes, especially those containing musk, are disagreeable to most persons, and to some positively distressing. There is no smell so universally pleasing as no smell. Never scent yourself when going into a crowded assembly. The same is true of the residuary smell of tobacco which hangs about the garments and afflicts the breath of those who habitually smoke. But tobacco almost invariably makes men self-indulgent and regardless of others' convenience. More brutal yet are they who go to church reeking, like a Dutchman's soup, with the smell of onions. There are scores of people who have lost all profit of a Sunday service by the sickening smells which surround them.

2. *Sounds.*—Whispering in church during the service is an affront to politeness. Much of the coughing which goes on in church arises from the poisonous gases and personal effluvia which exist in unventilated churches. But the power of the will over the muscles which do the coughing is very great. A heedless person will cough twice as much as is needful—will cough at the worst time possible, will cough plump upon the necks of those before him, instead of embalming the sound in his handkerchief, as with a little skill and politeness he might easily do. We would not forbid men who cannot sing to "make a joyful noise"—but it should be a softly noise. In all cases when it is a man's duty to sleep in church, it is his duty also to snore with the soft pedal down.

3. *Sight.*—Every one likes to see the minister. It cannot be done through your body. True, you cannot help being before somebody unless you are on the back seat. But with a little thought you may very much help those behind you. Any conduct which shall divert the attention of others from the service, such as ostentatious playing with a watch, or spearing and shutting it, reading books or papers, looking about inquisitively, is impolite.

TEMPERANCE AND RELIGION.—Temperance is not religion, but it is one of the virtues of religion. A man may be a temperance man without being a religious man; but he cannot be a pious or religious man so long as he remains an intemperate man. Temperance is an aid of religion—the ally of Christianity, preparing the mind and heart to receive the truth of religion. It casts the devil of drunkenness out of the man; sweeps the temple of the soul with the pledge of abstinence, and fits it to receive the holy influence of true piety. There is no antagonism between temperance and religion, for the former prepares the way for the latter. Temperance societies are the nurseries of the church; temperance tracts are the leaves which are intended for the healing of the nations; temperance lectures are the voice of John the Baptist in the wilderness. Drunkenness is a physical disease, breaking out in blotches upon the face, and sapping and mining the foundations of health and life. The pledge is a panacea which never fails to cure the disease, when it is taken in time and kept inviolate. Drunkenness is also a moral malady, and religion is the remedy which is sure to cure it when it is taken from the hand which offers it. Those men who trust to temperance for salvation are like the carpenters of Noah, who built a ship for other folks to sail in and yet were drowned themselves at last.—*National Temperance Advocate.*

TOMACCO IS CONNECTICUT.—The annexed prohibitory law against tobacco was adopted by the "general court" of Connecticut in 1664, and recently exhumed by a Hartford paper. At that time, we presume, the rich lands of the Connecticut valley were not, as now, largely devoted to raising the narcotic abomination: "Forasmuch as it is observed that many abuses are crept in and committed by frequent taking of tobacco."

"It is ordered by the authority of this court, That no person under the age of twenty-one years, nor any other, that hath not already accustomed himself to the use thereof, shall take any tobacco, until hee hath brought a certificate under the hands of some who are approved for knowledge and skill in phisick, that it is usefull for him, and also that hee hath received a license from the court for the same. And for the regulating of those who either by their former taking it have to their own apprehensions made it necessary to them, or upon due advice are persuaded to the use thereof: 'It is ordered, That no man with-

in this colony, after the publication hereof, shall take any tobacco, publicly in the street, highways, or any bare yards, or upon training days, in any open places, under the penalty of sixpence for each offence against this order, in any of the particulars thereof, to be paid without guineysaying upon conviction, by the testimony of one witness, that is without just exception, before any one magistrate. And the constables in the several townes are required to make presentment to each particular court of such as they doe understand, and can convict to be transgressors of this order."

ECLIPSE OF THE SUN IN DECEMBER, 1870.—Astronomers in all parts of the world are now busy in making their preparations for observing the eclipse of the sun on December 21-22, 1870. Although it will not be visible in the United States, it has been suggested that some of the American observers of the last eclipse be sent abroad for the purpose of taking part in the observations of the one in question, and Congress has already appropriated \$20,000 to the coast survey for the purpose. Great praise was awarded by foreign physicists to the American astronomers for the excellence of their work, and especially for the remarkable photographic pictures that were taken, and at so many points; and it is urged that these same gentlemen, or a selection from them, would be admirably fitted for a renewed investigation of the kind, since their experience of the first phenomenon would enable them to utilize their time to better advantage during the second. According to a recent writer, this eclipse will begin in the North Atlantic ocean; the line of central and total eclipse, moving in a southeasterly direction, crosses Portugal a little to the south of Lisbon; passing over part of Spain and the Mediterranean sea, it enters Africa near Oran, and soon afterward attains its extreme southern limit; the shadow of the moon, now moving in a northeasterly direction, leaves Africa, and, crossing the island of Sicily, the south of Turkey, the Black sea and the Sea of Azof, disappears; the penumbra of the moon, decreasing rapidly, leaves the earth with the setting sun in Arabia. The sun will be centrally and totally eclipsed at noon in latitude thirty-six degrees thirty-eight minutes north, longitude five degrees one minute west, a little to the northeast of Gibraltar.—*Harper's Magazine.*

OUR HIGH CHURCH FRIENDS ARGUE PROGRESS.—The English church organ of the Ritualists invites the English papists who are dissatisfied with the dogma of infallibility to unite with the Church of England, and holds out to them the following inducements:

"At no time since the Reformation till the present could a Roman Catholic join the English Church without heavy spiritual losses. The old anti-Roman view of the articles is rapidly dying out among intelligent English churchmen, and in its place Tract XC is accepted widely as the true solution of that ambiguous formula. The highest ecclesiastical court in England has just decided that the sacrifice of the mass and the adoration of Christ therein are doctrines of the Anglican Church. Prayers for the dead have been pronounced legal, too, and are in scores of devotional books. The confessional is wide and salutary in its working. The religious life has been successfully revived for women, and we believe we may now say for men too. Thousands of Anglicans invoke the saints, though without censuring those who find no spiritual profit in so doing. The full validity of Anglican orders has been demonstrated, so that no one but a Dublin Reviewer can attempt to gainsay it henceforward. Now that overtures have been made to Wesleyans to induce them to return to the English Church, it is unquestionable that Roman Catholics could get good terms should they desire to negotiate. It is probable that they could keep their existing office books, and tolerably certain that their clergy would not be required to sign the articles."

All this is very frank, and we especially commend it to the attention of our High Church friends in this country.—*New York Christian Advocate.*

"I TAKE THAT AMEN BACK!"—In Illinois, Ann Jordan, of the Methodist Church, gained quite a reputation as a local preacher. Ann was always ready, largely to the annoyance of Peter Cartwright. She was present at one of Cartwright's camp meetings, a good feeling prevailed, and many were at the altar. Cartwright called on all to kneel, and asked some one to lead in prayer. Ann struck off at once with much feeling and power. Cartwright, not recognizing her voice, shouted out, "Amen." A brother kneeling close by whispered: "It's Ann Jordan praying." Cartwright, looking round and seeing that it was so, cried out: "I take that amen back!"

LEONAR WAINWORTH AND STELLAR HEAT.—We have been educated to regard the sun as the one and only source of the earth's heat, and by a gratuitous inference we have come to look upon the rest of the celestial bodies as sources of cold. Although we do not, like the Indians, give to the moon a name that signifies "cold-darter," yet when we see her shining with silvery whiteness we look for atmospheric conditions the reverse of sultry. Similarly of the stars, when they glitter with abnormal brilliancy, we expect extra chilliness, and go forth into the night with more than ordinary precautions against cold-catching. We do undoubtedly get colder with clear skies; not because the moon and stars shed cold upon us, but because the earth, when there is no cloud-cover to cover it, radiates its warmth freely into surrounding space.

It is tolerably obvious that both moon and stars must impart to the earth, or whatever we may call the interplanetary medium, a certain amount of heat. Not much, but something; and of the same the earth must receive its title. We get their light, and with all known sources of light there is some heat, no cold illuminator having yet been found. When the light from a star is analyzed; when, by means of a prism, the beam is, as it were, unraveled and its fibers are arranged in a definite order, as they are in a spectrum, we find that the assorted rays have different properties: some which are blue to the eye possess the power of exciting actions in chemical compounds; others which are yellow, as far as we know, only affect us with the impression of light, and have no other property; but others, again, which are red give us the sensation of heat, and cause a thermometer to rise under their influence. So the red components of a star's light have come to be regarded as the "heat-rays," and no star has been met with that does not exhibit some proportion of these in its prismatic spectrum. Some, it is true, have them in very small quantity, but these are only the fainter twinklers that loom far, very far away, and whose comparatively sluggish heat undulations have been absorbed on their long journey to our system, or else whose nearer lights whose small magnitude makes them appear remote. The moon too, reflecting the illumination that it receives from the sun, gives us the proportionate amount of solar warmth, for in the moonlight spectrum there is the persistent red element that indicates calorific.

IMPORTANT GEOGRAPHICAL DISCOVERY.—A party under Prof. Bell, which has been recently engaged in a geographical survey of the region north of Lake Superior, has made an important discovery. Lake Neepigon, lying thirty miles north of Superior, and connected with it by a broad, rapid stream, called the Teepigon river, which has hitherto been considered too insignificant to find a place on the American atlas, is announced by the professor to be larger than other Lake Ontario or Erie, and surpassing Lake Superior in interest—a swarm of picturesque little islands covering its waters. Prof. Bell traversed five hundred miles of this coast line, when the approach of winter compelled the party to return to Canada. This lake is the seventh in number, and possibly the second in size, of the chain of great lakes. As it receives its waters from upward of a dozen considerable rivers, it is not improbable that the system of lakes, commencing with Lake Ontario, may extend many miles further on the north. That the existence of this inland sea should have remained unknown to this time is remarkable, considering how near it lies to Lake Superior.

"LAY ASIDE EVERY WEIGHT."—As applied to Christians, it means they should remove all which would obstruct progress in the Christian course.

It is not the same thing in all persons. In one it may be pride; in another vanity; in another worldliness; in another a violent and ungovernable temper; in another a heavy, leaden, insensible heart; in another some improper and unholy attachment.

Some persons would make much more progress if they would disencumber themselves of the heavy weight of gold which they are endeavoring to carry with them. Even a feather or a ring may become such a weight that they never will make much progress toward the prize.—*Barnes.*

It is said that the mummy pits of Egypt are being worked on a large scale, for the purpose of supplying phosphate of lime to the British agriculturists. The remains of the aristocracy of Cheops are cleaned out and sifted, packed in bags containing two hundred pounds, and carried on camels to Alexandria, and thence by boat to England, to give the requisite mineral to the wheat which shall stiffen the backbone of Victoria's Parliament.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, SEPTEMBER 24, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.

Three Dollars per Annum, in Advance.

Address—Rev. LINUS PARKER, 112 Camp Street, New Orleans, La.

AGENTS—All the members of the patronizing Conference.

CONFERENCE PUBLISHING COMMITTEE.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. M. MITCHELL, D. D.
REV. A. A. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. W. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the street, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a POST OFFICE ORDER, DRAFT, or by EXPRESS. If this cannot be done, Remit the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

MONEY.

By way of gentle reminder we would say to those having funds for the Advocate that this is the hardest season of the year financially, and that we need every available dollar to tide us over the present financial stringency. Small sums in many hands make a considerable aggregate. Don't wait till Conference, but remit at once by registered letter, post office money order or draft.

TO AND FROM OUR AGENTS.

We are in full sympathy with our brethren who are exerting themselves for the Advocate. We do not hear from as many of them, nor as often, as we would like, but we appreciate every effort, and the difficulties which some of the most faithful and laborious encounter in their endeavors to extend the circulation of even so good a paper as the New Orleans Christian Advocate. To be a good agent it takes time, considerable tact, and a good deal of perseverance, courage and faith. We must insist upon it as a duty that our people take a religious paper. It comes along in the same range as class meeting and family prayer, and will promote all other pious duties. We should labor with all our members until every family in every pastoral charge has the Advocate. Brethren will meet with occasional rebuffs, objections on the grounds of poverty, lack of mail facilities, and often because indifferent to the matter, but they must not be easily discouraged. A diligent brother writes: "I have presented to the people every inducement to get them to take our paper, but have failed to arouse them to the importance of discharging this important duty. I had a membership of thirty-five strong on my circuit, and, if I mistake not, I have obtained twenty-six subscribers to the Advocate this year. I have had a great work this year, the number of members being about one hundred and twenty, and the good work is still going on." The brother is not satisfied, but to us it sounds well. Nearly as many subscribers as he had members to start with! Who will do better than that? We doubt not that many of the new members will take the Advocate before the year is out. We were refreshed this week by a note from another brother, who says: "I have set out to get you fifty subscribers to the Advocate, and on the other side of this sheet you will find the first installment of same." The in-

statement was a list of twenty subscribers, from a field which we supposed had been already pretty thoroughly canvassed. May this example quicken and encourage others to bestir themselves. To try and fail is better than not to try at all; but the hardest fields will yield something to the diligent gleaner. Let each preacher set his mark for a good list of new subscribers—if not fifty, try for half that number, and work up to this self-assessment as nearly as possible. The existence and prosperity of the Advocate is in the hands of our brethren. We believe they are all true and devoted men of God, and we can confidently appeal to them to stand by their paper, and make it a success and a blessing to the church.

THE TWO JUSTIFICATIONS.

Justification in the sense of pardon.—The Saviour gives the term this significance in the parable of the Pharisee and the Publican: "I tell you, this man went down to his house justified rather than the other." Paul's use of the word in this sense is clear and uniform. In the thirteenth of Acts he says in his address to the Jews: "Be it known unto you therefore, men and brethren, that though this man is preached unto you the forgiveness of sins; and by him all that believe are justified from all things, from which ye could not be by the law of Moses." In the epistles Paul's meaning is not less explicit—"Whom God hath set forth to be a propitiation through faith in his blood, to declare his righteousness for the remission of sins that are past, through the forbearance of God; to declare, I say, at this time his righteousness, that he might be just and the justifier of him which believeth in Jesus." There is a justification, then, which has this specific import of pardon. It is the forgiveness of sins, the acquittal of the guilty upon terms satisfactory to the divine justice. God is just and at the same time "the justifier of him which believeth in Jesus." The condition of this justification is faith. It is granted to him which believeth. It is of faith as opposed to works. "Therefore by the deeds of the law there shall no flesh be justified in his sight," and again: "Therefore we conclude that a man is justified by faith without the deeds of the law." When the penitent believes in Christ he is justified, and his faith is the grand and proximate condition.

There is another justification spoken of especially by James. We have no reason to suppose that he uses the term in the sense of the forgiveness of sin. He points to the example of Abraham, and speaks of a justification which the patriarch experienced "when he had offered Isaac his son upon the altar." In the sense of pardon Abraham was justified before Isaac was born; and at the time the promise of a seed was given to him it is written: "And he believed in the Lord, and he counted it to him for righteousness." In the Pauline import of the term, then, Abraham was justified long before. He was already pardoned and an eminent saint when he received the command to offer his son for a burnt offering upon the summit of Moriah. If his justification in the last instance cannot mean that he then received pardon, it must have another import. James describes it as the justification of works—"Was not Abraham our father justified by works when he had offered Isaac his son upon the altar?" Mr. Watson's explanation is doubtless the correct one when he speaks of it as "the declarative justification of Abraham which resulted from his lofty act of obedience," and again: "That his works manifested or proved that he was justified, proved that he was really justified by faith, or, in other words, that the faith by which he was justified was not dead and inoperative, but living and active."

The two justifications are therefore intimately related, and yet are essentially different. The justification of pardon is by faith only; the subsequent proof and illustration are by works. The faith which secures remission of sins is an active and living principle, "which worketh by love," and the works which

follow attest the genuineness of the faith which justifies. As Abraham's faith wrought with his works, and as by works his faith was made perfect, so is it in all truly believing souls. The justification of works follows hard upon the justification of faith, and is the illustrious proof thereof. The latter does not exist without the former, and to suppose it is to indulge in a fatal delusion. Both must meet in our experience and practice, or our profession is an act of self-deception or hypocrisy. The two justifications, when placed together in their appropriate connection, are harmonious, and embrace the complete exhibition of the truth as it is in Jesus. To the penitent sinner pardon is offered upon the sole condition of faith. To the pardoned believer the essential importance of good works is insisted upon as the fruits and manifestation of the faith which justifies.

THE EUROPEAN SITUATION.

Each generation is disposed to magnify the affairs of its own time, but we think that the events now transpiring cannot well be overestimated. Two months have witnessed remarkable changes in Europe. Napoleon has been conquered, and France is at the mercy of the Prussian victors. The struggle may be prolonged, but we doubt whether Paris will be able or willing to stand a siege. The heads of the new government are more anxious for peace as the enemy's lines begin to close around the French capital, and we should not be surprised if peace or capitulation was to be secured, and perhaps both, within the next week or ten days. Bismarck's programme will be carried out, whatever that may be, as France is in no condition to prolong the struggle with any hope of ultimate success. The great powers of Europe will not interpose unless Prussia attempts a serious dismemberment of the empire. They are evidently all unfriendly to the establishment of a republic in France, and King William will be permitted to dictate the terms of peace so long as he confines himself to the readjustment of the frontier territories and the disposal of the fortresses of Metz and Strasbourg. France will be crippled and humiliated, and a gigantic and united German empire will be the immediate fruit of the present conflict.

In a political and military point of view Prussia will come out stronger and more influential than ever. Russia and Prussia are today the great and overshadowing nations of Europe, and they appear to be in perfect accord. Taking England into the account, and the liberal tendencies of Austria, the continent is in the hands of Protestant governments. France, Spain and Italy owe their weakness and emasculation, in a great measure, to the baneful influence of Catholicism, and the only hope of their regeneration lies in the advance of Protestant civilization. The turn which affairs have taken promise well for the spread of the gospel, and the reformation or overthrow of the Catholic Church. The Pope can no longer lean upon France; Austria has abolished the concordat and declines the infallibility; poor Spain is a mere cipher in her sympathies for the holy father, and Italy is completing her unification by investing the seven-hilled city. If not already in the hands of Victor Emmanuel, Rome will be in possession of his legions within a few days. Here, then, is the probable end of the temporal sovereignty of the Popes.

After centuries of unheeded of tyranny and darkness, the "lone mother of dead empires" may become a center of liberal civilization, and the gospel be preached there in the purity and power which characterized the ministrations of Paul eighteen hundred years ago. It will be something to startle the world when the dark and dismal secrets of papal cruelty shall be fully disclosed, and when all the dank and gloomy hiding places of inquisitorial malignity shall be open to the light of day. Much of all this is already known, but much more may be revealed when this

abode of superstition and religious corruption is made accessible to modern intelligence. The dogma of papal infallibility might compensate for the loss of the temporal power, if it were generally received, but it bids fair to disrupt and weaken the hold which the Roman Church has hitherto had upon the mere intelligent of her devotees. While the old Catholic countries are losing their political importance, and drifting away from the grasp of priestcraft, the younger and dominant nations of the earth will become the field wherein Romanism will put forth her mightiest energies. England, Germany and the United States will more than ever swarm with her instrumentalities, as it is only through these nations that she can hope to retain and establish her power. Her power is rapidly waning in Europe, and we believe the effect of the present war will be to strengthen the Protestantism of the world, while it gives a crushing blow to the political and moral influence of Romanism. The Cæsarian and popery which have been so long in alliance have met with a serious check—it may be the beginning of their final downfall.

The influences which the events now transpiring in Europe are exerting, and are likely to exert, upon our own continent, merit our careful study. The sympathies of our people have been profoundly enlisted, and the religious and political results will be felt in our institutions and society. A firm anchorage is needed to prevent false and mischievous consequences to both our liberties and our religion.

DEATH OF REV. T. H. WHITBEY.

The subjoined note brings the sad intelligence of the death of this esteemed minister of Christ:

GADSDEN, ALA., Sept. 14, 1870.

MR. EDITOR: I have to communicate the sad intelligence that Brother T. H. Whitbey, of the North Alabama Conference, is dead. He died at the house of Dr. Lawrence, at Gaylesville, Alabama, on last Saturday, the tenth instant, at eleven o'clock A. M., after a severe illness of twenty-one days. He was a faithful, good man, and died in great peace.

I will send you a biographical sketch. Yours in Christ,
R. A. TIMMONS.

YELLOW FEVER.—The number of deaths for the week ending at six P. M. on Sunday, the eighteenth, was 171, of which 52 were of yellow fever. On the nineteenth there were 8 deaths from yellow fever, on the twentieth 13, and on the twenty-first 9. The disease is still confined to the Second district for the most part, and to the neighborhood of the French market. The victims are nearly all foreigners, and mostly Italians. There is no doubt that the fever was brought here from Havana, and that a faithful quarantine would have saved us from this visitation. We cannot yet certainly determine that the fever will become of a general and epidemic character. The probabilities are that it will be so in a few days. Unacclimated persons will do well to keep away from the city for awhile.

MUSICAL INSTRUMENTS.—The advertisement of Mr. Philip Werlein will be found in the appropriate department of the Advocate this week. This gentleman deals in every description of musical merchandise, and on the most reasonable terms. We are disposed to regard music dealers as public benefactors, who contribute largely to the refinement and education of the people. Our churches will do well to consult Mr. Werlein about supplying themselves with organs. Persons wanting the best pianos, and at a moderate price, will find instruments to suit at Nos. 80 and 82 Baronne street. It will be seen that Mr. Werlein is general agent for the sale of J. P. Hale's celebrated pianos.

C. T. MERRIMAN & Co.—The card of this firm will be found in our advertising columns this week. The steel engraving of "Christ Blessing Little Children" is a very beautiful picture, and when neatly framed is a handsome ornament for the parlor or the Sunday school room. Salesmen will find it a most popular work for disposal everywhere.

RICHARD KEEN.

Richard Keen died in Jackson, Alabama, on Sunday, September 4, 1870. He was born near the city of London, England, on the twenty-fifth of October, 1800, and was, at the time of his death, in his seventieth year. He married in his twenty-first year, and came, some years later, to Brooklyn, New York. He also resided several years in New Jersey, and moved to New Orleans in 1835. Soon after he reached New Orleans his first wife died, and he married again in 1837. The second wife and six grown children survive. Brother Keen had no early advantages, either religious or literary. His parents were not religious, and he seems to have been a stranger to practical piety until after he was grown. His employer in Brooklyn first led him to a Methodist church, and during his residence there he was converted at a camp meeting when over twenty-five years of age. At the time of his conversion he seems to have commenced that active and zealous course of religious usefulness which characterized all his after career. His conversion was felt to be a call to immediate and devoted labor in the cause of Christ.

When he came to New Orleans, in 1835, he united with the Methodist church, then located on Gravier street, and which afterward became the Peydras street congregation, and is now known as the McGehee church, situated on Carondelet street. The edifice on Gravier street was a small frame, and probably the only Methodist church then in the city. The church in Lafayette may, however, have been in a germinal state at that time, and possibly possessed of a regular place of worship, as it appears in the appointments for that year. The work in New Orleans then consisted of two appointments: New Orleans station, J. C. Burriss; Upper Faubourg and Lafayette (mission) Alexander Tulley, for six months. W. M. Curtis was hook agent, and Barnabas Pipkin presiding elder. The membership for 1835 was not reported, but in 1834 the New Orleans station had fifty-six white and one hundred and thirty-eight colored members. In 1836 white members only were reported, giving New Orleans forty-eight and the Upper Faubourg twelve—in all sixty white members.

The thirty-five years which Brother Keen spent in New Orleans were important ones to Methodism. He was largely engaged in all the enterprises of the church during that period, and intimately connected with its extension and development. He did a great deal of pioneer work, and laid the foundation of several churches. He was the first to open a prayer meeting and Sunday school where the Moreau Street church now stands, and that church grew out of his labors. He was also, in company with Brother W. H. Dameron, the first to break ground for Methodism in Algiers, and a church was soon built there. The neat church on Louisiana avenue, which is now thriving under the pastorate of Rev. James A. Ivy, is a monument of his untiring energy and zeal, and ought to be called after him for all time to come. The beautiful church in Jefferson, now the Sixth district, situated on Cadiz street, owes also a great deal to the same untiring hands. In 1848 he organized a Sunday school on the corner of Dryades and Felicite streets, built a small church, and turned it over to a pastor as "The Andrew chapel." For years this little school and church did a good work, until it was absorbed in the present church on Felicite street. Brother Keen had a hand also in the "Old St. Mary Street church," the first of our up-town churches, and also in the original Elijah Steel church, on Magazine street, better known in its day as the "Flat-bent Church," because constructed of the lumber of broken-up flatboats. The present Felicite Street church was constituted by the consolidation and union of Andrew chapel, St. Mary street and the Elijah Steel congregations in 1848, under the pastorate of Rev. H. N. McTycire, now one of our Bishops.

Brother Keen had moved his membership to this church about the time of the consolidation, and, as usual, took a large amount of stock in the new church, which was dedicated by Bishop Capers on Christmas morning, December, 1850. Although a poor man, he was one of the largest contributors, and determined to live on bread and water rather than fail in paying the amount subscribed.

Besides what he gave, which was beyond all examples of giving we have ever met with, he bestowed much time and personal labor upon all of our church-building. He could beg money, and did it, and wrought with his own hands besides. As a Sunday school man he was pre-eminent. He was always engaged in organizing and superintending schools. He started nearly all of our Sunday schools, and was a diligent worker in this field to the last. He was the superintendent of the Louisiana avenue Sunday school at the time of his death. He has, indeed, filled every post in the church that a layman could fill. He was trustee, class leader, steward, Sunday school superintendent, sexton, and often all of these at the same time.

There was no work for God that he was not ready to perform. He could sweep, dust and light the church, work all night to build or repair it, and act efficiently as steward, raise the tunes, take up the collection, and do everything that a Christian man ever did do in the service and offices of the church. He lives in the history of New Orleans Methodism from its infancy, and his monument is in nearly every brick and beam and bell and spire. Every Sunday school is his memorial, and every congregation is a witness to his wonderful usefulness. A few such men in any community would evangelize it; a regiment of them would conquer a State. Brother Keen was a plain, illiterate man, without polish of manners, not prepossessing in person, nor greatly endowed in intellect, but he was humble and mightily in earnest, and consecrated all to God. He certainly made the very uttermost of his gifts and opportunities, and what he accomplished ought to shame and condemn thousands who, with superior gifts, accomplish far less for Christ. He came fully up to the apostolic exhortation: "Not slothful in business; fervent in spirit; serving the Lord." He was diligent in his own affairs, but still more diligent in the affairs of his divine Master. On the second of August Brother Keen left home for Alabama. Called by some business engagement to the little town of Jackson, on the Tombigbee river, he there died after a brief illness, and there he was buried. His last hours were peaceful, and we have no doubt that the final summons found him ready, willing and even glad to depart and be with Christ.

BLACKMAN'S COMMERCIAL COLLEGE. The advertisement of this old and widely known institution appears in our columns. Professor Blackman is an experienced teacher, and is ably assisted by a corps of teachers. His Commercial College affords an opportunity to young men to prepare themselves for business. The terms are moderate and the instruction thorough. See the professor's card—this week.

PROTRACTED MEETING.—Services will be held in the church at Algiers, with a view to revival, at seven o'clock every evening, commencing on Sunday, the twenty-fifth instant. Brethren in the ministry are earnestly requested to come over and help us. J. G. MILLER.

GOD KNOWS BEST.—"Lucy," said a friend one day to a little girl who was laid on a sick bed, "would you not like to be well and again at play?" Lucy thought for a moment, and then said, with great sweetness: "God knows best, and what he thinks best pleases me best."

DROPPED THE FAMINE LAST YEAR IN India ninety-two thousand nine hundred and eighty persons in the State of Gwalior, and nearly four hundred thousand animals are said to have died of want.

They never execute murderers in Sweden until they make a confession.

CENTENARY COLLEGE.

We do not overrate the advantages of being educated in the State in which one expects to live. It adds greatly to the chances of success in life that a professional man should be surrounded by those who have been trained in the same college. Throughout Louisiana and Mississippi the graduates of Centenary hold important positions. At the bar, in the pulpit and elsewhere may be seen the representatives of this venerable institution. A large proportion of the bar at Clinton, Louisiana, the presiding elders of the Greenville and the Port Gibson districts, Mississippi Conference, as well as the station preachers at Jackson and at Yazoo City, we can refer persons to who may wish to send their sons to college without sending them away from that part of the South in which they expect them to reside. The college opens on the first Monday in October. Tuition, \$60; board, \$15. Students will report to Prof. A. R. Holcombe, acting president.

J. C. KEENER,
Pres. Board of Trustees.

PERIODICALS.

THE SUNDAY MAGAZINE.—This truly superb monthly, edited by Thomas Guthrie, D. D., and published by J. B. Lippincott & Co., Philadelphia, contains an attractive table of contents in the number for September. There are also eleven fine engravings. Contents: Episodes in an Obscure Life, being experiences in the Tower Hamlets, by a Curate, illustrated; The Saving Power, by the editor; On the Miracles of our Lord, by George MacDonald, LL. D.; The Transfiguration, illustrated; The Lord Spoiling Balaam's Promises, by the Rev. A. L. Simpson; To Thee, by Francis Ridley Havergal; The Call of the Child, by the Rev. Henry Whitehead; "In the Mount of the Lord it shall be Seen," by the Rev. Hugh Macmillan, illustrated; Passover Observances, by the author of "Dreams and their Interpretation," illustrated; The Struggle in Ferrara, by W. Gilbert, author of "De Profundis," etc., illustrated; Nannie's Illness, by B. Orme; On Giving Holy Things to Dogs and Casting Pearls before Swine, by the Rev. Samuel Cox, illustrated; The Companions of St. Paul, by John S. Howson; D. D.; Dem of Chester; Fading with the Snowdrop, by Eleanora Louisa Hervey, illustrated; Supplement—Notes for readers out of the way.

GOOD WORDS FOR THE YOUNG.—The September part has the following table of contents and numerous illustrations: Randal Bannerman's Boyhood, by the editor, part 10, illustrated; The Lost Child, a legend of Brittany, by Madame Guizot de Witt, illustrated; Nature's Instructions, by Colonel A. W. Drayson, R. A., illustrated; Hymns for the Young, with music by John Hullah, No. 11; Oranges and Lemons, or Jean Baptiste of Montone, by the author of "Zigzag," etc., part 3, illustrated; A Day in the Tropics, part 2—Afternoon; At the Back of the North Wind, by the author of "Dealings with the Fairies," illustrated; Among the Butterflies, by the Rev. B. G. Johns, fifth paper, illustrated; The Village School, by the author of "Child Nature," part 6, illustrated; Aunt Annie's Stories about Horses, by Lady Barker, illustrated; Tibbie's Tea Things, by Eliza Moteyard; The Picture Book, by the Rev. George Jacque.

GOOD WORDS.—Edited by Norman MacLeod, D. D. The September part is profusely illustrated. It has the following table of contents: Fernhurst Court, an every-day story, by the author of "Stone Edge," part 5, illustrated; Crime in the Army, by the Rev. Patrick Benton; Married Lovers, by Jean Ingelow, illustrated; Wanderings in the Desert of the Exodus, by E. H. Palmer; Half Hours in the Temple Church, by C. J. Vaughan, D. D.; Not Alone, by L. C. S.; Dorothy Fox, by the author of "How it all happened," part 9, illustrated; From Calcutta to Alexandria, by the editor, illustrated; Simon the Cyrenian, a Christian ballad, by the Rev. John Monson, LL. D., illustrated;

The Country of the Camisards, by Samuel Smiles, author of "Self-Help," Letters from the Tropics, by the Rev. Charles Kingsley.

OLD AND NEW.—The September number is brim full of finished articles, full of thought and polish, and calculated to arouse the intellectual life of the reader. "Bryant's Translation of the Iliad" gives a most favorable impression of the work. The writer compares certain passages, and concludes that Gladstone has been greatly excelled by the American poet. "The Causes and Consequences of the Paraguayan War" goes deeply and remotely into that subject, and brings some things to light which have not been generally understood. Part first of what promises to be an exhaustive treatment of "The Church of Latter Day Saints" appears this month. People have heard so much lately of the Adirondacks that they must be nearly tired of the subject. Nevertheless we find something fresh and entertaining in the "Adirondacks in August."

BE TIMELY.—Dr. Tholuck tells a story of a minister who once preached a sermon to sixteen hearers, in which he warned them against the error of considering church-going an essential part of Christianity.

Obituaries.

MARTIN L. LEWIS was born February 9, 1839, and died March 24, 1870, aged thirty-one years, one month and fifteen days.

During his illness his mind was turned to the important matter of his personal salvation, and he gave many evidences, before his death, of a genuine conversion.

He left a wife and one child, whom we commend to the care of Him who hath promised to be "a father to the fatherless, and a judge of the widows."

W. B. LEWIS.

MR. JOHN V. SESSONS was born February 8, 1813, in Wetumpka, Alabama, and died August 21, 1870, at Brooksville, Mississippi.

In early life he gave his heart to God and joined the church. He loved the Sabbath school, the class meeting, the prayer meeting and the public worship of God, and was always in his place unless providentially hindered. He was a good citizen.

His last end was a fit conclusion to such a life. Having served God and his generation as a Christian in the communion of the Methodist Episcopal Church South, he died without a fear, without a doubt, and with only one regret—that of leaving his wife and children.

HENRY URQUIHART.

EDWARD S. MAYO was shot by James G. Hayes on the seventeenth instant, and died from the effects of the same about one hour afterward.

Brother Mayo was born at Plaquemine, in Iberville parish, Louisiana, but from early childhood had lived in Opelousas. He was in the twenty-fifth year of his age. He had been raised by a pious mother, whose early teaching had left its impress upon his mind. About two years ago he joined the Methodist church at this place, and lived a consistent member of the same until his death. We were sent for to visit him in his dying hour, but arrived too late to talk with him relative to his future prospects. He was speechless.

He leaves a widowed mother, wife, four brothers, one sister and many friends to mourn his loss.

W. C. HASBIE.

OPLOUSAS, LA., Aug. 21, 1870.

MISS LIZZIE A. FRYEN.

Lizzie was the daughter of the late Jonte Egan, of this city. She died

at Summit, Mississippi, on the twenty-eighth of August, aged nineteen years.

Two years ago she graduated at Whitworth College, taking the first honor. Just at that period when life is sweetest, just when hope is brightest, just when the fond affections of our hearts were clinging to her with most tenacity, and the prospects of future usefulness were opening most brightly before her—in such an hour she was called away. O how deeply dark the dispensation! how mysterious the providence! and, if it were "all of life to live," how inconsolable would be our grief! But when we hear the voice of our Saviour saying, "I am the resurrection and the life; he that believeth on me, though he were dead, yet shall he live," light breaks in upon the dark scene. Consolation comes to our agonizing hearts, and we can say, as did her afflicted mother just when the cords of her dear young life were being severed: "The Lord gave, the Lord hath taken away; blessed be the name of the Lord."

"A few more storms shall beat
On this wild, rocky shore,
And we shall hope tempests cease,
And surges swell no more."

"A few more struggles here,
A few more partings o'er,
A few more toils, a few more tears,
And we shall weep no more."

J. J. LYONS.

NEW ORLEANS, Aug. 31, 1870.

Mrs. JULIA H. GOOCH, daughter of John S. and Maria Childers, was born January 8, 1841, and died August 20, 1870, aged twenty-nine years.

She was a native of Bibb county, Georgia, was educated in Macon, came to Louisiana in 1849, and was married to Mr. William D. Gooch in 1859. She professed religion at ten years of age, and joined the Methodist Episcopal Church South, of which she remained a devoted and worthy member until death. Her religious life was consistent and uniform. "Her adorning was that of a meek and quiet spirit, which in the sight of God is of great price."

Having well accomplished her task in life as wife, mother and Christian, when she came to die the sting of death was gone and its fears were dissipated. Her mother, who lingered at her bedside until the last, as she has done for the most of her immediate family, to whisper words of comfort in a dying hour, said: "I was satisfied that Julia was prepared to die; but when I saw her sinking I was not willing that she should die without leaving some token of safety to comfort her friends." When aroused and told that she could live but a short time, she took leave of her friends, commended her children to God, and impressed her friends with the importance of raising them religiously, and gave satisfactory evidence that her way was clear and her future sure.

She requested that her obituary should be written and her funeral sermon preached, but without eulogy or excess of praise. She leaves a husband and four children, but they need not mourn as those who have no hope.

JOHN PRESS.

MASSFIELD, LA., Aug. 26, 1870.

Died, at Chocoma Corner, Clarke county, Alabama, July 23, 1870, Miss BETTIE POOLE, in the eighteenth year of her age.

From early childhood Bettie had been remarkable for extreme amiability and extraordinary powers of mind. Consequently in school and in her neighborhood she was dearly beloved by all. In her fixedness of purpose, high resolves and a correct knowledge of right and duty were harmoniously combined with delicate and refined sensibilities, and a warm and loving heart.

After having passed through the necessary course of preparation, Bettie entered the senior class in Centenary Female College, at Summerfield, in October, 1869. She at once took a stand with the first in the class in scholarship, and during the entire session she was but once absent from recitation. In the class room her duties were always faithfully and successfully discharged. During the session she joined the church as a seeker of religion, and was ever after punctual in the discharge of her religious duties. She was a seeker in the true sense, earnestly desiring to have assurance of the forgiveness of her sins and of reconciliation with her heavenly Father. And to her bereaved friends it is comforting that she had this blessed assurance, and that she was fully prepared for the summons of the angel of death.

Having graduated with distinction, Bettie returned home, where she was warmly greeted by her numerous friends. The trustees of the school in her native village, and in which she had been a pupil the year before, at once selected her as principal. But the hand of death was already upon her. Attacked first by a slow fever, her friends felt no alarm; but in a few days the disease had taken such possession as not to yield to the remedies used. From one who was present I learn that she died in full hope, of a blessed immor-

ality, and among her last invocations was the prayer that her heavenly Father would bless her dear father and mother, and the dear little children. May the Lord be merciful to her parents and friends, and enable them to bear their loss with Christian resignation.

WM. J. VAUGHN.

Mrs. AMANDA J. CARMICHAEL was born in Muscogee county, Georgia, on the thirteenth of May, 1842; was married to Jesse M. Carmichael, Esq., on the sixth of September, 1860, and died at Newton, Alabama, on the eighth of July, 1870.

From her infancy she was noted for her obedience to her parents and for the unaffected modesty which adorned every trait in her character. A sweet and submissive spirit was hers. Of her it may be truly said that none knew her but to love her. She was a loving wife, a kind mother and a consistent Christian.

She joined the Methodist Episcopal Church South in 1857, and experienced a change of heart in 1862. Her conversion was so powerful and striking that those who stood by saw her face, like Stephen's of old, "as it had been the face of an angel." Subsequent to her conversion her life was spent consistently with the profession she had made. She was not only a bright convert, but she was a shining Christian also.

She left behind her no dying testimony. She was sick for several days, but was not considered dangerously ill, and consequently nothing was said to her about her spiritual state. Her husband was waiting all the time to have an interview with her concerning her prospects whenever her case should be thought dangerous. At the very time she was supposed to be recovering, and all entertained great hope that she would soon be well again, behold! she gave a sudden flounce, and the weary wheels of life stood still in death. Although it is a source of consolation to the bereaved to know that the departed gave evidence of acceptance with God at the very moment when soul and body were parting, yet this kind of testimony cannot be relied on with any degree of certainty unless the former life correspond thereto. No doubt many, while dying, mistake the effects of some opiate for the results of religion. It is the consistent religious life to which we must look for anything like a well grounded hope of a blissful immortality on the part of the deceased. The latter kind of testimony Sister Carmichael has left behind to cheer the hearts of friends and relatives. A disconsolate husband, four little children, and a large circle of friends and relatives mourn over her untimely demise. But, blessed be the name of Jesus, their loss is her eternal gain.

WILLIAM A. SAMPY.

FIVE CENTS ADDITIONAL
will buy shoes with Silver or Copper Tops, which will save the buyer the price of a new pair of shoes. Compared with ragged toes and dirty stockings, they are beautiful to say the least. Parents, try it. sent 3c

SALESMEN
Wanted
For the beautiful Steel Engraving,
"Christ Blessing Little Children."

Taken from Eastlake's world-renowned painting. Sold only by subscription. This work has no equal for salability. Salesmen are making from \$5 to \$15 per day. Send for descriptive circular, terms and testimonials. Address
C. T. MERRIMAN & CO.,
Publishers,
se24 3m 68 Camp St., New Orleans.

J. W. BLACKMAN'S
COMMERCIAL COLLEGE,
61 CAMP STREET,
Corner Commercial Place, N. O.

Open day and evening the entire year. Penmanship, Book-keeping, Mathematics and Languages are practically taught by experienced professors. Persons from twelve to fifty years of age attend. The instruction is private to each student. Persons who have neglected their education can here speedily qualify themselves for good situations in business. Some from the country may obtain board in the family of the principal.
William Walker, a late graduate of the Southern University of Alabama, and son of the Rev. Dr. J. B. Walker, of New Orleans, has charge of the Mathematical department. Tuition—Ten to twenty per cent. less than other colleges in this city.
A liberal deduction made when three or more enter together. The principal has been a practical teacher in New Orleans since 1857. For circulars, giving terms, etc., address
J. W. BLACKMAN,
New Orleans.

MEMPHIS CONFERENCE FEMALE INSTITUTE, JACKSON, TENN.

This old and popular institution affords all the advantages of a first class Female College, and is steadily improving.
Charges are moderate. Fall session begins SEPTEMBER 5, 1870.
For catalogues address the President,
REV. A. W. JONES, D. D.,
se24 3m 68 Camp St., New Orleans.

Style 13—Eight stops. 185 00

Style 26—Eleven stops. 365 00

Please send for price lists of Pianos and Organs. no14 1y

SOUTHERN METHODIST

Male High School, New Orleans.

The exercises of the second session of this institution will commence on MONDAY, the fifth day of September proximo, in the basement of the German Methodist Church, Dryades street, between Felicite and Eugene. The Principal, encouraged by the gratifying success of the past session, will in no respect relax his energy in the effort to make the school all that could be desired by its patrons; and to accomplish this end neither pains nor expense will be spared.

To furnish to those who desire it an opportunity to obtain for their sons a systematic course of instruction from the beginning, upon which a thorough education so much depends, Primary and Preparatory Departments have been established in connection with the High School.

In selecting professors and teachers the greatest care will be exercised in regard to not only their mental qualifications, but also their moral character and Christian life. The rates of tuition have been fixed as low as is consistent with thorough instruction.

For further information as to terms, etc., apply at the School.

CHILDREN TEETHING.

Mrs. WINSLOW'S SOOTHING SYRUP,
FOR CHILDREN TEETHING.

greatly facilitates the process of teething by softening the gums, reducing all inflammation; will allay ALL PAIN and spasmodic action, and is

SURE TO REGULATE THE BOWELS.

Depend upon it, mothers, it will give rest to yourselves, and

Relief and Health to Your Infants.

We have put up and sold this article nearly thirty years, and can say in confidence and truth of it what we have never been able to say of any other medicine—NEVER HAS IT FAILED IN A SINGLE INSTANCE TO EFFECT A CURE, when timely used. Never did we know an instance of dissatisfaction by any one who used it. On the contrary, all are delighted with its operations, and speak in terms of commendation of its magical effects and medicinal virtues. We speak in this matter "WITNESSES," after years of experience, and pledge our reputation for the fulfillment of what we here declare. In almost every instance where the infant is suffering from pain and exhaustion relief will be found in fifteen or twenty minutes after the Syrup is administered.

Full directions for using will accompany each bottle. Be sure to call for

"Mrs. Winslow's Soothing Syrup,"
having the fac-simile of "CURTIS & PERKINS" on the outside wrapper. All others are base imitations.

Sold by Druggists throughout the world.

GENTLE LILIE.

Gentle, loving, blue-eyed Lillie,
Full of mirth and sunny glees;
Ever blooming little maiden,
What on earth can equal thee?

Everything now smiles around thee,
Parents' love and brothers' fun;
Nothing is allowed to vex thee,
Blossom opening in the sun!

But thy days are onward gliding,
Soon to mix with ripper years;
Why should ever grief's dark shadow
Dim thy laughing eyes with tears?

Would that I could always shield thee
From the varied ills of life—
From the dangers that will gather,
Rudely mocking childhood's mirth.

Yet I would not take thy future
In my puny, erring hands,
Lest I mar God's wonderful working,
And oppose his high commands.

For a mightier arm than human,
And a far surpassing love,
Will assuredly protect thee,
Safely leading thee above!

Then, whatever ills o'ertake thee,
Be thy pathway smooth or long,
Once amid eternal glories,
All shall turn to grateful song.

O. G. E., in Independent.

HOW TO MAKE A KITE.

Among the various kinds the "three-stick kite" is probably the surest for the beginner. Get three light, thin, straight sticks of cedar, pine or similar wood; smooth them, and let them be about half an inch wide by an eighth thick; perhaps a little more. Make two of them thirty inches long, and the third twenty inches. Mark a point ten inches from the end of each of the long sticks, and in the middle of the short one; cross the three sticks at these points, and tie them firmly with twine. Cut notches lengthwise across the ends of the sticks, and tie a strong twine from end to end, making the outline of an irregular six-sided figure, of which the bottom may be sixteen inches long; the sides about eighteen and a half; the shoulders eleven, and the top eight inches. These numbers may vary; it is necessary only that the corresponding sides should be exactly alike or the kite will not be well balanced. This finishes the frame.

Now lay down a sheet of strong, light paper, place the frame upon it, and cut the paper about two inches larger than the frame, all around. Fold the outside over the strings, and paste down with good boiled flour paste, cutting out the corners where they overlap.

The next thing is to hang the kite. Measure from each lower corner five inches along the sticks; make a small hole on each side of the stick through the paper, and tie in the ends of a string, which shall measure, when tied, about fourteen inches from stick to stick. This is the lower loop. In like manner tie an upper loop, about eight inches long, to points about three inches from the upper end of the same sticks. Remember to have the loops on the face side of the kite—that is, the side on which the sticks are not seen. Join the middles of the two loops by a string about twenty inches long; this is the belly-band. Hang the kite by the belly-band over the finger, and hold it so that one end of the kite touches the floor, the other may be about a foot above it; there is the place to tie the line, making it fast so that it will not slip. When the kite floats in the air it should lie at an angle of about forty-five degrees; if it stands too straight the string is fastened too low on the belly-band; if too flat, the string is not low enough.

The kite must have a tail to balance it. If the tail is too heavy the kite will not rise it; if too light, as is usually the case, the kite will not "stand" steadily, but will dive from side to side. Whenever it does that it should be taken in, and more weight added to the tail. Cut pieces of writing paper, four inches wide and six or eight long; fold back and forth, fan-like, and tie three inches apart, on a string, until you have made three or four yards. Then cut a quantity of strips half an inch wide, and twelve or fourteen inches long; tie the bunch of them by the middle, fold the ends together and tie again, making a tassel, which you may tie to the end of the tail. If the strips are of colored tissue paper, all the gayer. Tie a strip about twenty inches long to the two lower corners of the kite, and fasten the tail to the middle of it. Choose a smooth, close, well spun string—linen is best, and costs most—not too large, or its weight will make it "sag," or too small, or the kite will fly away with it. Finally, don't try to fly a kite when the wind don't blow.

Now just as each of your good mothers thinks she has a recipe for making cookies, which she thinks is a little better than any other, so every boy who has had experience in kite-making thinks his way is rather the best, and quite likely he may find fault with some of our reports. If so he has per-

liberty to change them to his liking. The important items are: the kite must be truly made, so that one side may just balance the other; it must hang at the proper angle to the wind; and the tail must be rightly proportioned in weight to the size of the kite.

If the kite don't behave well at first, think which of these items has not been carefully attended to, and correct. Don't give up at the first trial.—The Bright Side.

TRUTHFUL AND OBEDIENT.

"Charlie! Charlie! Clear and sweet as a note struck from a silver bell the voice rippled over the common."

"That's mother," cried one of the boys, and he instantly threw down his hat, and picked up his jacket and cap.

"Don't go yet!" "Have it out!" "Finish this game!" "Try it again!" cried the players in noisy chorus.

"I must go—right off—this minute. I told her I'd come whenever she called."

"Make believe you didn't hear!" they all exclaimed.

"But I did hear."

"She won't know you did."

"But I know it, and—"

"Let him go," said a bystander. "You can't do anything with him. He's tied to his mother's apron strings."

"That's so," said Charlie; "and it's what every boy ought to be tied to, and in a hard knot too."

"But I wouldn't be such a baby as to run the minute she called," said one.

"I don't call it babyish to keep one's word to his mother," answered the obedient boy, a beautiful light glowing in his blue eye. "I call that manly; and the boy who don't keep his word to her will never keep it to any one else, you see if he does!" and he hurried away to his cottage home.

Thirty years have passed since those boys played on the common. Charles Gray is now a prosperous business man in that great city, and his mercantile friends say of him that "his word is as good as his bond." We asked him once how he had acquired such a reputation.

"I never broke my word when a boy, no matter how great the temptation, and the habit formed then has clung to me through life."—Child's Delight.

The Farm and Garden.

WHY DOES A TREE DIE?

If it were asked why do such plants as the tomato, squash and May-weed die, we could easily answer that the frost kills them. But when a plant like the young maple or oak sapling survives the winter, and bursts forth every spring with new vigor, increasing in height, enlarging in bulk, defying storms and alternations of heat and cold, and thriving amid all vicissitudes, we may well ask, why should it ever cease to grow and prosper? Of course accidents will sometimes happen to trees. They may be injured by man or beast. Hurricanes may break them down, the lightning may cleave them, the woodman's ax may bring them to the earth, insects may prey upon the wood or bark or leaf, and eat away their vitality. But such things aside, why do trees die?

According to well received theories of vegetable economy, they ought to live for an indefinite period. Those parts of a tree which carry on the processes of life and growth are the extremities of the stem and branches, including the buds, the extremities of the roots and rootlets, and the newest strata of wood and bark. These are renewed every year. It is not so in the animal economy. There the functions of existence are carried on for a whole life-time in one set of organs, and when these wear out the animal dies. But as the life processes in a plant are carried on through organs never more than one year old, it would seem that this state of things might be continued indefinitely. At least there is no necessary reason, no cause inherent in the tree itself, why it should die.

Theorizing may go a little further. The physiologist looks at a tree not as an individual, but as a community. A rigid analysis will show that the only individual in the case is the first cell of which the plant was originally composed. So too every bud since formed and every leaf is an individual, since it has in itself all the elements of an independent plant, and may be made to produce one. Therefore, though some portions of a tree may die, as the heart-wood practically does, the other portions do not. Individuals may perish, but the community lives, and is renewed and augmented every year.

In treating of this subject Dr. Asa Gray happily compares a tree to the branching and arborescent coral. This structure is built up by the combined labors of a multitude of individuals. The surface of the recent shoots alone are alive; all underneath consists of the dead re-

main of former generations. Now as the coral structure lives and grows indefinitely, though the individuals composing it perish, so a tree, considered as a composite structure, may live on in the same way without any assignable limit to its life. Every joint in its root, as well as every bud on its branches, might be taken off and set up for itself to form a separate and independent tree; but if all the children choose to remain on the homestead, need all the family die out?

But these theories do not quite satisfy us, for there are too many facts against them. Is not the human body essentially the same now that it was in antediluvian times, when men lived eight or nine centuries? Theoretically it is; but the stubborn fact is that now the days of our years are threescore and ten. Now and then we see a person who inherits no perceptible disease from his parents, and who holds out to ninety, and even a hundred years. Yet every one knows that this is an exception to the general rule, and that the general rule will soon assert its sway. The old gentleman will take cold, or stumble and fall, or his digestion will become impaired, and he will suddenly die. So in the vegetable kingdom. By theory a tree has no assignable limit of life, but practically it has. Cases of extreme longevity sometimes occur, but they are rare exceptions, and even those trees finally perish.

The most satisfactory theory of the decay and death of trees is that which ascribes their decline to their expenditure of the vital force originally given them by their Creator. Different species of trees are endowed with different degrees of vitality. The willow and aspen, for instance, have less than the oak or pine or yew, and they perish sooner. In the case of many other trees the difference in amount of this original force is almost imperceptible, yet careful observation will discover it. Certain individuals of the same species may outlast others, while others may fall short, owing to difference of soil, climate, position and treatment; yet with the average of the species the law will hold good.

The law here referred to has a still wider application. It is seen in those plants commonly called annuals, and which compose many of the weeds, flowers and useful plants of our gardens and roadsides. These spring up from seed, blossom and die in a single summer—many of them, indeed, before the frost touches them. Then come biennials, whose period of growth and decay is bounded by two years. Then come the imperfect perennials, whose life beyond the second year is a matter of uncertainty. Then follow perennials which perpetuate themselves indefinitely by enlargement of the roots, by offsets, etc. After these, and among these, we may rank the trees of which we have already spoken—lasting, according to their species, from a few years to many centuries.

Statistics concerning the age of different species of trees are now being collected in various parts of the world, which will form an interesting record for the arboriculturist. Our own country has already furnished many important facts of this description, some of which we may at a future time present to our readers.—Hearth and Home.

The GERANIUM.—This old and well known flower, which has graced the gardens and windows of the people as far back as memory reaches, is now being brought up to a high standard of perfection by the introduction of some very fine new double varieties, mostly originated in France by that chief of geranium growers, Lemons. They are of all the shades of scarlet; and one of the last new ones is a bright pink, very close and compact, extra strong, of dwarf growth, the truss well up from the foliage, and some fine heads of bloom, having as many as eighty perfectly formed flowerets fully expanded at once. They are being offered by our florists here for sale this season.

Most of the new varieties have the desirable dwarf growth that shows so well in small clumps, or for the outside line in a large bed of this splendid flower, which is the best way to grow them. If room can be spared in the flower garden, nothing can surpass a fine bed of them of all the shades from bright scarlet to white. The double are not the only ones that are putting in their claims this season; some of the new Zonale varieties are grand in color and strength of growth, and will delight all lovers of a fine show of bloom with their trusses of flowers, some of which are over five inches in diameter, and every single flower fully expanded.

Any one can grow geraniums. All they want is plenty of sunlight, a good strong soil, and a little water, if the season is very dry. If you have room, try a few of them, and you will always grow them afterward. Every season brings us new varieties, and before long we will have the double white, which is what all geranium growers are now trying after.—Ruralist.

HOUSEKEEPERS' DEPARTMENT.

HAM TOAST.—Chop some lean ham fine, put it in a pan, with a little pepper, a lump of butter, and two eggs beaten; when well warmed, spread it on hot buttered toast, and serve.

TARTS.—Lemon butter is excellent for tarts. It is made as follows: One pound of pulverized white sugar, whites of six eggs and yolks of two, three lemons, including grated rind and juice. Cook twenty minutes over a slow fire, stirring all the while.

ZINC WHITENESS.—The Manufacturer and Builder says: "Mix oxide of zinc with common size, and apply it with a whitewash brush to the ceiling. After this apply in the same manner a wash of the chloride of zinc, which will combine with the oxide to form a smooth cement with a shining face."

PERPETUAL PASTE.—A perpetual paste may be made by dissolving an ounce of alum in a quart of warm water. When cold, add as much flour as will make it of the consistency of cream; then stir into it half a teaspoonful of powdered resin and two or three cloves. Boil it down, stirring it all the time. It will keep for twelve months, and when dry may be softened with water.

BEEF TOMATO PIE.—Take cold roast beef and cut in small thin slices; have the tomatoes ripe and peeled; line a deep dish with a light biscuit crust; put a layer of beef, then a layer of sliced tomatoes; salt, butter and pepper to taste, until the dish is nearly full; put on the top crust, cutting a gash from the top to the bottom of the dish, that it may not burn. Bake two hours in a slow oven.

PEA SOUP.—A pint and a half of split peas, two small onions, pepper and salt to taste. Use three quarts of water, and boil them from five to six hours. Pork is often put in, but makes it far less wholesome. If the water be hard add a piece of suet not larger than a pea. It would be difficult to find a way in which the same amount of nourishment could be obtained for four times what this costs.—Hearth and Home.

SIGAR BISCUITS.—Dissolve one teaspoon of white sugar in a quart of milk; then stir in a pint of lively yeast with sifted flour enough to make a stiff sponge; let it rise until very light, then work into the sponge three-quarters of a pound of melted butter, with sifted flour enough to make a stiff dough; work the dough thoroughly, cut into biscuits, let them stand on buttered tins to rise; sift sugar upon each, and bake in a quick oven.

LEMONADE.—Those who live where fresh lemons cannot be obtained whenever wanted, may find that a very nice substitute for lemonade can be made by dissolving a small portion of citric acid in water, flavored with good essence of lemon, and sweetened to taste. A quarter of a pound will make gallons of lemonade, and is much preferable to tartaric acid, being made from lemons themselves. It will also take the place of lemon juice in making lemon pies.

FILL LAMPS IN THE MORNING.—Scarcely a week passes but we read accounts of frightful accidents from kerosene lamps exploding, and killing or scarring for life women and children. A simple knowledge of the inflammable nature of the fluid will probably put a stop to nearly all the accidents. As the oil burns down in the lamp highly inflammable gas gathers over its surface, and as the oil decreases the gas increases. When the oil is nearly consumed a slight jar will often inflame the gas, and an explosion is sure to follow—death and destruction. A bombshell is no more to be dreaded. Now if the lamp is not allowed to burn more than half way down such accidents are almost impossible. Always fill your lamp every morning, then you need never fear an accident.

DRESS FOR A GENTLEMAN.—Let the head-covering be made of presence of mind and self-command, as these will insure its coolness and staidness. The bosom and waistcoat should be of white, spotless purity, close fitting about the heart. The pants should be of staid and sober truth, without stripes or ornament. Have the coat of broad sterling virtue and integrity. The buttons upon all should be bright, and sparkling of sunny smiles and good humor. Let the hands be clad with warm charity and benevolence. Let the feet be shod with the preparation of the "gospel of peace," that they may lend you into wisdom's ways. If a cloak or surtout is worn, let it be of modesty and not hypocrisy.

"NEVER MADE HIS MOTHER SMILE." What a unique and meaning expression was that of an Irish girl in giving testimony against an individual in a court of justice the other day. "Arrah, sir," said she, "I'm sure he never made his mother smile." There is a biography of unkindness in that short and simple sentence.

BELLS—BELLS.

CHURCH BELLS. CHURCH BELLS. We are prepared to furnish Church Bells of Steel Composition, having a rich, deep tone, at the following prices, which place it within the power of all Churches to be provided with a good Bell:

	Weight.	Vt. of Bell and mountings.	Price.
28-inch Bell...	250 lbs.	400 lbs.	\$65 00
36-inch Bell...	650 lbs.	800 lbs.	135 00
40-inch Bell...	800 lbs.	1000 lbs.	175 00
48-inch Bell...	1200 lbs.	1500 lbs.	265 00

These Bells are warranted for one year against breakage in ordinary use.

THOS. B. BODLEY & CO.,
609 1/2 N. O. 9 Perdido St., N. Orleans.

BELLS, STEEL COMPOSITION.

For Churches, Schools, Etc.
BLYMER, NORTON & CO., Manufacturers,
Cincinnati, Ohio.

These celebrated Bells (not Cast Iron or "Anvil") rival in purity and volume of tone those of copper and tin, are more durable, and cost only one-third as much. Send for descriptive circular. \$25 ly

SCHOOLS AND COLLEGES.

WHITWORTH FEMALE COLLEGE,

BROOKHAVEN, MISSISSIPPI.

On the New Orleans, Jackson and Great Northern Railroad, one hundred and twenty-eight miles north of New Orleans, and fifty-seven miles south of Jackson, will reopen on

The 21st of September, 1870.

Thorough instruction in all the branches of liberal education. Charge for board, tuition in English, English text books, school-room stationery, washing, fuel, lights, medicine and medical attendance, \$233 for the term of forty weeks. The languages and music, extra. A deduction of \$50 made for pastors of churches. Number of pupils last term, 165. For catalogue address

H. F. JOHNSON, President.

CORONA.....CORONA

Corona is a School designed for

The Higher Education of Women.

With a Faculty of ten able, experienced teachers, it is prepared to give young ladies a course of instruction equal in extent and thoroughness to that pursued in the best colleges for men. Best facilities in music, in the family of the principal young ladies will find the kindness and comforts of a home. The bed-rooms are large, airy, newly furnished and carpeted. Number of boarders limited to twenty-five. Apply early. Terms moderate. Session opens first Monday of September, 1870. Address

A. B. STALK, Principal, Lebanon, Tenn.

EAST ALABAMA COLLEGE.

ATMORE, ALABAMA.

The next annual session will open on the FIRST WEDNESDAY in October, with a full faculty.

Boys and young men at every stage of advancement can be received either in the Preparatory, Junior or Senior Departments. Additional schools of Modern Languages, Civil Engineering, and Commercial Arithmetic and Book-keeping have been established.

Economy, health, efficient faculty, good society, thorough discipline and the best religious privileges are the peculiar advantages afforded.

It is just the place to train Methodist boys, and there is room for three hundred. If every preacher and layman will work for us to secure students we will open with two hundred.

For full information or catalogue address the Secretary of the Faculty.

DAVID CLOPTON, President Board of Trustees.

HAWESSEE COLLEGE,

MOSKOE COUNTY, EAST TENNESSEE.

Having taken charge of this school, I desire to invite the attention of the friends of the Cotton States to the excellent location, delightful climate and cheap board. We are in the best part of East Tennessee, seven miles east of Sweetwater, on the great line of railroad, and two miles from Madisonville, which is our post office.

The college has been in operation for twenty years, and has boarding arrangements for about fifty students. The steward supplies his table from his own farm, and gives the best that the country affords, well prepared, and furnished rooms, at

Two Dollars and a Half Per Week

Tuition is \$40 per annum. Students will be received at any time, and charged to the end of the term. For circular address

REV. F. M. CLAY, Jr.,
at 27 1/2 Madisonville, Tenn.

THE ARROW TIE.

FOR BALING COTTON THE ARROW TIE is the most popular, being the best Cotton Tie in use.

Planters and Cotton Pressmen everywhere prefer it to all others.

THE ARROW TIE

was used to cover MORE THAN HALF THE CROP OF 1869, giving entire satisfaction.

The patentee and manufacturer of the celebrated ARROW TIE, J. J. McComb, formerly of New Orleans, now residing in Liverpool, having control of the best and most extensive Rolling Mills in Europe, is constantly importing large stocks of this popular Tie, manufactured of the very best quality of English iron, to meet the increasing demand for it throughout all the Cotton States.

Planters can buy or order the ARROW TIE of all dealers in Iron Ties, and of country merchants generally, at the lowest market price; and we respectfully solicit the patronage of Planters and Factors everywhere.

H. T. BARTLETTE AND R. W. RAYNE,

General Agents for the Arrow Tie,
124 Carondelet St., New Orleans.

CARPET AND OIL CLOTH WAREHOUSE.

MISCELLANEOUS.

BROOKS' IMPROVED PATENT

WROUGHT IRON REVOLVING

COTTON SCREW PRESS.

Patented by R. M. Brooks, of Georgia, April 14, 1866.

It took the first premium at the Louisiana State Fair, at New Orleans, April, 1868, over eleven competitors; also at the Tennessee State Fair, at Memphis; and more recently at the Mississippi State Fair, at Jackson; and again at the recent State Agricultural Fair, at New Orleans, April, 1870. In a contest with fourteen Cotton Presses, exhibiting the most approved patents from different States of the North and South.

The following is the certificate of some of the principal cotton factors and merchants of New Orleans. In our circulars we have given the certificates of practical planters and mill owners from several Southern States, attesting the principle and practical working of the press.

"We, the undersigned, purchased last season, from Messrs. J. B. Jennings & Co., the Brooks' Revolving Cotton Screw Press for our customers, and so far as heard from, they have given entire satisfaction."
"Messrs. Greenwood & Son, Warren, Crawford & Co., G. L. Wainwright, R. H. McComb, Frank & Daniel, Campbell & Co., Clapp Bros. & Co., E. F. Golan & Co., Wright, Abbott, Black & Co., Block Bros., etc."

Circulars, giving cuts, with full description, price list, etc., sent by mail on application to J. B. JENNINGS & CO., Proprietors, 14 Union street, New Orleans.

DRUGS AND TRUSSES.—DR. JOHN C.

DANIELL, informs the medical profession and others that he has constantly on hand and for sale a complete assortment of DANIELL'S TRUSSES, Spinal and Shoulder braces, and other appliances for the prevention, relief and cure of general debility, rheumatism and shingles, palpitation of the heart, bronchitis and weakness of the lungs, spinal weakness and deformity, dyspepsia and nervous affections, constipation and chronic diarrhoea, female derangement, Struth and prolapsus of the womb, Irritation, Piles, prolapus-ani, and weakness of the male and female system.

These light, cool and springy auxiliaries are the special favorites of the profession; are intensely comfortable and rational in their action; supply a missing link in treatment; place the above affections in a new and more hopeful light, and often complete cures where medicine can only mitigate, any more than it can cure a hernia or a dislocated joint.

He specially desires an examination of these appliances by the profession and sufferers. Where necessary the professional application of the above braces will be under his supervision or that of the family physician.

These valuable appliances are sanctioned by a large number of the medical profession in the United States and Europe as the best adapted to fulfill the purpose for which they are intended, and the Trusses and Braces adopted by the United States Government for the use of the army and navy. Terms cash. Consultations free. Send for your pamphlet. It is better to call.

Office and residence, 152 JULIA STREET, near Camp, New Orleans.

NOTICE

COOPER'S WELLS, HINDS COUNTY, MISSISSIPPI.

THIS NOTED WATERING PLACE

is now open for the reception of guests. The water is adapted to Cholera, Bowel Complaints, Diarrhoea, Dyspepsia, Dropsy, Diabetes, Catarrhs of the bladder

The Christian Advocate.

SATURDAY, SEPTEMBER 24, 1870.

RELIGIOUS INTELLIGENCE.

Prof. Knapp's Presbyterian church in Madrid had sixty-nine adult members at its second communion.

Twenty-five French, eleven German, six British and four Bishops from the United States voted against papal infallibility.

In 1800 there were not one hundred Protestants in all India and Burmah. Now there are not far from eighty thousand church members.

The younger son of Mr. Gladstone is a curate, attached to one of the churches of Lambeth, London. He is said to be, as a preacher, simple and evangelical.

The Episcopal diocese of Wisconsin expects to raise the amount (\$12,000) due on Kemper Hall, Kenosha, in order that it may not pass into other hands.

A Methodist seminary for children, young men and young women is to be opened at Salt Lake City this month. It will be conducted by Rev. Ernest Smith and his wife, of Illinois.

Upon re-entering his church in Chicago, after a recent trip to Europe, Bishop Whitehouse was handed a check for \$16,000, which had been raised during his absence for the liquidation of the church debt.

Ermen is coming into use among the common people in the north of Ireland as an intoxicant. Its use is said to be the result of the efforts of the Roman Catholic clergy to induce their flocks to give up whisky.

Rev. T. Chavies, en route for India, arrived at Liverpool on the steamship Manhattan on the sixteenth day of August, better pleased with nothing more than that he had gone over it one of Williams & Gorton's steamers.

A. M. E. Church.—The African Methodist Church reports three hundred and fifty thousand communicants, twenty-five thousand probationers, one thousand traveling and five thousand local preachers; \$5,000,000 in church property.

The London City Mission has in its employ 375 missionaries, who made over 2,000,000 visits last year, reclaimed 905 drunkards, restored 676 fallen women to their homes, or put them in asylums, and induced 184 shopkeepers to give up Sunday trading.

A recent sermon of Spurgeon's contains a sentence which will be as much appreciated here as in England. "Brethren," said Spurgeon, "if God had referred the ark to a committee on naval affairs, in my opinion it would not have been built yet."

Sir Francis Crossley, the famous carpet manufacturer of England, has just given \$110,000 to the London Missionary Society, and as much more for a fund for disabled pastors and their families. The profits of his business amount to a million and a quarter per annum.

Dr. M. D. Rindler writes to the Presbyterian Banner from Heidelberg that the King of Prussia "is an earnest Christian, as is Von Moltke, the planner of campaigns; while Von Roon, the minister of war, is one of the comparatively few men in Germany who gathers his household daily and leads their devotions."

Dr. O. A. Brownson, one of the ablest Roman Catholic writers in this country, says that if the Pope should declare an oath imposed by the constitution contrary to the divine law, he could not in conscience take it; or if the Legislature should pass a law, and the Pope should declare that what it required of him was forbidden by the law of God, he could not obey it.

Eminent lawyers advise that there are no insuperable objections to the proposed union of the Primitive Wesleyans with the Irish (Episcopal) Church, heretofore reported in our columns as under discussion. Since, at the recent conference of the Primitive Wesleyans, nearly three-fourths of the members voted in favor of such a union, and legal obstacles alone intervene to prevent it, there is little doubt that the union will eventually take place.

There are 129 church organizations in Boston, classified as follows: the Congregational Unitarian, 22; Congregational Trinitarian, 15; Baptist, 18; Methodist Episcopal, 15; Roman Catholic, 16; Universalist, 6; Methodist, 2; Presbyterian, 6; Episcopal, 14; Second Advent, 2; and the Congregational, Independent Methodist, Free Will Baptist, German Lutheran, German Evangelical, Polish Jew, German Jew, German Methodist and Swedenborgian, one each.

A new and deep felt want among our Norwegian and Danish people is about to be met in the publication of a new hymn book. It is styled "The Missionary Hymn with the New Song, a rather quaint name. It

will contain two hundred and forty-seven hymns with popular tunes attached. They promise to furnish a good list of translations from the English. The hymns will be what we would call prayer meeting or revival hymns. It is compiled by a certain N. P. Lang. The hymns used in the Scandinavian state churches are generally heavy and forced in their construction.

LIBERIA.—Not long since we remarked that Protestant missions in Liberia were never more prosperous, and ours peculiarly so. In a letter from Rev. James H. Deputie, just received at the mission rooms, dated June 22, he says: "Never in the history of Liberia missions has the work been so prosperous as now." His own station is at Mount Olive, among the natives, and quite in the interior. It consists mainly of converted natives, and Brother Deputie says of it: "It is a star in this part of Liberia. The natives around look at her glimmering light with wonder and astonishment."—*Christian Advocate.*

The Baptists among the Telugus of Nellore and Ongole are planning a theological seminary. Mr. Timpany, writing from the districts about Ongole, says that "whole villages are turning to the Lord. The Christians now live in about one hundred and twenty villages and number over one thousand, and others are daily added to us." The country, as a whole, seems almost ready to throw aside its idolatry. The highest native magistrate in Ongole, a high-caste Brahmin, a bachelor of arts and graduate of the Madras University, told Mr. Timpany, on a late visit to him, that he believed the Christian religion to be true; but could not break away from caste, though he expected that his boy would be able to. There are needed there thirty native pastors for the churches.

The Hungarian Church is making a bold strike to free itself both from the Pope and the Emperor. A very significant work from the pen of a popular author has just left the press, wherein it is asserted that the great cause of all the trouble in church government is the fact that the people have nothing to do with it, and claim that they ought to control both it and the schools. The book says:

"If the church is to have true effectiveness it must be by the co-operation of all who sustain it and belong to it; it must be organized on a democratic basis, and must take in general the Protestant Church as a model. To this end the worshipers in the church should not be mere idle spectators, listening to a liturgy that they do not understand, nor should they be excluded in the church assemblies from having a voice in the selection of their pastors."

A MAGNIFICENT GIFT BY AN ENGLISH METHODIST.—At the late session of the English Wesleyan Methodist Conference, during the discussion of a memorial from the Metropolitan Chapel Building Fund Committee, asking for the appointment of a special secretary for the ensuing year, a very interesting and important announcement was made. Rev. William Arthur stated that he had received a letter that morning from Sir Francis Lytton, a distinguished Methodist layman, in which he (Sir Francis) said that he hoped within ten years, perhaps seven, to see erected in London fifty new chapels; and if £50,000 (about \$250,000) could be obtained from the connection he intended to give as much. The announcement produced a deep impression on the Conference, and was received with loud applause. Of course a special secretary was appointed. Our Methodist brethren in London seem to entertain no doubt that the other \$250,000 will be forthcoming.

The recent revolution, the more remarkable because so peaceful, which has converted Austria from a mere dependency of Rome into a truly independent empire, is largely due to her prime minister, Von Beust, a man of scarcely less genius than Bismarck, though less known, and like Bismarck, a Protestant, though, unlike him, at the head of a Roman Catholic country. During his ministry Austria has adopted a system of free schools, established the validity of civil marriages, limited the authority of the priests, and so far insured the independence of the clergy that the Austrian bishops were not less manageable in the Ecumenical Council than those who came from Protestant Prussia. To him, too, is due the first notable effect of the council on European politics—the abolition of the Concordat, the effect of which will be to destroy within Austria the church's power as a corporation, to bring it under the authority of the ordinary civil law, to make it liable to any law the Reichsrath and the Emperor may impose, and to divest it of the supreme control it has hitherto had over education; the result of all which has been, according to the London Spectator, "an astounding crop of atheists."

Independent.

BOOKS AND STATIONERY.

STANDARD EDUCATIONAL WORKS.

PUBLISHED BY

CHARLES SCRIBNER & COMPANY, 654 BROADWAY, NEW YORK.

Guyot's Geographical Text-Books.

"Incomparably superior to anything published."—*Agassiz.*

Introduction to the Study of Geography. Elementary Geography. Intermediate Geography. Common School Geography.

Guyot's System is approved and indorsed by the most distinguished literary and scientific men of our nation; such as Prof. Agassiz, Dana, Tenney, Huxley and others, celebrated in science throughout Europe as well as at home.

The fact that ONE MILLION (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New System, for no other series of books ever published in America have ever secured so rapid and extensive introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; Cincinnati, Cleveland, Columbus, Springfield, Toledo, Marietta, and most of the other important towns and cities, numbering nine thousand schools in Ohio, and hundreds of towns and cities in the other Western States, while in the Southern States and California they are being extensively adopted.

Relieving that the publication of Professor Guyot's series has marked a new and better era in the presentation of geographical science, that by it the pupils of this generation will obtain a clearer, more definite and extended knowledge of the world on which they live, and that it is so systematized as to render that knowledge more valuable and permanent, we commend it to the attention of all interested in educational improvements and progress.

FELT'S POPULAR SCHOOL ARITHMETICS.

First Lessons, (Illustrated.) Primary Arithmetic, (Illustrated.) Intellectual Arithmetic. Intermediate Arithmetic. Practical Arithmetic.

We are Manufacturers' Agents at New Orleans for

Avery Pumps, Peacock Pumps, Callahan Pumps, Brinley Pumps, Garrett & Cottman Pumps, Hays Valley Pumps, East Iron, James H. Hall Cottonseed and Eagle Pumps.

We sell all these at manufacturers' prices, and all other kinds of Pumps at the lowest market rate.

THOS. B. BODLEY & CO.,

Dealers in Machinery and Agricultural Implements, 901 Poydras St., N. Orleans.

SCHOOLS AND COLLEGES.

FLORENCE WESLEYAN UNIVERSITY.

FLORENCE, ALABAMA.

W. H. ANDERSON, D. D., PRESIDENT.

This institution of learning, so widely known through the South, will begin its next session on WEDNESDAY, SEPTEMBER 14, 1870.

The Faculty is composed of men of experience and ability. The course of study is comprised in the Literary Department, Law Department, Department of Biblical Literature and Commercial Department. The advantages of this University are seen in its healthful and attractive location, thorough course of study, excellent discipline, the character and success of its instructors, and the reasonable rates at which board and tuition are furnished.

Licentiate in the ministry and sons of ministers in the regular work are admitted to matriculation on paying the incidental fees.

EXPENSES PER SESSION OF FIVE MONTHS.

Tuition in the University classes.....\$30 00

Tuition in Grammar School.....25 00

Tuition in Law Department.....40 00

Incidental fees.....1 00

(Tuition and incidental fees required in advance.)

Boarding can be had in the best families at from \$16 to \$20 per month.

For particulars see circular, or apply to the president, Rev. Dr. Anderson, or to Hon. W. H. Wood.

J. H. WOOD—President Board of Trustees.

TUSKEGEE FEMALE COLLEGE,

TUSKEGEE, ALABAMA.

The Fifteenth Annual Session begins SEPTEMBER 15, 1870, and continues forty weeks; divided into two equal terms.

REV. GEO. W. F. PRICE, M. A., President.

REV. B. H. ROSS, M. A., Professor of Latin and Mathematics.

DR. S. M. T. FLETCHER, Director of Music, with Nine Assistants in the various departments of instruction and discipline.

The president calls particular attention to the fact that Rev. B. H. Ross, of the Alabama Conference, has accepted the professorship of Latin and Mathematics in the institution.

Brother Ross is a graduate of Lagrange College, Alabama. He was professor of Mixed Mathematics in that institution for two years. Subsequently he was president of Tuskegee Female Institute. His classical education, his experience in the practical business of teaching, his acceptable career of literary service, his many excellent personal traits, all entitle him to the unqualified confidence of our people.

The College has just closed a most successful year. Its prospects were never more flattering. Its present organization of the institution combines all the best features for securing the thorough instruction and efficient discipline of its pupils. The Faculty contains none but tried and trained teachers, whose success has been tested by years of service. The boarding arrangements are under the immediate control of the president, who resides in the building, and supervises the social, recreational and professional duties of the pupils. The health of the girls is in charge of an experienced matron. The table, kitchen and laundry are in charge of a thoroughly trained housekeeper. Miss Shuler, of Tuskegee, is the governess, and directs to the office high social position, experience as a teacher, liberal education, and matured Christian character. The pupils are trained in gymnastic and calisthenic exercises, thereby developing their physical powers, strengthening their constitutions, and imparting grace and dignity to their movements. Religion is the basis of the system of education, and girls are taught that "the truth as it is in Jesus" is the highest attainable wisdom.

CHARGES FOR SCHOLASTIC YEAR OF FORTY WEEKS.

Tuition, according to grade, from \$25.....\$60 00

Tuition in music.....60 00

Tuition in art, from \$20 to.....40 00

Tuition in languages.....20 00

Board, washing and fuel.....220 00

Instruction in vocal music, free of charge.

Instruction in calisthenics, free of charge.

Use of models in the study of calisthenics, free of charge.

Use of instruments for practice, free of charge.

Use of library of reference, free of charge.

No incidental charges of any kind.

Tuition for each term payable in advance.

J. H. WOOD—President.

WESLEYAN FEMALE INSTITUTE,

STANTON, VIRGINIA.

will begin its next session September 20, 1870, and close June 22, 1871.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, OCTOBER 1, 1870.

NO. 37.

NEWS OF THE WEEK.

DOMESTIC

CHEYENNE, Sept. 26.—Half a block of buildings on Eddy street were destroyed by fire last night. Loss \$200,000—very little insurance.

New York, Sept. 26.—The steamer Sarah Fish, of Maine, was abandoned at sea in a sinking condition. Her crew reached this city in safety, having been rescued by the steamer Metropolis from New Orleans.

Keppel was arrested near Reading, Pennsylvania, charged with implication in the Nathan murder. He was in New Jersey when the murder was committed, but his arrest was caused by the extravagant account he has given of his own exploits.

New York, Sept. 29.—The surrender of Strasburg attracts little attention in the press or business circles, but the rumored intention of Russia to interfere to prevent any disturbance of the balance of power on the continent has had the effect to send gold slightly up and to create considerable excitement and uncertainty in financial circles.

A Washington special says the Post Office Department will hereafter send the Texas mails from this port via the Mallory steamers direct to Galveston.—*New Orleans Times.*

FOREIGN

Luxemb., Sept. 22.—General Burnside left here for Paris this morning. He carries letters from Count Bernstorff to Bismarck; also to Prussian and French commanders.

All communication between Paris and Tours has been cut, and the provisional government is now as effectually separated as before.

Lyon and Paris are in political accord.

The great cities of France refuse to be bound by the action of the capital if it capitulates.

The Catholic powers have already communicated to the Pope their readiness to contribute to make up a revenue for the maintenance of the Holy See.

Reports from Tours to the effect that Thiers has obtained from England recognition of the provisional government are not believed here. In Tours the belief is that no negotiations for peace are likely to succeed until military events before Paris assume a turn.

Lillo has completed its fortifications. Immense munitions and provisions have been laid in and specie payments suspended.

A dispatch from Havre says that complications have sprung up between Russia and Turkey, and that war between these two powers is probable.

LONDON, Sept. 22.—The Tribune's correspondent telegraphs from Florence that a courier has arrived from a Tribune correspondent who is with the Italian army. He entered Rome with the assaulting column. The Italians lost four killed and thirty wounded.

The papal troops held a strong position. In ten minutes the white flag was displayed. Then came a deputation from the diplomatic corps, escorted by the Pope's dragoons, and capitulation was arranged without further bloodshed. The foreign population laid down their arms and will be sent home.

Great preparations are going on at Florence for the transfer of the capital of Italy to Rome.

TORONTO, Sept. 24.—The ministry have issued a proclamation, that France will rather bury herself under her own ruins than accept the insolent conditions of Germany.

It is reported Duke d'Aumale will be a candidate for the Constituent Assembly.

Five of the imperial yachts have been renamed Trochu, Jupiter, Turanno, Dessaix and Kleber.

FLORENCE, Sept. 24.—The Roman population tore down the emblems of the foreign legations where they were combined with the papal arms.

General Cadorna issued a proclamation denouncing such actions as violations of international law, and threatening severe penalties.

Viterbo votes on the plebiscite the second of October.

MADRID, Sept. 24.—A manifesto will appear to-morrow, signed by all the Republican members of the Cortes, in favor of an Iberian union.

Senator Orenz publishes a manifesto, advising the formation of a legion in aid of Franco. He says the candidature of the Prince of Hohenzollern, or any other person in the Prussian interest, is inadmissible.

General DelRoda announces the approach to submission of all classes of Cuba to the Spanish rule. When

it occurs he will accord them the same privileges accorded to Porto Rico.

COPENHAGEN, Sept. 24.—Twenty vessels of the French fleet have arrived in the Gulf of Lubek.

BRUSSELS, Sept. 24, noon.—Marshal Bazaine has offered to capitulate at Metz on condition that his forces be allowed to retain their baggage and arms, stipulating not to take up arms again for three months.

LONDON, Sept. 26.—The Times' special from Saarbrück, on the twenty-fourth, says: Bazaine made a faint on the side of Mercy-la-Haute and attempted to escape to Thionville.

A heavy cannonade of some hours followed, and there was a short fight at Monlon, seven miles from Metz, in which the French were driven back. Their loss was serious. Bazaine has released his prisoners.

A heavy force of Bavarians are penetrating the country toward Lyons.

The cathedral at Strasburg is irreparably injured, but the astronomical clock is still going.

Von Beust assured M. Thiers of their deepest sympathy, but stated that intervention was impossible.

It is said that Thiers will offer the Czar important concessions in the East.

A French levy en masse is hourly expected.

The Baltic fleet has been ordered to cut the cable between Germany and Sweden.

TORONTO, Sept. 26.—This city is crowded with refugees from all quarters, many of whom sleep in the streets.

BRUSSELS, Sept. 26.—The Belgian press unanimously denounce Prussia's arrogant demands.

PARIS, Sept. 26.—General Cadorna, addressing the provisional government of Rome, which he himself created, said: "Your task is sublime. The twentieth of September will ever remain an important era in your history, for it makes Rome again the capital of the kingdom."

MADRID, Sept. 26.—The government informs Captain General De Rodas that his resignation, if persisted in, will be accepted.

TORONTO, Sept. 26.—Balloon letters from Paris give the following account of the battle on the nineteenth: General Ducrot occupied the heights from Ville Juif to Meudon. He made a reconnaissance and encountered the Prussian masses concealed in the woods with many caution.

The French attacked vigorously, and drove them precipitately from their position. The Prussians reformed on the heights of Chateau and opened a tremendous artillery fire, from which General Ducrot was compelled to seek shelter in Fort De Vanves. His artillery was well served by the Garde Mobile, who were cool and resolute. Ducrot finally withdrew into Paris. The Prussians suffered severely.

LONDON, Sept. 27.—The German Official Gazette, a new journal, published at Haguenau, Bas Rhin, Alsace, referring in its first number to the proposed incorporation of Alsace and Lorraine into Germany, says: Alsace and Lorraine are already Teutonic in politics, manners, language and ideas; they will only be too happy to separate from infidel, socialistic France.

TORONTO, Sept. 27.—The Prussians have cut the Orleans railroad, and now occupy several points along the line. The cars run only to Blois.

The Prussians menace Orleans.

The Arab troops have been sent back from Marseilles to suppress a general revolt in Algeria.

Bronze statuary in Paris has been melted to make cannon.

ROME, Sept. 27.—The city is quiet, and confidence returning. The Pope and cardinals reappear in public.

MADRID, Sept. 27.—An article in the papers shows that the late law for the emancipation of slaves in the Spanish colonies has been nullified in the West Indies.

LONDON, Sept. 27.—The arrest of Jacoby, the noted Liberal, gives profound offense throughout North Germany.

TORONTO, Sept. 27.—Jules Favre's official report concludes as follows: "From the manner in which all my efforts for peace were met by the Germans, they are determined upon conquest. The interviews were not altogether useless, as they have proved that Prussia, contrary to her declarations, is fighting against the French nation, which must arise en masse either to disarm the provisional government, or resist the enemy to the last."

BERLIN, Sept. 27.—The Press, repelling the charge that Strasburg was bombarded while crowded with women and children, says General

Ulrich has persisted in refusing the departure of non-combatants.

MAINTENANCE, Sept. 27.—Five hundred Garibaldians arrived and were enthusiastically received. They departed for Tours.

The mayor announces a war loan of ten million francs.

M. Gaffinalo, a Greek merchant, gives the city two million francs.

There were thirty-two thousand soldiers in review yesterday, whereof eighteen thousand are well armed.

LONDON, September 27.—The new Roman government announces an appropriation of fifty million to defray the expenses of the inauguration of Rome as the capital of Italy.

The enthusiasm of the inhabitants is boundless, and the plebiscite is expected to be unanimous.

The Pope will probably leave Rome as soon as the result is declared.

Parliament will meet on the twelfth proximo to ratify the plebiscite, and on the eighteenth the King will make his entry into Rome and alight at Quirinal.

There is great rejoicing throughout Germany over the capture of Strasburg.

CANBERRA, Sept. 28.—Gen. Werder has announced the unconditional surrender of Strasburg, with seven thousand men, including the National Guards. Also four hundred and fifty-one officers.

This morning the gates were occupied by the German troops.

It was reported that the inhabitants, driven to desperation, succeeded yesterday evening in hoisting a white flag on the cathedral, but General Ulrich ordered it to be removed. The surrender was afterward compelled by pressure of the citizens and the garrison. There was great rejoicing. It is a severe victory, which is regarded as a triumph. Salutes are being fired and bells are being rung.

BERLIN, Sept. 28.—On the twenty-second and twenty-third instant there was fighting of considerable magnitude east of Metz. The First Corps and the Thirteenth Division were engaged. No ground was gained by the French.

MEAGER telegraphic dispatches from England bring us news of the most terrible marine disaster which has befallen a vessel of the British navy since the "Royal George" went down with twice four hundred men.

The British ironclad Captain sank on Wednesday night, off Cape Finisterre, and so far as is at present known, her entire complement of five hundred officers and men, with the exception of eighteen who made their way to shore in a small boat, were lost. The Captain was the last completed achievement of British naval architects, and was in every respect the most perfect ironclad afloat. Her capacity was four thousand two hundred and seventy-two tons burden; she carried a battery of six three hundred pounders; her engines were nine hundred horse power; her armor was of wrought iron, and in the most exposed portions of her hull was eight inches thick; her crew was a picked one; when she went into commission her whole equipment was as perfect as any dock yard ever turned out, and at sunset on Wednesday night she was literally the sovereign of the seas, for nothing afloat could bear comparison with her as a vessel of war. She was accompanied on this, her trial trip, by the flagship of Admiral Milne and several other vessels of his squadron, and she passed successfully through many of the severe tests to which a man-of-war is usually subjected. On Wednesday afternoon a gale arose with a heavy sea, and at 1.15 A. M. the Captain's lights were seen near the flagship. She was in no apparent trouble, although heeling rather excessively to the leeward. Soon afterward her lights were shut off by rain, and when morning dawned not a trace of her was to be found save a few floating fragments and an overturned boat. This disaster must be taken as a warning to all naval engineers, and it is very probable that the plans of several ironclads now building in English yards will be modified. The Captain had all that she could carry in the way of armament and stores, and possibly the adjustment of her sustaining capacity was so delicate that a single sea, which a more buoyant vessel would easily have shaken from her decks, sent her to the bottom as suddenly as one of her own guns would have gone. Not a rocket was seen by the fleet; not a gun was heard, and until we receive the story of the survivors we can know nothing of the fearful scenes which must have occurred on the deck of the sinking ship.—*Christian Union, Sept. 17.*

Our Sunday School Department for 1871.

We respectfully submit, for the consideration of all who are interested in the Sunday school work, the following statement of our plans for the year 1871:

I.—UNIFORM LESSONS, AND TEACHERS' MONTHLY.

Following the suggestions and advice of the Bishops in their quadrennial address, the General Conference, at its late session in Memphis, "recommended the adoption by our Sunday schools of the best system of uniform lessons that can be procured, and 'advised the publication, at the earliest practicable day, of a monthly journal adapted to teachers and the older classes of pupils.'"

To meet the spirit of these resolutions, and to supply what we believe to be an admitted want of our Sunday schools, we purpose to bring out, on the first day of December next, the January number of a monthly journal of thirty-two pages, octavo, at \$1 per annum. We do not know of any journal of the same size and character that is published at so low a price.

With the first number we begin the publication of a series of Uniform Lessons upon the Testimony of the Evangelists.

Our plan contemplates a two years' course upon the gospels; furnishing for each year forty-eight weekly lessons, and four lessons for quarterly review. These lessons will be prepared upon the basis of the most approved Harmony of the Gospels.

We do not propose to copy any of the systems that are now in use; we may learn from them all, finding in each, perhaps, something to adopt and something to avoid. We shall endeavor to profit by the failures, not less than by the successes of others. It is designed to make these lessons, in their expositions and illustrations, full enough to furnish all necessary assistance, but not so elaborate as to be tedious, or to relieve the necessity of application.

We reserve the liberty of varying our method of illustration according to the nature of the subject, knowing no reason why each Bible lesson should be developed under the same number of heads, or all our instructions should be run into the same mold.

Teachers and Bible students who do not see proper to adopt our series of lessons will nevertheless find this journal to be of great service to them. It will be the organ through which our wisest Sunday school workers may communicate the results of their studies and experience. Recognizing in the Sunday school a substitute for no scriptural form of Christian enterprise or usefulness, but gratefully accepting it as a providential and potent auxiliary to them all, we believe that this journal may be made interesting and useful to all who are laboring in this field.

It will discuss all practical questions that concern our Sunday school work; it will advocate no methods simply because they may be fashionable, or may have succeeded in other quarters; it will cling to nothing simply because it is old, nor be afraid of anything simply because it is new.

Our constant endeavor will be to ascertain the wants of our own schools, and, by the blessing of God, to supply them. The editor and his correspondents must keep in constant remembrance the apostolic injunction: "Prove all things; hold fast that which is good." Moreover, we hope to be sufficiently independent of our own conceptions of the whole subject of Sunday school work as to receive the benefit of future discoveries. We are to seek not merely what we believe to be good, but what shall be proved to be best.

To clubs of ten or more, sent to one address, we will furnish six Lesson Papers gratis, for each subscriber, monthly. Extra Lesson Papers, one cent each, or seventy-five cents per one hundred, monthly, or \$8 per one hundred, per annum. Lesson Papers, in packages of ten or more, can be ordered, at \$1 per one hundred monthly, without the journal.

We announce the publication of this teachers' journal, and of our series of lessons, with the utmost confidence, having received from every part of the church repeated assurances of a prompt and generous response.

II.—OUR LITTLE PEOPLE.

At the same time we begin the publication of a little paper, in such form that two pages may be distributed to the infant classes weekly

—printed in bold type and handsomely illustrated. It will contain, in addition to appropriate reading matter, such easy questions and answers upon the lessons of the day as may be adapted to this class, yet not so extensive as to prevent the profitable use of the catechism.

Our Little People will be published at the exceedingly low rate of \$10 per one hundred copies, per annum, giving to all that take ten copies, to one address, the benefit of the rate.

III.—THE SUNDAY SCHOOL VISITOR.

At the same time the Visitor will be issued in three forms—for monthly, for semi-monthly and for weekly distribution; furnishing for the monthly four pages per month, at \$12 50 per one hundred copies, per annum; for the semi-monthly, four pages twice a month, or eight in all, at \$25 per one hundred copies, per annum; for the weekly, sixteen pages per month, or four pages for each Sabbath, exclusive of fifth Sundays, at \$50 per one hundred copies, per annum. To encourage all classes, we will send as few as ten copies, to the same address, at these reduced rates: Single copies, monthly, for one year, twenty cents; single copies, semi-monthly, for one year, forty cents; single copies, weekly, for one year, seventy-five cents. Each number of the Visitor will be beautifully illustrated.

We contemplate varied improvements in the style and appearance of the Visitor, while the publication of Our Little People will allow us to raise its literary standard.

Surely every preacher, local and itinerant, and every Sunday school teacher, will co-operate with us in our earnest endeavor to supply the wants of our schools. Every teacher and Bible class student should subscribe for the monthly journal, and see to it that the Visitor or Our Little People is placed in the hands of every child of our church.

IV.—THE SUNDAY SCHOOL MUSIC BOOK we expect to issue during the month of December.

V.—NEW BOOKS.

We are glad to announce that during the next year we expect to make important and extensive additions to the catalogue of our own publications.

In the editorial supervision of these various departments the secretary hopes to be Methodist without being offensively sectarian.

ATTICUS G. HAYGOOD,
Sunday School Secretary.
A. H. REDFERN, Agent.
NASHVILLE, Sept. 13, 1870.

Proceedings of the Missouri Conference.

AS FAR AS RECEIVED.

The Missouri Conference of the Methodist Episcopal Church South commenced its fifty-fourth annual session in the Presbyterian church, in Columbia, Boone county, Missouri, September 14, 1870, at nine o'clock A. M., Bishop McTear presiding; Bishop Marvin also present.

The session was opened with religious service conducted by the Bishops present.

Heretofore the annual sessions have been numbered in the secretary's minutes from the organization of the Methodist Episcopal Church South, in 1845; this, according to that numbering, being the "twenty-fifth" session; whereas the Missouri Conference of the Methodist Episcopal Church was organized in 1816. On motion of P. M. Pinckard, it was resolved that this session, and all future sessions of this Conference, shall be numbered from the original organization in 1816—this session being the fifty-fourth instead of the twenty-fifth session.

The action of the General Conference giving the Board of Bishops what has been called the veto power, which provides that when the Bishops present objections to any rule or regulation of the General Conference it shall require a two-thirds vote of that body to pass it over the Bishops' objections, and which was referred to the Annual Conferences for approval, was presented to the Conference for its action. The action of the General Conference was approved by a unanimous vote of this Conference.

The examination of character began with Andrew Monroe, the patriarch of the Conference, presiding elder of the St. Charles district.

Father Monroe said he had been fifty-five years a traveling preacher, and forty-six years in Missouri; and in all that time had never been absent from his work more than ten weeks in succession, except when at a General or Annual Conference.

He proposed now, in his old age, to ask the privilege of a few weeks' absence from the work that might be assigned him. He has two venerable brothers in the ministry, both older than himself. They live in the East, and are anxious he should visit them. He is equally as anxious to see them, and hoped to be able to do so, if he can raise the funds to defray the expenses of the journey.

Horace Brown and Thomas Hunt were continued in the supernumerary relation. Brother Brown is one of the fathers of the Conference, having been fifty-one years a minister of the gospel.

Dr. Leftwich presented a paper from the curators of Central College, at Watrous, which was referred to the Committee on Education. The report states that the college will be opened on Thursday, the twenty-second instant, on which occasion Bishop McTear will deliver an address. It announces that the agent has completed the \$100,000 endowment fund, and has received bonds for the same. The completion of the fund and approaching opening of the college are a grand consummation of an anxious desire cherished by the friends of male education in the two Conferences of Missouri. The friends of the college in both Conferences are invited to be present at the approaching opening on the twenty-second.

FIVE PER CENT.

A resolution of the Conference, of some years' standing, requires the preachers to collect and pay into the Conference treasury, for the benefit of the widows and orphans of deceased preachers and needy supernumeraries, five per cent. on their salaries. The Board of Finance has had the import of this resolution referred to them, and to-day made a report which was adopted. The report requires presiding elders, agents and school teachers to pay five per cent. on the net proceeds derived from their calling—less house, rent and traveling expenses. All who are prospective beneficiaries on this fund are expected to pay the per centum assigned.

On Saturday night the missionary anniversary meeting was held in the Presbyterian church, W. M. Leftwich presiding; J. P. Nolan, the secretary of the society, read his report, detailing the operations of the missionaries in the bounds of the Conference as reported to him.

P. M. Pinckard, the treasurer, read his report, presenting the payments for missions by circuits and stations, but which we are not able thus to present at this time. The sum total of money paid is about \$3,400.

Dr. A. G. Haygood, of Nashville, addressed the assembly in a very appropriate speech, which was well received by the audience. He was followed by an appeal from Bishop Marvin for money. The collection amounted to \$437; \$275 of the amount was given by five persons, viz: W. M. Rush, \$50; W. G. Miller, \$50; W. A. Maylow, \$50; S. W. Cope, \$50; W. M. Sharp and wife, of Concord, Callaway county, \$75.—*St. Louis Christian Advocate, September 24.*

IMPORTANT NEWSPAPER CHANGE.—The Hearth and Home, a finely illustrated family journal of a high character, hitherto issued by Messrs. Pettengill, Bates & Co., has been purchased by Messrs. Orange Judd & Co., of 245 Broadway, New York, the well known publishers of the American Agriculturist. Messrs. S. M. Pettengill & Co., whose great advertising agency, established in 1849, is one of the largest and most reputable in the world, find that their extensive business requires their exclusive attention, and they therefore transfer Hearth and Home to the new publishers, whose long experience and abundant facilities will enable them not only to maintain the past high character of the paper, but to add materially to its value. The new publishers also announce a reduction of the terms to \$3 per year. The change will not at all affect the American Agriculturist, which will continue on independently as heretofore. The illustrations and reading matter of the two journals will be entirely different. Either of the journals will be furnished from now to the end of 1871 (fifteen months) at the yearly subscription rate, viz: the weekly Hearth and Home at \$3; the monthly American Agriculturist, \$1 50; or the two for \$4.

There is no truth more important and few less thought of than this: the more we forsake simplicity in anything, the more we multiply the means of corruption and error.

The Christian Advocate.

SATURDAY, OCTOBER 1, 1870.

STAND LIKE THE ANVIL.

The following lines by Bishop Doane, suggested by the immortal words of Ignatius' message to Polycarp, are as remarkable for their force and tenderness as for the noble spirit of endurance which breathes in every line.

"Stand like the anvil" when the stroke Of stalwart men falls fierce and fast; Storms but more deeply root the oak Whose brawny arms embrace the blast.

"Stand like the anvil" when the sparks Fly far and wide, a fiery shower; Virtue and truth must still be marks Where malice proves its want of power.

"Stand like the anvil" when the bar Lies red and glowing on its breast; Duty shall be life's leading star, And conscious innocence its rest.

"Stand like the anvil" noise and heat Are born of earth and die with time; The soul, like God, its source and seat, Is solemn, still, serene, sublime.

LETTER FROM CHINA.

SHANGHAI, CHINA, Aug. 9, 1870.

MR. EDITOR: When we look around us and see the dense multitudes of human beings "wholly given to idolatry," like Paul, our spirits are stirred within us, and we earnestly desire to see them brought to a "knowledge of the truth as it is in Jesus." When, oh! when shall the blessed promise be fulfilled when "the idols shall be utterly abolished?" When shall the heathen be given to Christ the Lord? When, oh! when shall "the knowledge of the Lord fill the whole earth as the waters cover the sea?" When will the Lord "make bare his holy arm in the eyes of all the nations, and all the ends of the earth shall see the salvation of our God?"

In China, to some extent, the people are all idolaters. Some are admirers and worshippers of Confucius, and pretend to abide by his teachings. They are the Pharisees of China. Others embrace the Taoist religion, while others are worshippers of Buddha. But there are many who lay hold of the three and try to embrace them all. In case of mourning for the dead, Buddhist priests may be called in to-day to pray for the soul of the deceased, and to-morrow the Taoist priests may be called in for the same purpose. It is, indeed, often the case that they are both called in together to repeat their different formulas for the soul of the deceased member of a family. There is, no doubt, in the minds of many a consciousness of some defect in all these systems of religion, and thus they attempt to grasp the whole and worship all the gods, in order to be sure and get the favor of the right one and escape his anathema. No doubt it has been the case with some who have embraced the Christian religion—for their minds are dark and full of superstition—hoping thereby to embrace the right faith, and add the Christian God to their innumerable gods, and thus appease his wrath, with a hope that in the end if the faith in one god failed them, faith in another might save them. They often ask what they must do to believe in Jesus. They are willing to do anything you tell them, except give up their sins. They are willing to repeat prayers, go through with any number of ceremonies, but when they are exhorted to give up their idols and forsake all their sins they turn away from you, for they are loth to give up their idols and their beloved sins.

There are thousands of the heathen who embrace the three religions of China and have added to them many superstitious ideas of their own. The true nature of sin is not understood by the heathen. They look upon it as a violation of the laws of etiquette or a transgression against their fellow-men, and that a remission of this can be easily obtained by flattery or offering a bribe to their gods, and that this can be as easily obtained as the forgiveness of any crime against the laws of their country by bribing those in authority. Even those who commit outrageous acts of violence on their fellow-men frequent these temples and present their prayers and their offerings to the gods, imploring their protection and their blessing in their commission of crime. The offerings which they

bring are not to atone for their sins, but to insure them protection while engaged in their unhallowed work.

Now, Christian friends, we have a noble work and a glorious work to perform—and, thank God, it is his work—the conversion of heathen China. Is there sufficient sympathy among our churches at home for the missionary engaged in the most difficult field among the heathen? Some seem to think that because the board has the immediate charge and supervision of the mission and his work, they (the churches) have no immediate interest in him or his work, as he is in good hands. Just as sure as that close union of the missionary and the churches be removed, then the sympathy which was formerly felt is removed, and the cause suffers thereby. The board can accomplish but little without the aid of all the churches. We would be glad to know that the churches felt that they were identified with us in this great work. We are sure that they have a great and a good work to do at home, and we do not expect much time or money or sympathy where it militates against the home work. How many hundreds and thousands at home who could now and then send us a line of encouragement! A few lines expressive of their sympathy for us and the work, assuring us of their hearty co-operation and of their prayers, would greatly encourage us in this glorious work.

My Christian friends, we want more of the spirit of our blessed Lord and Master. We want an outpouring of the Holy Spirit of God. We want more earnest and faithful prayer to God, who is able to cause these dry bones to live. How many dear Christians pray for us as messengers of the gospel to the heathen? How many pray for these native converts, that they may be faithful? I know there are many who do. This encourages us to preach on, to pray in faith and to labor in hope. We want your prayers, and we need them, that the Lord may abundantly bless the work. We want your co-operation and your aid, and by the blessing of God the work will go on, and souls shall be converted to him.

J. W. LAMBETH.

To the Eastern Preachers of the Alabama Conference.

DEAR BRETHREN: You have all doubtless read Dr. Hamilton's communication to us in the New Orleans Advocate of the seventeenth instant. The doctor takes for granted that unless we adopt the plan to raise the Conference collection proposed by the resolution of the Mobile Conference, alluded to by him, we will be sadly behind our western brethren in this service; in which event he foresees serious complications in the division of the fund. For one, I have grave objections to the plan proposed—that of holding each preacher responsible for eight per cent., or any per cent. whatever, on the amount of salary he receives. I am satisfied that if we work our present plan the doctor's fears will not be realized.

One objection I have to the plan proposed is, that it will injure, instead of benefit, our collection. According to the statistics of 1868, that portion of the Montgomery Conference now included in the Alabama Conference raised for Conference collection a little over eight per cent. on the salaries of the preachers. Last year's statistics are not before me; but the same portion of the Montgomery Conference raised thirty-two per cent. more than it did the previous year, which must have been considerably over eight per cent. on preachers' salaries. This year I know one pastoral charge in which the assessment for Conference collection is twelve per cent. on assessed salary, and I think it will be raised. Many others will range as high; few as low as eight per cent. Now, brethren, let us not stop at eight per cent. on our salaries. Let us raise our assessments. Do this, and no complications will arise in dividing the fund from our neglect. In the meantime let every one be sure to carry up to Conference the amount assessed for the Bishop.

T. S. SMITH.

AN EDUCATED MINISTRY.

MR. EDITOR: I am constrained to write a few lines on this very important subject, of an educated ministry, as there seems to me to be too little importance attached to it. None but those who have been unfortunate in an early training for the ministry can, by possibility, appreciate the great want of a thorough preparation for the high and the responsible functions of the office of a minister in the church of God. And I am fully satisfied, just at this time, that of all the subjects that is worthy the attention and serious consideration of the Methodist Church, this subject is of the most vital importance to her life and future usefulness.

The "former days" are numbered, when it was thought if a man had "ciphered" to the "single rule of three," and learned "geography" to tell that the capital of his country was somewhere on the face of the globe, that he could preach, for he was unmistakably an educated man. No, sir, the times and the people have changed. The cry is now coming up from all quarters for an educated ministry; and the time is coming when none others will be heard. Therefore this subject appears to the Methodist Church South with an interest never, no never before seen and felt, and she must take right hold of it as it presents itself, and go to work—devising means and providing ample resources for its accomplishment, or, be it said, greatly criminal in its neglect. We are considerably behind other churches in this glorious enterprise. I will only instance what our Baptist brethren have done, and I suppose are still doing, in the way of educating young men for the ministry. They, at one of their annual associations, appointed a committee on ministerial education, and at once they went to work. They employed an agent to travel and collect money for this noble, praiseworthy object. As soon as a sufficient amount of money was raised to maintain a young man, he was at once sent to Clinton College. This agent raised enough to support two young men in a little time. He continued his labors until, from the report last fall, he had collected nearly \$2,500, and had six or seven young men in that institution, all of them licentiates and young men of considerable promise.

It is true that we have a Ministerial Educational Association, "so called," with its officers and managers and a constitution. And it is a notorious fact that we had lengthy, able speeches at Conference on the subject, and a resolution adopted by the Conference making it the duty of the presiding elders of the several districts in the bounds of this Conference to urge upon their congregations to organize district, station and circuit societies auxiliary to the parent association of the Mississippi Annual Conference. All this, I know, was done; at least it was said it must be done. But what are the facts in the case—what has been done? But little—but little. All these things look fine on paper, and sound well from home. But, sir, we want something more practical.

There are young men, plenty of them, who are called of God to preach, and men of the very first grade of talent, if cultivated and brought out properly. But they are poor and unable to fit themselves for the work, and if the church is wanting in that enlarged liberality which, I am sorry to have to say, has always characterized her, and does nothing for them, and just lets them go, they will enter that church that will render them the necessary aid, and be lost to us. There is one young man I know of now who is seeking aid from the church in order to fit himself for the ministry; and if he is taken up and helped through he will make a workman approved of God, a blessing to the church and an honor to the profession. He informed me that he had made frequent applications to ministers of this Conference, asking them to inquire into the matter, and ascertain whether he could obtain any assistance from the church, and they invariably put him off—giving

him no encouragement at all. I also learned that three very promising young men were lost to us by the very same treatment. They were bid for—the help they needed was promised by another church, and they went to it. I do sincerely hope the church will wake up to the great and incalculable importance that at this moment attaches to this subject, and at once set to work to educate young men, so that our work may not suffer for lack of useful, efficient laborers in the vineyard of the Lord. It is the imperative duty of the church to do this, and to do it at once. There are a thousand and one gross errors in the land that must be met and refuted, which are openly and defiantly opposing the truth. How can the church meet and defeat those hydra-headed monstrosities, Romanism, Ritualism and many other sources of infidelity, that are spreading over the country and threatening the peace and purity of the church, unless her ministry be thoroughly educated? I use these terms purposely. I look upon the Methodist Church South as the only church in the world that can successfully combat these enemies to true religion, and defeat them. She not only has the true element in her to make her successful, but she has the ability to succeed if she can be made to see it. But to do this she must educate her ministry. We therefore earnestly recommend to the church, and do most sincerely urge her to pray constantly, unceasingly to almighty God that he may send more laborers into the field; and to look out and hunt up young men who are called to the work of the ministry, and encourage them by aiding them in their efforts to be useful, and sending them to some of our colleges, and then supporting them while they are there. God will bless you in the work.

And, my dear brethren, there is another class of men I must speak a word for. They are those men who were denied a liberal education when they began to preach the gospel. There were no ministerial educational associations then, and, being poor, were unable to educate themselves. They would or could educate themselves in the ministry, now they are in it, but they are still poor—too poor to buy books. Look after all such, and examine their libraries, and when they are lacking furnish them. Any station or circuit could, if they would, purchase a library for their preacher, and thereby save him considerable expense in purchasing books, and also in having to ship them from place to place. I know men now who can never be the men they might have been for the want of books—yes, books—the right kind of books. I do sincerely hope this will meet the eye of some liberal, generous soul—one who will set this ball in motion—and then we shall soon see our preachers supplied with books. And the result will be an educated ministry.

JULIUS T. C.

MISSISSIPPI SPRINGS, Sept. 16, 1870.

NEWS FROM THE CHURCHES.

NEAR PHOENIX P. O., Sept. 16, 1870.

MR. EDITOR: I have returned from a three days' meeting held by Brother Dilly at Kelley's school house, on Mount Olivet circuit. I organized a society of fourteen members. Others will join in that vicinity. The congregation was large. On Sabbath twenty-five or thirty knelt for prayers. Our old and venerable brother's silvery locks and beard seemed to fill the place with dignity, and demanded respect. May his good instructions be like bread-cast on the waters, and be gathered many days hence. May he live forever. My district (colored) is doing better than I could expect.

J. S. HARRIS.

CASTOR CT., LOUISIANA CONFERENCE, September 15, 1870.

MR. EDITOR: This circuit, until the last of June, was without a pastor. At our second quarterly meeting Brother Armstrong directed Brother Mullock to take charge of this in connection with the Louisville circuit. Brother M found the religious interest of the circuit anything but encouraging, but he entered the field "with a will," and (thank God, we are now enjoying

refreshing seasons at all the appointments, such as it has scarcely ever been my privilege to witness. At one of these meetings, which has just closed, the presence of God was powerfully felt. One night of the meeting every sinner in the house came forward seeking salvation, and when the opportunity was offered every soul in the house, not already a member, joined the church, and such a "shout in the camp" I have never witnessed. To God be all the glory.

J. W. HEARN.

MT. CARMEL, MISS., Sept. 20, 1870.

MR. EDITOR: We have just closed a most interesting meeting at Santee church, on Mount Carmel circuit, Mount Carmel district, Mississippi Conference. It began on the tenth and closed on the fifteenth of September. The congregation was large and attentive from day to day while the meeting lasted. On Tuesday, the fourth day of the meeting, the good Lord was present in unusual power. The whole congregation felt, and the hardest of cases wept freely. When the word was given for seekers to come to the altar there was a powerful rush to it, and many were converted. Several of the oldest Christians acknowledged that it was the most powerful manifestation of the presence and power of the Spirit of God they had ever witnessed. There were added to the church seventeen whites and ten blacks. Eternity alone will reveal the good that was accomplished during the meeting. Brother Weems, the presiding elder, labored very zealously during the meeting.

H. P. L.

CURA CT., MOBILE CONFERENCE, September 20, 1870.

MR. EDITOR: Perhaps you are aware that the Cuba circuit was admitted into the Conference last year, and was left to be supplied by myself. As our former worthy presiding elder, S. H. Cox, thought it was my child, I ought to take care of it. And by the help of the good Lord we have tried to do our duty. I have just closed the third protracted meeting, held at Reed's chapel, assisted by Brothers Wingfield, Brogan and McBride, son of the Rev. A. McBride, long a member of the old Alabama Conference, and of precious memory to many now living. May the mantle of the father, now gone to his reward, fall upon the son.

Our worthy presiding elder was hindered from being with us at our quarterly meeting on account of sickness in his family. We turned presiding elder, according to the provisions of the Discipline, went through the duties of conference, and protracted the meeting. It was indeed a precious season of "refreshing from the presence of the Lord," and, my brother, if you had been there you would have been forcibly reminded of the days of primitive Methodism. It reminded me of the days of my childhood, when people were not ashamed or afraid to shout "Hallelujah to the Lord." I have been at protracted meetings where there were more accessions to the church, but a marked characteristic of our meetings has been that the Lord was with his people in much power to bless.

There seems to be a good leaven at work among the people of my charge. May the Lord bless us more abundantly. Your brother in Christ, GEORGE BANCROFT.

THE BIBLICAL BEHEMOTH alluded to in the fortieth chapter of Job has found an intelligent exponent in the celebrated Barzilia of Trieste, the learned and well known exegetist of the Hebrew Bible text. He says that translators do not alter the word from Hebrew because they see in it an etymological allusion to the great size of the animal. But he seeks to prove that Behemoth is nothing else than the antediluvian Mammoth, and asserts that B. and M., as Indians, are frequently interchanged, and that thus our modern word has arisen. He contends also that the description which Job gives of the animal accords in all respects with the fossil remains of the Mammoth as found in various parts of the world. Proceeding from the view that the author of Job only knew the Behemoth in its fossil state, Barzilia finds in this fortieth chapter of Job an exceedingly interesting and significant description of the great fossil Mammoth.

VICKSBURG DIST. CONFERENCE.

MR. EDITOR: This Conference held its session at Port Gibson, commencing September 7, and ending on the tenth. As suggested by the Discipline, prominence was given to religious exercises, which continued until after the Sabbath, and included a love-feast and sacrament on Sunday morning. The conference was presided over by the presiding elder, Rev. J. A. B. Jones. We had the promise of Bishop Keener, but his numerous engagements were such that he could not attend, which was greatly regretted by the people. The various subjects laid down for the organization of District Conferences in the new Discipline were taken up and discussed. Much information was elicited from the various churches (which were nearly all represented) upon the various enterprises of our denomination within the bounds of the district. Several of the churches reported revivals, and much interest manifested by others. Under the inquiry about missions, the Rev. W. E. M. Linfield, from Vicksburg station, offered the following resolution, which was adopted:

Resolved, That the Missionary Society of the Mississippi Annual Conference be requested to consider the expediency of establishing a German mission in the city of Vicksburg.

During the discussion of this resolution Brother Linfield gave the conference the present condition of the German population of that city, and the pressing necessity for Protestantism seizing the opportunity of preaching the true faith to them.

The Sunday school cause was fully and elaborately discussed, and exhibited an increased interest.

When the subject of education was presented, it was made known that the Port Gibson Collegiate Academy property had been transferred to the Mississippi Annual Conference, and is now the property of the church. Thereupon the following resolutions were offered and adopted:

Whereas, There is within the bounds of this district no decidedly Methodist school besides the Port Gibson Collegiate Academy to divide the affections or patronage of our Methodist community; therefore,

Resolved, That the members of this Conference feel themselves altogether free to recommend this school, and to give it their personal patronage and unembarrassed support. Resolved, That in view of the advantage of well conducted schools as accessories to the gospel in building up the church, that it will be to the interest of the church in this district to build up, support and secure the permanent establishment and greatest possible usefulness of the Port Gibson Collegiate Academy.

Resolved, That the presiding elder of this district be and he is hereby requested to appoint a visiting committee, who shall attend the annual examination of said institution, and report their visit to this conference at its next session.

W. E. M. LINFIELD.

The financial system was discussed, but no new plans were adopted. We are in hopes that if the system adopted in 1868 is carried out faithfully it will fully accomplish the end designed.

Full inquiry was made with regard to church property, and some suggestions made, which, it is to be hoped, will be carried out.

Utica, in Hinds county, was selected as the next place of meeting—to be fixed by the presiding elder.

The following brethren were elected lay delegates to the next session of the Annual Conference: R. D. Howe, S. L. Guico, E. S. Drake and Thomas Reed. Alternates: Rev. G. C. Armstrong, W. J. Lum, Hayman Foote, Thomas Hackett and D. J. Remor.

We left a very interesting revival progressing, which we hope may be successful.

THOS. REED, Sec'y.

A YOUNG GENTLEMAN sent seventy-five cents to New York recently for a method of writing without pen or ink. He received the following inscription, in large type, on a card: "Write with a pencil."

Is my expiring number the editor of a paper in an Indiana town writes: "It needs but a few words to explain the situation. Cambridge saw me a stranger; I was taken in and done for. Farewell!"

The Christian Advocate.

SATURDAY, OCTOBER 1, 1870.

WOMAN'S PLACE AND POWERS.

BY A WOMAN.

Even in the great variety and vagueness of opinion which floats around the whole subject of woman's place and powers, we may recognize something like the mist before the dawn. Chaos must precede Cosmos; and they who are puzzled by the chaotic state of this and other social questions only find a difficulty because they do not perceive a power higher than their own at work; because they imagine that on our judgment and our efforts alone it depends to bring light out of darkness. The confusion is inevitable. The cream must thicken, and become for a time a useless fluid, neither one thing nor another, before the butter can appear, and the buttermilk be removed; and the liquid must boil and bubble in the pot before the scum can be cleared away and the good liquor obtained. When designing mothers, and fast girls, and sanctified dressed matrons, and unbalanced clever women, have all been scummed away, what will the "coming woman" be? There is a deep truth, besides the one I have indicated, underlying all this incoherence and contradiction. The woman-worship of the Catholics, the mariolatry of the Romish Church, finding its way in clouds of incense and glorious music into our own, and the agitation for woman's rights, are all branches of the same tree; evidences of the growth of that half of human nature, which has hitherto remained in abeyance, till the intellect, its inseparable comrade, should have gained strength and maturity; and man should turn and hold out a hand to his seemingly weaker half—only outwardly and seemingly weaker, for the true and peculiar power of a woman is still undeveloped, and is hardly as yet suspected. The Buckle of the next age will study this element, and write its history as a strong feature and agency in the world's progress, for the Buckle of the next age will have found out that it is not intellect alone which shapes the course of things. And this other principle, the existence of which is only just recognized under the indefinite name of the feminine element, will be understood and brought out to the full light, not only as supplementing man's intellect, but as that without which intellect has only half its power. The two united represent, in their earthly form, the word and the wisdom of old philosophy. They have existed together in all times, in both sexes; but intellect, coming first in the order of natural growth, is in advance of its companion. The later-growing element is gaining strength in man, just as the developing intellect in woman gives strength to her own special characteristic. It is not now held to be a matter of course that boys to be manly, must be cruel and unrefined; and if women are becoming generally more intellectual than they used to be, men, taken collectively, are more sympathetic and humane.

Another consideration may help us to find out where we women stand as to our past and future, and why this excitement and confusion prevail with reference to ourselves. Every moral and social growth has its two periods, corresponding to law and gospel. In the first period, when evil is seen and recognized, measures of repression are tried, and the offender is condemned and punished, in the belief that the mischief may be crushed out. When this method has been tried, and has failed, comes the gospel age; a new life is introduced, the old errors pass away, and evil is overcome with good. The healing art is now undergoing this change. The old blisters and bleedings and repressive measures are but sparingly used; gentler methods are tried and found effectual, and as time goes on even those remedies which are wanted now will be dispensed with, and sanitary measures will take their place. Then we shall give our children health instead of physic; them for sickness; the gospel time of medicine will have come, for the Great Healer will be with us all.

It is the same with law. At present all is punishment; and time and money are lost in fruitless efforts to repress crime. But this will not always be so, for everywhere the old wall of prejudice is giving way, and the sunlight comes in, showing people how much better work schools do than prisons. School work is done in a crude, imperfect way as yet, for we are only groping our way to a real education, and head-work has more than its fair share in the business.

It is just because law and medicine are in their present condition that I don't believe either of them offer a perfectly fitting field for woman's work. Perhaps the fact of a few women being successful in medicine may indicate the transition state of that science. It is quite

certain that a criminal law court can be no place for a woman. Law as it relates to property is another matter, and there does not seem to be any reason why a woman should not be a conveyancer if she likes it. But if I have formed a true guess as to our place in creation, our time for being lawyers and doctors is not fully come.

We ourselves are passing through our Mosiac dispensation, and our gospel time is at hand. We have been well found fault with on all hands, and scourged by clever reviewers till we feel ashamed of ourselves and of what we are said to be. But we may look up a little, for man, not our hard master, but our kind helper, is holding out his hand to us, and offering to share with us all his intellectual wealth. Surely with all this scolding, and scourging, and teaching, all monstrosities in the shape of women will be got rid of, and the rod may be thrown away.

Then will our gospel time come, and we shall be under our own only Master, whose law of love will alone and effectually develop our hidden grace and strength, and fit us to form one-half of human nature in its completeness.—Good Words.

INFALLIBILITY IN TROUBLE.

The infallibility dogma has elicited an opposition so serious and widespread that it seems scarcely possible that a grave schism can be averted by any expedient short of the abandonment of the scheme to which the council is indeed morally pledged, but whose consummation is incomplete until the signatures of the bishops have been affixed. From every quarter come protests as emphatic as it is possible to make them. Close upon Austria's abrogation of the Concordat—the momentous consequences of which we lately explained—came the conference of the Bavarian bishops at Fuld, which last week temporarily adjourned after having, as the cable dispatch states, "unanimously resolved never to submit to the action of the Ecumenical Council on the infallibility question." From North Germany we were told last week that Dr. H. Eberst, the Prince Archbishop of Breslau, is about to resign his office in consequence of the promulgation of the dogma; and from Great Britain that Father Sheffield, chief of the Dominican order in England, is reported to have resigned his office because of his objections to it. As to the views of the theologians whose opinions carry most weight, we have already announced that the non-theological faculties at Munich have published a protest against the infallibility dogma, and that the theological faculty is preparing to follow their example. It now appears that Würtemberg follows the lead of Bavaria, and that the faculty of Tübingen, in a meeting held last week at Nurnberg, "resolved to protest formally against the doctrine of absolute spiritual power and papal infallibility." Dr. Haas, a prominent Catholic theologian, and brother-in-law of Bishop Hefele, of Gottenburg, known as the most learned bishop of the Catholic world, has also published an earnest protest against the council of the council. Dr. Dollinger—who has long been known as one of the staunchest and most learned theologians in Bavaria, the most strongly Catholic State in Europe, yet has received the public thanks of the King for his effective opposition to papal encroachments—is now reported by the German and English papers to have been in conference with the Anglican Canon Liddon upon a basis for the intercommunion of their respective churches. In Hungary a general schism of the kind seems on the point of accomplishment. Long ago the Hungarian government decided on taking a decided attitude of condemnation toward any infallibilist bishops from that country, threatening them with the loss of their temporalities in case they should resign themselves to the schemes of the Jesuits. Now there is a general popular movement for the establishment of a Free Church, a movement headed by many eminent men, among them Prof. Schwicker, who has written a pamphlet, setting forth the reasons for such a decided step toward religious freedom. A similar movement in Spain we described last week, and we have now only to add that it has taken the strenuous form of shooting the priests. The attitude of the government is no less significant than that of the people. Bavaria and Spain, through their ministers, issued cautions in advance against the precise measures which the council subsequently took; France counseled her bishops to moderation; Russia insured it by the summary mode of restraining her bishops from attending the council at all; and, on several subsequent occasions, the French, Spanish, Prussian and Austrian governments, through their representatives at the Court of Rome, have repeated their warnings in significant terms. Lastly, Austria has declared the dissolution of all

arrangements between herself and Rome; and Italy, having no longer any possible fear of France before her eyes, may even take part with her republicans, certainly cannot withstand them, in ejecting the papacy from Rome. The new dogma is likely to remain unproclaimed. No bishop as yet has been called upon to publish any papal decree on the subject in his diocese, and it is doubtful whether the Pope will venture that length. No Roman Catholic state in Europe will sanction such publication, and it is likely that only in England and America can his decrees be published to his own children with impunity.—Christian Union.

THE CREED OF PIUS THE NINTH.

If Pius the Ninth is personally infallible, every other Pope before and after his time has been and will be infallible, for the decree confers the attribute on the Popes generally, and does not limit it to the present holy father and his successors. * * Let us fill in this sketch for the benefit of the Romanists of the future.

Innocent the First and Gelasius the First declared that it was so indispensable for infidels to receive the holy communion, that those babes who die uncommunicated go straight to hell. Pius the Fourth confirmed the decrees of the Council of Trent which anathematized this doctrine. Gregory the Seventh and Urban the Second declared that ordination performed by a simoniacal bishop is invalid. Celestine the Third decreed that if a husband or wife became a heretic the marriage bond was dissolved. Hadrian the Sixth pronounced Celestine a heretic for having thus decided. The Capernate doctrine of the blessed sacrament, rejected by the whole church, was affirmed by Nicholas the Second. Innocent the Third informed the church that all Christians were required to obey all the regulations of the Book of Deuteronomy. John the Twenty-Second condemned the teaching of the Fraticelli as heretical, and delivered the unfortunate brethren over to the Inquisition. Sixtus the Fourth reversed the decision of John the Twenty-Second, and pronounced these heretics to be orthodox. Eugenius the Fourth, in a decree issued to the Armenians in 1439, expounded the dogmas of the Western Church in such wise that he made the outward formula and matter of certain sacraments to consist of that which made the sacraments of confirmation, penance and ordination invalid in the first centuries of the church.

Honorius the Third (in 1220), Innocent the Fourth (in 1243), Alexander the Fourth (in 1253), Urban the Fourth (in 1262), and Clement the Fourth (in 1265), decreed heresy to be a public crime, worse than treason; and ordered all heretics, without appeal or possibility of pardon, to be burnt alive, their goods to be confiscated and never to be restored to their families. Persons suspected of heresy, unless they could clear themselves within a year, were to be put to death. Repentant heretics to be imprisoned for life; if they relapsed, to be killed. When, in 1486, the magistrates of Brisen refused to burn heretics, they were excommunicated by Innocent the Eighth. In 1520 Leo the Tenth formally condemned as heretical the proposition—"That it is against the will of the Holy Ghost to burn heretics alive." Pius the Fifth condemned the practice of lending money on interest. Sixtus the Fifth issued his bull *De debellis* against partnership in business whereby one of the partners lends capital and the other gives his activity, as a mortal sin. Galileo was condemned by the Congregation of the Index acting under papal authority and in the presence of the Pope, and it decreed, by order of Paul the Fifth, that to assert that the sun is in the center of the solar system is absurd, philosophically false and formally heretical; that to say that the earth revolves on its axis, and is not immovable in the center of the universe, is also absurd, philosophically false and erroneous in faith.

We are now able pretty well to fill in the outline of faith in the personal infallibility of the Pope, and to inform Romanists what are some of the articles of the creed to which they are called upon to subscribe. They must believe faithfully if they hope for salvation: (1) That children dying uncommunicated are undoubtedly damned; but also (2) that such a statement is heretical—i. e., that children dying uncommunicated are not undoubtedly damned. (3) That ordination performed by a simoniacal bishop is invalid; but also (4) that such an ordination is valid. (5) That heresy dissolves the marriage contract; but also (6) that heresy does not dissolve the marriage contract. (7) That in the blessed sacrament the body and blood of Christ are present visibly changed, and sensibly present to sight and scent and taste; but also (8) that the accidents remain unchanged—i. e., that Christ is not sensibly present to sight, scent and

taste. (9) That Christian men are bound by the ceremonial law of Moses contained in the Book of Deuteronomy; but also (10) that they are not bound by the ceremonial law of Moses. (11) That the teaching of the Fraticelli on voluntary poverty is heretical; but also (12) that it is strictly orthodox. (13) That in the first few centuries of the church three at least of the sacraments were invalid; but also (14) that they were valid. (15) That it is according to the will of the Holy Ghost that no man who disbelieves any one article of the creed has any fixed right to his life or property; that every Christian government should commit him to the flames; that children should be encouraged to denounce their parents if they suspect them of heresy; that the persons of heretics may be reduced to slavery, be bought and sold, and their slaves exempt from punishment. (16) That to give interest for the loan of money is mortal sin; and that the principle of partnership is also sinful. (17) That the sun moves round the world, and that the world does not revolve on its own axis, but is the center of the system, and that sun and planets wheel round it.

Verily, were it not that we commiserate the unfortunate Catholics abroad, we should be inclined to smile at the absurd position into which the Pope and the Curia have brought the faithful. Pius the Ninth seems to have accepted the adulation and homage of the Roman hierarchy crying to him like Ekebolius to the Emperor Julian: "Only trample us under your feet!" and to have answered: "I take you at your word the dust you love shall be your food."—Church Review, London.

RELIGIOUS INTELLIGENCE.

TWENTY-SEVEN German professors of law and medicine at Munich, Bavaria, have added their signatures to the protest of the theological faculty against the results of the Ecumenical Council.

IN A CERTAIN quarter of San Francisco, within a radius of seventeen hundred feet, there are, either finished or in process of erection, three Jewish synagogues, twelve Christian churches, and one Chinese joss-house.

CANON LIDDER, of London, lately had an interview with Prof. Dollinger, of Munich. The influence of the new papal dogma was discussed, and plans sketched for combined action between the German Catholics and the English Churchmen.

ALL RITE different bodies interested have appointed committees to meet in conference on the subject of an organic union between the different Presbyterian bodies in the Dominion of Canada, and it is believed that the result will be union at no distant period.

THE story that the Marquis of Bute had been reconverted to the Church of England by reading "Lothair" is probably untrue. He has been spending some days at the Bishop's house in Clifton, attending mass daily, and being particularly assiduous in his devotions.

THE Boston Theological Seminary, Methodist, opens its next session in the fine new building on Bromfield street. Besides the ordinary theological curriculum, it offers instruction in theological encyclopedia, missionary science, music, German, Rabbinical Hebrew, Samaritan, etc.

CALIFORNIA is about sending forth her first foreign missionary, in the person of Miss Julia Rappelye, a member of the First Congregational church in Oakland, and for several years a most popular and useful teacher in a young ladies' seminary there. She goes to Western Asia.

A MOVEMENT is announced in Hungary, headed by Prof. Schuckor, looking to the establishment of a Hungarian National Church, independent of Rome. The professor says, in a pamphlet, that it is the firm conviction of all Catholics in Hungary that such a church be organized.

AT A RECENT communion three Chinamen were admitted to the Congregational church in Oakland, California. This is said to be the first case in which Chinese converts, brought to Christ in California, have been received into full fellowship with any American church. They had first been taught in the Sabbath school.

THE Paris Missionary Society (laboring among the natives of South Africa, in Senegal and Tadjit) received last year \$12,978. The Berlin Missionary Society received sixty-seven thousand seven hundred and fifty-four thalers. Its missions seem to be all in South Africa, and have one thousand eight hundred and forty-nine communicants.

IS MR. GEORGE MULLER'S last report, he says that since the beginning of his work for orphans he has received £467,000, with which nearly nineteen thousand children have been taught in the schools, and buildings erected, at a cost of £115,000, to accommodate two thousand and

fifty orphans. During the past year one thousand eight hundred and eighty-five orphans have been cared for in the Ashley Downs Orphan Houses.

THE Michigan Sunday School Association have issued a circular announcing their plans for the current year. The State is divided into eleven districts, in each of which it is intended to hold during the year a Sunday school revival meeting. The association is not denominational, but labors for the good of the Sunday school cause in all parts of the State, and invites co-operation from all denominations.

FROM A cable dispatch it appears that a conference of Roman Catholic professors of theology has been held, and that it has unanimously protested against the doctrine. The Lord Chamberlain of the Bavarian Court (Count Morf) has left the Roman Catholic Church in consequence of the proclamation of papal infallibility; and others will, it is said, follow his example. It is reported that the papal Nuncio at Vienna will be recalled; but the rumor has not yet been confirmed.

WITH the money taken from monastic establishments in Italy and devoted to education, there have been founded thirty-three great model schools—ten in Sardinia, six in Lombardy, four in Emilia, two in the Marches and Umbria, two in Tuscany, and five in the Southern provinces. Since 1862 more than sixteen thousand elementary schools for boys and nine hundred for girls have been established in Italy. In these schools sixty thousand boys and thirty thousand girls are under instruction.

A WEEKLY church paper states that seven men who had gone over to Rome have returned to the Church of England, and last week partook of the communion in one of the London churches. The remarkable letter of Father Rodolph Snfield, with the sermon of Mr. Case at Clifton, and the well known attitude of Bishop Clifford, are all signs of a very formidable upheaval which the recent vote of the council threatens to bring upon English Roman Catholics, as well as upon those of France, Germany and Hungary.

OLDEST METHODIST IN THE WORLD. Rev. I. James, M. D., of Bustleton, has this honor. He is in his ninety-fourth year, being born January 28, 1777. He joined the Methodist society in 1790, eighty years ago. He was licensed to exhort in 1798; to preach in 1800; was ordained deacon by Bishop Asbury in 1806, and elder by Bishop Morris in 1849. He was baptized in 1785 by Rev. Thomas Vasey, shortly after the organization of the church. The year he joined the membership of the church was fifty-seven thousand six hundred and thirty-one, and the number of preachers two hundred and twenty-seven.

THERE is in connection with the Church of the Holy Communion, New York city, a home for aged females. There are now fourteen inmates enjoying its advantages. Each has a private apartment, containing a neat bed, a little chest, drawers, etc. Every effort is made to remove the appearance and discipline of an institution, and to establish in its stead the freedom and familiarity of a family. They are subject to but two rules: Visitors must leave at eight o'clock in the evening, and the inmates must give notice when they intend to be absent all night. The home was established a year ago, and is supported by the congregation of the church.

TRICHOPTER, in Leipzig, is as busy as ever with his revived codices. He is about to issue an appendix to his edition of the Sinaitic Codex, as well as to those of the Vatican and Alexandria. In this he will give some Old Testament fragments, discovered by the Russian Bishop Porphiri in old volumes of manuscripts of the Sinai convent, belonging to the first and fourth books of Moses. Also twenty pages copied from the Codex Vaticanus belonging to the New Testament, and a *fac simile* text of the two letters of Clement of Rome, from the Alexandrine Code in London; this latter is the only documentary source for this very important memorial of the apostolic fathers.

THERE are signs of progress in India. The Rajah of Jeypore employs a missionary to superintend his medical and educational departments. He supports a young lady from the "Women's Union Missionary Society" to teach the ladies of his palace and the girls of his capital. The Prince of Jamkhande marked his sense of the propriety of reform by sending one thousand rupees as a marriage gift to a couple in Bombay, the first instance of the reform marriage of a Bramin widow—an event which called forth the bitterest censure of the whole orthodox Bramin priesthood. The Maharajah of Kolapoor, an intelligent young man of twenty, has determined to visit England, and study its institutions before assuming the reins of government.

MONK'S PARADISE is the new name

just conferred by some wag on the busy little country of Belgium. The why and wherefore is found in the statistics of a recent census, which represent the country as nearly in the possession of religious corporations of various kinds. There are now over twelve hundred of these—every wealthy village has its order, and several cities number from thirty to forty of them. The property of these parasites is reckoned by millions, if, indeed, it is countable at all. These monks exert a vast influence over the population, especially in the rural districts, so that it is doubtful whether universal suffrage will there be a blessing. It will be remembered that the recent election was carried by the ultramontane party, and, with the above showing, it is no wonder.

REV. ROBERT MORFAT, who has just returned to England, has been a missionary in South Africa for fifty-four years. His great literary work has been the translation of the Bible into the Sechana language. The tribes with whom he has labored have been brought mainly under Christian influence. He says: "When I first went to Kurlman scarcely an individual could go beyond. Now they travel in safety to the Zambesi. The influence of Christianity in that country is now very great and constantly increasing. Our advanced station at the Matobele is in a very prosperous state, and I quite expect that the Matobele will become one day a great nation. They sternly obey their own laws; and I have noticed that when men of fixed principles become convinced of the great truths of Christianity they hold firmly to the faith, and their fidelity is not lightly to be shaken."

THE EASTERN CHURCH.—A majority of the Eastern Bishops who attended the Roman Council were decided opponents of infallibility to the last, and it is expected that the separation from Rome will now be general. The Pope steadily resisted all attempts made by the Turkish government to compromise matters with that part of the Armenian Church which had refused to acknowledge the authority of the Patriarch Hossoun. He also refused to repeal the bull *Reversurus*. This bull has been translated for the benefit of the Turkish government. As also the infallibility dogma has now been proclaimed, and there can be no appeal from the decisions of the Pope, the government refuses to acknowledge the new condition of things. The Armenian Church is by its authority restored to the rights and privileges it enjoyed before the promulgation of the bull *Reversurus*, and the Pope and Patriarch Hossoun are set at naught.

FROM Madagascar details are being received of the work done there last year. The wonderful growth appears from these returns of church membership:

	1870.	1869.	Year's gain.
Hearers.....	153,000	37,000	116,000
Communicants.....	10,516	7,000	3,516
Total.....	163,516	44,000	119,516

IN correction of the assertions that conformity to Christianity has been enforced by the government, one of the missionaries of the London Missionary Society states that he has "met with no instance in which coercion has been employed in the matter of religion." The same missionary reports of a native congregation under his own supervision, that its interest was such that during the year it made contributions amounting to £97, sent out twenty-one evangelists to labor among tribes still heathen, and increased the number of their dependent stations from fifteen to fifty-three.—Christian Union.

SOMETHING FOR EACH TO DO.—It is said that one year ago the Beach street Presbyterian church in Boston was struggling for existence, with a congregation of about one hundred, and a sum total of \$1,900 raised during the year. Since that two hundred and fifty members have been added; their house is crowded; \$8,000 have been raised for current expenses and a debt of \$30,000 paid; from four to six hundred are present at the prayer meetings. They think the change has been effected by giving each something to do in one of those departments of committee work: Relief, which renders material aid; care of sick; strangers, the "hand-shaking committee," domestic, to look after the working girls and hired men; music, to be responsible for the singing; sociable, to provide social entertainment; Sabbath school, to visit the sick and look after absentees; devotional, a prayer meeting committee; young women's devotional; and spiritual, to assist the pastor. All are expected to be employed. A superintendent directs the work of each committee, and the pastor looks to the superintendent and works through him.

THE long English rille consists of fifty-three parts, and passes in all through seven hundred and forty processes of manufacture. Each process is carefully checked, so that uniformity in every respect may result.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, OCTOBER 1, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.

Three Dollars per Annum, in Advance.

Address—REV. LINUS PARKER, 112 Camp

street, New Orleans, La.

Agents—All the members of the patronizing

Conferences.

CONFERENCE PUBLISHING COMMITTEE

FOR MONTHLY CONFERENCE:

REV. J. HAMILTON, D. D.

REV. A. H. MITCHELL, D. D.

REV. J. B. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.

REV. W. SHAPARD.

REV. J. B. COTTRELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.

REV. JAMES A. GODFREY.

REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.

REV. J. B. WALKER, D. D.

REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a POST OFFICE ORDER, DRAFT, or by EXPRESS. If this cannot be done, enclose the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

MONEY.

By way of gentle reminder we would say to those having funds for the ADVOCATE that this is the hardest season of the year financially, and that we need every available dollar to tide us over the present financial stringency. Small sums in many hands make a considerable aggregate. Don't wait till Conference, but remit at once by registered letter, post office money order or draft.

PERSONAL.

Bishop Keener left the city on the nineteenth ultimo for his tour of Conferences. We see from the following paragraph in the Western Methodist that he reached Memphis in safety, and left immediately for his field of labor.

Bishop Keener arrived in this city on Tuesday last, September 20, and left in the evening by steamer for Helena, where he intended to remain some days, including Sunday, and will of course preach several sermons during his sojourn. From Helena he goes by private conveyance to Mount Zion, the seat of the White River Conference, to begin September 28. Upon the adjournment of that body the Bishop's route will be in the direction of Clarksville, where the Arkansas Conference is appointed to meet, October 12.

Rev. R. J. Harp, after a few weeks' absence, returned to his post of duty last week. The Depository, under his management, has become a power in the Southwest, and is one of the finest book stores in New Orleans. Here, at 112 Camp street, our friends from the country, as well as those residing in the city, can obtain all of our church publications, besides the freshest and choicest literature of the day, and everything in the stationery line, from a lead pencil to a letter press. It behooves us to build up our publishing interests, and purchasers will find it to their interest to send their orders for school books, paper and standard works to Bro. Harp. He can probably sell at rates more reasonable than any establishment in the South. Our own publications are sold at the same rates as at Nashville.

Rev. C. F. Evans, of the Louisiana Conference, has been spending a few days with his friends in New Orleans. His work at Monroe, Louisiana, is in a prosperous condition, and he comes to obtain a plan and specifications for an elegant brick church which he is about to build at that place. This is to be the banner church edifice of the Conference, outside of the New Orleans district. What cannot a man of faith and energy accomplish?

DOCTRINES AND EXPERIENCES.

Nothing is more common than to institute comparisons between the present and the past in reference to doctrines and experiences. Of the former it may be that we do not preach and write as much as the fathers did; and that, as a consequence, the people are not as well instructed as in other days. Some of the leading doctrines of the gospel are seldom exhibited and discussed, and they are in danger of becoming practically obsolete in the minds of many. A contemporary not long since referred to "total depravity" as a *lost doctrine* which demands restatement and vindication. The venerable Dr. Lovick Pierce, in his review of the church and ministry in the first decade of the present century, contrasts the convictions and conversions of those times with our own. The present style of preaching is not pointedly doctrinal, nor does this kind of reading obtain to any great extent. In the South we are walking in "the old paths" more closely than in some other quarters, but there is room for improvement. The numerous and extensive revivals reported in our religious papers show that we have not lost our primitive power; but still it is well to keep the importance of doctrinal statements constantly in view. Let conviction for sin be expounded and defined, let total depravity be scripturally exhibited, and let justification and regeneration be insisted upon.

Religions experience is intimately connected with a right apprehension of the doctrines of the gospel. Defective views of the truth will almost inevitably lead to imperfect experiences. How can there be thorough repentance where deep and pungent conviction is wanting? And where repentance fails, how can we look for a conversion that can be trusted? Where faithful exhibitions of doctrinal truth are presented an elevated experience is sure to obtain. The operations of the Spirit are essential, but our own ministrations must be in harmony with his. If we expound and enforce the doctrine of original sin, the Spirit will be present in peculiar power to "reprove the world of sin;" and if we dwell upon the nature and necessity of the new birth, he will be there to renew the penitent heart. We need not split hairs about entire sanctification, nor trouble about the psychology and metaphysics of perfect love. It is enough to preach the Word and to hold up the promise that "the blood of Jesus Christ, his Son, cleanseth us from all sin." Under such statements the Spirit will lead believing souls to higher realizations of the cleansing blood. The lack of clear and powerful manifestations is, in a great measure, owing to the absence of this distinct and earnest exposition and application of evangelical doctrines.

In our comparisons, however, between the past and the present, some allowance must be made for differences in religious culture and moral conditions. A generation living in utter ignorance and neglect is certainly very far removed from one possessed of great religious privileges. The demonstrations in conversion are likely to be modified by the previous intelligence, manner of life and moral habits. In the profession of a child reared in a praying family, and blessed with Sunday school instruction, there may be none of those strong emotions which mark the conversion of a man who has grown up in ignorance and vice. There are thousands of people, mostly young people, received into the church every year, who have been praying and living uprightly all the time. In religious opinions, in the practice of many religious duties and in outward morals, no material change is possible. The transition with them to the complete assumption of the obligations of the Christian profession is neither so great nor so violent as in the case of others who have wandered far from virtue, and have broken away from all religious restraints. The contrast between the old and the new may be somewhat explained by these considerations: that the present is a time of early training and conversion, while in the first decade

the Sunday school was almost unknown.

It is not wise to set up any standard of physical phenomena in conversion, nor in the subsequent experience. To say that a man was powerfully converted is no more than saying that he was converted. The real power lies in the inward work of the Spirit; so that if a man is converted at all, he is powerfully converted. The proof of the power is more in the subsequent life than in present physical demonstrations. But God operates in his own way. In some the devil is cast out amid the most fearful throes and convulsions; and in others the divine kingdom breaks upon the soul as silently and sweetly as the morning dawn. A condition of things such as now obtains is liable, no doubt, to peculiar dangers. The theology of children glides into lax doctrinal views, unless carefully guarded. Our children are of the kingdom of heaven, but the doctrine of total depravity is true, notwithstanding. They are members of the visible church, but baptism is not regenerating. We must still insist upon pungent conviction for sin, deep repentance, the assured pardon of sin, the birth of the Spirit and the complete realization of the blood which "cleanseth us from all sin."

OUR LITERARY INSTITUTIONS.

On turning to the advertising columns of our ADVOCATE I find nearly a score of educational institutions advertised—some universities—and all with very full courses of study and able corps of instructors. This is an immense advance upon the olden time. In the early days of our church papers there were few notices of schools, but now there are more school notices than any other class.

At the beginning of the century our church was eminently and almost exclusively pioneer. Our fathers had to clear the forest, bridge the streams and drain the swamps. They had work enough without going extensively into school enterprises. But the pioneer condition, east of the Alleghanies and east of the Mississippi, has passed away. The pioneer column has advanced far west of the great river; indeed the column of Christian civilization is advancing from the shores of the Pacific eastward; so that the present century will see the end of pioneering in the present territorial limits of the Federal Union. The time was when our branch of the church was regarded as purely a pioneering organization—that we would fulfill our mission, pass away, and leave others to take permanent possession of the land. But those who thus thought, predicted, and possibly wished to succeed to the inheritance which the zeal and love of our fathers had won from the wilderness, have been precipitate and mistaken. In all the large cities, towns, villages and most populous neighborhoods we are well, numerously and permanently represented. Ours has not been a castiron system, incapable of adaptation to the needs of changing times. The subdivision of our work with the increasing density of the population, and the extension of our pastorate, enables our preachers to be "pastors" as well as "evangelists," and thus to exercise social influence and take a social hold upon the affections of the people not possible to the original conditions of our organization.

Here, now, our educational system comes into play as another phase of the pastorate, another instrumentality for making permanent the results of the past. It is an omen for good—a prophecy for extension and perpetuity—to see so many schools, possessing the best elements of intellectual and moral excellence, springing up all over the land. The church that trains the children in her schools will, as a rule, receive them into her communion. Rome—deep, subtle, sagacious Rome—well comprehends the power of education, and everywhere in these States, from ocean to ocean, she is founding schools, and gathering into them not only her own children, but, so far as she may, all

others. The numbers, wealth and zeal of Rome are formidable, and it well behooves all who believe that the Bible, the whole Bible, and nothing but the Bible is the religion of the Protestants, to bestir themselves. Let us as Methodists rejoice in our schools, heartily sustain them, and continually labor to extend them until they shall be fully adequate to the needs of our people. Let us labor and pray that the time may speedily come when every large congregation among us shall have a good school. W.

THE WORK IN ILLINOIS.

Bishop Marvin has recently attended a camp meeting in Illinois, and gives us his views of the prospect there. He sets the brethren a good example in all work, and among other things, to which the Bishop turned his hand, was soliciting subscribers for the Advocate circulating in that field. Here is a high and worthy example. What he says about reading the Discipline and other religious books should be carefully considered. An Advocate and a Discipline, besides the Bible and hymn book, are necessary. We are gratified to see a revival of interest in the religious literature of the day.

I must say that I was much pleased with what I saw in Illinois, as also with what I heard. There is steady and decided growth. Our people are well organized and confident. A large number of good churches have been built this year. The church is anchoring itself in the country with real estate. We have few more inviting or important fields than this in Illinois. We have taken possession of a vast domain without the expenditure of a dollar of missionary money. This healthy, vigorous growth from our borders outward is the sign of life and power.

They need more men in the Conference, not self-seeking men, but men who care for the flock more than the fleece. They need young men. The work is new, and in many places not able to bear a heavy charge. The fields are white, the laborers few. The faithful men who have been in this work deserve well of the church. They have felt themselves to be on the outside, beyond immediate and active intercourse with their brethren. Sometimes they have even suspected a want of sympathy. But God has been with them, and their brethren have felt a more lively interest in them than they themselves knew. There is no more important outpost than this which they occupy. They are already reaping the fruits of their toil, and their reward is on high.

I undertook to act as agent of the Advocate at this camp meeting, and though I did not get things, I satisfied myself that an active, interested agency would soon increase the subscription list a hundred per cent.—double it. No family has a complete Methodist outfit without the Advocate.

The matter of religious reading is not pressed among us as its importance demands. Young Christians must have solid Christian reading in order to the formation of a well developed and well poised character.

Can you imagine an intelligent man who has been in the church for many years and never read the Discipline? Alas! there are many such. I have been asked questions by just that class of men which betrayed almost total ignorance of the constitution and the polity of their church. They understand all about politics, but are uninformed as to the simple structure of their own church. Brethren, this ought not to be! In many Methodist houses I can find no Discipline. Let the preachers look to this matter. Soon after I joined the church my preacher showed me a Discipline and asked me to buy it. I bought it, and, though a mere boy, soon knew what my church was. Soon after I got "Advice to a Young Convert," "The Life of Bramwell," "The Life of Carver," "The Life of John Nelson" and other books which were food to the soul. I grew sensibly by the reading of them. My character assumed depth and consistency by their means. The preachers may do a great work by looking after the reading of the young members.

The New Orleans District Conference will meet on Wednesday morning, the fifth instant, at ten A. M., in the Carondelet Street church. On Wednesday night, at seven o'clock, there will be preaching by the Rev. R. S. Trippett. After preaching the Lord's Supper will be administered. On Tuesday night a district love-feast will be held.

SILKS AND CLOTHES.

The venerable Dr. Lovick Pierce is contributing an interesting series to the St. Louis Christian Advocate on early Methodism. He attributes our worldly tendencies in the church to shallow convictions for sin and the reception of unconverted members. It is in connection with such reflections that he speaks plainly and suggestively of a very prevalent evil. Let our Methodist women take heed to the following paragraphs:

Then our female members caught the mania of following fashions, as fashions; having no preliminaries to settle, but simply, Am I in the fashion? They put on jewelry right in the face of God's prohibitory word and of the general rules, declaring therein that they were not Methodist, only denominationally. They have followed up this open defiance of Methodist law and church regular commissions you will find a crowd of them attired in a style that would foretoken a visit to Bunyan's Vanity Fair grounds rather than to the Lord's Supper. To give this supper heavenly value to them he humbled himself, and became obedient unto death, even the death of the cross. To celebrate this commemorative duty they come in all the vain glory of fashionable glare, and, in order to glorify themselves, they shame and keep away many of the poorer of their sex.

And now, while I do not justify this proud weakness in the poorer order of women, I do most sincerely condemn this worldly conformity to fashion in the house of God. If this folly could be allowed in any other gathering of people, yet all must see and feel that the house of God is a holy exception to it. I affirm that in our cities these fashionable members that come to church on a Sunday, dressed as if to shame the humblest women of the congregation, are doing Satan a great service by keeping away a multitude of our excellent calico-dressed women. They are women—they will not stand the contrast. They are behind you only in means. They cannot come up to you in dress, but you can come down to them, and then be dressed as elegantly as any Christian lady ought to be in the house of God.

O! ye victims of fashionable folly, I tell you this weakness in your sex lessens your own chance for heaven, and drives many of your less favored sisters from church privileges, because their mortified womanly pride cannot bear such open humiliation in wardrobe contrast. I ask you, in God's name, shall these poorer women be driven from God's house of worship on Sundays because they will not worship in neat calicoes amid rustling silks and glittering jewels? Shall these excellent women, for whom Christ died, perish that you may show yourselves to be fashionable ladies? Let the love of God for sinners answer by ten thousand tongues, No, never. We will never put our sisters in unfavorable contrast with ourselves, at least not amid those scenes where this love of God for us miserable sinners is the theme of song and the subject of thought.

ABOUT TAKING A PAPER.

Among Dr. Bond's last *entrees*, in the Baltimore Christian Advocate, are some true things well said on this subject. We know some people who prize an Advocate, and who can illly spare even \$3 a year from their scanty means of subsistence. We send our paper to a few who are unable to remit the whole amount at one time. But we fear the doctor is right when he tells us that the love of money and a distaste for religious reading are the most frequent causes. After all that Grotes tells about Boetia, we hope neither old Baltimore nor other of our Conferences are going thither. There is room for improvement everywhere in this duty of taking religious papers. Scarcely any field is as yet half canvassed, and there are many sections that scarcely ever hear of our church literature. The man who is instrumental in introducing a religious paper into a single household is doing a most important work. It is equal to nearly fifty-two pastoral visits in a year, and almost as many sermons, in some instances, to that particular family.

We are sorry to learn that not one-third of the members of our church in some parts of the Baltimore Conference take any religious paper or read any religious books, except the few inherited from ancestors and spared by the war. There is room enough for all the papers competing for the patronage of the church; and certainly in the variety offered to the people, every-

body might find a paper suited to his capacity and taste. When in a society of three hundred members only, twenty papers are taken, preachers need not be afraid of inadequate interference in urging upon the people to subscribe to some one that represents the church. The plea of want of money is contemptible in most cases. Three dollars a year, or six cents a week, is not a sum the expending of which creates anxiety in many households. Surely, in consideration of the difference there is between a family that reads and one that does not, the price of the paper is a mere pittance. Yet we have known a man to pay \$10,000 for another farm and stop his paper to save \$3 toward the purchase. The fact is, the man did not value reading. Very probably thought hurt him. Whatever tendency toward raising him out of his low views of life gave him pain. But the Baltimore Conference must not become the Boetia of the church. Everywhere else our papers are flourishing. The people read them, and through them are led to read books. We in this Conference are falling rapidly behind the rest. The people in Arkansas and Texas support their papers well, and enable the publishers to enlarge and improve them; but in our Conference any paper would perish that did not draw its support from other Conferences, which nevertheless support their own. Now as Methodists we must not undervalue the press. Mr. Wesley did as much with it as with the pulpit. Reading was once a characteristic of Methodists. The preachers carried their books and papers in their saddle bags, and supplied them where other people were destitute. The press and the pulpit must work together if we are to sustain ourselves; and especially now when the power of the press is so greatly increased.

Western Virginia Conference.

This Conference adjourned on Tuesday, the thirteenth of September. We copy the following statistics from the Daily Christian Observer, of Catlettsburg. The editor of the Daily has the distinction, we believe, of publishing the first Annual Conference daily in our church.

White members, 10,835; colored, 21; local preachers, 76; exhorters, 49; adult baptisms, 535; infant baptisms, 118; total baptisms, 653; Sabbath schools, 140; officers and teachers, 1,139; scholars, 6,040; volumes in libraries, 22,525; church periodicals taken, 1,536; churches, 108; value, \$109,450; sittings they afford, 25,100; parsonages, 7; value, \$4,200; value of other church property, \$6,415.

YELLOW FEVER.—On the twenty-first of September there were nine deaths from this disease, on the twenty-second ten, on the twenty-third eleven, on the twenty-fourth ten, on the twenty-fifth nine, on the twenty-sixth fifteen, and on the twenty-seventh twenty-two. It will be seen that there is a gradual increase from week to week, but so slow that we still hope that the city may escape a severe epidemic. There are a few scattering cases in the First district, but the fever is still nearly all confined to the region where it first made its appearance, in the neighborhood of the French market.

St. John's Church.—Our new church in this city is fast approaching completion. The tower is all that remains of the brick work to be finished—the roof will be on in a few days, and the material for the windows is on hand, and the preparation of the interior for the reception of the congregation will be carried forward so rapidly that it will be ready for the preacher whom Bishop Marvin will assign to the charge next year. The building is one of the largest and most elegant structures in the State. The audience room is in the second story, and, with its numerous windows, will be delightfully ventilated—an item too often overlooked in the erection of church buildings in the South.

The Sunday school room will be in the lower room, and will be of such ample size that even the wants of the Galveston Methodist Sunday school will be met. We are informed that sea captains say that the church is now the first building they see as they approach the city, and when the tower is completed it will become one of the landmarks which will guide the mariner to our port. We trust that it will be instrumental in guiding many souls to the port of everlasting bliss.—Texas Christian Advocate.

Statistics prove that seventy-five per cent. of cases of crime are traced to intemperance in American cities. Intemperance is the direct cause of habits produced by drinking or to vices engendered by the excessive use of alcohol.

NEW PUBLICATIONS.

A TREATISE ON THE PREPARATION AND DELIVERY OF SERMONS. By John A. Broadus, D. D., LL. D. Philadelphia: Smith, English & Co. New York: Sheldon & Co.

This is a volume of five hundred and four pages, 12mo, and replete with good sense throughout. The author is an eminent Baptist preacher and professor in the Southern Baptist Theological Seminary, Greenville, South Carolina. The book opens with a judicious introduction. Part first is occupied with the "materials of preaching," part second treats of the "arrangement of a sermon," part third of style, part fourth of the delivery of sermons, and part fifth of the conduct of public worship. All of these subjects are exhibited and discussed with clearness and comprehensiveness. We are impressed with the excellent taste and the good sense and judgment which pervade the entire work. Experienced preachers will obtain many valuable suggestions by reading it, and young men in the ministry, or preparing for it, will find it one of the best volumes which they can consult on the subjects of which it treats. The publishers, Smith, English & Co., Philadelphia, send it by mail prepaid for \$2.

ELEMENTARY TREATISE ON MECHANICS. For the use of colleges and schools of science. By William G. Peck, LL. D. A. S. Barnes & Co., New York and Chicago. 1870.

A 12mo of two hundred and ninety-six pages. The author is professor of mathematics and astronomy in Columbia College, and of mechanics in the School of Mines. He is evidently well qualified for the authorship of a work of the kind. It is not of a popular cast, but adapted to schools and for the use of mathematicians. As a text book we should judge it to be equal, if not superior, to any other in general use. Price, postage paid, \$2.25.

PERIODICALS.

The first of the October monthlies received by us is **ARTHUR'S HOME MAGAZINE**. T. S. Arthur & Sons, Philadelphia. Arthur's imprint always assures a sound and wholesome literature. Some of it may be light, but the moral tone is good, and there is no concealed poison. The present number of the Home Magazine is made up with the usual variety of original matter, and contains fashion plates, engravings and music. The publishers promise that the Home Magazine for 1871 shall outstrip everything of its kind, and to be continued at its present low price of \$2 a year.

The **CHILDREN'S HOUR**, also published by T. S. Arthur & Sons, is a capital thing for the young folks. The number for October is beautifully illustrated, and contains sixteen articles adapted to amuse and instruct the children.

BURKE'S WEEKLY FOR BOYS AND GIRLS.—The September part has been received. There is a steady improvement in this excellent publication. The publishers promise a piece of music every month for young singers, and the continuation of the series of illustrations of Southern scenery. There is no better literature for the young than is afforded by this beautiful paper. Address J. W. Burke & Co., Macon, Georgia.

THE LITTLE CORPORA.—Published by Sewell & Miller, Chicago, Illinois. The October number has a bright and cheerful look. The paper, typography and illustrations are good for sore eyes. The frontispiece is a sweet picture indeed. We rely upon the Little Corporal when we wish something choice for our Child's Corner.

LIPPINCOTT'S MAGAZINE, for October, opens with the Ghost of Ten Brock Van Der Heyden. There is an article on the Great Monopoly, by which is meant the Western Union Telegraph Company, another on Prussia the German Nation, besides at least a dozen other articles of more or less interest.

The **GALAXY**, for October, as a frontispiece gives an engraved likeness of Comte Bismarck. The opening article is the continuation of the story of Lady Judith, by Justin McCarthy. There is an article also, written by Horatio King, vindicating

the character and course of James Buchanan. There are several additional chapters of Overland, full of excellent adventure, and the usual assortment of superior prose and poetry. Memoranda, by Mark Twain, will make people laugh in spite of the hard times.

YELLOW FEVER IN ST. LANDRY.

Opelousas, Sept. 21, 1870.

MR. EDITOR: Doubtless various and exaggerated reports have gone out in regard to the scourge of yellow fever in St. Landry. A correct statement will relieve the minds of all concerned.

A party of mulattoes which left this parish before the war, and went to Hayti, returned about the first of August last. It seems that the quarantine authorities below New Orleans did not require them to open and disinfect all their baggage. On their arrival at Barry's Landing and Washington their first work was to sun their clothing. This work resulted in infecting the places, and on the twenty-seventh of August it became known that the yellow fever existed. There have been one hundred and sixty-two cases in Washington, and thirty-one cases have proved fatal. Dr. Cook reports the disease as having exhausted all the material in Washington, and if the corporate authorities can devise means to cleanse and disinfect the place, before allowing the fugitive citizens to return, the scourge is over.

At Barry's Landing there have been about thirty cases, resulting in about twelve deaths. That is not a village, and if there is any prudence exercised in the neighborhood it must soon cease its ravages there.

Opelousas, under a very strict quarantine, has thus far been free from the sad scourge. A few cases have occurred in the vicinity of Washington, and one within two miles of Opelousas; but the disease has not spread from them. Otherwise our parish is perfectly healthy. The crops are good, and cotton is opening with great rapidity.

Yours truly, B. F. WHITE.

Proceedings of the Kentucky Conference AS FAR AS RECEIVED.

The fifth session of the Kentucky Annual Conference convened at Covington, September 14, 1870, Bishop Robert Paine presiding.

On motion of C. W. Miller it was resolved that instead of referring the various questions to be brought before the Conference to select committees, as heretofore, they be considered in Committee of the Whole on the afternoon of each day of the session, and that chairmen be appointed to preside during the consideration of such subjects.

On Saturday morning Dr. Henderson, chairman of the Committee on Missions, presented his report. I was allowed to make a statement concerning the old debt, and Kentucky's part of it—\$1,500—according to the recent division. Bishop Paine followed—then Bishop Kavanaugh. A lay delegate from Shelbyville arose and said he would be one of fifteen to pay it then and there. In less than fifteen minutes the whole amount was paid in cash, and pledged equal to cash. So the agent appointed by Bishop Paine, for Kentucky, needs only to be the medium in forwarding the money to the treasurer of the board at Nashville. The scene of Saturday morning will not be forgotten soon. It is written here that other Conferences may imitate if they choose. Dr. Henderson withdrew his report.

A great crowd attended the anniversary of the Conference Board of Missions on Saturday night. Upward of \$400 was contributed. The pastor, the Rev. H. P. Walker, had already taken his collection for this Conference year, and had pledged his church for another hundred on the "old debt." Well done for Seett street!—Nashville Christian Advocate.

A Baptist minister in California, writing to the Standard, says: I came here with the old opinion that plenty of wine would promote the temperance cause. I am cured. When I see whole families, father and mother, boys and girls, made drunkards by the produce of their own vineyards, I am convinced that wine-making is a curse. California is becoming a State of drunkards.

An English life insurance company has paid the insurance for the death of a man one hundred and three years old, who took out his policy in 1793. It is said to be the first instance in which an insurance has ever been paid on the life of a centenarian.

Married.

September 14, 1870, at the residence of Mr. George M. Pharr, by the Rev. M. J. LAW, Mr. THOMAS S. HYLTON to Miss MARY F. POINTER, all of Wilcox county, Alabama.

Obituaries.

Died, in New Orleans, on Sunday, August 28, at one o'clock A. M., at the residence of her mother, Mrs. C. King, KATIE CURRAN, aged eleven years and twenty-seven days.

A child of the covenant, given to God in baptism, and religiously trained at home, in the Sabbath school and the house of God, her youthful mind, aware of approaching death, seemed to grasp with all of a child's unquestioning and hopeful trust the sweet words of Christ: "Suffer little children to come unto me, and forbid them not, for of such is the kingdom of heaven." May God sustain and comfort the sorrowing hearts so sorely smitten in this great bereavement.

Died, on the morning of the eleventh of September, at the residence of his grandfather, Rev. J. L. Forsyth, in Jackson, Louisiana, JAMES BURNESS SINGLETON, infant son of H. R. and Lucy B. Singleton, aged four months and nineteen days.

Thus has the last visible link been severed which united his now glorified mother to us. But it is all right. Our Father is too wise to err, too good to be unkind. What we know not now we shall know hereafter.

"Beyond the flight of time,
Beyond the reign of death,
There surely is some blessed clime
Where life is not a breath.
Nor life's affections transient fire,
Whose sparks fly upward and expire."
Though

"Transient and vain is every hope
A rising race can give
In endless honor and delight
Our children all shall live."

J. L. FORTYTH.

THOMAS HENRY JENKINS departed this life on the nineteenth of July, 1870. He was born in Yazoo county, February 25, 1840.

He enlisted as a soldier, at the commencement of the late war, in Company B, Eighteenth Mississippi Regiment. Not long after this he contracted measles, which settled on his lungs. In 1862 he re-enlisted in the Third Mississippi Regiment, and at Camp Moore was violently attacked with hemorrhage of the lungs.

He was married on the twenty-fifth of October, 1865. He became a member of the Methodist Episcopal Church South at the age of fourteen. The writer of this obituary, who became his pastor in 1869, first saw him that year. He was then a consumptive in feeble health. This year it was his privilege to be with him several times. He lingered for many weeks prostrate upon his bed. He was not only a member of the church, but a professor of religion, and gave satisfactory evidence of his acceptance with God. He said that if he had to live his life over again he would be more faithful in serving God. He manifested no trepidation, however, in the contemplation of death. He spoke to his mother with remarkable composure about the arrangements for his interment. The different inmates of the household were addressed singly by him a short time before his departure from them.

ANDREW B. STEWART.

Died, near Colorino, Lowndes county, Alabama, July 29, after a painful illness of over four months, Miss SARAH FRANCIS BYFORD, daughter of Brother Luckin W. and Mary Buford, aged twenty years, lacking fourteen days.

Sister Sallie professed the religion of the Saviour when in her tenth year, and joined the Methodist Episcopal Church. Young as she was, one-half her days were spent in the service of God. She adorned that profession by a well ordered walk and a godly conversation. She was a quiet, sweet-spirited girl, rather retiring in her manners, never participating in the follies

and vain amusements too common with the youth of her age. Her zealous devotion to the cause of the blessed Saviour often elicited the admiration of older Christians.

She entertained strong hopes of her recovery all the time of her sickness, and exercised much patience. A few days before her death she complained to her aunt, who was at her bedside, that she felt very strangely. She was told that it was death. Without the least apparent alarm, fully resigned, calm and submissive, she called to her bedside her parents, brothers and sisters, and gave to each her dying censels, requesting them to meet her in heaven, saying to them: "Weep not for me. Our separation will not be long." She also sent this request to absent friends. Bless God for that religion that disarms death of its terrors, and for that faith that enables the timid female to triumph in the last conflict. May the Lord sanctify this loss to the good of all that dear family, and may this tie severed by death be reunited in the world of glory. J. M. SCOTT.

Died, in New Iberia, Louisiana, August 19, 1870, of pulmonary consumption, Mrs. MARY M. ANDRUS, in the sixtieth year of her age.

Sister Andrus was born at Plaquemine Brulee, St. Landry parish, Louisiana. She was married in 1831, and removed to Opelousas, where she resided until 1866, when she removed to New Iberia. She joined the Methodist Church in 1842, but did not profess religion until 1865, when her evidence of acceptance was clear and her joy was full. From that time to the hour of her death she lived in the full enjoyment of religion. The last years of the life of Sister Andrus were years of almost continual suffering and debility. For nearly two years before her death she was unable to attend church, and much of that time she suffered greatly, but manifested great patience and resignation to the divine will. She often received the holy communion upon her bed, and seemed to be much comforted and strengthened by it.

About two months before her death she was suddenly taken very ill, when she received the sacrament and gave a dying testimony. But it was the will of God that she should remain on exhibition while longer, and for weeks together many friends watched and ministered at her bedside, enjoying, in her conversation and in frequent exercises of devotion, such evidences of grace as does not often fall to the lot of those who desire to learn how to die. She was ever ready, but not impatient. Only toward the last the messenger seemed more slow than she expected, and once or twice she said, "When will the messenger come?"—not impatient, but like Paul, "having a desire to depart and be with Christ." At length, on the nineteenth of August, at one o'clock A. M., she sweetly fell asleep in Jesus, without a groan or a struggle. "Let me die the death of the righteous, and let my last end be like hers." A. E. GOODWYN.

FIVE CENTS ADDITIONAL

will buy shoes with Silver or Copper Tips, which will save the buyer the price of a new pair of shoes. Compared with ragged toes and dirty stockings, they are beautiful, to say the least. Parents, try it. sc17 3mr

NEW ADVERTISEMENTS.

J. W. BLACKMAN'S
COMMERCIAL COLLEGE,
61 CAMP STREET,
Corner Commercial Place, N. O.

Open day and evening the entire year. Penmanship, book-keeping, Mathematics and Languages are practically taught by experienced professors. Persons from fifteen to fifty years of age attend. Instruction given privately to each student, who has a separate desk to himself, and is put through a thorough and systematic course of study to qualify him for the situation he intends to fill. Persons who have neglected their education are here speedily prepared for business. Students from the country may obtain board in the family of the principal. Tuition—Twenty per cent. less than other Commercial Colleges in this city. Cost of full Commercial Course only \$100. Average time, three to four months. The principal has been a professional teacher in New Orleans since 1851. For circulars address

SOUTHERN METHODIST

Male High School, New Orleans.

The exercises of the second session of this institution will commence on MONDAY, the 6th day of September proximo, in the basement of the German Methodist Church. Pupils must meet between Eight and Entree.

The Principal, encouraged by the gratifying success of the past session, will in no respect relax his energy in the effort to make the school all that could be desired by its patrons; and to accomplish this end neither pains nor expense will be spared.

To furnish to those who desire it an opportunity to obtain for their sons a systematic course of instruction from the beginning, upon which a thorough education so much depends, Primary and Preparatory Departments have been established in connection with the High School.

In selecting professors and teachers the greatest care will be exercised in regard to not only their mental qualifications, but also their ability to impart instruction.

The rates of tuition have been fixed as low as is consistent with thorough instruction.

For further information as to terms, etc., apply at the School.

D. I. RABT, Principal.

DIALOGUE.

ANNE.

Oh, mamma, come see my pretty bow;
Come, daddy, come along;
Mark! listen! don't you hear the bird
That sings the pretty song?

Did God make birds to sing us songs,
And fragrant flowers to smell?
How beautiful he made them all!
But why? Can mamma tell?

How sweet and lovely is that rose,
Just opening to the view.
Did God then paint its pretty leaves,
And make them look so new?

MOTHER.

Oh, yes, my child, God made the world,
And all that it contains;
He made the fishes in the sea
And cattle on the plains;

And all, my child, you view around
The earth and sky above,
He made man happy at the first,
And filled him with his love.

ANNE.

Did God, then, make this rose so white,
Give it the scarlet hue?
And does he paint the things he makes
The way that people do?

MOTHER.

Oh, no, my child, that's not the way.
The great creating Cause
Paints fields and forests, shrubs and flowers,
By his unerring laws.

ANNE.

Why, ma! how strange this seems to me.
Such laws as papa knows?
Can papa paint the lovely pink,
And fringe with red the rose?

MOTHER.

No, no, my dear, 'tis not such laws
As legislators frame.
God's laws no likeness have to these,
Except perhaps in name.

God does not leave his place in heaven,
For at creation's birth
He made, with other causes joined,
The sun to paint the earth.

ANNE.

Oh, Buddy, run and bring my doll;
His face now looks too white.
Ma, have God's sun repaint it all,
And make it new and bright.

MOTHER.

Oh, don't, my child; don't talk that way;
Stop, Buddy; don't you go.
No, child, the sun would never paint
Your little doll, I know.

ANNE.

Why, ma, it's pretty, though it's small;
The cause I cannot see.
The sun that paints those apples red
Can surely paint for me.

MOTHER.

My dear, and have you never seen
The sun on rainy days
Peep out behind the western clouds,
And eastward cast his rays?

Then have you seen the splendid bow
Span o'er the eastern sky,
With tints of green and golden hue,
So charming to the eye.

These things to you seem strange indeed,
And how there are that know
The reason why the light and rain
Should form the gorgeous bow.

And yet, I trust, before your grown
You'll fully understand
How skillfully God made his works,
How wisely all are planned.

My darling, when you are as old
As Cousin Carrie looks,
You'll read the laws that God has made,
And learn them from the books.

And Nature, too, that great big book,
Will open to your view,
And though its lessons all are old,
You'll always think them new.

And then you'll learn to praise that God,
Great Father of the skies,
For you will see that all his laws
Are good and just and wise.

KARUEZ, Miss, Aug. 20, 1870.

The Tiger, the Bramin and the Fox.

A HINDOO STORY.

A tiger, prowling in a forest, was
attracted by a bleating calf. It
proved to be a bait, and the tiger
found himself trapped in a spring
cage. There he lay for two days,
when a Bramin happened that way.
"Oh, Bramin," piteously cried
the beast, "have mercy upon me,
and let me out of this cage."
"Ah, but you will eat me,"
"Eat you! devour my benefactor!
never could I be guilty of such a
deed," responded the tiger.

The Bramin, being benevolently
inclined, was moved by these en-
treathes, and opened the door of the
cage.

The tiger walked up to him, waved
his tail, and said: "Bramin, prepare
to die; I shall now eat you."
"Oh, how ungrateful, how wicked!
am I not your saviour?" protested
the trembling priest.

"True," said the tiger, "very
true, but it is the custom of my race
to eat men when we get the chance,
and I cannot afford to let you go."
"Let us submit the case to an ar-
bitrator," replied the Bramin; "here
comes a fox; the fox is wise; let us
abide by his judgment."

"Very well," agreed the tiger.

The fox, assuming a judicial ap-
pect, sat on his haunches with all
the dignity he could muster, and
looking at the disputants, said:

"Good friends, I am somewhat con-
fused by the different accounts
which you give of this matter; my
mind is not clear enough to render
an equitable judgment, but if you
will be good enough to act the whole
transaction out before my eyes, I
shall attain unto a more definite
conception of the case. Do you, Mr.
Tiger, show me just how you ap-
proached and entered that cage;
and then do you, Mr. Bramin, show
me precisely how you liberated him,
and I shall be able to render a
proper decision."

They assented, for the fox was
solemn and oracular. The tiger
walked into the cage, the spring
door fell and shut him in. He was
a prisoner inside.

The judicial expression faded from
the fox's countenance, and, turning
to the Bramin, he said: "Now you
are all right, you silly Bramin; I
advise you to go home as fast as you
can, and abstain, in future, from
doing favors to rascally tigers. Good
morning, Bramin—good morning,
Tiger."—Henry M. Scudder, D. D.

ADORNING CHILDREN'S GRAVES.—
Mr. Gray had not long been minis-
ter of the parish before he noticed
an old habit of the grave-digger;
and one day coming upon John
smoothing and trimming the lonely
bed of a child which had been buried
a few days before, he asked why he
was so particular in dressing and
keeping the graves of infants. John
paused for a moment at his work,
and looked up, not at the minister,
but at the sky, and said: "Of such is
the kingdom of heaven."

"And on this account you tend
and adorn them with so much care,"
remarked the minister, who was
greatly struck with the reply.

"Surely, sir," answered John, "I
cannot make too nice and fine the
bed-covering of a little innocent
sleeper that is waitin' there till it is
God's time to waken it and cover it
with a white robe, and wait it away
to glory. When sich grandeur is
awaitin' it yonder, it's fit it should
be decked out here. I think the
Saviour will like to see white clover
spread above it; do you not think
so too, sir?"

"But why not cover larger graves
also?" asked the minister, hardly
able to suppress his emotions. "The
dust of all his saints is precious in
the Saviour's sight."

"Very true, sir," responded John
with great solemnity, "but I cannot
be sure who are his saints and who
are not. I hope there are many of
them lying in this church yard, but
it would be great presumption to
mark them out. There are some that
I am pretty sure about, and I
keep their graves as neat and clean
as I can. I plant a bit flower here
and there as a sign of my hope, but
dare not give them the white skirt,"
referring to the white clover. "It's
very different, though, with the chil-
dren."—Seeds and Sheaves.

ONE HUNDRED YEARS AGO.—The
following description of a couple on
their wedding day in 1770 is amus-
ing and interesting: "To begin with
the lady. Her locks were strained
upward over an immense cushion
that sat like an incubus on her head,
and plastered over with pomatum,
and then sprinkled with a shower of
white powder. The height of this
tower was somewhat over a foot.
One single white rosebud lay on its
top, like an eagle on a haystack.
Over her neck and bosom was folded
a lace handkerchief, fastened in front
with a bosom-pin rather larger than a
copper cent, containing her grand-
father's miniature, set in virgin gold.
Her airy form was braided up in a
satin dress, the sleeves as tight as
the natural skin of the arm, with a
waist formed by a bodice, worn out-
side, whence the skirt flowed off and
was distended at the top of an ample
hoop. Shoe of white kid, with
peaked toes and heels of two or three
inches' elevation, inclosed her feet,
and glittered with spangles as her
little pedal members peeped curi-
ously out.

"Now for the swain. His hair
was sleeked back and plentifully
beffoured, while his eye projected like
a handle to a skillet. His coat was
a sky-blue silk, lined with yellow;
his long vest of white satin, embroi-
dered with gold lace; his breeches
of the same material, and tied at the
knee with pink ribbons. White silk
stockings and pumps, with laces and
ties of the same hue, completed the
habilliments of his nether limbs.
Lace ruffles clustered around his
waist, and a pretentious frill, worked
in correspondence, and bearing the
miniature of his beloved, finished his
truly genteel appearance.

NEW YORK has a young lady who
divides up her time in the most
methodical manner, and never allows
one duty to infringe upon the time
devoted to another. Recently a friend
called to gently break to her the in-
telligence of the death of her much-
beloved grandmother. The methodi-
cal young woman was affected over
to tears, but drew forth her watch
at the most touching point in the
story and begged her friend to cut
it short, as in four minutes and
twenty seconds she must practice
with her dumb-bells.

The Farm and Garden.

COTTON VERSUS CORN.

A PEEP AT THE OTHER SIDE.

It is well sometimes to examine
the foundation even of what are
termed truisms, but a popular error
might be perpetuated for the lack of
proper investigation. "Less cotton
and more corn" is in everybody's
mouth, until some seem to doubt
the policy of planting any cotton at
all. Indeed we heard a citizen, who
aspired to be a connoisseur of one of
our largest cities, contend that cot-
ton was a curse, the country was
impooverished by it, and its cultiva-
tion should be abandoned. He was
estopped, however, in the timely re-
marks of a bystander, that without
cotton his own business would soon
go down, and grass grow in the
streets of his renowned city.

So strong has this anti-cotton
feeling become that some have pro-
posed to invoke the strong arm of
the law, and others to form agricul-
tural rings, binding every member
to plant but a small quantity of this
terrible weed, lest utter ruin fall
upon the country. But what if these
rings should become universal, and
every farmer in the South agree to
plant only one-third of his land in
cotton, would it not result like the
demand of the priest-on-his parish-
ioners for each of them to bring a
bottle of wine and pour it in a bar-
rel for sacramental purposes? As
every one brought water, there was
no wine in the barrel; so we think
such a combination would produce
the biggest crop of cotton ever made.
The best land would be selected, the
best fertilizers used in large quanti-
ties, and the best cultivation possible
given; while the corn, on small
acres, poor land and bad cultivation,
would be left out in the cold.

We are among those (very few in
number, however), who are willing
to leave this question to be settled
by the great law of supply and de-
mand. For while the people think
that the chances are favorable for
them to make more money by plant-
ing more cotton and less corn, they
will do it, despite the *ex parte* figures
of newspaper correspondents and
the diatribes of learned editors.
While the demand of the world is
so great as to give good prices
farmers will make cotton and run
the risk of having to buy corn from
the great West. If they can buy it
cheaper than they can make it, what
harm is done? If it costs them
more, they are the greatest sufferers.
Let them plant it, then, until they
are convinced that it is bad policy.
Until this thing happens you had as
well try to dam up the Mississippi
river as to stop them from its pro-
duction.

But, then, planting so much cotton
is a selfish policy, and the country
is impoverished by it. True, there
is selfishness in it, and so of all hu-
man policies, is the anti-cotton
plan less chargeable with the spirit
of selfishness? You say, let us make
half the cotton and twice as much
corn, and we will have as much
money and more bread. Admitting
its truth, would you, for the sake of
putting twice as much money in your
pocket, take from the poor of the
world one-half of their clothing,
causing cotton fabrics to rise to such
a price as would delude many of them
from muslins and calicoes, and even
the common homespuns? What
would you think of Cuba and Lou-
isiana if they were to combine and
only make half the supply of sugar,
thereby doubling the price and de-
priving the poor of that great lux-
ury? And so of the wheat and
coffee producing countries? Would
you not say at once, these men are
violating the laws of God, and are
unworthy the heritage he has given
them? Do the cotton planters con-
stitute a more privileged class than
the sugar planters or the wheat
growers? Are we better than they?
Shall we curtail commerce, stint the
world in its clothing, and cause our
own people to pay double the price
for cotton fabrics, because we refuse
to produce what God has given us
the means to do? Can we do this
and not injure ourselves, as well as
the rest of mankind? We certainly
cannot, for duty and interest are
beautifully blended together in this
as in all the other departments of
life.

Let us examine a little more closely
the policy of planting for only a half
crop of cotton. Two bushels of cot-
ton seed, applied as a fertilizer to
corn, will cause our lands to pro-
duce one bushel more than the
natural soil. These two bushels of
cotton seed are worth a bushel of
corn. Allowing that a crop of four
millions of bales of cotton will only
bring as much money as two mil-
lions (which is not true,) the South
will have besides seventy-one mil-
lions four hundred and twenty-eight
thousand five hundred and seventy-
one bushels of cotton seed, which,
properly husbanded and applied as
a fertilizer, is equal to thirty-five
millions seven hundred and fourteen
thousand two hundred and eighty-
five bushels of corn, or its equiva-
lent in wheat or oats. Besides this,
every yard of calico, muslin, home-
spun and other cotton fabrics pur-

chased at the South (not to say
elsewhere) will be cheaper by half
to its people, and thus save millions
more. The half crop would stop
many mills, throw out of employ-
ment many operatives, and cause
much distress among the poor of
other lands. The full crop would
not only increase the mills and op-
eratives, and thereby add to the sus-
tenance and happiness of many poor
people, but would largely increase
the consumption of cotton, and en-
hance its comparative value. A
stinted supply would stimulate its
production in other countries, as
was evidenced by the late war, while
repeated full crops would drive from
competition all countries that could
not afford to make it at low rates.

It is true that our farmers can
raise a certain amount of meat and
corn cheaper than they can buy from
the West. It is to their interest to
do this, and then raise as much cot-
ton as they can besides. Beyond
this they should not go. No man
has a right to try to make a planter
raise a bushel of corn when he can
buy it by planting cotton, cheaper
than he can raise it. The truth is,
cotton is our great staple and our
wealth. The more we make of it
the wealthier we are. Without it
we are the poorest civilized people
on earth. If that man was consid-
ered a great blessing to his race who
taught how to raise two blades of
grass where only one grew before,
he is no less worthy of praise who
teaches how to make two bolls of
cotton where only one appeared be-
fore. For, while the one has dou-
bled the amount of provender
for the ox that treadeth out the corn,
the other has added two-fold to the
production of that beneficent fabric
which clothes the teeming millions
of earth.—E. M. Pendleton, in South-
ern Farm and Home.

OUR HANDS.—The human hand is
so beautifully formed, it has so fine
a sensibility, that sensibility governs
its motions so correctly, every effort
of the will is answered so instantly
as if the hand itself were the seat of
that will; its actions are so free, so
powerful and yet so delicate, that it
seems to possess a quality instinct
in itself, and we use it as we draw our
breath, unconsciously, and have just
all recollection of the feeble and ill-
directed efforts of its first exercise,
by which it has been perfected. In
the hands are twenty-nine bones,
in the mechanism of which result
strength, mobility and elasticity. On
the length, strength, free lateral mo-
tion and perfect mobility of the
thumb depends the whole power of
the hand, its strength being equal
to that of all the fingers. Without
the fleshy ball of the thumb the
power of the fingers would avail
nothing; and accordingly the large
ball formed by the muscles of the
thumb is the distinguishing char-
acter of the human hand.

ONE-HALF of the lame horses
throughout the country are made so
on account of bad shoeing, and the
loss of the labor of a horse makes
up a considerable item in the sum
total of the wealth of a nation.

SCHOOLS AND COLLEGES.

WHITWORTH FEMALE COLLEGE,

BROOKHAVEN, MISSISSIPPI.

on the New Orleans, Jackson and Great
Northern Railroad, one hundred and twenty-
eight miles north of New Orleans, and fifty-
seven south of Jackson, will reopen on

The 21st of September, 1870.

Thorough instruction in all the branches
given.
Charge for board, tuition in English, Eng-
lish text books, school-room stationery, wash-
ing, fuel, lights, medicine and medical at-
tendance, \$250 for the term of forty weeks.
The languages and music extra. A deduc-
tion of \$50 made for pastors of churches.
Number of pupils last term, 165.
For catalogue address

Jy30 3m H. F. JOHNSON,
President.

EAST ALABAMA COLLEGE,

ATLANTA, ALABAMA.

The next annual session will open on the
FIRST WEDNESDAY in October, with a full
faculty.

Boys and young men at every stage of ad-
vancement can be received either in the
Preparatory, Junior or Senior Departments.
Additional schools of Modern Languages,
Civil Engineering, and Commercial, Arith-
metic and Book-keeping have been estab-
lished.

Economy, health, efficient faculty, good
society, thorough discipline and the best re-
ligious privileges are the peculiar advantages
afforded.

It is just the place to train Methodist boys,
and there is room for three hundred. If
every preacher and layman will work for us
to secure students we will open with two
hundred.

For full information or catalogue address
the Secretary of the Faculty.
DAVID CLOPTON,
President Board of Trustees.

HIWASSEE COLLEGE,

MONROE COUNTY, EAST TENNESSEE.

Having taken charge of this school, I de-
sire to invite the attention of friends in the
Cotton States to the excellent location, de-
lightful climate and cheap board. We are in
the best part of East Tennessee, seven miles
east of Sweetwater, on the great line of rail-
road, and two miles from Madisonville, which
is our post office.

The college has been in operation for
twenty years, and has boarding arrange-
ments for about fifty students. The steward
supplies his table from his own farm, and
gives the best that the country affords, well
prepared, and furnished rooms, at
Two Dollars and a Half Per Week.
Tuition is \$10 per annum. Students will
be received at any time, and charged to the
end of the term. For circular address
REV. P. M. GRACE,
Madisonville, Tenn.

MUSICAL INSTRUMENTS.

PHILIP WERLEIN,

SOUTHERN MUSIC HOUSE,

80 & 82...BARONNE STREET...80 & 82

New Orleans.

The house of WERLEIN is the oldest es-
tablished Music House in the South. Its pre-
sent reputation shall be sustained and increas-
ed by every effort.

The best PIANOS AND ORGANS that this
country affords are being sold at from ten to
twenty per cent. under current rates, in con-
sequence of systematic management of busi-
ness and low expenses.

PIANOS, ORGANS, MELODEONS,

HARPS, MUSIC, BRASS AND GERMAN

SILVER INSTRUMENTS,

Strings, Violins, Guitars, Banjos, Flutinas,
A accordions, Drums, Piano Stools and Covers,
and

MUSICAL MERCHANDISE

OF EVERY DESCRIPTION.

P. S.—Persons not acquainted with me, fa-
voring other houses, will please send for
price lists before ordering. Our Pianos and
Organs are imported to this market in sail-
ing vessels, and special low freight contracts
are made with the view of selling at the very
lowest rates and competing with Northern
markets. Every Piano and Organ fully war-
ranted. Second-hand Pianos at very low
prices. Pianos repaired at our Factory.

Very respectfully,

PHILIP WERLEIN,

Southern Agent for Dunham & Sons, Mar-
shall & Miltner, and Hale Piano Man-
ufacturers, New York; and Needham & Son,
manufacturers of the celebrated Silver
Tongue Organs and Melodeons.

THE ARROW TIE.

FOR RAILING COTTON THE ARROW TIE

is the most popular, being the Best Cotton

Tie in use.

Planters and Cotton Press men everywhere

prefer it to all others.

THE ARROW TIE

was used to cover MORE THAN HALF THE
CROP OF 1869, giving entire satisfaction.
The patentee and manufacturer of the cele-
brated ARROW TIE, J. J. McComb, formerly
of New Orleans, now residing in Liverpool,
having control of the best and most exten-
sive Rolling Mills in Europe, is constantly
importing large stocks of this popular Tie,
manufactured of the very best quality of
English Iron, to meet the increasing demand
for it throughout all the Cotton States.

Planters can buy or order the ARROW TIE
of all dealers in Iron Tie, and of country
merchants generally, at the lowest market
price; and we respectfully solicit the patron-
age of Planters and Factors everywhere.

BROOKS' IMPROVED PATENT

WROUGHT IRON REVOLVING

COTTON SCREW PRESS.

Patented by R. M. Brooks, of Georgia,

April 14, 1868.

It took the first premium at the Louisiana
State Fair, at New Orleans, April, 1869, over
eleven competitors; also at the Tennessee
State Fair, at Memphis, and more recently
at the Mississippi State Fair, at Jackson and
at New Orleans, April, 1870. In a contest
most approved patents from different States
of the Union, North and South.

The following is a certificate of some of
the principal cotton factors and merchants of
New Orleans. In our circulars can be seen
the certificates of practical planters and sec-
ondary factors from several Southern States
regarding to the admirable principle and
practical working of this Press.

"We, the undersigned, purchased last sea-
son, from Messrs. J. B. Jennings & Co., the
Brooks' Revolving Cotton Screw Press for
our customers, and so far as heard from,
"Moses Greenwood & Son, Warren, Crav-
ford & Co., C. L. Walmsley, Jr., McDaniel
& Co., Frank & Daniel, Campbell & Strong,
Walker, Violet, Black & Co., Black Bros.,
W. H. Allen & Co."

Circulars, giving cuts, with full description,
price list, etc., sent by mail on application to
J. B. JENNINGS & CO.,
Proprietors, 14 Union street,
New Orleans.

BRACES AND TRUSSES.—DR. JOHN C.

Scientific.

PREHISTORIC RELICS IN ITALY.—Prof. Botti announces the discovery of remains belonging to the bronze and antecedent ages, in the Grotto del Diavolo, Bay of Lucca. Fragments of pottery, from the most elegant vases of the finest clay to the roughest objects kneaded with sand, bones of ruminants, whether of extinct species or not we are not told, layers of ashes and charcoal, five flint weapons, and various objects of lead and copper. This discovery may serve to modify Dr. Mommsen's statements in his history that there are no remains of man in Italy antedating the Hellenic-Italian immigrations, but the character of the remains would, on the whole, indicate a comparatively modern origin.

PETRIFIED WOOD IN EGYPT.—For a great many years travelers to Egypt have been in the habit of bringing away as curiosities pieces of stone, calcareous, which were petrified wood. The locality near Cairo has been called the petrified forest. Mr. Carruthers has examined it more carefully, and determined the wood to be of exogenous trees, differing in this respect from the prevailing palms of that land, and from the flora of the coal epoch. The growth is of a comparatively modern geological period. He supposes that the forests flourished to the south, and trunks of trees were brought down to the desert in lower Egypt by floods. Only two species can be detected, and of these one greatly predominates.

SPONTANEOUS GENERATION.—Dr. Bastian has been making some fresh experiments to determine this vexed question. After submitting various fluids to what he claims to be crucial tests for the destruction of all germs, he still found, after the lapse of a certain number of days, in his sealed flasks various living infusoria, with protoplasmic matter, whatever that may be. He claims to have shown thus that life may be developed without previous life. The same thing has been said many times before, while further examination has shown at some point a fallacy; we must therefore wait for the experiments of others before assuming that the question is settled that the nitrogen of ammonia may take an organized form, without the help of previous organs.

SOUTH HEMISPHERE OBSERVATORIES. Prof. Gould, a distinguished astronomer of our own land, is active in his labors as superintendent of the Argentine Observatory, to which he has been appointed by that government. Mr. Stone, of the Royal Observatory, Greenwich, is to be established with a telescope at the Cape of Good Hope, and Mr. Le Sueur is successfully at work at Melbourne. Observations from these three points, by such experts, with first class instruments, can hardly fail to add much to astronomical knowledge, and their arrangements will be complete when the demands of commerce shall bring them into telegraphic communication with one another and with northern observatories. The sun, with its spots, its storms, its chromosphere, its photosphere and its prominences, is now attracting a lion's share of attention.

HEIGHT AND WEIGHT.—According to a writer in Nature, the weight of the human body, well developed and in health, ought to be one hundred and fifteen pounds for a person five feet in height, with an addition of five pounds for every additional inch. The result is obtained from a very large number of observations and measurements, though not large enough to be the foundation of any absolute conclusion, or more than an approximation to the truth. It is assumed that by establishing a law of relation between height and weight, in health, a new means may be given to medical practitioners for determining the presence of disease when the weight is seriously below the standard. As corroborative of other symptoms, and when noticed as a sudden change, diminution of weight is a matter of great consequence. But the exceptions to such a law as this must be many. It remains also for like determinations to be made for different nations and localities. The difference of weight between a raw-boned total abstemious Yankee and a larger beer-drinking Dutchman must seriously differ, without reference to disease in either.

SCARLET FEVER.—The British Medical Journal estimates that in twenty-two and a half years there have been four hundred and seventy thousand deaths directly from scarlet fever and diphtheria. But aside from these a great many have received through these the legacy of other troubles leading to death or to life-long disabilities, increasing the statistics of suffering, greater or less, from this source to five millions! Of these, sixty-two per cent. are attacked at an age under five years, and before the possibility of self-protection; hence the not unimportant demand for civil legislation to meet, as far as possible, an evil as gigantic as can be named. We have heard

of such things in this land as parents willingly allowing their children to be exposed to the contagion of scarlet fever and other eruptive diseases of childhood, on the theory that they must run the gamut, and it is better to have them when young. Nothing could be more barbarous. Parents and the guardians of communities should pledge their best efforts to use every resource suggested by science in stamping out the contagion, instead of allowing it to be propagated by carelessness in the care of the sick, or in the protection of the well. These scourges are terrible in their consequences, taking young life, or embittering it for weary years. The infection may be greatly circumscribed, and it is a shame to our civilization that it is not more thoroughly provided against than we find it.

HOUSEKEEPERS' DEPARTMENT.

THE ABOMINATIONS OF OUR FOOD.—The practices of those employed in manufacturing food are reprehensible beyond expression. Much has been written on this subject; yet the manufacturer goes on; and his products sell as well, and the consumer is content with an occasional grumble. There is scarcely an article used as food, which passes through any change of form by manipulation from the raw material, but is adulterated, and often with deleterious ingredients. If we are to persevere in our present course, and consume everything concocted by the grocer and manufacturer, it is best we do not know anything about the matter; for if we are to sit down to a rat pie, ignorance is bliss, and it is best we believe it is squirrel.

That strychnine, cayenne, etc., enter into the composition of the best "Bourbon" is of little moment to the well ordered citizen, who may think if a man will drink it is best to get him out of his misery by the most active of poisons; but what shall we say when similar processes enter into the formation of the necessities of life? The ground spices, coffees, etc., are worthless, to say the least. We venture the assertion that not a paper of the article is what it is represented to be. Take coffee, for instance. Fortunes have been acquired by preparing burned and ground peas, beans, barley, liver, blood, bran, etc., and selling the abominable mixture, just scented with coffee extract, for "pure Java."

Coffee is a delicious and very concentrated drink, containing caffeine, as tea therein, from which it derives its stimulating quality. This principle is found in no other plant. It allows of no substitute, and although the taste may be deceived, the vile slops dealt out as coffee are without exception injurious. Coffee is ground for the sole purpose of adulteration by large establishments, as are the spices.

The sugar we use is also a sufferer, especially the pulverized, which almost always contains a large per cent. of sand and chalk. The presence of the chalk is easily detected by stirring a spoonful of the sugar into a glass of vinegar. The effervescence will usually overthrow the glass. Terra alba, a kind of soft chalk, is brought by the ship load from Ireland for the express use of the sugar maker.

In this connection we give an instance of a more outrageous adulteration than any of the above, taken from the American Grocer. The editor says:

Having occasion, a day or two ago, to use some cream of tartar, we sent to a friend in the trade, from whom we are constantly buying, for a small quantity. Its action was so different from what it ought to have been that our attention was called to it. Upon an analysis we found the sample to contain eighty-three per cent. of sulphate of lime—plaster of Paris—and the seventeen per cent. composed of starch and sulphuric acid, without a trace, so far as our examination has extended, of bitartrate of potash—cream of tartar.

We know our friend had no idea of what this wretched stuff consisted that he was selling every day to families for bread making. Upon inquiry we ascertained that he purchased his cream of tartar from one of the leading drug houses of this city, and that he was assured that he was getting the pure ground crystals.

We do not know what he paid for it, but he was selling it at seventy-five cents per pound. Five cents per pound would pay an elegant profit of a hundred per cent. upon the manufacture of the stuff.—*The Household.*

TWINS A LA SIAM.—Two blackish, united a la Siamese twins, were caught in the Great South Bay, Connecticut, last week. The twins and fins were grown together for several inches, the heads being nearly at right angles with the other. It is believed that no finny pair were ever found before with such a finny tie to unite them.

KANSAS ANNOUNCES that it has room for a million of Chinese to go into the silk manufacturing business.

BOOKS AND STATIONERY.

STANDARD EDUCATIONAL WORKS

PUBLISHED BY
CHARLES SCHUBNER & COMPANY,
654 BROADWAY, NEW YORK.

Guyot's Geographical Text-Books.
"Incomparably superior to anything published."—*Agassiz.*
Introduction to the Study of Geography. Elementary Geography. Intermediate Geography. Commercial School Geography.

Guyot's System is approved and indorsed by the most distinguished literary and scientific men of our nation; such as Prof. Agassiz, Dana, Tenney, Henry and others, celebrated in science throughout Europe as well as at home.

The fact that ONE MILLION (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New System, for no other series of books ever published in America have ever secured so rapid and extensive introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; Cincinnati, Cleveland, Columbus, Springfield, Toledo, Marietta, and most of the other important towns and cities, numbering nine thousand schools in Ohio, and hundreds of towns and cities in the Western States, while in the Southern States and California they are being extensively adopted.

Believing that the publication of Professor Guyot's series has marked a new and better era in the presentation of geographical science, that by it the pupils of this generation will obtain a clearer, more definite and exact knowledge of the world on which they live, and that it is so systematically so rendered that knowledge more valuable and permanent, we commend it to the attention of all interested in educational improvements and progress.

SCHOOLS AND COLLEGES.

FLORENCE WESLEYAN UNIVERSITY,

FLORENCE, ALABAMA.

W. H. ANDERSON, D. D., PRESIDENT.

This institution of learning, so widely known through the South, will begin its next session on WEDNESDAY, SEPTEMBER 14, 1870.

The Faculty is composed of men of experience and ability. The course of study is comprised in the Literary Department, Law Department, Department of Biblical Literature and Commercial Department. The advantages of this University are seen in its healthful and attractive location, thorough course of study, excellent discipline, the character and success of its instructors, and the reasonable rates at which board and tuition are furnished.

Licentiate in the ministry and sons of ministers in the regular work are admitted to recitation on paying the incidental fees.

EXPENSES PER SESSION OF FIVE MONTHS.

Tuition in the University classes..... \$30 00

Tuition in Grammar School..... 25 00

Tuition in Law Department..... 40 00

Incidental fee..... 2 00

(Tuition and incidental fee required in advance.)

Chemical fee, paid once..... 5 00

Boarding can be had in the best families at from \$16 to \$20 per month.

For particulars see circular, or apply to the President, Rev. Dr. Anderson, or to Hon. W. H. Wood, GEO. W. FOSTER,

my 23 ly President Board of Trustees.

TUSKEGEE FEMALE COLLEGE,

TUSKEGEE, ALABAMA.

The Fifteenth Annual Session begins SEPTEMBER 14, 1870, and continues forty weeks; divided into two equal terms.

REV. GEO. W. F. PRICE, M. A., President.

REV. C. H. ROSS, M. A., Professor of Latin and Mathematics.

DR. S. M. BARTLETT, Director of Music, with Nine Assistants in the various departments of instruction and discipline.

The President calls particular attention to the fact that Rev. H. B. Ross, of the Alabama Conference, has accepted the professorship of Latin and Mathematics in the institution. Brother Ross is a graduate of Lagrange College, Alabama. He was professor of Mixed Mathematics in that institution for two years. Subsequently he was president of Talladega Female Institute. His classical education, his experience in the practical business of teaching, his acceptable career of itinerant service, his many excellent personal traits, all entitle him to the unlimited confidence of our people.

The College has just closed a most successful year. Its prospects were never more flattering. The present organization of the institution combines all the best features for securing the thorough instruction and efficient discipline of its pupils. The Faculty contains none but tried and trained teachers, whose success has been tested by years of service. The boarding arrangements are under the immediate control of the president, who resides in the building, and supervises the social recreations and the professional duties of the pupils. The health of the girls is in charge of an experienced matron. The table, kitchen and laundry are in charge of a thoroughly trained housekeeper. Miss Shelley, of Talladega, is the governess, and brings to the office high social position, experience as a teacher, liberal education, and matured Christian character. The pupils are under the discipline of the college, and are thereby developing their physical powers, strengthening their constitutions, and imparting grace and dignity to their movements. Religion is the basis of the system of education, and girls are taught that "the truth as it is in Jesus" is the highest attainable wisdom.

CHARGES FOR SCHOLASTIC YEAR OF FORTY WEEKS.

Tuition, according to grade, from \$25 to \$60 00

Tuition in music..... 60 00

Tuition in art, from \$20 to..... 40 00

Tuition in languages..... 20 00

Board, washing and fuel..... 220 00

Instruction in vocal music, free of charge.

Instruction in sciences, free of charge.

Use of models in art, free of charge.

Use of instruments for practice, free of charge.

Use of library of reference, free of charge.

No incidental charges of any kind.

Tuition for each term payable in advance.

Address: REV. GEO. W. F. PRICE, President.

my 3 ly

WESLEYAN FEMALE INSTITUTE,

STAUNTON, VIRGINIA.

will begin its next session September 20, 1870, and close June 22, 1871.

REV. WILLIAM A. HARRIS, President.

The Christian Advocate.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, OCTOBER 8, 1870.

NO. 38.

NEWS OF THE WEEK.

DOMESTIC.

SAN FRANCISCO, Sept. 30.—The volcano near San Rafael Valley, after remaining dormant for two years, is violently erupting, throwing out smoke, ash, and cinders. Telegrams from San Diego say the volcano is plainly visible from there. The whole southern horizon last night was dark with the smoke. (Remond, Sept. 30.) Superintendent Kates, of the Western Union Telegraph Company's lines, telegraphs this morning that a number of buildings at Lynchburg have been swept away, and that both the gas and water works are submerged, and houses from the country above have been floating by all the morning and during last night.

The new iron bridges of the Southern roads were carried away this morning.

The highest flood ever known there is prevailing at Lynchburg.

The bridge across James river, a quarter of a mile long, was washed away last night.

The depots of the Orange and Alexandria railroad and the Virginia and Tennessee railroad are submerged. The canal is submerged, and the boats are going about over the towpath and through the lower streets of the city.

The water washed up the main gas pipe, and at eleven o'clock last night Lynchburg was suddenly thrown into total darkness.

A large number of employees on the Southside railroad are cut off on an island below the city.

The fire-het will reach Richmond about two o'clock to-day, and the river here has already risen a foot. Merchants are busy in the lower portion of the city removing goods in time.

The telegraph lines are down in all directions.

WASHINGTON, Oct. 1, noon.—The Potomac river, the canal and the adjacent streams are all flooded. The Long Bridge is under water. Provision has been made to avoid delaying the mails or passengers. The weather to-day is clear but very hot. The loss of the Orange and Alexandria railroad is roughly estimated at \$500,000. The chain bridge has been washed away. A span of it is now lodged against the Long Bridge, and experts say that both will go. The only communication at present between here and Alexandria is by boat.

RICHMOND, Oct. 1, noon.—The James river here rose twenty-five feet during last night and this morning, and is now within a foot of the Danville railroad bridge and Mayo's passenger bridge. The streets for four or five blocks in the vicinity of the old market, which is the lowest point in the city, are submerged in four feet of water. Thousands of persons are on the river banks waiting to see the bridge go.

The lower portion of Libby prison took fire at eleven o'clock this morning, from a quantity of lime, which was on the ground floor, being overflowed by the flood. The fire was stopped before much damage was done.

The citizens are volunteering their services to remove the tobacco from the warehouses on the river bank.

Everything is excitement. Furniture, trunks, and barrels of flour and whisky are floating down the river.

The river at Lynchburg has fallen eight feet.

Several bridges on the Virginia and Tennessee railroad were washed away.

The persons who were drowned at Lynchburg were Mrs. Ransom and her daughter, three children of Mr. Whitlow, and a colored woman.

New York, Oct. 1.—The steamer Ville de Paris, for Havre, which was to have sailed to-day for Europe, is detained until Monday to carry out military stores. She will take two hundred recruits for the French army, including the French General Paul Lefevre.

Governor's Island has been placed in quarantine in consequence of the existence of yellow fever there. The same disease is in the city.

STANTON, Va., Oct. 3.—Colonel Christian, just from Lexington, reports that on the evening of the twenty-eighth of September General Lee, after presiding over an unusually large meeting of the faculty of Washington College, attended a protracted and exciting meeting of the vestry of the Episcopal church. On his return to his residence he fainted from the extraordinary fatigue, and was placed in bed, where he has since remained, under the advice of his physicians.

He has had no symptoms of apoplexy or paralysis; only a torpor. He has had full use of bodily powers, and speaks as occasion requires. His physicians confidently expect his recovery in a day or so. At noon to-day (Monday) he was cheerful, and his family and physicians are confident of his speedy restoration.

Colonel Christian left General Lee's house at twelve o'clock to-day. This is reliable.

New York, Oct. 5.—No further case of yellow fever has occurred in the city, though some additional ones are reported on Governor's Island.

FOREIGN.

LONDON, Sept. 29.—A dispatch has been received from Maudslah, dated yesterday, stating that Strasburg surrendered only when the helpless condition of the place rendered it almost inevitable. The victims of a heart-rending fever which was prevalent in the city seemed almost numberless. The inhabitants generally were famishing, and the dead and dying were lying in crowds in the streets. This state of things decided General Ulrich to capitulate. In doing so he shed tears and exclaimed, as the Prussians entered the city: "J'ai fait mon devoir."

HAVRE, Sept. 29.—The merchandise remaining here is protected by neutral consuls, their flags flying over the warehouses.

A huge electric light illuminates the entire bay and enormous chains protect the entrance to the harbor.

TOWN, Sept. 29.—The prefects of the several departements adjacent met to organize further means of defense.

The organization is progressing rapidly. Companies of thirty men are being received by the government, who are permitted to choose their own officers, and will act independently of the regular troops. If circumstances demand it, these companies will be united under one command. The departments will furnish arms and equipments for this force. Their term of enlistment is for the war.

Another corps is organizing, which will carry the black flag. They announce that they will neither give nor take quarter.

The troubles at Lyons from the Red flag continue, though the hope of their suppression has not been abandoned.

Marseilles is quiet.

HAVANA, September 29.—Alfred J. Clark has been recognized as the American consular agent at Remedios.

Regent Serrano has ordered the execution of the Spanish emancipation law in Cuba and Porto Rico. All children of slave mothers born henceforth are free, and all those born since 1868 are free upon certain conditions. All slaves over sixty years of age at this date are free, and all others as soon as they arrive at that age. All slaves belonging to the state are declared free; also all those who have rendered public service during the insurrection. As soon as Cuban deputies are admitted to the Spanish Cortes the government will present the project of a law for complete emancipation of all slaves.

ROME, Oct. 3.—Later returns show fifty thousand for unity and five hundred against. Several monks and priests voted "Yes."

BARCELONA, Oct. 3, via London, Oct. 3.—Thirty-five new cases of vomit reported to-day and twenty-nine deaths.

VIENNA, Oct. 3.—The Review, of this morning, says the alarming news about Russian war preparations is untrue.

General Ignatiff is still at Constantinople.

Russia makes no war movement. The relations between Russia and Austria leave nothing to be desired.

New York, Oct. 4.—Times' special:

PARIS, Oct. 4.—Judging from the present indications I am inclined to think the Prussians will walk into Paris at their first serious attack. No works can stand against Krupp's cannon at the range which the besiegers can place them by recent advances.

ROME, Oct. 4.—It is reported that the cabinet is divided whether to remove the government to Rome immediately, or await a breathing spell after so great a surprise of good fortune.

October 18 is fixed for the King's visit to Rome.

MADRID, Oct. 4.—The struggle between monarchy and republicanism may last here for a few months longer, but it may be taken for certain if the regent obtains the power

he demands, and inclines the balance in favor of any particular candidate for the throne, he is lost.

It is equally certain if Prim assumes the dictatorship we shall have a civil war lasting a year.

TORONTO, Oct. 5.—The authorities have not yet been apprised of the fact that the Napoleon manifesto is most probably a forgery.

The reporter of the Gazette de France says: "Unfortunately for the Bonapartists, they publish their documents separately. Rouher, addressing the Emperor on the morning of the declaration of war, said: 'Animated by a calm hope in the true force of the empire, you know how to wait; but the past four years you have perfected the armament of the soldiers and raised to the highest pitch the organization of our military force. Thanks to your care, sire, France is ready.' After that," the Gazette adds, "it is idle to pretend that Napoleon is not responsible for this war."

Dispatches further tending to establish the death of General Von Melke are published to-day.

It is reported the Franciscans recently blew up and destroyed the railway for a long distance near Saverne, and that the Prussian communications are badly interrupted in consequence.

Litz, one of the members of the Committee of National Defense, and a delegate of the government, has been arrested by the Garde Mobile at Besancon. The nature of the charges preferred against him are unknown.

MADRID, Oct. 5.—The vomit has spread to the city of Alente. The citizens are leaving town.

Olozagui's resignation as minister to France has been formally accepted.

Heavy rains have fallen in Valencia recently, and the streams are swollen to an unusual size. Much damage has been done.

LONDON, Oct. 5.—It is believed that England and Russia are actively engaged negotiating an armistice.

Reports are current that the Meeklenburgs will be incorporated with Prussia. The Grand Dukes will be compensated by the cession to them of Alsace and Lorraine.

A large meeting of the German Catholic aristocracy is about occurring at Fulda, to consider the infallibility dogma.

LIVERPOOL, Oct. 5.—Bark Radcliffe, from Quebec, foundered at sea. Three of the crew were lost. The rest were saved.

THE FRANCO-PRUSSIAN WAR.

LETTER FROM BISMARCK.

BERLIN, Sept. 23.—The following letter is from Bismarck to the means and conditions of peace:

MEXICO, Sept. 16.—Your excellency is familiar with the circular which I have addressed to the foreign representatives of France, in the name of the men for the present holding power in Paris, and who call themselves "Le gouvernement de la defense nationale." I have learned simultaneously that M. Thiers has entered upon an confidential mission to foreign courts; and I may presume that he will endeavor on the one side to create the belief in the love of peace of the present Parisian government, and on the other side request the intervention of the neutral powers in favor of a peace which shall deprive Germany of her victories and the right to make the next attack of France on Germany more difficult. We cannot believe in the sincerity of the desire of the Parisian government to make peace so long as it continues by its language and its acts at home to excite the passions of the people, and to increase the hatred and bitterness of a population stung by the sufferings of war to repudiate in advance every basis acceptable to Germany and unacceptable to France. By such a course it becomes impossible to make a peace, for which the people should be prepared to use calm words and words corresponding with the gravity of the situation.

If we are to believe that negotiations of peace with us are honestly intended, the demand that we should conclude an armistice without any guarantees for our conditions of peace could be meant seriously only on the supposition that we lack military and political judgment, or are indifferent to the interests of Germany. Moreover, the hope entertained by the present rulers in Paris of a diplomatic or material intervention of the neutral powers in favor of France prevents the French people from securing the necessity of peace. When the French nation becomes convinced that they having

wantonly conjured up the war alone and Germany having had to fight it out alone, they must also settle their account with Germany alone, they will soon put an end to their resistance, now surely unavailing. It would be an act of cruelty to the French people by the neutral powers to permit the Prussian government to nourish among the people hopes of intervention that cannot be realized, and thereby strengthen the contest.

We are far from any inclination to mix in the general affairs of France. It is immaterial to us what kind of government the French people shall formally establish for themselves. The government of the Emperor Napoleon has hitherto been the only one recognized by us. Our conditions of peace with whatever government we may negotiate are wholly independent of the question how or by whom the French nation is governed. They are prescribed to us by the nature of things and by the law of self-defense against a violent and hostile neighbor.

The unanimous voice of the German government and the German people demands that Germany shall be protected by better boundaries than we have had hitherto against the dangers and violence we have experienced from all French governments for centuries. As long as France remains in the possession of Strasburg and Metz, so long is its offensive strategically stronger than our defensive, so far as all South Germany and North Germany on the left hand of the Rhine are concerned. Strasburg in possession of France is a gate always open for attack on South Germany. In the hands of Germany, Strasburg and Metz obtain a defensive character in more than twenty ways.

We have never been aggressors of France, and we demand of the latter nothing else than our safety in our own lands—so often threatened by it. France, on the other hand, will regard any peace that may be made now as an armistice only, and in order to avenge the present defeat, will attack us in the same quarrelsome and wanton manner, as this year as soon as it feels strong enough to do it, from its own resources or from foreign alliances. In rendering it difficult for France, from whose initiative alone the disturbances of Europe have hitherto resulted, to resume the offensive, we at the same time act in the interest of Europe, which is that of peace. From Germany no disturbance of the European peace is feared.

After having had this war forced upon us, which for four years by our care and by restraining the feelings of our national self-respect so incessantly outraged by France, we had prevented, we mean now, for our future safety, to demand the price of our mighty efforts. We shall demand only that which we must have for our defense. Nobody will be able to accuse us of a want of moderation if we insist on this just and equitable demand. Your excellency will make these views your own and advocate them in discussions.

The above is a circular addressed to the North German representatives abroad.—*New York Tribune.*

HEAVEN is the very element, and Christ is the center, of every gracious soul. Heaven only is the breathing place, and Christ only is the resting place. There is the place of its respiration, and here is the seat of its repose; it cannot live out of that element; it cannot rest out of this center; it is always struggling, till it gets to heaven, always rolling till it comes to Christ. "Return unto thy rest, O my son," said David. Lord, let me draw no breath but that which I fetch from heaven; and never let me rest till I rest in thee.—*Divine Breathings* (1750).

THE FIRST SURGEON OF ANESTHESIA. The application of chloroform to patients requiring surgical aid was at first opposed by some, on the ground that to prevent the sensation of pain in connection with "visitations from God" was to contravene the decrees of an all-wise Creator. Dr. Simpson's reply to these objectors was: "Did not God throw Adam into a deep sleep when he wished to extract a rib out of which to make him a wife?" Some were silenced, if not convinced that anesthesia was of divine origin, and first practiced in the Garden of Eden.

Do it.—"How," said Mr. Munsell to Mr. Yates, "do you accomplish so much in so short a time? Have you any particular plan?" "I have, I go and do it."

KENTUCKY CONFERENCE ITEMS.

This body, which met at Covington, Kentucky, adjourned on the twentieth of September:

FINANCIAL REPORT.
Claims of preachers, \$63,967; receipts, \$56,957; receipts of pre-siding elders, \$5,944; Conference collection, \$1,677 55; Bishops' fund, \$1,035 80.

TRANSFERRED TO THIS CONFERENCE.
Samuel W. Spear, Dr. J. A. Henderson and Jacob Ditzler, from the Louisville Conference.

VOTE ON PROVISION.
The Bishop submitted to the Conference the proviso proposed by the General Conference, investing the Bishops with a veto power in the proceedings of the General Conference, and seventy-nine votes were found in favor and none against.

MISSIONS.

W. W. Chamberlin, treasurer of the Missionary Society, presented a report of the collections for missions, showing the amount of collections for circuits and stations, \$3,265 98; anniversary collection, \$217 25. The assessment upon the Conference of \$1,500 for account of the old debt was reported to the Conference, and the whole amount was pledged by subscription taken in the Conference room.

STATISTICAL SECRETARY'S REPORT.

White members, 17,203, increase, 662; colored members, 220, decrease, 554; adult baptisms, 1,190, increase, 58; infant baptisms, 304, increase, 57; local preachers, 114, increase, 6; Sunday schools, 130, decrease, 10; officers and teachers, 947, decrease, 70; scholars, 6,216, decrease, 3,779; volumes in library, 22,049, decrease, 2,840; Sunday school papers, 1,759, increase, 242; church periodicals, 953, increase, 256; number of churches, 218; value of churches, \$597,800, increase, \$69,254; number of parsonages, 30, increase, 1; value of parsonages, \$64,400, increase, \$1,250; amount of church repairs, \$24,413, increase, \$3,831 50; amount of parsonage repairs, \$4,476 85, decrease, \$7,366 90; collections for American Bible Society, \$961 10, increase, \$134 95; collections for Sunday schools, \$2,215 97, increase, \$27 99.

NOT TOO SWEET.—In Free Milton Church, Glasgow, in the days when Dr. John Duncan was minister, there sat one of the "men" from Ross-shire—a picturesque man arrayed in a blue camelot cloak, with a bright red handkerchief tied up to his cheeks. He was in the habit of walking into the vestry after the sermon, and giving the young minister advice. A young friend of ours was preaching an early sermon in this church, and after sermon this extraordinary figure, whom he had noticed under the pulpit, stalked into the vestry and said: "My young friend, ye hae g'in us a sweet discourse the day. But there's nae thing I would say, a discourse nae by owre sweet. I would say to you as Boaz said (Ruth second and fourteenth): 'Dip thy morsel in the vinegar.'"—*Dr. Begg.*

The Rev. P. T. Martin, of Dickson circuit, Tennessee Conference, says he held protracted meetings from June 5 to September 20, and had one hundred and fifty conversions and one hundred and forty-three accessions. He was assisted by Brother John Rooker. Truly that looks like business. Now, with so much work cut out, what pastoral diligence will be required to see that they "lose not those things which they have wrought!"—*Nashville Christian Advocate.*

FLORIDA CONFERENCE.—The Southern Christian Advocate says: "The approaching session of this body will be held at Tallahassee, January 4, 1871—the seat having been removed from Key West by authority of the presiding elders and the Bishop."

ATLANTA, GEORGIA.—The Rev. W. C. Dunlap writes to the Southern Christian Advocate, September 10: "Our meeting still goes on—five weeks to-morrow since it began; one hundred conversions and one hundred and fifty accessions."

STRANGE EPIGRAPH.—In a country graveyard in New Jersey is said to be a plain stone, with this inscription: "Julia Adams, aged 19, who died April 17, 1829, of thin shoes."

REBAPTISM.

The following pertinent and instructive observations on this subject are from the pen of Dr. Summers, of the Nashville Advocate:

A correspondent wishes to know if our church sanctions rebaptism in the case of an adult who is dissatisfied with his baptism in infancy. The church does not favor rebaptism. In the General Minutes of the Methodist Episcopal Church in America, December, 1784, when the church was organized, we find the following: "Quest. 46. What shall be done with those who were baptized in their infancy, but have now scruples concerning the validity of infant baptism?" "Ans. Remove their scruples by argument, if you can; if not, the office may be performed by immersion or sprinkling, as the person desires." In the Minutes of 1786 there is the same question, numbered forty-four, and the same answer, only the word "pouring" is inserted before "sprinkling."

But after 1786 it appears that this provision was removed, and has not appeared in the Discipline since. The late General Conference was memorialized to express an opinion on this subject, and the matter was referred to a committee, which reported that no action was needed. The report was adopted. Personally we are opposed to rebaptism, as we have stated in our Treatise on Baptism. But we do not oppose it on the ground of the High Churchmen, that a man cannot be born again but once, and that takes place in baptism. If by regeneration they mean a change of the heart, we deny that it ever takes place in the baptism of infants, or, indeed, in the case of adults, unless they exercise justifying faith first in the moment when the water is applied—and then the water merely symbolizes the thing signified, the cleansing influence of the Holy Spirit. Baptism as an external ordinance, is a mode of professing Christ. The baptismal vow is an oath of allegiance, and there is no necessity of repeating it, as an assumption of the obligation it involves is the great matter, and the baptismal vow is virtually repeated in the other great ordinance, the Lord's Supper. The time and mode of baptism are small matters; the stipulations of the baptismal vow—repentance, faith, and obedience—are of infinite importance; and we do not see how the repetition of baptism can give greater solemnity. Indeed we fear that it might tend to promote ritual rather than experimental and practical religion. No minister is bound to rebaptize any one merely to satisfy his "scruples"—provided the matter and form of baptism were duly observed—for once admit the principle that he is so bound, and whither will it lead?

DEATH OF THE REV. CHARLES L. HAYES.—Another of the superannuated preachers of the South Georgia Conference has been removed by death. The Rev. Charles L. Hayes joined the Georgia Conference in 1835; but he has been residing many years, a superannuated preacher, in Alabama, where he died. William Lowther, Esq., in sending the resolutions of respect to his memory passed by the Crawford quarterly conference, Montgomery district, says: "These resolutions are an evidence of the confidence and esteem in which Brother Hayes was held in this section, where he has for many years resided. Another laborer in the Master's vineyard has been called to receive his wages. He was no sluggard. Ever active, industrious and faithful in sowing the word of God, his life was a living epistle read of all men. He has left a vacuum hard to be filled. His obituary might be summed up thus: The world has been the better for his having lived in it. He died as he lived, in faith."—*Southern Christian Advocate.*

Dr. Hayes writes us from the Missouri Conference: "The district returns, taken in connection with the reports of the new Western Conference, show that at least four thousand people joined our church in the territory of what was last year the Missouri Conference." From this we presume that the members within the bounds of the Western Conference are not comprehended in the total number of members reported in the minutes sent us from the Missouri Conference.—*Nashville Christian Advocate.*

MANY favors which God giveth us travel out for want of hemming; through our own unthankfulness; for though prayer purchaseth blessings, giving praise doth deepen the quiet possession of them.—*Fulder.*

The Christian Advocate.

SATURDAY, OCTOBER 8, 1870.

AUTUMN WOODS.

BY W. C. BRYANT.

Are in the northern gale
The summer trees of the trees are gone,
The woods of autumn, all around our vale,
Have put their glory on.

The mountains that unfold,
In their wide sweep, the colored landscape
Round, the green fields below,
Seem groups of giant kings in purple and gold.

That guard the enchanted ground,
The woods that crown
The upland, where the mingled splendors
Of the gay company of trees look down
On the green fields below.

My steps are not alone
In these bright walks; the sweet southwest
Winds, rustling where the painted leaves are
Strewed.

Along the winding way,
And far in heaven, the while,
The sun, that sends the gale to wander here,
Pours out on the fair earth his quiet smile.

The sweetest of the year,
Where now the solemn shades
Verdure and bloom, where many branches
Meet.

So grateful when the noon of summer made
The valleys sick with heat,
The sun, that sends the gale to wander here,
Pours out on the fair earth his quiet smile.

Let in through all the trees
The strange rays; the forest depths are
Bright with the new light,
The sun, that sends the gale to wander here,
Pours out on the fair earth his quiet smile.

Twinkles like beams of light,
The sun, that sends the gale to wander here,
Pours out on the fair earth his quiet smile.

And glimmerings of the sun,
The sun, that sends the gale to wander here,
Pours out on the fair earth his quiet smile.

And glimmerings of the sun,
The sun, that sends the gale to wander here,
Pours out on the fair earth his quiet smile.

And glimmerings of the sun,
The sun, that sends the gale to wander here,
Pours out on the fair earth his quiet smile.

And glimmerings of the sun,
The sun, that sends the gale to wander here,
Pours out on the fair earth his quiet smile.

And glimmerings of the sun,
The sun, that sends the gale to wander here,
Pours out on the fair earth his quiet smile.

And glimmerings of the sun,
The sun, that sends the gale to wander here,
Pours out on the fair earth his quiet smile.

And glimmerings of the sun,
The sun, that sends the gale to wander here,
Pours out on the fair earth his quiet smile.

And glimmerings of the sun,
The sun, that sends the gale to wander here,
Pours out on the fair earth his quiet smile.

And glimmerings of the sun,

The sun, that sends the gale to wander here,
Pours out on the fair earth his quiet smile.

oncamped in their journeys to the promised land. Excellent and substantial tents have been erected, and more, doubtless, will go up, and the China Grove camp ground is regarded as a permanent fixture. On Sunday it was estimated that five thousand people were on the ground. Besides the building of tents, preparing the grounds and the cost of the arbor, which was about \$250, we raised, by subscription and cash, about \$200 for missionary and Sunday school purposes. Now, Mr. Editor, if you get tired of the monotony of city life and the editorial tripod, and wish to see an occasion which will lead your mind back to the days of primitive Methodism, throw aside your scissors for awhile and come to our camp meeting.

The residue of the district is not in a very prosperous state, and many of the circuits are not doing more than holding their own. Many of the preachers are not being supported, and are in straightened circumstances. The presiding elder has, up to date, received about \$170, and the preachers have not been paid any better. Liberal and noble souls there are, but the Ananias and Sapphiras are too much in the ascendency. I hate to write this after telling you about the camp meeting, but candor and truth demand it. I am now on my last round, and hope that the quarterage will come up better than our fears. Why will Methodists, who are able to support their preachers, drive them from the walls of Zion by their stinginess, and compel them to go into secular employment to make a living for their families? I have never yet known a community that did so but what the curse of God and blight rested upon them.

WESLEY B. DENNIS.
NEWTON, ALA., Sept. 16, 1870.

MILTON BIBLE SOCIETY.

Mr. Editor: The Rev. S. P. Richardson, agent for the American Bible Society for the State of Alabama and west Florida, has been with us; and in addition to his preaching for us, and preparatory to re-establishing the Milton Bible Society, Florida, on Sabbath, the twenty-fifth instant, in the Methodist Episcopal Church South, he delivered one of his most able, eloquent, forcible, and effective addresses in behalf of the Bible cause, and pledged himself, as such agent, that if the congregation would raise \$100 he would have the American Bible Society to give \$200 worth of suitable Bibles and Testaments for gratuitous distribution among the destitute poor. The \$100, at the proper time, was raised, the names of the contributors taken down and handed in, the amount contributed by each annexed to the name, either lady or gentleman. The contributors constituted the membership of the society, which at once proceeded to elect its officers for the present year, which resulted in the election of Captain Daniel C. Monroe, president; Mr. Henry A. Bushnell, vice president; Judge John Chain, secretary; Hon. Neill McMillan, treasurer; and Major William J. Keyser, Dr. Z. Swift, James A. Chaffin, Esq., and Messrs. William A. C. Benbow and John H. Cross, directors.

By request and agreement the officers met the next day at nine o'clock A. M., at Judge Chain's office, the Rev. Mr. Richardson being present. This meeting of the officers requested the NEW ORLEANS CHRISTIAN ADVOCATE, the Southwest Presbyterian, of New Orleans, and the Pensacola papers to publish this notice of the matter in their respective papers, and the secretary to furnish them with a copy.

JOHN CHAIN,
Sec. M. B. Society, Florida.
MILTON, FLA., Sept. 26, 1870.

A CELEBRATED divine, who prided himself upon the originality of his sermons, was once told, jocularly, that a sermon he had preached was excellent. "But," said the wag who told him, "I had previously read every word of it in a book I have at home." The astonished clergyman begged for a sight of the volume. "O, I have no doubt you have the same book in your library; it is Webster's Dictionary."

LETTER FROM ALABAMA.

Mr. Editor: In your last issue I see a communication from Dr. J. Hamilton, "To the Eastern Members of the Alabama Conference," in which our attention is directed to a resolution of the Mobile Conference, "passed unanimously at its last session," requiring each preacher to take up a Conference collection equal to eight per cent. on his salary, or to pay it himself. This plan, it was supposed, would raise a fund sufficient to meet the demands of all the claimants.

As the doctor has heard of no "such measure" over here, he thinks it likely our collections will not equal those of the western section, and asks, Will we "expect a common fund to be made at the approaching session of the new Conference, and an equal distribution to be made to all beneficiaries, when equal efforts and sacrifices have not been made by all to raise the fund to a proper point?" He therefore suggests that we adopt the Mobile plan, and "hopes the presiding elders will move in this matter at once."

It is truly refreshing to us over here to learn that the Montgomery part of the new Conference is likely to be behind the Mobile section in any of the public collections. The history of the last four years contains nothing to suggest such an idea. We begin to hope they are about to do better over there.

For the Montgomery district I must decline the suggestion, for the simple reason that we will lose money by it. The assessments for all the preachers in charge amount to \$11,100. Eight per cent. on this amount gives \$888. At our last Conference the financial board assessed to my district \$1,400 for the Conference fund, which is \$512 more than the Mobile plan would raise. The demands of our claimants are too urgent to allow of our losing that much. I have already divided the amount among the several churches, and have no doubt—judging from the past—of its being collected, though some of the preachers may not get the full amount assessed them.

Our other districts will, I trust—taking a hint from the doctor's fears—raise their full assessments, and then there will be enough to meet the claims of our beneficiaries.

The present condition of the church in this district is encouraging. In some of the charges meetings of interest and profit have been held, and the church greatly strengthened. This is especially the case at Montgomery, where there has been an ingathering which has surpassed anything known there for years. At present meetings of promise are in progress at this place and at Opelika, and we hope there will be gracious revivals in all the charges before the year closes.

Money is very scarce, and the stewards have had difficulties in making collections; but they seem to be animated by the right spirit, and I think, will settle in full with most of the preachers.

Our District Conference, held by Bishop Pierce, was very interesting. An effort was made, according to the Discipline, to make the religious element prominent. Each day at eleven o'clock the Bishop preached with the fire and power of former years, greatly to the edification and comfort of us all. The old adage, "Make a Bishop and spoil a preacher," fails in his case. Brother McCarty, of the Eufaula district, also gave us an excellent sermon. Indeed all the preaching was effective, and a fine impression and influence went out from the meeting. The love-feast on Sunday morning was numerously attended, and a most gracious season.

The business part of the conference was conducted on (to us) a new and rather informal plan. We had no committees, and consequently no written reports. The several pastors were called on for verbal reports of their charges. In consequence of the new order the discussions were not so animated and free as heretofore.

During the year we have been afflicted on the district, and the work somewhat hindered in consequence of it. Before he had made his first

round, Brother Turrentine, one of the oldest and most esteemed ministers among us, was stricken down, and has not yet fully recovered. Brother Wild has also been seriously sick. We greatly feared at one time that his work was about ended, but he is now preaching again. Dr. Cox was compelled to give up his work and remove to Virginia to restore his shattered health. He was with us but a short time, but fully long enough to win all our hearts, and cause us deeply to sympathize with him in his afflictions. While I write Brother Ross watches by the bedside of a greatly afflicted wife, which necessarily restrains the ardor that would impel him, during this the revival season, to be in the saddle and among his people all the time.

At Mount Meigs, where we scarcely had a society at the close of the war, the brethren are erecting a new church, which will cost over \$2,000 when completed; and at other points on this district churches have been remodeled and repainted—showing material prosperity.

East Alabama College, under a new programme—the open course—will commence its fall term on the first Wednesday in October. The institution is now freed from debt, and will be kept so hereafter. From present indications there will be a greatly increased patronage this fall. Tuskegee Female College is once more the property of the church. During the war it was sold for debt, with the right of redemption, on the part of the trustees, on certain conditions. Since the war complications have arisen, and the matter was carried to the courts. During our District Conference a majority of the legal conference met the attorneys representing all claims against the college, and made a satisfactory arrangement by which the whole of the property will be turned over to them as the representatives of the church. Thus this vexed question is at rest, and the rights of the Conference secured. And now let us give to that institution the patronage it so richly merits.

M. S. ANDREWS.
AUBURN, ALA., Sept. 21, 1870.

To the Preachers of the Union Springs District, Alabama Conference.

DEAR BRETHREN: I see in a communication from Dr. Hamilton that he wishes to know if the preachers of the eastern part of the Alabama Conference will raise for the Conference fund eight per cent. on the salaries received by the preachers, according to a resolution adopted by the Mobile Conference. Of course the rule is not binding on us, as we did not make it; but let us see if we cannot come up to it in our district.

Eight per cent. on the salaries assessed to you will make your Conference assessments as follows, viz:

Union Springs station	\$120 00
Mount Hilliard circuit	40 00
Lino Creek circuit	64 00
Pine Level circuit	46 00
Rocky Mount circuit	78 00
Fort Deposit circuit	80 00
Sandy Ridge circuit	62 00
Greenville station	120 00
Rutledge circuit	48 00
Troy circuit	90 00
Brundidge circuit	48 00
Elba mission	20 00

J. W. SHORES, P. E.

To the Members of the Former Montgomery Conference.

BRETHREN: As the minutes of the last Conference were not published, permit me to remind you of a resolution unanimously adopted at that session that we would present the claims of the Preachers' Aid Society to our people and solicit contributions for the same. It is important that the original fund should be increased, that we may be able to do more for our brethren who come up to the Conference from hard work, almost totally destitute and debarraged as claimants from the Board of Finance. Do not fail to bring up something for this charitable institution.

A. J. BAGGAS,
Pres. Preachers' Aid Society,
Former Montgomery Con.
BIRMINGHAM, September, 1870.

BE DEAF to the quarrelsome, blind to the scorner, and dumb to those who are mischievously inquisitive.

A boy in Maryland fell dead a few days since while making a "home-run" in a game of base ball.

NEWS FROM THE CHURCHES.

NEW ORLEANS, ALA., Sept. 29, 1870.

Mr. Editor: Say to the friends of Zion that we have had some gracious seasons of divine grace on the Brush Creek circuit, Mobile Conference, Bethlehem, Providence, Salem and Mount Zion. We have had thirty accessions to the church. We have a protracted meeting appointed for every Sabbath in October. Pray for us. Yours,

J. W. McCANN.

SHUQUALAKE, MISS., Sept. 28, 1870.

Mr. Editor: We have just closed a protracted meeting at Spring Hill, Summerville circuit, Mississippi Conference. The power of God was manifest in the awakening of sinners and the conversion of mourners. There were seven conversions and six accessions. We left thirteen penitents at the altar. The church was greatly revived. May the blessed work still go on.

Very respectfully,
J. F. RANDALL.

AUBURN, ALA., Sept. 30, 1870.

Mr. Editor: Rev. William Shepard is blessed with a gracious revival in his church. He is assisted by the Rev. M. S. Andrews, presiding elder; Rev. J. Spangler and myself. Over fifty conversions in two weeks. Such a revival has not visited this church in years before. The work of grace is still going on, increasing in power and extent. It is propitious for the opening of the college, into which we pray that the revival influences will sweep and convert every young man who comes here. Very truly yours,

A. D. McVOR

The Christian Advocate.

SATURDAY, OCTOBER 8, 1870.

NEVER MIND.

BY M. F. TITMER.

Soul, be strong, whatever befall;
God himself is guard and guide;
With my Father at my side,
Never mind!

Clouds and darkness hover near,
More hearts filling them for fear;
But be thou of right good cheer;
Never mind!

Come what may, some work is done,
Praise the Father through the Son,
Goals are gained and prizes won;
Never mind!

Be thou tranquil as a dove,
Through these thunder-clouds above,
Shines after the heaven of love;
Never mind!

Flauntability of the Romish Conclusion.

Mr. Enron: Start with a church

organized *de novo*, under more positive

law, in the nature of a corpora-

tion, and let us see where we stand.

The organization of the body means

the organization of its government.

There is nothing else to organize.

Then Jesus delivered to these twelve

original corporators, a charter for

the perpetual government of the

body. This charter was delivered

orally, or if written the writing is

lost. Notoriously it does not now

exist except in the safe keeping of

the church where it was first de-

posited. If it is not now pure, in

the hands of the church, then its

safe keeping was not well provided

for; and yet it was divinely provid-

ed for. Did Jesus make a mistake

as to its exact preservation? When

you Protestants think you see a

difference between the Scriptures

and this church law in the hands of

the church, it must be an error in

your construction of the former.

The New Testament was written

long after this church law was made

and delivered to the church, and

was practically operating. It con-

tains some allusions to the church

law, it is true; but the proof that

you Protestants misconstrue the

Scriptures is the truth that infalli-

bility in the book cannot conflict

with infallibility in the church char-

ter previously made.

To say that Jesus organized the

church is the same as to say he pro-

vided perpetually for its legislation,

for its judiciary and for its execu-

tive functions, for these three things

are what you mean when you say

government. Then is it unreasonable

to suppose he appointed a presi-

dent? And why not Peter? And

was not the presidency perpetually

provided for? And is not that con-

stant succession and tactical suc-

cession?

Suppose Luther and his confeder-

ates were, as you say, dealt hardly

with. What of it? They were put

out. And no matter how they got

out, being out, what right had they

to set up another church outside the

church? And so we ask all Prot-

estant churches: Where's your char-

ter? It must come from the *Magna*

Charta, or you must show that

Christ authorized it subsequently.

If the church was organized by

Jesus Christ, or by somebody else,

and so is a government working un-

der a charter—a mere positive law,

in the nature of a charter—then be

it so, and let us keep strictly within

the original government as its func-

tions and functionaries were origi-

nally established. The death of the

original corporators does not affect

the corporation. Their successors

succeeded to all the original rights

and immunities of the original in-

cumbents. Where's the difference

between our Pope and the first

president?

R. ABBEY.

To the Eastern Members of the Ala-

bama Conference.

DEAR BRETHREN: You have seen

the notice of Dr. Hamilton, with

the above heading, in which he in-

forms us: "At the last session of

the Mobile Conference a resolution

was passed unanimously that each

member of the Conference should

bring up a Conference collection

equal to eight per cent. on the

salary he received, and if he did not

collect it from his charge he should

pay it himself." It is true no such

measure was adopted by us, but that

is no reason why their collections

should be greater than ours. I hope

every preacher in the east will raise

more than eight per cent. That

amount may be liberal enough down

west; where they are weak; but in

the east, where we are strong and

have taken possession of the land,

it will not suffice.

Brethren of the east, bestir your-

selves and stop not at eight per

cent., but get ten, fifteen or twenty

if you please. Our responsibilities

have been largely increased, but with

the help of our blessed Master we

are "sufficient for these things."

Let the brethren "collect such au-

thentic information in regard to the

pecuniary circumstances of the usual

clergymen at the Conference, funds

as shall facilitate the business of the

board" at its next meeting.

A. J. BLAGG,
Chm. Joint Board of Finance,
Former Montgomery Con.

These German Provinces of Franco.

These provinces are of great in-

terest to us at the present time,

partly because they are the theater

of the sanguinary battles between

the French and the Germans, and

partly because many well informed

people think that if successful,

Prussia will insist upon the cession

of Alsace and Lorraine, or at least

Alsace. So far we hear only the

utterings of the storm, but there is

no doubt but that the annexation

of these provinces will be the will

of the victorious German nation,

and that such a design is in the

minds of King William and Count

von Bismarck is evident from the

fact that Prussian generals have

been appointed as governors of these

provinces, and that mayors and other

municipal officers have also been ap-

pointed.

Alsace is one of the fairest and

most fertile provinces of France.

To the west lies the Grand Duchy

of Baden, separated by the Rhine;

to the north is the Bavarian Palat-

inate; to the south is the Swiss

Canton of Basle, while the French

provinces of Lorraine and Franco

Compte lie to the west. It is divided

into two departments: Bas-Rhin

and Haut-Rhin, with Strasburg and

Colmar as their respective capitals.

From the year 870 till 1848 the

whole of Alsace was exclusively Ger-

man, but in the latter year Austria

ceded her Alsatian possessions to

France, and by a mixture of diplo-

macy and force France obtained pos-

session of fragment after fragment,

till at length, in the storm of the

French Revolution, the Republic of

Muhlhausen with several sovereign

principalities were annexed, and

Alsace became wholly French. At

the present time the two depart-

ments of Alsace have a population

of nearly eleven hundred thousand,

of whom a little over one million

are of German nationality, very

many of them unable to speak

French. The upper and middle

classes speak good German, but the

lower classes speak a kind of Ger-

man patois, the Alsatian idiom.

Lorraine is of larger area than

Alsace, and is divided into four de-

partments—Meuse, Moselle, Meurthe

and Vosges. To the north it stretches

toward Luxembourg and the Rhine;

to the south is the French province

of Champagne, to the east Alsace,

while the Province of Cham-

pagne bounds it to the west. Far

in the depths of what some people

style "the age of faith," though we

call that period "the dark ages,"

Lotharius the First gave Lorraine

to his son Lotharius the Second,

and after his death, in 868, Lorraine

was divided between France and

Germany, but it subsequently at-

tached to the latter empire. For a

time it belonged to Burgundy, and

about the middle of the eleventh

century the Emperor Henry the

Third conferred the sovereignty upon

Duke Gerard of Alsace, who became

the founder of a long line of dukes

who ruled Lorraine till the year

1736. During the reign of Louis

the Thirteenth, Lorraine was the bone

of contention between France and Ger-

many, and after the battle of Det-

tingen the Austrian captains talked

of completing the work of Marlbor-

ough and Eugene, and of compelling

France to relinquish Alsace and the

three bishoprics—Metz, Toul and

Verdun. At the peace which termi-

nated the war of the Polish suc-

cession, Lorraine was handed over

to Stanislaus, ex-King of Poland, on

condition that it be annexed to

France after his death. Stanislaus

died in 1776, since which time Lor-

raine has been French. Lorraine is

not by any means so exclusively

German as Alsace. Its four de-

partments have a total population

of one million five hundred and

ninety-six thousand five hundred

and forty-eight, and of these the Ger-

mans number three hundred and

fifty-two thousand. The department

of the Moselle is entirely French, and

the Germans are mostly in the re-

gion between Metz and the Vosges

mountains—hence called German

Lorraine.—Intelligencer.

SINGULAR POMPEIIAN STATUES.

During the eruptions of Vesuvius,

which destroyed the ancient city

Pompeii, those who delayed too long

in making their escape fell victims,

for the most part, to the pernicious

effects of sulphuric and carbonic

acid gases, and were rapidly covered

by the showers of fine dust following

the eruption, which, gradually hard-

ening, formed perfect molds of the

unhappy beings who so miserably

perished, from which admirable

casts are taken, showing their forms,

features, expression and attitude

when overtaken by death. At the be-

ginning of the excavations little at-

tention was paid to the natural molds,

only a few having been partially

cast and preserved, the most re-

markable of which were those of a

husband, wife and child; the hus-

band at the moment of death press-

ing tightly to his breast nineteen

pieces of gold and ninety-one pieces

of silver, which were found fixed

to his ribs; the wife fell a coarse

linen cover, in which were found

fourteen bracelets, gold rings, ear-

rings and jewels of less importance.

It was only, however, in 1863 that

M. Fiorelli had the happy idea of

filling these natural molds with a

peculiar solution of plaster, by which

process the victims are reproduced

in their integrity.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, OCTOBER 8, 1870.

Office—No. 415 CAMP STREET, NEW ORLEANS.

Three Dollars per Annum, in Advance.

Address—Rev. LINUS PARKER, 112 Camp Street, New Orleans, La.

Agents—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEE

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. M. MITCHELL, D. D.
REV. A. A. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. W. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM F. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To Subscribers.—Any person wishing to subscribe for this paper, can do so by paying the Methodist preacher in the neighborhood, and forwarding to us his receipt for the same, with the address of the subscriber. The receipt should be sent to the Office of the Christian Advocate, and the receipt ought to be taken in duplicate. Agents are requested, when they receive the paper, to send it to the subscriber, and to send the receipt to the Office of the Christian Advocate. If this cannot be done, the receipt should be sent to the Office of the Christian Advocate. When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

MONEY

By way of gentle reminder we would say to those having funds for the Advocate that this is the hard season of the year financially, and that we need every available dollar to tide us over the present financial stringency. Small sums in many hands make a considerable aggregate. Don't wait till Conference, but remit at once by registered letter, post office money order or draft.

DEATH OF REV. W. W. DRAKE.

The following note from Bro. Herbert announces the sudden death of one of the most promising and useful of our preachers. Brother Drake was the son of the Rev. Dr. Drake, of precious memory, and was named for Dr. Winans. He bore these great names worthily, and was an ornament and a blessing to his church and Conference. We join with thousands of mourners in mourning over his death. He has been called in the early prime of his manhood and of his ministry, but he had already done much for the cause of Christ. Apparently his death is premature and untimely, but God's providence is over all, and there is a life beyond the grave. The early crown is often gemmed with the brightest stars. Brother Drake's last communication to the Advocate was a tender and loving tribute to our Brother Hallberg. They are now together in paradise.

GRANDVILLE, Miss., Sept. 23, 1870.
Mr. Editor: It is with indescribable sadness that we are called on to announce the death of our very dear and highly valued brother, WILKIN W. DRAKE. He died at about nine o'clock last night in the person of this place, after an illness of only a few days. He had a chill on Friday, another on Saturday evening, and a third on Sunday morning, after which the case assumed alarming symptoms, and a physician was immediately called in. But all that he and the assiduous attention of an affectionate wife and sympathizing friends could effect was powerless to arrest the cold hand of the fell destroyer. Thus has the Greenville district been suddenly bereaved of one of the most able and efficient ministers of the Conference. He died as he lived; a good man and true, bitterly regretted by all who knew him. But his record is on high. Some friend will doubtless prepare a more extended obituary.

In sorrow, notwithstanding hope, yours truly, H. H. HUBBERT.

THE CONFERENCE YEAR.

Ecclesiastically Methodists live a year at a time. The chronology of preacher and charge is measured by Conferences. With the Conference the year begins and ends. The system has established peculiar habits of thought and feeling, so that change, or the possibility of it, is contemplated as a matter of course. The excitement and unrest incidental to such an economy has become a luxury and almost a necessity. The people have been educated in it, and they like to think of it as something that may be, even when they are sure that it will not take place. There is a fascination in the suspense, and a certain kind of pleasure in the agony, which neither preacher nor people would forego. The monotony of a settled pastorate is dispelled by the force of an annual appointment, even where the preacher is returned for a series of years, and there is always the certainty of change within a definite period. It must act as a stimulant to the entire church, quickening the great pulses of our Zion, and keeping us from social and mental stagnation. We often find ourselves commiserating the settled pastors of other denominations, and the Bishops, editors and missionary secretaries of our own, who are deprived of this yearly anticipation. If there is something painful in the suspense incidental to our system, there is also much that strikes us as pleasurable. It is a mixed feeling, in which there is at least as much play for hope as fear. No hour is richer in deep emotions than that in which an Annual Conference listens to the reading of the appointments. Utter ignorance is the condition of bliss, and they alone are to be pitied who know where they are going. If the fascination of the sea to the sailor is its storms, the attractions of the itinerancy are, to a considerable extent, in this trial of faith. That brother is most to be envied who, when he hears his appointment, knows nothing of its geography or people. This condition of complete felicity is rarely secured to any but new beginners, but where it occurs they are doubly blessed.

A strong point in Abraham's faith was that "he went out, not knowing whither he went." The itinerancy develops a faith of unquestioning obedience that is peculiarly Abrahamic. Change often brings relief to all concerned, even where peace and people have dwelt together in unity; and the benefits may be considerable where there is present dissatisfaction. It is a happy consideration that they do not always know what is best for themselves, and that our system provides for such occasions. There is also a shifting of the responsibility. The people have not chosen their pastor, the pastor has not selected his charge. They have but to do their duty, and leave the result with God. If the arrangement is a mistake, the consequences do not lie at their door. This closing things up annually, upon compulsion, has its advantages to all concerned, and counteracts the disposition to postpone the duties of the present to another year. As to his present charge it is 99 if a messenger from heaven should say to the pastor, "This year thou shalt die." The work must be kept up and left in a condition to be resumed by other hands.

Preachers and people, according to circumstances, look forward with very different emotions to the end of the Conference year. In some cases there is fear, sorrow, regret; and in others a brightening horizon and the hope of better days. The foot-sore pedestrian is relieved by changing his shoes, and the equestrian knows that a change of steeds is restful to both rider and horse. There is often a strong desire to fly from the ill we know to those we know not of. The interests of families are more difficult to adjust. Wife and children are most concerned, and their welfare is often seriously affected by the inexorable demands of change. As woman is essential to home, so home is essential to woman. She is the happiness, the ornament, the sunshine of home, and home is the sphere and

boon which her nature demands. The education and welfare of children are also promoted by a local habitation. It is a hardship, indeed, to sacrifice them in mind or body to the demands of an excellent and time-honored system. The single man who sticks about an appointment ought to be ashamed of himself; but the gentle wife and tender little ones may be allowed to excuse the anxiety of the considerate husband and father. Charges are often inconsiderate, if not selfish, in this matter; seeking their own gratification and pleasure, though it may be at the expense of the itinerant's wife and children. The work may suit the necessities of the preacher and his family; but perhaps the preacher does not altogether meet the popular demand, and he must be sent where his family will be deprived of society, schools and an adequate support. Well instructed Methodists ought to know that the itinerancy is a system of compensations and of compromises, and that the preacher and his family have claims which must be considered in connection with the preferences of the charge to which he is assigned. Considering how much the preachers are called upon to hear with the people, it is but reasonable and just that the people should be willing to bear with their preachers, even when a change might be desirable.

As for the Conference occasion itself, we would like to see it a time of as much cheerfulness and relaxation as consist with the gravity of the business to be transacted. The only relief the most of our preachers get from the arduous routine of circuit and station work, is while in attendance at the Annual Conference. There they ought to have a little relaxation, and not to be a whit more devout and solemn than at home. The good people should see to it that they are well housed and fed, and that everything about them wears a bright and pleasant aspect. We hope our venerable and grave superintendents will not insist on too much seriousness, as the poor itinerants and their poorer families have enough of this all the year round. They have had no trip to the Adirondacks nor to the springs during the year, and why may they not, for a few days, cast off the working harness, and have a pleasant, social reunion with their brethren and companions in tribulation? It should be a period of refreshment to soul and body, and not to be rushed through at railroad speed. There should be decorum, good order and plenty of sunshine in the Conference room, and also a due amount of prayer. The Conference year should begin with a smile and end with one. There are shadows enough, and toils and tears, between.

Mrs. STUART.—We were much pained this week to hear of the death of Sister Stuart, the wife of President Stuart, of Mansfield Female College. This esteemed and accomplished lady was of great assistance to her husband in the work of instruction. She had few if any superiors as a teacher, and her influence upon the young ladies of the college was most salutary. Her death is a great loss to the cause of education, to society and to the church. To her husband and the mourning household, we tender our heartfelt sympathy.

METROVIST MISS J. L. LANE.—We have received the first number of this paper. It is to appear monthly, edited by Rev. H. P. Walker, and published by J. Grotius Downtain. It is to be devoted to the interests of the Methodist Episcopal Church South, and published at Covington, Kentucky. The present number contains twenty pages of choice reading matter, original and selected, and is beautifully printed on the best paper. The Miscellaneous is mailed to subscribers at the low price of \$1 a year. We wish the editor and publisher abundant success, and congratulate them on their handsome debut in the world of journalism.

THE M. E. CHURCH IN AFRICA.

Dr. Reid, of the Northwestern Christian Advocate, gives his views on this subject. We have no doubt Zion's Herald will be after him fiercely, and that many of the more advanced brethren will take him to task for daring to say that "black is the popular color now-a-days with demagogues," and that the qualities for the office of a Bishop "lie more than skin-deep." Let our friends of the "mixed circular" and protestant doggos, so handsomely concocted here by Dr. Daley, get up a protest against this heresy of the Northwestern. Brother Matlack will surely regard this as something worse than being locked out of his own love-feast by that same protest. "Let us deal with them as men, irrespectively of their complexion!" and, if so, what becomes of the promised bishopries to the faithful down here? Bishop Burns, the only shadow of a negro Bishop, is no Bishop anywhere except in Africa, having jurisdiction over an ordinary presiding elder's charge, and even in this limited field he is an utter failure. There is no danger that Burns or any of his skin will be elevated to the episcopal bench. Our Northern brethren are learning slowly about Africa and the self-supporting qualifications of colored missions. We do not care how much they repudiate caste if they will only admit the logic of history and facts. When the present political fogs are a little dispersed they will wake up to the conviction that they have wasted missionary money somewhere else besides in Africa. As items of news and food for reflection to our neighbors of the Methodist Episcopal Church, and especially to all colored pro tems, and aspirants for episcopal honors, we condense the statements of Dr. Reid, sincerely hoping that he may not be read out of the church for his unparalleled temerity.

Black is the popular color now-a-days with demagogues, but the church must be true to her great head, even in the face of the popular cry. Show us the most fitting men for Bishops, and if we have a vote they shall have it with our eyes shut on their complexion. The qualities for that office lie more than skin deep. It is as much an offense, however, to our judgment and our grace to ask us to vote for a man because he is colored as to ask us to vote against him on that account. What is true of this matter is true of all our dealings with the colored race. Let us deal with them as men, irrespective of their complexion.

On this principle we aver that our work in Liberia would long since have had a sifting. The Bishop there would, if he were white, at once exercise his functions to better purpose, or he would forthwith cease to exercise them at all. We are solemnly satisfied before God that silence on this point is sin to us, and therefore we speak and have spoken. Something must be done for Africa. What that something must be can only be learned by the facts.

The events of that long-past period thrilled our boyhood's heart, and we saved and begged to help on the work. We cannot bear to think that within the last thirty-five years, during which our work in Africa has been a Conference, and for nearly half of which we have had a Bishop there, not one minister has been added to the Conference. We had 17 preachers in 1836, when the Conference first reported, and in 1869 we had just 17 preachers. There were then 575 members in the church, and in 1869 there were but 1770 reported.

Bishop Burns entered on his duties, if we mistake not, in 1858, when he had 1,563 members and 19 preachers, and now we have 1,770 members and 17 preachers. This too in a Christian colony numbering nearly 20,000 colonists, with natives, uncivilized, numbering 700,000 or thereabouts. This result is after more than thirty-five years of labor, and the expenditure annually of a sum perhaps averaging \$20,000. Surely it is legitimate to raise the question whether we have been adequately remunerated, and whether our policy might not be changed for the better—better for us and better for Africa.

of God dwelling in a free republic, bordered by a line of moral darkness, no lighter than an African complexion, should have carried the torch of salvation into the gloom beyond? Sadly we say that we do not find the work thus stretching out into the circumambient gloom. The Liberian Church has not been a missionary church, and this is one reason for its decay, and decaying it evidently is.

We see no work that is done by the African Bishop that at all pays for sustaining him there. He can easily visit all his charges once a quarter, and as there are presiding elders this duplicates the quarterly visit, making one by the Bishop and one by his representative, and unless he can show us that he is pushing outward, of what use is he save to ordain? and we have already shown that this can as well be done otherwise.

We believe this church is feeling the power of the equatorial sun. Tropical heat has wilted it. It has had a great church and a plethoric treasury to lean upon, and has failed to do its work. God means to save the church from the poles toward the equator; a work not to be done even by almighty power and infinite grace, from the equator to the poles, with man a free agent. We must stir up the African Church; we must take away her props; we must make it self-reliant; no Bishop of hers should have the support of our zone without the enterprise of our zone. We must address ourselves to this work. Let the African Church know that we will pay as results are produced; let us withdraw all support from the old charges, and if Africa has not men to go out into the jungle, let us begin again to send them from the United States. We want no Bishop there dozing in his dignity. Wake him up, and put him on a circuit, and if God will give us a man on whom the mantle of Cox has fallen, let us ordain him and send him out; until then let us manage the work from the home office. If to make the Liberian Church independent will inspire it, by all means let us bid her go out; but we are not so clear on this point. What we want is a self-reliant, progressive church in Africa, and we have but little to waste on either the Bishop or the church as it is. We speak the mind of thousands, and we hope Africa will hear us and bestir herself. We have no room for Bishop Roberts on our full bench, if we can read his qualifications, and apprehending that the spirit of the times would cover his deficiencies and those of his church, we have spoken. Let those who will charge us with caste.

EXTREMISTS.

We often hear surprise expressed at the sudden transition of individuals from one extreme opinion to another. This has so often been remarked that one of the world's experimental pieces of wisdom says: "Extremes meet." Whenever, for example, liberty degenerates into the extreme of licentiousness it becomes a despotism. So it was in the bloody and frightful days of "the reign of terror in France." So, too, the extreme fanaticism that provoked persecution in England itself became intolerant and persecuting in New England, even unto death.

All extremists are so from passionate impulse or deliberate self-interest. Those who are the creatures of powerful impulse, and who mistake their passions for the promptings of conscience, are never profound and careful thinkers, who rest their convictions upon well ascertained and solid principles. They are not like the surge-repelling rock, fixed and immovably sure, but rather like the weakly-anchored ship, too easily torn from their moorings and "carried about by every wind of doctrine." This, we think, explains the apparent mystery of sudden transitions from theory to theory and from party to party.

There is no mystery in the movements and sudden changes of the deliberately selfish. Persons of this stripe really undergo no radical change of character or principle. Self-interest is ever their aim. They only adopt new methods and new associations with the hope of greater success. It is observable, when men go from one extreme to another in opinion or party, that they always adopt the extreme views of the party to which they go. They must do this, if fanatics, to convince themselves that they are in earnest, and have been carried away by the force of great principles. If simply selfish, they must take extreme views to convince others that they have

made the change upon principle, and are sound converts.

We have for years witnessed illustrations of this in politics. If a man left the Democrats and became a Whig, he was the most earnest, active and far advanced of the Whigs; and, per contra, if a man left the Whigs for the Democrats, he was the most democratized of all the Democrats. So, in these days, if a man voted for secession, was an officer in the Confederate army or an officeholder under the Confederate government, and was the most ultra and fire-eating of Southern men, if he turns Radical, and seeks office or patronage from them, he is the most ultra universal suffrage, social equality man you can find, combining with these extreme views the ostracism and oppression of his old compatriots.

So in matters churchly. If a man leaves the Methodists, after holding for years the non-essentialness of the mode of baptism, he is apt, if he turns Baptist, to become the most violent advocate of immersion as the only scriptural mode of baptism—the only mode that authorizes a believer to approach the table of the Lord in the sacrament of the supper.

So, too, when a preacher leaves the Methodist or Presbyterian Church to join the High Church Episcopalians, he becomes at once the most violent advocate of extreme ritualistic views. "The church" is ever on his tongue and mingling in his talk—more glorified, it would seem, than the Head of the Church himself. These gentlemen must give some reason for this change. Any other but a reason based upon some point of real or supposed importance, doctrinally or ecclesiastically, would be unsatisfactory to themselves and to others. They must make a great ado about the vast importance of some of the extreme points differing the church they have joined from the one they have left, to convince themselves that they are in earnest, and that great principles have carried them from one church to another.

So, good reader, when you see one of these gentlemen, with his new-fledged zeal for a party or an ism the antipodes of his former affiliations and professions, you will understand "the reason why."

YELLOW FEVER.—We give the number of deaths daily for the seven days since our last report:

September 29	13
September 30	10
October 1	11
October 2	10
October 3	13
October 4	9
October 5	12

Making a total of..... 78

It will be seen from these figures that the fever is somewhat on the decrease. It is still mainly confined to the infected district where it first originated, and the deaths are almost exclusively among the foreign population. We are having bright, cool weather, and are hopeful of the rapid disappearance of the disease. We do not regard this city, however, as altogether safe for unacclimated visitors.

COMMISSION MERCHANTS.—Special attention is called to the card of Messrs. Sutton, Powell & Huey, which appears in our columns this week. This firm succeeds the old firm of J. R. Powell.

The old firm of Payne, Huntington & Co. has, since the death of Mr. Huntington, changed its style to Payne, Dameron & Co. This is one of our oldest and strongest houses, and one of the most reliable and experienced in the cotton business of the Southwest. Their card appears this week in the columns of the Advocate.

To the Presiding Elders of the North Alabama Conference.

DEAR BROTHERS: Allow me again to call your attention to the fact that it will greatly facilitate my preparing for the reception of the members of the Conference to have all the names, beforehand. I hope, therefore, you will at once send me the names of all who expect to attend the annual session at Gadsden, on the sixteenth of November. I am, dear brethren, in Christ, your obedient servant, J. H. THOMPSON, Pastor, Gadsden, Ala., Sept. 24, 1870.

NEW PUBLICATIONS.

THE NEW TIMOTHY. By William M. Baker. New York: Harper & Brothers. 1870.

After dipping into this book in several places we must characterize it as decidedly clever. It is a sort of religious novel. The scenes are in the South, and some of the characters are well drawn. Mr. Baker, the author, is said to be an orthodox minister of the gospel. We have not had time to hunt for heroes in the work, but the general drift seems wholesome, and we intend to read it through it time ever permits such a luxurious indulgence. The New Timothy is a 12mo of three hundred and forty-four pages, and published by the Harpers in their usually elegant style. For sale by Ellis, Camp street, New Orleans.

THE GENIAL SHOWMAN. By Edward Kingston. New York: Harper & Brothers, publishers. 1870.

This work of one hundred and fifty-five pages, bound in paper, is occupied with what purports to be "remembrances of the life of Artemus Ward." The author traveled with Ward, and was with him when he died; but he is an Englishman, and utterly incapable of describing and interpreting American humor. He has evidently done his best, but the book is a failure.

We have received from the publishers, Harper & Brothers, through Mr. George Ellis, "The United States Revenue and Tariff Law," passed July 30, 1870. Compiled by Horace E. Dresser.

From the same publishers we have received "TRUTH TO HERSELF," a romance, by F. W. Robertson.

THE RIVERSIDE MAGAZINE, FOR YOUNG PEOPLE, published by Hurd & Houghton, New York, is always welcome. The publishers know how to cater to the tastes of the young and mingle the amusing with the instructive. The number for October is finely illustrated, and, counting the calendar, contains sixteen first rate articles.

THE NEW ECLECTIC MAGAZINE, published in Baltimore by Turnbull & Murdock, is on our table. The October number has over a dozen articles, original and selected, and every one of them worth reading. This is a Southern periodical, but its intrinsic merits are of so high an order that it be patronized it needs only to be known.

THE SOUTHERN UNIVERSITY.

The next session will begin Oct. 5, and continue without intermission, except one week at Christmas, until the first Wednesday in July. The faculty consists of gentlemen of established reputation. They are:—

Rev. E. Wadsworth, D. D., Rev. J. C. Wills, A. M., O. F. Casey, A. M., N. T. Lupton, A. M., and W. D. Wills, A. B. Greensboro is on the Selma, Marion and Memphis railroad, and this railroad is now in running order within two miles of the town. The cars will take students to the present terminus of the road, and they will run into this town of Greensboro during the present month. All who intend to come here should take tickets to Marion Junction, fifteen miles west of Selma, and thence by Marion and Greensboro train to this place.

Our financial condition is sound. We are on the true University basis. We have all the appliances requisite for imparting thorough education. Students board and lodge in the houses of the citizens, where they are received and treated as members of the family. The large mansion in front of the University has been thoroughly repaired, and is open for the reception of students. We have catalogues and circulars which contain full information, and they will be sent to all who apply for them. Address

W. WADSWORTH, Chairman of Faculty. Greensboro, Ala., Oct. 1, 1870.

The Episcopal Methodist says: "Rev. William L. Hunter, of the Virginia Conference, Methodist Episcopal Church South, died at his home near Emmaus, in Bedford county, Virginia, on the tenth of September. He was in charge of the Bedford circuit, and his disease was dropsy."

Tribute to the Late Thomas K. Price.

At a meeting of the Board of Directors of the Southwestern Bible Society, convened on Tuesday, the thirteenth of September, 1870, William H. Foster, Esq., in the chair, Dr. J. S. Copes offered the following for record in reference to the deceased vice president, Thomas K. Price, Esq., and it was unanimously adopted:

WHEREAS, It has pleased an all-wise God to remove from earth our greatly esteemed vice president, Thomas K. Price, the Board of Directors desire to place upon their records the following memorial:

Mr. Price was one of the founders of the New Orleans and Lafayette Bible Society in 1841, and for many years was its treasurer. In 1850 he was one of the originators of the Southwestern Bible Society, and was a useful and honored director and the treasurer thereof for many years. Upon resigning these offices he was elected a vice president, and so continued, by regular annual re-elections, till his decease.

In the death of this most estimable Christian gentleman we are compelled to realize the loss of a highly valued friend and counselor; and find our hearts repeating the cry of the Psalmist: "Help, Lord, for the godly man ceaseth, and the faithful fail from among the children of men."

It is but a just tribute to his worth as a man and as a Christian to say that his life was an active, demonstrative exhibition of piety; that his religion was warm, his zeal unflagging, and his labors in every good work of private duty and public benevolence unremitting. We feelingly acknowledge the value both of his personal services and his inspiring example during more than thirty years of his hearty support of the Bible cause, and honor the catholicity of his regard for the disciples of Jesus Christ by whatsoever name known. We mourn the loss of his venerable presence and help in our work, and shall ever hold his name in reverential remembrance.

We also request our corresponding secretary to communicate to the family of our deceased friend a transcript of this testimonial, and to furnish the press with copies for publication.

A true copy from the minutes. J. E. C. DORRIS, Gen. Agt. S. W. Bible Society.

The Child's Corner.

THE BABY.

Where did you come from, baby dear?
Out of the every where into here.

Where did you get your eyes so blue?
Out of the sky as I came through.

Where did you get that little tear?
I found it waiting when I got here.

What makes your forehead so smooth and high?
A soft hand stroked it as it went by.

What makes your cheek like a warm white rose?
I saw something better than any one knows.

Where did you get that smile of bliss?
Three angels gave me at one kiss.

Where did you get that pretty ear?
God spoke, and it came out to hear.

Where did you get those arms and hands?
Love made itself into hooks and bands.

Foot, whence did you come, my darling things?
From the same box as the cherubs' wings.

How did they all just come to be you?
God thought about me, and so I grew.

But how did you come to us, my dear?
God thought about you, and so I am here.

THE POWER OF CHILDREN.

A man was leaning, much intoxicated, against a tree; some little girls coming from school saw him there, and at once said to each other: "What shall we do for him?"

Presently said one: "Oh, I'll tell you; let's sing him a temperance song."

And so they did; collecting around him they sang:

"Away the bowl, away the bowl,"
And so on in beautiful tones.

The poor fellow enjoyed the singing, and when they had finished that song, said: "Sing again, little girls, sing again."

"We will," they said, "if you will sign the temperance pledge."

"No, no; we are not at a temperance meeting; there are no pledges here."

"I have a pledge," cries one; and holding up the pledge and pencil, they besought him to sign it.

"No, no; I won't sign it now."

"Sing for me," said the other.

So they sang again—

"The drink that's in the drunkard's bowl
Is not the drink for me."

"Oh, do sing that again," said he, as he wiped the tears from his eyes.

"No, no more," said they; "unless you'll sign the pledge; sign, and we'll sing it for you."

He pleaded for the singing, but they were firm, and declared they would go away if he would not sign.

"But," said the poor fellow, striving to find an excuse, "there's no table here; how can I write without a table?"

"At this a modest, quiet, pretty little creature, with a finger on her lips, came and said: 'Yes, you can spread the pledge on the crown of your hat, and I will hold it for you.'"

Off came the hat, the child held it, and the pledge was signed, and the little ones burst out with—

"Oh, water for me, bright water for me,
Give wine to the treacherous debauchee."

I heard that man, in Worcester town hall, with uplifted hands and quivering lips, say: "I thank God for the sympathy of those children. I shall thank God to all eternity that he sent those little children as messengers of mercy to me."—John B. Gough.

THE GOOD TEACHER.

He understands the lesson. We cannot teach what we do not know. He whose ideas are confused and imperfect can have no confidence in himself, and cannot impart light to others. Therefore the good teacher always examines the lesson, not only that he may understand what the points are, but that he may see which are the most important, and how each can be presented in the clearest manner.

He loves souls. The burden of souls so pressed upon Paul that he cried: "Woe is me if I preach not the gospel." At Athens his spirit was so stirred within him, when he saw the idolatry of the people, that he could not rest. He could no more endure the thought that men should grope on their way in darkness and sin to eternal ruin, than you could endure the thought that those around you were struggling in the waters, just ready to sink, while you remained quiet and unconcerned, extending no hand to help. Souls are precious, and he who realizes that their redemption ceases forever is ready to work with a will.

He has a distinct object in view. He must have if he thus loves souls. When the history, the geography, the manners and customs, and even the sense of the passage is clearly presented, he does not consider his work done. All this is only means to an end. He gathers light from every quarter and concentrates it upon the passage, that he may make that passage tell upon the destiny of an immortal being. He watches for souls. He studies how the heart can be reached; he considers the habits, the disposition, the aspirations of his pupils and the influences

to which they are exposed; he marks the first indication of seriousness; he improves every opportunity to win the soul, as he who seeks to win in the race.

He is a man of prayer. He knows where his strength lies. He knows that the Holy Spirit alone can convert and sanctify the soul. He knows, and is sure that this Spirit is given in answer to prayer. Therefore he continually brings the object of his solicitude to the mercy seat.

He looks for the conversion of souls. He does not expect to sow in vain. He believes that the promises are all yea and amen in Christ Jesus; therefore he is looking to see these lambs gathered into the fold in answer to prayer. On one occasion a person told Harlan Page of the conversion of one in whom he was deeply interested, and was surprised that he seemed so little moved. Observing his look of surprise, Mr. Page simply remarked: "I was expecting this." He walked with God, and prayed, not doubting that his Father in heaven would answer.

The Holy Spirit is with him. "I am not alone," said the Saviour, "but I and the Father which sent me." So the faithful teacher is not alone. He feels his own insufficiency. Therefore, like Moses, he says: "I cannot do except thou go with me," and the Spirit does go with him, filling his heart and making his words words of power.—Independent.

A GOOD ANSWER.—A little Chinese girl was asked: "Were you sure of dying to-morrow what would you do to-day?" She was one of a class. The first who replied said she would be getting her grave ready, which is a very important business among the Chinese; but this dear child answered with a resolute countenance: "I would believe strongly in Jesus."

HOUSEKEEPERS' DEPARTMENT.

LUXURY OF EASY DRESSES.—The following, clipped from "Laws of Life," is especially commended to the careful perusal of ladies who indulge in tight lacing:

"Very few ladies know how to appreciate an easy, healthful dress. They think their dresses are loose, when a man or boy put into one would gasp for breath, and feel incapable of putting forth any effort except to break the hands. Ladies are so accustomed to the tight fits of the dress-makers that they fall to pieces when relieved of them. They associate the loose dress with the bed or lounge. To be 'up' they must be stayed up, and to recommend a comfortable dress to them is not to meet a conscious want of theirs."

"It is a great pity none the less. If they could once know what a luxury it is to breathe deep and full at each respiration, to feel the refreshment which the system takes in by having the blood enlivened and sent bounding through the veins, to have the aids to digestion which such process gives, to have their own strong, elastic muscles keep every organ in place and themselves erect; if they could for a good long while know this blessed luxury, and then be sent back into the old, stiff, straight jackets, they would fume and fret and rave in very desperation if they could not get rid of them."

"As it is they prefer to languish, and sniffer dreadfully, and die young, and leave all of their friends, and their husbands, and their little children; and I do not see any other way but to let them be sick and die till they are satisfied. If only the sinner were the sufferer there would not be occasion to make a great ado about it; but the blighting of future innocent lives, which must follow, renders the false habits of our women in the highest degree criminal."—The Household.

SEEKING EVER THE SUNLIGHT.—Upon a late beautiful winter Sabbath our attention was turned, in a Christian dwelling, towards some choice plants in a swinging basket near the window, when the gentle voice of her who had watered and watched them exclaimed, "How like intelligent creatures they seem; turn them in whatever direction I may, they seek the sunlight, leaning over towards the window." This phenomenon was not new in vegetation, but awakened an interest unfelt before, and something like the admiration created by the presence of a lovely human character. "Seeking ever the sunlight—it is our life," they said by the very law of their growth.

Oh Christian, consider the lesson of these unconscious flowers when the earthly side is dark, and lean and look towards the eternal light, for which the soul will reach longingly for a few days, and then will come the transplanting forevermore to the paradise of the glorious King. Religious Herald.

PROF. SCOTT, of New York, has discovered a new method of healing cancer. He applies to the surface of the sore the chloride of chromium incorporated with stramonium ointment. This causes it to crumble away.

The Farm and Garden.

Preservation of Fruit After Gathering.

I have tried many experiments in keeping fruit, and especially pears, after they have been gathered from the tree, but none of the common expedients seemed to answer the purpose. A very low temperature, and a dry, pure atmosphere present the only sure means of preserving fruit. No sort of packing, such as sawdust, charcoal, dry sand or land plaster, has proved even moderately successful. Packing in air-tight vessels, so far from being useful, is fatal to long keeping; I do not even like close drawers or boxes. In barrels, with numerous openings for ventilation, I think pears may keep well in a cold, dry atmosphere, but I am not sure of it. My objection to packing in barrels is, that it jams and bruises much of the fruit, which will be disfigured and injured by this process. No bruised pear will ever ripen satisfactorily. Hence when pears have been packed in barrels, and carried any distance on railroads, etc., they will probably never keep well afterward.

There is another objection to packing pears in barrels. If, after being packed, they are subjected for a few days to a temperature of seventy-five to eighty-five degrees, they will be so heated that fermentation will take place in their tissues, and the cells of the fruit will be partially ruptured, while chemical changes will be induced in the juices, which will be fatal to long keeping afterward.

The result of my experience in keeping pears may be stated in a very few words.

I think pears intended to be kept for a long period of time, say six months or more, should be carefully hand-picked, when well matured on the tree, and put immediately into a fruit room at a temperature as nearly down to forty degrees as possible. They should be placed in shallow boxes or on shelves, in such a manner that the air can reach them, and so that they will not be bruised or crushed. The fruit room should be kept constantly at about forty degrees; the air should be dry and pure, but no fresh air should ever be introduced into the apartment with a view to ventilation, as such ventilation would introduce fresh supplies of oxygen, the destructive agent of the atmosphere.

In such a room nearly all perishable fruits will keep for an incredibly long period of time. The most delicate pears, such as Bartlett, nearly tree-ripened, will keep for three or four months, if not longer, while the later pears, with tougher skin, will surely keep for six months, and some of the winter pears, I have no doubt, perfectly sound for a year. In keeping grapes, native or foreign, I believe not so much success has been achieved as in keeping most other fruit, though instances of great success are reported. Singularly enough, peaches, which are generally perishable, keep surprisingly well in a cold, dry fruit room, and when brought from such a fruit room into a warmer atmosphere are not much affected by the change.

The great difficulty about keeping winter pears sound and plump which we find in this climate is, that it is almost impossible, without the aid of a cold fruit house, to carry even winter pears through the hot weather in October, when the thermometer frequently shows seventy-five degrees of heat, and no cellar or vault can be sufficiently cool and dry to keep the fruit from passing into a state of partial decay. It requires a temperature nearly down to forty degrees to keep pears for a long period of time, and in this part of the country no cellar, rocky vault twenty-five feet deep, or rocky well seventy-five feet deep, has ever shown a temperature lower than fifty degrees, or thereabouts; generally the coldest lager beer vaults (rocky caverns thirty feet deep) stand constantly at fifty to fifty-five degrees.

Such a fruit room as I have described, cooled with ice to an unvarying temperature of forty degrees, and even lower, in a simple and inexpensive manner, with a perfectly dry and pure atmosphere, without the aid of any artificial absorbent or dryer, I have had in operation at my fruit farm for three years with the most perfect success. This house was examined by a large number of pomologists last September, during the session of the National Pomological Society, and was reported upon by a committee of that society. The report will be found in the published proceedings. This house was invented by a practical man, who had twenty years' experience in handling ice, and can be had by any person who desires to make use of it, without any of the extravagant sums which have been charged for similar houses. There are some ten or twelve houses of this kind, which have been in successful operation in the city of Philadelphia for three years.

The use of ice for the preservation of fruit I regard as an important necessity; and a simple, practically successful method of doing this, without costly machinery or con-

stant attendance, must be regarded by every fruit grower as an achievement worthy of attention.—Dr. J. S. Houghton, in Tilton's Journal of Horticulture.

GOOD DEEDS HAVE NO SABBATH.—Not long since, says a Breslau paper, stood in an eating house, surrounded by a crowd of people. The landlord held the man's hat and cane, and an impudent waiter stood between the guest and the door. The confusion of the old man was indescribable. He seemed to be for the first time in his life, in such a scrape—said nothing, looked down on the ground, and with difficulty restrained his tears, while all around mocked and jeered him. Just then a poorly dressed Israelite, with a long white beard, entered, and inquired what it meant, with an expression of almost feminine curiosity. He was told that the man had eaten and drank, and now that he must pay, he searched his pockets in vain for money. "Well," exclaimed the Israelite, "I see the old man for the first time, but I'll be bound that he did not come here to cheat. And, landlord, suppose he had no money to forget, couldn't you for once give a poor man something to eat, for God's sake? How much does he owe, anyhow?"

The debt was eight silver groschen, and the Israelite, paying this, took the poor old man by the hand and led him to the door. Those present did not seem to enjoy the spectacle, which their brutality had received, and one insolent fellow cried out:

"Hey, Jew, what have you done? This is the Sabbath, and you have touched money!" (This is forbidden to the Israelites.)

"Just now I forgot that I was a Jew, just as you forgot you were a Christian. But you may rest easy on my account; I understand my commandment, which says: 'Remember the Sabbath day to keep it holy.' Just get some schoolmaster to explain it to you, and if he is a reasonable man he will agree with me. 'Good deeds have no Sabbath.'"

And with these words the good man left the room.—The Methodist Recorder.

THE TURN OF LIFE.—Between the years of forty and sixty a man who has properly regulated himself may be considered as in the prime of life. His matured strength of constitution renders him almost impervious to the attacks of disease, and experience has given soundness to his judgment. His mind is resolute, firm and equal; all his functions are in the highest order; he assumes the mastery over business; builds up a competence on the foundation he has formed in early manhood, and passes through a period of life attended by many gratifications. Having gone a year or two past sixty, he arrives at a critical period in the road of existence; the river of death flows before him, and he remains at a standstill. But atwart this river is a viaduct, called "The Turn of Life," which, if crossed in safety, leads to the valley of "old age," round which the river winds, and then flows beyond without a heat or caseway to effect its passage. The bridge is, however, constructed of fragile materials, and it depends upon how it is trodden whether it bend or break. Gout, apoplexy and other bad characters are also in the vicinity to waylay the traveler, and thrust him from the pass; but let him gird up his loins, and provide himself with a fitting staff, and he may trudge on in safety with perfect composure. To quit metaphor, the "Turn of Life" is a turn either into a prolonged walk or into the grave. The system and powers, having reached their utmost expansion, now begin either to close like flowers at sunset, or break down at once. One injudicious stimulant, a single fatal excitement, may force it beyond its strength; while a careful supply of props, and the withdrawal of all that tends to force a plant, will sustain it in beauty and in vigor until night has entirely set in.—A Physician.

WHISKY IN THE WEST.—During the year ending July 1, 1870, Chicago licensed two thousand three hundred and sixteen drinking saloons, deriving therefrom a revenue of \$120,432. The liquor sold in the city and county paid, at fifty cents a gallon, a United States tax of \$3,663,404. They boast seventeen distilleries, sixty rectifiers of whisky, and one hundred and sixty wholesale liquor dealers.

St. Louis has one thousand eight hundred and six licensed saloons, twelve distilleries, thirty-eight rectifiers and seventy-one wholesale dealers. Cincinnati has fifteen hundred saloons.

In each of these cities seventy-five in every hundred keepers of saloons are Germans; the rest are foreigners, or men and women from the Eastern States.

MUSICAL INSTRUMENTS.

PHILIP WERLEIN,

SOUTHERN MUSIC HOUSE,

50 & 52.....BARONNE STREET.....50 & 52
New Orleans.

The house of WERLEIN is the oldest established Music House in the South. Its present reputation shall be sustained and increased by every effort.

The best PIANOS AND ORGANS that this country affords are being sold at from ten to twenty per cent. under current rates, in consequence of systematic management of business and low expenses.

PIANOS, ORGANS, MELODEONS, HARPS, MUSIC, BRASS AND GERMAN SILVER INSTRUMENTS.

String, Violins, Guitars, Banjos, Flutinas, Accordions, Drums, Piano Stools and Covers, and

MUSICAL MERCHANDISE OF EVERY DESCRIPTION.

P. S.—Persons not acquainted with me, favoring other houses, will please send for price lists before ordering. Our Pianos and Organs are imported to this market in sailing vessels, and special low freight contracts are made with the view of selling at the very lowest rates and competing with Northern markets. Every Piano and Organ fully warranted. Second-hand Pianos at very low prices. Pianos repaired at our Factory.

Very respectfully,

PHILIP WERLEIN,

Southern Agent for Dunham & Sons, Marchall & Mittner, and Halo Piano Manufacturers, New York; and Needham & Son, manufacturers of the celebrated Silver Tongue Organs and Melodeons.

Beautiful first class Pianos, seven octave, rich rosewood case, carved legs, front round, corners, serpentine moldings, possessing sweet, powerful and deep tone, with perfect touch.....price, \$450 00

Style 6 Organ—Five stops, diapason, violin, octave, piccolo and tremolo, five octave, two sets reeds, with "on and off" tremolo and combination swell, oil-finished black walnut case, paneled all around, with moldings, brackets and engraved ornaments, inside desk and carpeted double blowing pedals..... 150 00

Style 10—Six stops, two sets reeds..... 165 00

Style 13—Eight stops..... 185 00

Style 26—Eleven stops..... 365 00

Please send for price lists of Pianos and Organs..... not 14

BELLS—BELLS.

CHURCH BELLS. CHURCH BELLS.

We are prepared to furnish Church Bells of Steel Composition, having a rich, deep tone, at the following prices, which place it within the power of all Churches to be provided with a good Bell:

Weight.	Wt. of Bell and mountings.	Price.
28-Inch Bell..... 250 lbs	400 lbs	\$65 00
36-Inch Bell..... 650 lbs	800 lbs	135 00
40-Inch Bell..... 800 lbs	1000 lbs	175 00
48-Inch Bell..... 1200 lbs	1500 lbs	265 00

These Bells are warranted for one year against breakage in ordinary use.

WORTH FEMALE COLLEGE.

BROOKHAVEN, MISSISSIPPI.

On the New Orleans, Jackson and Great Northern Railroad, one hundred and twenty-eight miles north of New Orleans, and fifty-seven miles south of Jackson, will reopen on

The 1st of September, 1870.

Thorough instruction in all the branches given. Charge for board, tuition in English, English text books, school-room stationery, washing, fuel, lights, medicine and medical attendance, \$263 for the term of forty weeks. The languages and music, extra. A deduction of \$50 made for pupils of churches. Number of pupils last term, 165. For catalogue address

H. F. JOHNSON, President.

Not 14

EAST ALABAMA COLLEGE.

AUTUMN, ALABAMA.

The next annual session will open on the 1st of September in October, with a full faculty.

Boys and young men at every stage of advancement can be received either in the Preparatory, Junior or Senior Departments. Additional schools of Modern Languages, Civil Engineering, and Commercial Arithmetic and Book-keeping have been established.

Economy, health, efficient faculty, good society, thorough discipline and the best religious privileges are the peculiar advantages afforded.

It is just the place to train Methodist boys, and there is room for three hundred. If every preacher and layman will work for us to secure students we will open with two hundred.

For full information or catalogue address the Secretary of the Faculty.

DAVID CLOPTON, President Board of Trustees.

MISCELLANEOUS.

THE ARROW TIE.

FOR BAILING COTTON THE ARROW TIE is the most popular, being the best Cotton Tie in use. Planters and Cotton Pressmen everywhere prefer it to all others.

THE ARROW TIE.

was used to cover MORE THAN HALF THE CROP OF 1869, giving entire satisfaction. The patentee and manufacturer of the celebrated ARROW TIE, J. J. McCondy, formerly of New Orleans, now residing in Liverpool, having control of the best and most extensive rolling mills in Europe, is constantly importing large stocks of this popular tie, manufactured of the very best quality of English iron, to meet the increasing demand for it throughout all the Cotton States. Planters can buy or order the ARROW TIE of all dealers in Iron Ties, and of country merchants generally, at the lowest market price; and we respectfully solicit the patronage of Planters and Factors everywhere.

H. T. BARTLETTE AND R. W. RAYNE,

General Agents for the Arrow Tie, 1618 1/2 124 Carondelet St., New Orleans.

BROOKS' IMPROVED PATENT

COTTON SCREW PRESS.

Patented by R. M. Brooks, of Georgia, April 14, 1868.

It took the first premium at the Louisiana State Fair, at New Orleans, April 1869, over eleven competitors; also at the Tennessee State Fair, at Memphis; and more recently at the Mississippi State Fair, at Jackson; and again at the recent State Agricultural Fair, at New Orleans, April, 1870, in a contest with fourteen Cotton Presses, embracing the most approved patents from different States of the Union, North and South.

The following is the certificate of some of the principal cotton factors and merchants of New Orleans. In our circulars can be seen the certificates of practical planters and scientific artisans from several Southern States in regard to the admirable principle and practical working of this Press.

"We, the undersigned, purchased last season, from Messrs. J. B. Jennings & Co., the Brooks' Revolving Cotton Screw Press for our customers, and, so far as heard from, they have given entire satisfaction."

"Messrs. Greenwood & Son, Warren, Crawford & Co., C. L. Wamsley, Irby, McDaniel & Co., Franke & Daniel, Campbell & Strong, Clark Bros., Cy E. E. F. Co., R. & Walker, Violet, Black & Co., Brock Bros, Wright, Allen & Co."

Circulars, giving cuts, with full description, price list, etc., sent by mail on application to J. I. JENNINGS & CO., Proprietors, 14 Union New Orleans.

DRUGS AND TRUSSES.—DR. JOHN C. D'ANGELO.

Dr. D'ANGELO informs the medical profession and others that he has constantly on hand and for sale a complete assortment of HAYS' TRUSSES. These Trusses are made of the best materials, and are adapted for the treatment of all cases of general debility, weakness and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, apoplexy, and all other diseases of the chest, and are especially adapted for the treatment of rheumatism, neuralgia, sciatica, and all other diseases of the limbs, and are also adapted for the treatment of all cases of general debility, weakness and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, apoplexy, and all other diseases of the chest, and are especially adapted for the treatment of rheumatism, neuralgia, sciatica, and all other diseases of the limbs, and are also adapted for the treatment of all cases of general debility, weakness and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, apoplexy, and all other diseases of the chest, and are especially adapted for the treatment of rheumatism, neuralgia, sciatica, and all other diseases of the limbs, and are also adapted for the treatment of all cases of general debility, weakness and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, apoplexy, and all other diseases of the chest, and are especially adapted for the treatment of rheumatism, neuralgia, sciatica, and all other diseases of the limbs, and are also adapted for the treatment of all cases of general debility, weakness and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, apoplexy, and all other diseases of the chest, and are especially adapted for the treatment of rheumatism, neuralgia, sciatica, and all other diseases of the limbs, and are also adapted for the treatment of all cases of general debility, weakness and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, apoplexy, and all other diseases of the chest, and are especially adapted for the treatment of rheumatism, neuralgia, sciatica, and all other diseases of the limbs, and are also adapted for the treatment of all cases of general debility, weakness and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, apoplexy, and all other diseases of the chest, and are especially adapted for the treatment of rheumatism, neuralgia, sciatica, and all other diseases of the limbs, and are also adapted for the treatment of all cases of general debility, weakness and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, apoplexy, and all other diseases of the chest, and are especially adapted for the treatment of rheumatism, neuralgia, sciatica, and all other diseases of the limbs, and are also adapted for the treatment of all cases of general debility, weakness and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, apoplexy, and all other diseases of the chest, and are especially adapted for the treatment of rheumatism, neuralgia, sciatica, and all other diseases of the limbs, and are also adapted for the treatment of all cases of general debility, weakness and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, apoplexy, and all other diseases of the chest, and are especially adapted for the treatment of rheumatism, neuralgia, sciatica, and all other diseases of the limbs, and are also adapted for the treatment of all cases of general debility, weakness and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, apoplexy, and all other diseases of the chest, and are especially adapted for the treatment of rheumatism, neuralgia, sciatica, and all other diseases of the limbs, and are also adapted for the treatment of all cases of general debility, weakness and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, apoplexy, and all other diseases of the chest, and are especially adapted for the treatment of rheumatism, neuralgia, sciatica, and all other diseases of the limbs, and are also adapted for the treatment of all cases of general debility, weakness and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, apoplexy, and all other diseases of the chest, and are especially adapted for the treatment of rheumatism, neuralgia, sciatica, and all other diseases of the limbs, and are also adapted for the treatment of all cases of general debility, weakness and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, apoplexy, and all other diseases of the chest, and are especially adapted for the treatment of rheumatism, neuralgia, sciatica, and all other diseases of the limbs, and are also adapted for the treatment of all cases of general debility, weakness and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, apoplexy, and all other diseases of the chest, and are especially adapted for the treatment of rheumatism, neuralgia, sciatica, and all other diseases of the limbs, and are also adapted for the treatment of all cases of general debility, weakness and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, apoplexy, and all other diseases of the chest, and are especially adapted for the treatment of rheumatism, neuralgia, sciatica, and all other diseases of the limbs, and are also adapted for the treatment of all cases of general debility, weakness and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, apoplexy, and all other diseases of the chest, and are especially adapted for the treatment of rheumatism, neuralgia, sciatica, and all other diseases of the limbs, and are also adapted for the treatment of all cases of general debility, weakness and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, apoplexy, and all other diseases of the chest, and are especially adapted for the treatment of rheumatism, neuralgia, sciatica, and all other diseases of the limbs, and are also adapted for the treatment of all cases of general debility, weakness and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, apoplexy, and all other diseases of the chest, and are especially adapted for the treatment of rheumatism, neuralgia, sciatica, and all other diseases of the limbs, and are also adapted for the treatment of all cases of general debility, weakness and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, apoplexy, and all other diseases of the chest, and are especially adapted for the treatment of rheumatism, neuralgia, sciatica, and all other diseases of the limbs, and are also adapted for the treatment of all cases of general debility, weakness and lungs, apoplexy, and all other diseases of the chest, and are especially adapted for the treatment of rheumatism, neuralgia, sciatica, and all other diseases of the limbs, and are also adapted for the treatment of all cases of general debility, weakness and derangements of public speakers and singers, palpitation of the heart

The Christian Advocate.

SATURDAY, OCTOBER 8, 1870.

THE JAPAN DISASTER.

OVER ONE HUNDRED AND TWENTY KILLED.
THE DEATHS OF MANY PRODUCED BY
JAPANESE TREATMENT.

The following are additional details to those already sent, of the explosion of the steamer Yeddo, in the harbor of Yeddo, Japan. The death of many was hastened, if not brought on, by Japanese doctors. These men have a bitter hatred toward foreign physicians, and do not wish to see their people treated by them. These native doctors took off the bandages that had been put on by foreign doctors, and commenced their own treatment upon them. Nearly all of those who were thus dealt with died. It is reported that almost all the wounded Japanese have died, but as they were scattered it is doubtful whether the number of deaths is actually known. Several Japanese have told me that, including those killed outright and those who since died, the number is over one hundred and twenty. If such is the case, a large number of deaths must have been caused by bad treatment of the Japanese doctors, for all wounded foreigners and several Japanese who were entirely under the treatment of the foreign doctors are doing well, and doubtless will recover, although some were severely scalded.

The most pitiable object of all was the youngest child of Mr. Cornes. It is only three months old. Of the whole family, it alone was spared. Its preservation seems miraculous. All around it were killed. Immediately after the explosion Mr. Skinner, one of the wounded foreigners, heard it crying, and went and took it in his arms, thus saving it from drowning by water, which was fast running into the wreck. The poor little thing was uninjured, except a slight scald on each forearm. It is now cared for in the hospitable family of Dr. Hepburn, of Yokohama.

Mr. Cornes was a missionary of the American Presbyterian Church. During the late American war he served in a Pennsylvania cavalry regiment in 1865. He graduated at Washington and Jefferson College, Pennsylvania, taking the highest honors of his class. During the fall of the same year he entered the Presbyterian Theological Seminary at Chicago, where he finished the prescribed three years' study, much respected by both professors and fellow-students. During his second year in the seminary he offered himself to the Presbyterian Board of Foreign Missions, requesting to be sent to Japan. He was accepted, and, with his worthy companion, was sent to this country immediately after finishing his course at the seminary. At the time of his death he was occupying the position of professor in the Japanese University at Yeddo. He was a man of more than ordinary ability, and never failed to gain the respect of those who knew him. In a beautiful spot of the cemetery at Yokohama they all—father, mother and lovely child—sleep side by side in one grave. A monument will be erected over them by the citizens of Yokohama.

The next morning after the accident the American consul at Yeddo held an inquest over the bodies of Mr. and Mrs. Cornes and their child. The verdict was: "That they came to their death by the explosion of a boiler on the steamer City of Yeddo, which resulted on account of the ignorance and carelessness of the engineer."

A JAPANESE GIRL'S TOILET.—"Russell," who is traveling around the world for the Boston Traveler, is now in Japan. Here is something readable from one of his letters:

Having watched the man, we now turned to the "barberess." She had a lady customer, whose rich robes and lady-like demeanor indicated social position, and whose face and form showed considerable personal beauty. She was unmarried, for her teeth were glistening white. Neither of the ladies took any other notice of us than to glance at us sidewise. The customer, after leaving her clog sandals at the edge of the platform, which is the floor of the open Japanese houses, and advancing barefooted to the middle of the room, made a low bow to the "barberess," and told her how she wished to be dressed. The barberess placed a mat before the customer, and the young lady knelt upon it. Then, removing the robe from her shoulders, began the work upon the hair. First it was pulled down and wet with warm water, until it was softened sufficiently to admit a comb. When the combing was done, all the hair was gathered back from the face to the crown and tied there. Then the "long tail" was waxed and oiled until it was stiff. It was next flattened out with the hands near the head, and the comb gathered around the flat piece in curious curls and fantastic braids, the end fastened

with a pin, the face and neck wiped dry with a towel. Then began a process for which I was wholly unprepared. I had not supposed the Japanese to be so near civilized. The barberess took up a little box, with a fine bamboo sieve in the end, and after telling the customer to shut her eyes, began to throw (or sift) the fine rice flour (or dust) upon the young lady's face and shoulders. Very soon the skin that was naturally copper-colored was artificially white. That portion of the flour that did not stick was brushed off with a feather brush, after which a piece of bark of some kind was rubbed on her cheeks until "red as a rose was she." Then for the first time a polished mirror, of iron or steel, serving for a mirror, was held up before the young lady, who smiled her approval, rose to her feet, gathered up her dress, and marched proudly off, leaving the barberess to await another customer.

Mr. Max Muller, in his third lecture on the "Science of Religion" (printed in this month's *Frazier*), referring to a former lecture at the Royal Institution, observed: "I wish to call back to your recollection the fact that in exploring together the ancient archives of language, we found that the highest god had received the same name in the ancient mythology of India, Greece, Italy and Germany, and had retained that name whether worshiped on the Himalayan mountains or among the oaks of Dodona, on the capitol or in the forests of Germany. I pointed out that his name was *Dyaus* in Sanskrit, *Zeus* in Greek, *Jovis* in Latin, *Tiu* in German; but I hardly dwelt with sufficient strength on the startling nature of this discovery. These names are not mere names: they are historical facts, awe, facts more immediate, more trustworthy, than many facts of medieval history. These words are not mere words, but they bring before us with all the vividness of an event which we witnessed ourselves but yesterday, the ancestors of the whole Aryan race, thousands of years it may be before Homer and the Veda, worshipping an unseen Being, under the solemn name, the best, the most exalted name they could find in their vocabulary—under the name of Light and Sky. And let us not turn away, and say that this was after all but nature-worship and idolatry. No, it was not meant for that, though it may have been degraded into that in later times; *Dyaus* did not mean the blue sky, nor was it simply the sky personified; it was meant for something else. We have in the Veda, the invocation *Dyaus pitar*, the Latin *Jupiter*; and that means in the two languages what it meant before those two languages were torn asunder—it means heaven. Father! These two words are not mere words; they are to my mind the oldest poem, the oldest prayer of mankind, or at least of that pure branch of it to which we belong—and I am as firmly convinced that this prayer was uttered, that this name was given to the unknown God before Sanskrit was Sanskrit and Greek was Greek, as when I see the Lord's Prayer in the languages of Polynesian and Melanesia, I feel certain that it was first uttered in the language of Jerusalem. We little thought when we heard for the first time the name of Jupiter, degraded it may be by Homer or Ovid into a scolding husband or a faithless lover, what sacred records lay enshrined in this unholy name. We shall have to learn the same lesson again and again in the science of religion, viz, that the place where we stand is holy ground."

Christ is almighty, and therefore perfectly able to restore lapsed powers, root up inveterate habits, and implant heavenly tempers.

There is a married couple in Brown county, Indiana, whose combined height is thirteen feet and four inches.

THE BOTTOMS HORSE POWER GIN GEAR.

This Power is now put up in three different forms—stationary, movable and mounted on wheels—all having the same action and capacity, differing only in peculiar movements and arrangements, all of which are covered by patents and covenants. Models and patents of the same may be seen by all interested by calling on me at the St. Charles Hotel; and to any one desiring to enter, with a small capital, a new business, which will yield a sure fortune, I will give undoubted and unparalleled inducements, if immediate application is made.

J. W. HUNTON, M. D.

HIWASSEE COLLEGE.

HAVING taken charge of this school, I desire to invite the attention of friends in the Eastern States to the excellent location, delightful climate and cheap board. We are in the best part of East Tennessee, seven miles east of Sweetwater, on the great line of railroad, and two miles from Madisonville, which is our post office.

The college has been in operation for twenty years, and has boarding arrangements for about fifty students. The steward supplies his table from his own farm, and gives the best that the country affords, well prepared, and furnished rooms, at

Two Dollars and a Half Per Week.

Tuition is \$10 per annum. Students will be received at any time and charged to the end of the term. For circular address, apply to

BOOKS AND STATIONERY.

STANDARD EDUCATIONAL WORKS.

PUBLISHED BY
CHARLES SCHUBNER & COMPANY,
651 BROADWAY, NEW YORK.

Guyot's Geographical Text-Books.

"Comparably superior to anything published."—*Agnostic*.
Introduction to the Study of Geography.
Elementary Geography.
Intermediate Geography.
Common School Geography.

Guyot's System is approved and indorsed by the most distinguished literary and scientific men of our nation; such as Prof. Agassiz, Dana, Tenney, Henshaw and others, celebrated in science throughout Europe as well as at home.

The fact that ONE MILLION (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New System, for no other series of books ever published in America have secured so rapid and extensive introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; Cincinnati, Cleveland, Columbus, Springfield, Toledo, Marietta, and most of the other important cities and places, numbering nine hundred and thirty schools in Ohio, and hundreds of towns and cities in the other Western States, while in the Southern States and California they are being extensively adopted.

Relieving that the publication of Professor Guyot's series has marked a new and better era in the presentation of geographical science, that by it the pupils of this generation will obtain a clearer, more definite and exact knowledge of the world on which they live, and that it is so systematically so arranged that knowledge more valuable and permanent, we commend it to the attention of all interested in educational improvement and progress.

SCHOOLS AND COLLEGES.

FLORENCE WESLEYAN UNIVERSITY.

FLORENCE, ALABAMA.

W. H. ANDERSON, D. D., PRESIDENT.

This Institution of learning, so widely known through the South, will begin its next session on Wednesday, September 14, 1870.

The Faculty is composed of men of experience and ability. The course of study is comprised in the Literary Department, Law Department, Department of Biblical Literature and Commercial Department. The advantages of this University are seen in its healthful and attractive location, thorough course of study, excellent discipline, the character and success of its instructors, and the reasonable rates at which board and tuition are furnished.

Lectures in the regular work are admitted to recitation on paying the incidental fees.

EXPENSES FOR SESSION OF FIVE MONTHS.

Tuition in the University classes..... \$30 00

Tuition in Grammar School..... 25 00

Tuition in Law Department..... 40 00

Incidental fee..... 2 00

(Tuition and incidental fee required in advance.)

Chemical fee, paid once..... 5 00

NEW ORLEANS MARKETS.

From the N. O. Price Current.

Since our last report several branches of the wholesale trade have shown a more active movement in filling orders, but the market is not so much improved as to give the merchants a more favorable view of the future. The weather has been clear and cool, and the prevailing winds from the north and highly favorable to cotton picking. Up to the close of August it had been decidedly unfavorable, and undoubtedly seriously injured the growing crop, but on the seventh ultimo we had occasion to notice a favorable change, and remarked that, if it was of a similar character in the country, we might expect more encouraging accounts. The sugar reports are nearly all favorable.

The river is twelve feet two inches below high water mark.

Cotton.—The following are the arrivals since the thirtieth ultimo:

Levee and Mississippi... bales, 7,718

Mobile... 264

Florida... 55

Other... 2

On Saturday the movement continued with an active demand, which

until it was checked toward the close

by exhaustion of the supply, and the

sales amounted up 3,250 bales, at stiffer

prices generally, but without any quota-

tion advance, except in good ordinary

and low middling, in which there was

an improvement of $\frac{1}{8}$ ¢. The fullest

rates were realized early in the day,

and the competition was most active.

Toward the close, when the movement

subsided, they were less buoyant. On

Monday buyers again came forward

and the offerings being confined

to Saturday's arrivals, and what was

left over previously, the business was

restricted to 2,300 bales, which was

800 bales more than was generally ex-

pected from the moderate supply. At

the same time competition among buy-

ers enabled factors to realize fuller

prices for low middling and middling,

which respectively closed at 14 $\frac{1}{8}$ ¢, 14 $\frac{1}{4}$ ¢,

and 15 $\frac{1}{4}$ ¢. On Tuesday the market

opened with an active demand, and

although factors raised their preten-

sions the movement continued animat-

ed throughout the day, nearly or quite

all the offerings being taken at a further

advance of $\frac{1}{8}$ ¢ in good ordinary, $\frac{1}{8}$ ¢

to $\frac{1}{4}$ ¢ in low middling, and $\frac{1}{4}$ ¢ in

middling. The sales embraced 3,600

bales, which is the heaviest of the

season.

This makes an aggregate for the past

three days of 9,150 bales.

The receipts at this port since the

first of September (exclusive of the ar-

ivals from Mobile, Florida and Texas)

are 34,512 bales, against 52,907 bales

for the same date last year, and the de-

crease in the receipts at all the ports,

up to the latest dates, as compared with

last year, is 29,277 bales. In the ex-

ports from the United States to foreign

countries, as compared with the same

dates last year, there is an increase of

6,364 bales to Great Britain, and a de-

crease of 4,034 to France, and of 837 to

other foreign ports.

Referring to our remarks above, we

quote as follows:

Ordinary... 11 to 12

Good ordinary... 13 to 14

Low middling... 14 to 15

Middling... 15 to 16

Strict middling... 16 to 17

Special Notices.

NOTICE.

The class of the first year, Alabama Conference, will meet the committee for examination on Monday, December 5, at ten o'clock A. M. Brother Cannon will examine the class on the Bible, historical and biographical parts; Wesley's Sermons, volume 1 of the four-volume edition. Brother Brown will examine on Clarke's Preachers' Manual, Theological Compend and English grammar. I will examine on Watson's Institutes, part 3, and Discipline and hymn book. We advise the class to study the new course also, if possible.

D. M. HUDSON, Chairman.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, OCTOBER 15, 1870.

NO. 39.

NEWS OF THE WEEK.

DOMESTIC.

WASHINGTON, Oct. 6.—The President will see no visitors on Tuesday or Friday, and only before twelve o'clock on other days.

Alabama is to constitute a separate military district in the Department of the South, General S. W. Crawford commanding. It is also stated that ten additional companies will be sent there.

SAN FRANCISCO, Oct. 6.—Railroad passengers are detained by burning snowsheds. The origin of the fire is mysterious.

Late Arizona advices state that the Pima friendly Indians killed thirteen Arapahoes.

ST. LOUIS, Oct. 6.—The Temperance Convention in session here voted against prohibitory laws and special temperance candidates for office.

CINCINNATI, Oct. 7, evening.—The name of the Southern Commercial Convention was changed to National Commercial Convention by a unanimous vote. Great applause followed the announcement. The convention will meet at Baltimore next year. Adjourned sine die.

A grand banquet to the members was given last night.

LEXINGTON, Va., Oct. 12, 7 A. M., via Millsboro, Va., Oct. 12.—Symptoms of an unfavorable character have manifested themselves in the disease of General Lee within the last two days, and his condition is not very encouraging; indeed it begins to excite the grave apprehension of his friends and physicians.

The members of his family at a distance have been summoned to his bedside.

LEXINGTON, Va., 10 A. M., via Millsboro, Va., Oct. 12.—General Robert E. Lee, the Christian gentleman and hero of a hundred battles, breathed his last at thirty minutes past nine o'clock this morning, of congestion of the brain, aged sixty-three years, eight months and twenty-three days.

RICHMOND, Oct. 12.—The Dispatch has just received the following special telegram:

LEXINGTON, Va., Oct. 12.—General Robert E. Lee died this morning at half-past nine o'clock. He began to grow worse on Monday, and continued to sink until he breathed his last this morning.

The places of business are closed; the bells are tolling and the whole community has been thrown into the deepest grief.

NEW YORK, Oct. 13.—The best information from the elections shows a Democratic Congressional gain of eight members, which will make the delegation from Ohio, Indiana and Pennsylvania stand thirty Republicans to twenty-four Democrats, instead of thirty-eight to sixteen, as now.

A Herald war special reports the difficulty of supplying the Prussian army so great as to occasion its leaders much anxiety. They have lived off the country mainly hitherto, but it is now eaten out.

The Prussian minister at Washington denies that his government has protested against the exportation of arms and ammunition from the United States to France.

The French consul general at this port gives notice of a decree of his government, adopted October 10, under which all arms and ammunition heretofore imported into France are to be seized and appraised by the government, and receipts for their value given to owners.

This morning's Herald publishes a letter purporting to come from Lima, dated September 24, which says two thousand coolie laborers revolted and killed forty whites, and were only dispersed by government troops.

The Peruvian government is considering the prohibition of further coolie importations.

The French corvette Primangnet, four guns, has just arrived at this port.—New Orleans Times.

FOREIGN.

LONDON, Oct. 6.—The adherents of the French Emperor are very active. Rouher and Baron Jerome David, who live here, visit the Emperor often.

It is rumored Prussia is not averse to these movements in favor of Napoleon.

There are some who assert that Bismarck furnished part of the funds for the establishment of La Situation, the imperial newspaper here.

Late Paris advices say General Trochu is turning General Ripley's experience and ability to good account.

LONDON, Oct. 6.—General Treskew

commands the Prussian army which is to operate in southern France.

Five hundred houses were destroyed by the Strasburg bombardment, leaving ten thousand persons homeless.

King William reviewed the sixth army corps at Versailles, on Wednesday. His headquarters have been permanently established at Versailles.

FLORENCE, Oct. 6.—Senor Sella has remitted the Pope fifty thousand crowns, the amount of his civil list for the current month.

FOREIGN SUMMARY VIA LONDON.—The result of the plebiscite has been officially announced. The vote stands: For Italian unity, 13,365; against it, 1,507.

Sharp firing was reported yesterday in the department of the Vosges. The fight was between nine thousand Prussians and five thousand French, who were deficient in artillery. Night ended the conflict, the French retaining their position, which the Germans attempted to carry. General Dupre, commanding the French, was slightly wounded. Skirmishing has commenced, before New Breisach.

George Saunders writes from Paris that that city is good for sixty days' siege. A correspondent of the Pall Mall Gazette says the same thing.

Another dispatch says that Paris is now at the mercy of the Prussian guns on the heights of Ville Juiff. There are no Prussians in the department of the Aube.

The Prussians again threaten Gisors.

General Burnside telegraphs from Paris that the people are calm; the city has its usual appearance. He had an interview with Favre, who was hourly expecting a visit from Bismarck.

Mierette, near St. Dennis, has been abandoned by the French.

Two Frenchmen, caught cutting the telegraph wires, were shot by the Prussians.

The Tours government announces cheering advices from all quarters of France. The army reorganization is proceeding rapidly.

It is stated that Gambetta recently left Paris in a balloon, and landed safely outside of the Prussian lines.

A dispatch from Belgrade says the French occupy Pithiviers.

MAISELLES, Oct. 8.—Garibaldi is here.

Tours, Oct. 8.—The Pontifical Zouaves to come here will form a corps six thousand strong. Four thousand Italian volunteers have arrived in France.

LONDON, Oct. 10.—A note from the Prussian government to the great powers states that Paris threatens to hold out until it starves. In that event two millions of people would be in the hands of the Prussians, who will be unable to furnish supplies for a single day, as there is nothing edible within several days' march of Paris; hence the people cannot abandon the city by the roads. The consequence will be that hundreds of thousands must starve. The Germans, nevertheless, must prosecute the war, and those holding power in France will be answerable for the results.

The Germans evacuated Molhouse on Sunday, and proceeded toward New Briesach and Schleisstadt.

AMSTERDAM, Oct. 10.—The Bank of Holland has reduced the rate of discount to four per cent.

ROME, Oct. 10.—Thirty-two thousand voters refused to vote in the papal States at the recent election.

The officials readily transfer their allegiance to the King.

PERIN, Sept. 10, via St. Petersburg, Oct. 10.—The people have destroyed the Catholic buildings in this city.

FLORENCE, Oct. 10.—A decree has been issued annexing the Roman provinces to the kingdom of Italy. The Pope preserves his dignity and the inviolability of his personal prerogatives as a sovereign.

General LaMarmora is appointed lieutenant governor of the papal provinces.

The laws of Italy are to be introduced and amnesty proclaimed.

LONDON, Oct. 11.—Margaret Waters, the notorious baby farmer, was hung to-day. She died protesting her innocence.

Five French ironclads passed Dover to-day, going eastward.

Garibaldi advises the people of Savoy and Nice to discontinue agitation at present, as it only embarrasses the French in their struggle against Prussia.

Tours, Oct. 11.—Another body of Prussian prisoners arrived to-day. Gambetta's balloon brought thirty-nine thousand letters.

The Prussians shoot all France

troops captured. This is one reason why the troops carry the black flag.

The papers announce the death of Prince Frederick Charles.

It requires a large force to protect the Prussian prisoners from the indignation of the people.

New York, Oct. 11.—Special to the Times, dated Rome, states that the provisional government is more anxious to effect relief for Metz than even Paris, for Metz, it has reason to know, contains eighty-five thousand chassepots, immense quantities of ammunition and other stores.

The people of Reuen are lamentably lacking in pluck, but may possibly show fight under Commanant DePaley, a redoubtable fire-eater, who has promised to defend the city.

It is noticeable that the Rouen journals are growling at the reception of Garibaldi, because of his former oath to take Nice from the French.

A correspondent writing under the date of the sixth states that Republicans are leaving in numbers from all parts of Spain to offer military aid to the French government.

In Portugal things are going badly. The King was obliged to go and seek Sada Bandaria to implore him to keep his portfolio until he was able to form another ministry.

The King is becoming more unpopular daily, and Republicans hope to precipitate the crisis and dethrone him.

The United States is threatened with quite an invasion of French artists and models. Jerome Meissner, Rosa Bonheur, Galant and Saintvire are all here, with the intention of visiting and perhaps remaining in New York if the war continues.

FLORENCE, Oct. 11.—Replying to a deputation from Rome, King Victor Emmanuel declared the country reconstituted through the unanimity of the votes on the plebiscite, and rejoiced in the completion of the kingdom. As King and Catholic I guarantee liberty to church and unity to Italy, and independence to the pontiff. So I submit to you the result of the plebiscite, and transmit it to the Italian people.

FLORENCE, Oct. 12.—Lieutenant General La Marmora entered Rome yesterday, and was received with hearty demonstrations of welcome by the people.

LONDON, Oct. 12.—A French fleet has been sighted off Heligoland.

The authorities at Altony and other parts have been warned to remove the outer banyans and lights of their harbors to prevent a surprise.

The United States steamer Plymouth has arrived out at Kiel, though that port is ostensibly closed by the blockade. Other American men-of-war are expected there.

BRUSSELS, Oct. 12.—The report that the Prussian minister at Brussels had been recalled, which was recently published, has been denied. There was an enthusiastic meeting at Mechlen yesterday to protest against the deposition of the Pope. The Archbishop of Mechlen presided, and among the participants were the Archbishop of Buffalo and Calcutta. A protest was unanimously adopted.

Tours, Oct. 12.—Official reports from Beaunegey state that the Prussians entered Orleans last night. The French forces are on the left bank of the Loire. They received to-day heavy reinforcements, including ten batteries of field artillery.

Tours, Oct. 12.—The ministry have the following: The courier who brought this intelligence was allowed to pass through the Prussian lines. There was a battle on Friday, seventh instant, between Fort Mont Valerien and St. Cloud, on the west side of Paris. The French, under General Ducrox, made a sortie in force, by which the Prussians were completely defeated and driven to Versailles, entirely surrendering the position lately occupied by them, and from which they might have shelled the western part of Paris.

Advices from various parts of France confirm the reported Prussian outrages upon the helpless people and towns. Successes of the Francitours are followed by the burning of villages and the authorities of towns seized. In view of this frightful state of affairs the Tours government has presented the subject to the Prussian military authorities and the ambassadors of neutral powers.

CHATEAU DUE, Oct. 12.—The enemy have been beaten back at Dreux.

MORCERN, Oct. 11, 12 P. M.—The enemy's scouts retreated before the

approach of the Francitours and Garle Mobile.

Tours, Oct. 12.—The government is satisfied of the good faith of General Bonbraki.

Five-franc pieces, with emblems of the republic, are circulating.

Tours, Oct. 12.—Messengers who were sent to Orleans yesterday, where a battle was going on, have returned. They make the following report:

The French were in much smaller force than the Prussians, and were literally crushed by their superior artillery and driven back into the suburbs of the town. Some barricades had been erected there, and our forces took advantage of the shelter there afforded. The Papal Zouaves and Mobiles behaved most courageously, but the regular troops fled on the first fire. None of the regular troops made much resistance; many threw away arms in their flight.

The Prussians opened fire on the town after the French defeat. Owing to the barricades many fires occurred. The railway depot was destroyed and many other large establishments. At the last accounts the people of Lyons were flying in all directions.

At a late hour last night the Prussians had pushed south to Beaunegey and Meung, beyond Orleans. It is feared the Papal Zouaves will be surrounded and captured. Other French troops in that neighborhood are in a good position, and heavy reinforcements were sent forward to them during the night. It is reported that several heavy guns have also gone forward from Bourges. The French troops at Beaunegey and Meung are excellent; they are composed chiefly of the National Guard and Mobiles, and are determined to resist to the last.

In view of the urgency of the case, Garibaldi left Tours this morning for the field.

There is a great movement here of Francitours. Troops of all kinds are pushing to the front with all dispatch.

The government has repeated its determination to retaliate for Prussian atrocities; and if the municipal authorities of Ables are executed, an equal number of Prussian prisoners will be shot.

LONDON, Oct. 12.—Telegraphic communication with Aden and India, via the Red sea cables, was again established this afternoon.

HOW WE GET THE WAR NEWS.

The press dispatches from Europe to New York, during the last four weeks, says the Journal of the Telegraph, numbered about one hundred thousand words. New York has been better posted on the issues of the war each day than London, Paris or Berlin. These dispatches have almost wholly been sent by a single cable, full-one-third of the whole to a single daily paper, and with marvelous rapidity and accuracy. Familiar as we are with the work of the telegraph, it has been a marvel to us. To hundreds of thousands of minds the whole process is and has been a deep enigma.

Here is a man sitting in a darkened room at Heart's Content. The ocean cable terminates here.

A fine wire attached thereto is made to surround two small cores of soft iron. As the electric wave, produced by two pieces of copper and zinc at Valencia, passes through the wave, these cores become magnetic enough to move the slightest object.

A looking-glass, half an inch in diameter, is fixed on a bar of iron one-tenth of an inch square and half an inch long. On this tiny glass a lamp is made to glare so that its light is reflected on a tablet on the wall. The language of the cable is denoted by the shifting of this reflected light from side to side.

Letter by letter is thus expressed in this flitting idiom in utter silence on the wall. There is no record made by the machine except as the patient watcher calls out to a comrade the translated flashes as they come, and which he records. It seems a miracle of patience. There is something of awe creeps over us as we see the evidence of a human touch three thousand miles away, swaying that line of light.

By such a delicate process as this, and after being repeated from line to line five times before its ultimate copy is in New York, have the late great battles been recorded in our daily papers with great particularity, and sent throughout the Union.

Nothing like it has ever before been accomplished. The enterprise of the New York press—of a single

press in New York—has eclipsed that of the wealthiest and ablest presses in Europe.

KENTUCKY CONFERENCE ITEMS.

This body met at Greensburg, Kentucky, on Wednesday, September 23, 1870.

At the appointed hour for convening the Conference Dr. N. H. Lee was elected president, pro tem, the Rev. J. A. Lewis secretary, and the Rev. D. Sparrier and S. C. Allen assistant secretaries.

Bishop Paine arrived and took the chair about eleven o'clock A. M.

Thomas G. Bosley was announced by the Bishop as transferred from the Louisville Conference.

Dr. Redford addressed the Conference on the old missionary debt, and urged its prompt payment. It was moved to refer the matter to the Committee on Missions.

Pending the passage of this, the Rev. D. Morton proposed that the Conference make the effort to secure pledges for its payment at once, becoming himself responsible for \$100, it being one-fiftieth of the amount assessed by the Parent Board to the Conference. The amount was raised, and Dr. Redford asked to be appointed agent to collect it.

Bishop Paine mentioned that he had received a Christian letter from his old and respected colleague, Bishop Morris, of the Methodist Episcopal Church, who desired to be affectionately remembered to the brethren whom he had known in the happy days of yore, and to assure them of his patient waiting for the summons to the better land.

Dr. Dannelly, in a forcible speech, presented the claims to the sympathy and support of the Conference of the Mount Vernon Place church, Washington City, asking each of the preachers to contribute, in behalf of his congregation, \$5 to assist in the liquidation of a pressing debt about to mature.

The usual report expressing the purpose to support the American Bible Society was adopted. The Committee on Temperance reported resolutions expressing the conviction that the making, vending and drinking of intoxicating liquors, as a beverage, is contrary to the spirit of Christianity and the Discipline; and that the use of wines, cordials and malt liquors at dinners, festivals, etc., is a pernicious practice, to be discouraged by the ministers, and providing that each minister shall, early in the ensuing Conference year, preach a sermon on the evils of intemperance.

The Preachers' Aid Society held its anniversary on Friday night.

The treasurer, the Rev. David Morton, read his report, showing that the capital of the society, in interest-bearing bonds, amounted to \$7,000. The Rev. Dr. R. H. Rivers, Dr. H. A. M. Henderson and Dr. A. H. Redford made the addresses. The interest was profound. Though the house was densely packed with auditors, there was not a perceptible ripple of impatience or weariness during the delivery of the speeches. The collection amounted to a little more than \$250—

which was a creditable collection, showing that the widows and orphans of our deceased ministers are sympathetically regarded by the church. May not the family of every faithful preacher say: "The Lord is my shepherd; I shall not want?"

The missionary meeting on Saturday night was addressed by the Rev. Jacob Ditzler and the Rev. E. W. Schen, D. D., and we opine that two better speeches have seldom been made upon a similar occasion. There was logic, pathos and humor so pleasingly blended as to make every one feel that the occasion was edifying, and that it was good to be there. The collection was not large, but when the prompt payment of the \$1,500 missionary debt, and the liberal donation to the Preachers' Aid Society are considered, was as large, perhaps, as the most sanguine expected. The moral effect far transcended the material result. The seeds of future harvest were sown, which the sickles of the church will surely reap during the coming Conference year.

St. Louis projects an immense structure, to embrace under one roof a grand union railroad depot, customhouse, merchants' exchange and hotel, covering three entire blocks, and to cost \$3,000,000.

Faithfulness.—There are people who betray their friends a little, just for the sake of showing that they are faithful.

COLUMBIA CONFERENCE.

FIFTH SESSION.

We condense the following items from the Spectator of the twenty-ninth ultimo:

The fifth session of the Columbia Conference of the Methodist Episcopal Church South convened at Dallas, Polk county, Oregon, Wednesday, September 7, 1870. Bishop W. M. Wightman in the chair.

The Conference was opened with religious services, conducted by the Bishop.

The secretary of the last Conference being absent, the assistant secretary called the roll, and the following ministers answered to their names: C. H. E. Newton, A. E. Sears, J. W. Stahl, B. R. Baxter, R. C. Martin, D. C. McFarland, R. C. Oglesby and Joseph Emery.

Absent—W. A. Finley.

Lay delegates were called for, and Brothers W. B. Bryan and J. H. Lewis, of the Oregon district, presented their certificates of election, were introduced to the Conference and invited to seats within the bar.

On motion, Joseph Emery was elected secretary and J. W. Stahl assistant secretary.

The name of Levi Vanslyke was called, and the presiding elder responded: "In heaven!" Brother Sears gave a brief account of Brother Vanslyke's faithful labors on his work until prostrated by sickness, of his patience and resignation during his long-continued illness, and of his triumphant death.

The following persons being duly recommended, and having passed their examinations satisfactorily to the committee, were admitted on trial: John Mallan, R. T. Weatherly, Elijah G. Mitchell and John W. Starr.

SUNDAY, 5 P. M.—After the solemn commemoration of the Lord's Supper, Bishop Wightman called the Conference to order. He then delivered an address on the Elements of Character Necessary to the Success of a Minister. These elements are: Purity, courage and self-sacrifice. After the address he read the appointments for the Conference year, as follows:

OREGON DISTRICT.—A. E. Sears, P. E. Dallas circuit, R. C. Oglesby; Corvallis and Albany, Joseph Emery and W. A. Finley; Albany circuit, E. G. Michael; Brownsville circuit, J. W. Stahl; Lafayette circuit, John Wallan; St. Helen's mission, R. T. Weatherly; Oregon City circuit, supplied by Eliel Oliver; president of Corvallis College, W. A. Finley; professor of mathematics in Corvallis College, Joseph Emery; agents of Corvallis College, B. R. Baxter and B. F. Burch.

JACKSONVILLE DISTRICT.—D. C. McFarland, P. E. Jacksonville circuit, supplied by G. W. Fleming; Roseburg and Oakland mission, N. M. Elton; Coast Fork mission, to be supplied; Eugene circuit, R. C. Martin.

UMATILLA DISTRICT.—C. H. E. Newton, P. E. Walla Walla circuit, supplied by B. F. King; Umatilla Meadows and Birch Creek circuit, to be supplied; Grande Ronde circuit, to be supplied; Powder River circuit, J. W. Starr.

RESOLUTION OF THANKS.

TEMPERANCE HALL, BIBLE HOUSE, New Orleans, October 12, 1870.

At a meeting of Pelican Division No. 1 and Crystal Fount Division No. 4, Sons of Temperance, the following resolutions were unanimously adopted:

Resolved, That the cordial thanks of these divisions be tendered to the Rev. J. A. Ivy for the able, lucid and earnest temperance sermon delivered by him on Sunday, October 2, 1870, and the clear and logical address against the liquor traffic delivered by him before these divisions on the evening of October 5.

Resolved, That these resolutions be inserted in the New Orleans Christian Advocate.

JOHN CHRELLER, R. S.,

Pelican Division.

WM. SHARPLES, R. S.,

Crystal Fount Division.

CHILDHOOD is like the mirror, catching and reflecting images all around it. Remember that an impious or profane thought uttered by a parent's lips may operate upon a young heart like a careless spray of water thrown upon a polished steel, staining it with rust, which no after-scouring can efface.

Look upward and onward: We learn to climb by keeping our eyes not on the valleys that lie behind, but on the mountains that rise before us.

The Christian Advocate.

SATURDAY, OCTOBER 15, 1870.

TO THEE.

I bring my sins to thee,
That thou I cannot count,
That all may cleanse be
In thy once-opened fount.
I bring them, Saviour, all to thee;
The burden is too great for me.

My heart to thee I bring,
The heart I cannot read,
A faithless, wandering thing,
An evil heart indeed.
I bring it, Saviour, now to thee,
That fixed and faithful it may be.

To thee I bring my care,
The care I cannot free;
Thou wilt not only share,
But take it all for me.
O loving Saviour! now to thee
I bring the load that weighs me.

I bring my grief to thee,
The grief I cannot tell;
No words shall needed be,
Thou knowest all so well.
I bring the sorrow laid on me,
O suffering Saviour! all to thee.

My joys to thee I bring,
The joys thy love has given,
That each may be a wing
To lift me nearer heaven.
I bring them, Saviour, all to thee,
Who hast procured them all for me.

My life I bring to thee—
I would not be my own;
O Saviour! let me be
Thine ever, thine alone!
My heart, my life, my all I bring
To thee, my Saviour and my King.

Sunday Magazine.

WHITE RIVER CONFERENCE.

MOUNT ZION, ARK., Oct. 3, 1870.

Mr. Editor: The first session of the White River Conference began at Mount Zion, Arkansas, on September 28, constituted of the following members:

Traveling elders—J. M. Steel, J. A. Williams, B. Harris, L. D. Webb, J. P. Webb, A. R. Bennick, John Rhyno, G. A. Dannelly, J. Mackey, G. A. Shaeffer, E. T. Jones, R. G. Brittain, E. M. Baker, W. T. Noe, C. H. Ellis, H. A. Barnett, B. F. Hall, J. H. Cox, C. H. Gregory, W. A. Cobb, John W. Walkup, Burwell Lee, M. C. Morris, J. W. Patton and M. B. Pearson.

Traveling deacons—J. L. Denton, Thomas H. Howard, W. M. Watson, J. H. Dye, E. W. Coleman, William W. Gillespie and H. T. Gregory.

Lay members—James M. Hanks, W. F. Sale, H. T. Blythe, J. F. Smith, James Wickersham, M. H. McInty, T. W. Price, J. A. Garnett, J. H. McFerrin, J. C. Brookfield, William M. Allen, Alfred T. Holleman, Josiah Roberts, R. C. Sherald, R. S. Bryant and L. Williams.

The Conference, after a session of five days, adjourned. The following are the minutes of its action:

1. Who are admitted on trial?

Answer: Stephen D. Evans, Wesley M. Whitehead, Thomas J. Settles, Jerome Havalson, William H. Corley, William J. Ross, Nathaniel G. Murphy, Joseph Parker, Thomas Vincent, William J. Dodson, Edwin A. Garrison and William C. Malone.

2. Who remain on trial? Answer:

Leroy D. Webb, Dndley W. Reid, Fletcher A. Ellis, Calvin S. Floyd, Robert N. Francis and John H. Porter.

3. Who are discontinued? Answer:

William G. Hilton, George DeBoze, James A. Walden, at his own request, and Henry P. Clay, at his own request.

4. Who was admitted into full connection? Answer: William R. Young.

7. Who are the deacons of one year? Answer: William M. Watson.

8. What traveling preachers are elected deacons? Answer: None.

10. What local preachers are elected elders? Answer: William H. Corley, Thomas J. Settles, Jeremiah J. Bean, William N. Green, Solon Graham (colored), Daniel McWhister and Benjamin J. K. Hite.

12. What traveling preachers are elected elders? Answer: William R. Young, H. T. Gregory, Thomas H. Howard, John H. Dye and William W. Gillespie.

14. What local preachers are elected elders? Answer: Moses C. Clark, Larkin F. Johnson, Thomas A. Craig, Hardy Williams, W. H. Phipps, Thomas Vincent and John Cook.

16. Who have located? Answer:

J. W. Patton, at his own request, and J. A. Williams.

The session was enlivened and greatly instructed by the presence of the editor of the Western Methodist and the missionary secretary. The Conference raised \$680 missionary money, to be appropriated to the old debt. Increase of members, two hundred and seventy-seven; local preachers, twenty-seven. The weather was showery, so that the "camp" arrangement went pretty much for nothing. The seat of the Conference was merely a country church, in a populous neighborhood. Large audiences attended. A number of mourners were at the altar at the time of the adjournment. There are in the bounds of this Conference one hundred and three churches, with two thousand four hundred and seventy-five sittings, valued at \$61,900. The total amount allowed for the support of the preachers, \$18,792, of which \$12,472 was raised.

The region which the boundaries of this Conference embraces is one of the most fertile and beautiful in the West. Its preachers make sacrifices to cultivate this vineyard of our Lord that older Conferences have but a feeble notion of. There are three parsonages to the whole territory, worth in all \$1,200. The number of preachers received on trial indicates what faithful work they have done during the year. A large current of immigration is pouring in by the Memphis and Little Rock railroad, and will be greatly swollen when the roads already projected between Memphis and Kansas, and between St. Louis and Helena, shall have been completed. Some excellent transfers from older Conferences appeared during the session, and are no doubt the van of a strong force of preachers who seek for their growing families the advantages of a new country. The Conference voted upon the veto proviso in the affirmative by a vote of twenty-seven yeas, no nays. James Wickersham was elected the Sabbath school delegate from the Conference to the Sabbath School Convention of the Methodist Episcopal Church South, to meet in Nashville in May next. He was also elected the Conference Sabbath school secretary.

The Conference mourns the death of two of its members who have fallen during the year—John Cowlo and Elijah McNabb, two faithful servants of the Master.

The appointments for the year are:

HELENA DISTRICT.—J. M. Steel, P. E. Helena station, James L. Denton; Helena circuit, to be supplied by Elias Jackson, transfer; Long Lake, to be supplied; Trenton circuit, Thomas J. Settles; Mariana, William T. Noe; Prairie circuit, to be supplied by D. D. McCutcheon; Clarendon and Macedonia station, Elias M. Baker; Shady Grove, to be supplied by Thomas A. Craig.

HAIRSBURG DISTRICT.—William A. Cobb, P. E. Hairsburg circuit, to be supplied by William J. Ross; Wittsburg circuit, to be supplied by Miller H. White, transfer; Taylor's Creek, John W. Walkup; Forest City, to be supplied by Arthur Davis, transfer; Jonesboro circuit, Henry T. Gregory; Greensboro circuit, to be supplied by D. B. Warren; Maumville, Edward W. Coleman; Gainesville circuit, Leroy D. Webb; Bayou Deview, W. C. Malone.

JACKSONPORT DISTRICT.—G. A. Dannelly, P. E. Jacksonport station, John H. Dye; Jacksonport circuit, Edwin A. Garrison; Augusta circuit, James Mackey, E. T. Jones, supernumerary; Cotton Plant circuit, Thomas H. Howard; Pleasant Valley, Stephen D. Evans; Searcy station, Calvin S. Floyd; Searcy circuit, to be supplied by James Talkington; Cadron circuit, Thomas A. Graham; Black River circuit, Nathaniel G. Murphy; Chorokee Bay, Jacob H. Cox; American Bible agent, John Rhyno; Prospect Bluff, Thomas Vincent; Grand Glaize, Wesley M. Whitehead.

BATESVILLE DISTRICT.—Burwell Lee, P. E. Batesville station, Cyrus H. Ellis; Batesville circuit, Augustus R. Bennick; Bethesda circuit, to be supplied by Josiah Roberts; Smithville circuit, Fletcher A. Ellis; Pocahontas and Powhattan station, to be supplied; Pocahontas circuit, William M. Watson; Mammoth Spring, to be supplied by James Denton; Evening Shade circuit, Dudley W. Reid; Salem circuit, Joseph Parker; In Crosse circuit, Moses C. Morris; Big Creek circuit, to be supplied by Jesse Griffin, transfer.

MISSISSIPPI DISTRICT.—Benoni Harris, P. E. Walnut Bend, W. W. Gillespie; Marion circuit, to be supplied by Andrew Conley; Elm Bend, Benoni Harris; Frenchman

Bayon, John H. Porter; Osceola, William R. Young.

Transferred to Arkansas Conference—H. A. Barnett, R. G. Brittain, B. F. Hall, J. H. Hall, C. H. Gregory, William J. Dodson, Jerome Havalson and William H. Corley.

Transferred to St. Louis Conference—G. A. Shaeffer.

Transferred to Missouri Conference—R. N. Francis.

Located at his own request—J. W. Patton. J. A. Williams, located.

RELIGIOUS DEOLENSION.

Mr. Editor: Within the area embracing this place God has lavished every good thing for the use and prosperity of man. There is not only a genial climate, but a fertile soil—beauteous prairies, noble forests, and many streams of water. Luxuriant grass meets the eye on every hand, feeding and fattening thousands of cattle, horses, sheep and swine. To the lover of nature is presented beauty of every imaginable hue, and objects which open to him matters of delightful thought. The sun does not lighten in his daily round a more inviting spot, nor do the stars in their nightly sweep look down upon a more sweet or quiet retreat for man. And yet, amid these tokens of God-like handiwork, beauty and comfort, how little of true spiritual thanksgiving! A pilgrim like myself does not look to the world to give praise and glory to Him who bestows such gifts, but rather to those who profess to love and honor the Giver. The eye almost tires in the hunt for such. Now and then, in some humble, unpretending and almost buried (in the world's estimate) child of man, one meets a heart filled with true and holy reverence for Jesus, the maker of all things; but in the large majority of cases formalism has usurped the place of living piety, and its dwarfing and parching influence has twisted the fiber of true godliness into a mass of dry husks.

Methodism, Presbyterianism and Baptistism (excuse the word) were once powers in the full sense of the term; but gentility, formalism and trimming with the world have paralyzed this power, taken away their strength and obscured their glory. In former days each member of the churches above named was required to show his faith by his works. He was expected to separate himself from the world in the Scripture sense. If he broke the Sabbath and made the wicked his companions, rather than those of the household of faith—if he was seen in the dram shop, and the light of his countenance was never seen in the prayer meeting—history tells us that then he was given the choice of either living up to his privileges and vows or taking the world wholly, for the church was not made for such as served God and mammon. But today a maudlin humanitarianism—a fear of man rather than of God, and a disposition to trim the sails of God's ship so as to catch as much breeze from the world as from the blessed Holy Spirit—seems to be the most approved and generally held doctrine.

To expect from a church member, in these enlightened times, an aggressive mode of life, a zeal tempered with love, and the least amount of spiritual enthusiasm, is to bring upon you the charge of Puritanism, and of being over-righteous. Now, dear Advocate, I, being a simple Pilgrim, would like you, as one of the watchmen over God's flock, to give, in the fear of God and according to Scripture, a plain outline of your opinion upon this deadly sickness which has spread over Immanuel's kingdom. Please let all the pilgrims know whether the rules of the church are considered as having any living power, or are merely for form's sake?—whether they fill up a simple hiatus, or were truly intended to be put in force? And besides, please state with mathematical certainty and precision how far a church member may intrude into the devil's territory, and yet claim and be recognized as a citizen of the empire of God?

These rough thoughts are the result of observation in my late journeyings. They are mournful to me, and I believe upon their solution depend the present organized churches. Why mourn over the ab-

sence of the Spirit and the lukewarmness of the church? Rather point out, urge and insist upon the faithful discharge of every duty upon the part of each pastor and church member.

PILGRIM.

OPELOUSAS, August, 1870.

A VOICE FROM SABINE.

Mr. Editor: In reviewing the annals of Methodism, its thunder-claps of power reach down to us and almost cause us to think nothing is being done now. Its former triumphs were but the effects of talents sanctified, energy increased, time redeemed, reproof sharpened, and patience developed among the first preachers of our "royal priesthood." The same signs and wonders will be seen again when preachers again use those means. We think a good work is taking place in our midst, though unfavorable signs ushered in the Conference year.

Our presiding elder, Rev. J. Pipes, has paid us two visits, advising with discretion and preaching with acceptability, insomuch that we shrewdly suspect his cheering visits have been the means of uniting us and inaugurating the gracious work now progressing. Every now and then some faithful one—local preacher or member—gets a drop from the cloud of glory, when hallelujahs of praise ascend in response to the secret messages just sent down. Even our care-worn and weather-beaten selves have felt the rejuvenating fires, until we have "renewed our youth" and "mounted up on eagle's wings," until heaven's blue vault seemed our footstool. However, the "oil of gladness" sometimes gets sand in it, and Zion's wheels move heavily. Some of the "duly authorized" regenerators do much injury; sorrow is manifested by some because "men are riding over the country preaching apostasy," while some of the preachers declare: "If a man is baptized, and will add to his faith virtue, etc., it is impossible for him to fall." We believe in perseverance as strongly as St. Paul, whose memorable warning should not be forgotten: "I keep my body under, lest after having preached to others I myself should be a castaway." These brethren preach: "Adam fell not from but on grace." Grace is favor. Therefore a man can never get God's favor until he sins, and therefore all infants are lost and all sinners saved, while the believer, like the drowning Irishman, after praying for help, finds some timely willow bough, says: "Niver mind; I'm independent of ye now." The believer, independent of the Lord now, what's the use for him to pray?

The correspondence and editorial of a certain "mammoth" Baptist paper, charging the "circuit rider" with purloining said "mammoth" from the post office to prevent the circulation of Baptist literature, is uncharitable. The elder, as well as the rider, will have to bear this grave charge. The ninth commandment is alike binding. Its violation is alike blame-worthy.

We are traversing land and water to get volunteers for Christ. We have seventeen appointments, three hundred and seventy-five members, three hundred sinners, even local preachers (colored included,) and about fifty miles square of country as the elements of this circuit. There are many places entirely destitute of preaching. Below this is a vast country of sinners, where the greatest profligacy prevails, where Sabbath privileges and obligations are scarcely known. Family prayer is a "strange, unearthly sound." Members of the "only true church," of all and of no church, pop their whips as loud, drive their beaves and wagons as far, and drink their dram as freely on Sunday as ever. And there, with saintly face, they will tell you their "doctrine." What is "doctrine" worth when daily life is so glaringly inconsistent with it? We often hold class meetings. Christians praise, penitents weep, backsliders return, sinners pale and silent as death. Who would not hold class meetings? The recollection of a venerable father, who held the responsible position of class leader and led his children in the same way, is pleasant.

There is much talk of a railroad

from New Orleans through here, and many think themselves capable of giving the "building committee" the whereabouts of the route, which, of course, lies directly through our settlement. It would be well for the company to think of this. Crops are good, and already, in the imagination of the rider, good collocations are realized. Will those mercies God showers down on the fields be exchanged for gold tried in the fire, or for costly apparel adorning the hair, many sorrows and bitters? Who can tell? Thou, Lord, knowest.

As to the state of the country we will say nothing, as these days of progress require a committee on that subject. We are just reminded of death by the peaceful end of a young brother. Three dollars a year is no consideration for the privilege of reading of the glorious triumphs of faith. The triumphal columns are a weekly heritage. Will you pray for the establishment of our succession in these parts, Calvin, Campbell and Pius the Ninth to the contrary notwithstanding? We, in return, will pray that your quill may, as the pen of a ready writer, bear testimony of Jesus' saving blood to thousands of interested readers.

PRAIRIE.

ANACOCO CT., LA. CON., July, 1870.

BIOGRAPHICAL.

ELIJAH GILMORE.

"Help, Lord, for the godly man ceaseth, for the faithful fall from among the children of men."

The subject of this notice, Elijah Gilmore, was born in Wilkes county, Georgia, July 10, 1787, and departed this life August 13, 1870, being in his eighty-fourth year. His father removed from thence to Green county, where he (Elijah) was principally raised. Here he had the misfortune to lose his good and pious father, who as a minister of the gospel in the Methodist Church had stood upon the walls of Zion, and preached that gospel that was instrumental in bringing his son to a saving knowledge of the truth.

From thence the family removed to Morgan county, where he was converted to God and joined the Methodist Church in 1810, under the ministry of Rev. Robert Kennon; of sainted memory, and was subsequently appointed class leader, and then received license to exhort from Rev. John Collinsworth. In 1812 he removed to Tennessee, and received license to preach at a camp meeting from Rev. Thomas Doughlass.

From there he removed to Alabama, where he received deacon's orders from Bishop Soule at Greensboro, and subsequently received elder's orders from Bishop Andrew. In all the relations that he sustained to the church, and indeed all the relations he sustained in life, whether immediately connected with the church, family or neighborhood, integrity and fidelity were the great ruling principles of his life. As a Christian, from early life, through all the various shades, forms and vicissitudes of this troublesome world, his feet were firmly planted on the Rock of Ages. Through the slippery paths of youth, when many bright scenes were looming up before him, and many avenues and paths were leading out in every direction to worldly ambition, fame and pleasure, he was never known to swerve or recoil from the good and right way—from the God of his fathers. In sickness or in health, in prosperity or adversity, around the peaceful home and fireside, following his domestic avocations in the school room, or on the thundering battle-field, amid fire, blood and death, he was still the same immovable Christian. The Bible is now in his house that he carried with him to New Orleans in the war of 1812, where he served God and his country as a firm and good soldier of both. When he returned home he consecrated himself anew to God for sheltering his head in the day of battle. Once he was brought very near death by an abscess being formed inside of him. Indeed it seemed like a miracle that he lived, but God sustained and spared his life. Once he was bitten by a large rattlesnake, but, like Paul, he shook off the monster, and felt but little harm. Once, while

traveling along, a large portion of a tree fell between the wagon and his beloved partner, with an infant in her arms. Once, when teaching school, himself and the whole school were knocked down by lightning. Yet, amid these intimations of displeasure, or the shaking of the rod of God, he was wont to say: "Though he slay me, yet will I trust in him." If ever there was a faithful Christian he was one. In early life he erected the family altar. That family altar was never thrown down. Nothing was permitted to interfere with his stated hours of devotion. All through a long life, when the time for family devotion came, it had to be attended to. His secret devotions also were the regular business of his whole life. There is now at this time a plain, beaten path that could be followed in the night, leading to a little grove, which he made in a few months before his death. Here he often held communion with his heavenly Father.

As a husband he was faithful, kind and loving. As a father he not only labored with untiring industry for his children, but was always instructing them in divine things, and praying with and for them. So much and so regular did he read the Bible to his children that when they grew up they could repeat whole chapters from memory. The result of this parental and religious culture was a clear and satisfactory conversion of the whole family, which amounts to ten children, five of whom have crossed the flood before him, while his devoted companion lingers close behind with the other five. The writer fully believes that this would be the case with every family if the same course was faithfully pursued. This is not all the fruit of this culture and religious training. Three of his sons became ministers of the gospel, and the fourth was a warm exhorter in the church. So, though dead, he yet speaketh. As a preacher he was warm and fervent, plain and practical, faithful and untiring.

I have known him to work hard all the week and preach every Sabbath, and sometimes ride twenty miles to a regular appointment. He labored in Tennessee, Alabama and Mississippi, but the principal field of his labor was in Alabama. In his old age he moved to Mississippi, where he labored for the church, as best he could, until a short time before his departure, when he could do no more. He would hold prayer meetings every Sabbath as long as he was able to get to the church. The disease which terminated his mortal life was dropsy of the chest. A little over a year before he died he had a severe attack of it, but was relieved by the physician at the time, and he continued lingering until about the first of August, 1870, when he began rapidly to sink. He said he was conscious that his time had come. A few days before his death he commenced praying, and got perfectly happy on his bed, and exhorted those around him to prepare for heaven. His children asked him if his way was clear. He said it was. Soon the slumber of death prevented him from speaking, and he quietly sank in death. Thus departed one of the best men that ever lived or died in this country.

H. S. GILMORE.

SUBOTA, September 30, 1870.

THE LAST PRAYER.—Dr. Backus, president of Hamilton College, was upon his death-bed. His physician called upon him, and after approaching his bedside and examining his symptoms with interest and solemnity, left the room without speaking, but, as he opened the door to go out, was observed to whisper something to the servant in attendance. "What did the physician say to you?" said Dr. Backus. "He said, sir, that you cannot live to exceed half an hour." "Is it so?" said the great and good man. "Then take me out of my bed and place me upon my knees; let me spend that time in calling on God for the salvation of the world!" His request was complied with, and his last breath was spent in praying for the salvation of his fellow-men. He died upon his knees, and "entered heaven with prayer."

Christ never designed his church to be a trash for hiding of the lights, but a candlestick from which each light is to send forth its rays.

The Christian Advocate.

SATURDAY, OCTOBER 15, 1870.

COMPENSATION.

There's not a heart, however true,
But hath some little flower
To brighten up its solitude
And scent the evening hour.

There's not a heart, however true,
But hath some little flower
To brighten up its solitude
And scent the evening hour.

NEWS FROM THE CHURCHES.

MANFIELD, LA., Oct. 7, 1870.

Mr. Editor: The Mansfield Female College opened its fall session, on the twenty-eighth ultimo, very favorably, notwithstanding the severe blow received in the death of Mrs. E. L. Stuart. We have had some refreshing times on the circuit. Twenty or more accessions.

Yours in the bonds of Christ,

M. C. MASEY.

ATLANTA, ALABAMA.

Mr. Editor: The church in Auburn, Alabama, has been favored with a most gracious outpouring of the Spirit. The membership is greatly revived. Fifty souls have been converted; and thirty-eight added to the Methodist Episcopal Church South. The pastor acknowledges his indebtedness to Revs. A. D. McVay and M. S. Andrews, presiding elder, for their efficient aid.

W. SHAPARD.

SEPTEMBER 30, 1870.

Mr. Editor: The Lord is still blessing us on the Homer circuit. Since my last we have had gracious revivals at Lisbon and Homer. About forty conversions at the two meetings and the church greatly edified. Brothers Armstrong, Cravens and Cobb, of the Conference; Brothers Jordan, Blackman and Clements, local; Brother Davidson, of the Presbyterian, and Brother Harris, of the Baptist Church, did us good service. The glory belongs to God.

C. A. C. NORTH ALA. CONFERENCE, September, 1870.

Mr. Editor: Since we last wrote we have held several protracted meetings. The Lord blessed them, and we have reason to believe that at each of them the church was revived, and sinners were brought to a knowledge of the truth as it is in Christ Jesus. Our third quarterly meeting was held at Johnson's chapel, on the seventeenth and eighteenth instants. Brother Bohnd, our presiding elder, staid several days with us, and did all the preaching. We attended the camp meeting at Grimes's chapel, ten miles west of Elyton. It commenced on the twenty-second instant, in her very unfavorable auspices. Brother J. D. Anthony, pastor in charge, was providentially detained at home, and the burden of the meeting fell on Brother Boland, who had just completed a round on his district, over one thousand miles by private conveyance, preached on an average nearly once every day, but he went to work with his usual untiring zeal for the prosperity of Zion and the salvation of sinners. The meeting surpassed anything we ever saw. The second evening was indeed a time of refreshing from the presence of the Lord. At every hour's service the meeting increased in interest to the close. The second and third days Brothers Isaac Taylor, William Wilson, J. B. Powers, J. G. Gurley and other ministerial brethren came in and labored earnestly with us. We did not learn the number of conversions, but we are satisfied that many will look back with joy to that sacred plat of ground where they began to live. Pray for us.

Fraternally, etc., C. L. K.

HAYNEVILLE, Sept. 28, 1870.

Mr. Editor: I have just closed a series of protracted meetings on the Haynesville circuit, resulting in the conversion of about one hundred souls and ninety accessions to the Methodist Episcopal Church South.

At Whitehall, assisted by Revs. J. R. Smith and Harris, we held a meeting which lasted ten days. This place was one of the most wicked places in the parish. A retail whisky shop of three years' standing had spread its poisonous miasma through the minds of the young and old men of the place, until the morals of the community

were well nigh ruined. But the good Lord intervened to save them by this meeting. The grocery was broken up. Grocery keepers, Sabbath breakers, swearers, drunkards and gamblers were converted. I never saw a greater change wrought in the moral status of a community. The results of this meeting will only be known in eternity. I have heard of members joining other churches, dating their conversion to Whitehall meeting. (The Baptists will take Methodist work as good.) We had but fourteen members at the commencement of the meeting; at its close we numbered fifty-one. At Crystal Springs our meeting was equally as good as the above. We had but a handful of members here, and closed the meeting with fifty. Here an aged man, seventy-five years old, was powerfully converted. He is now as zealous for the cause of God as he was formerly for sin.

At Ward's chapel, Mount Zion and Grey's school house we had good meetings; also at Haynesville. We closed the meeting at the latter place night before last. I never saw a greater display of divine power with the church than at this place. It ought to have been protracted longer, but Brother Jordan, who rendered us valuable assistance at the meeting, had left us; and Brother Smith (who had stood by me through the heat of battle) and myself were worn out. Eight weeks of incessant labor in protracted meetings has so prostrated me that I am almost worn out with fatigue. The good Lord was abundantly blessed my people this year, and greatly strengthened the church. Prayer and class meetings are revived. The family altars that have been torn down for years have been re-erected. Peace and harmony, with religious prosperity, pervades the whole circuit. The Lord hath done great things for us, whereof we are glad.

JOHN A. MILLER.

MINDEN CIRCUIT, LOUISIANA.

SHREVEPORT, LA., October 9, 1870.

Mr. Editor: This is a small work composed of four societies, and one appointment taken in this year, at which we have no society or church organization. Denominational lines are distinctly drawn within its bounds. It lies in almost a line north and south, only twelve miles in length—this being the distance from Minden, the southern extremity, to Flatlick on the north, Oak and Pine Groves lying between. I sent you an account of the District Meeting, which resulted in the accession of thirteen members at Minden; also of eight at Flatlick. I however returned to that neighborhood—the laymen having continued the meeting—and, assisted by Brothers Miller and J. R. Smith, protracted it a week longer, resulting in twenty-four accessions and as many conversions. We closed at Flatlick on Friday night before the second Sabbath in September, and the next day commenced a meeting at Pine Grove. The Lord owned his word and blessed his people. Twenty-six were added to our church—mostly males and material of much promise to the church. Brother Kimble was with us one day and preached, and Brother B. F. Alexander took charge and continued the meeting until Sunday night. Having an appointment for Minden on the third Sabbath, and also to commence at Oak Grove, at three o'clock, a meeting with a view of protracting, I was compelled to leave after the eleven o'clock service. Brothers Kimble and Alexander rendered us valuable assistance at the Oak Grove meeting. Fourteen souls were added to our church and as many conversions. The meeting closed on Friday night, and on Saturday at eleven o'clock we commenced a meeting at Lewis' school house. This is the new appointment taken into our circuit this year. The congregation in part was from the Pine Grove and Flatlick neighborhoods, and hence at the very commencement the people were moved and the power of God displayed.

We were here assisted by Brothers Miller and Smith. On Wednesday night we closed by baptizing nineteen adults, and receiving

twenty-nine persons into the fellowship of the church. Two of the applicants for membership having been raised under the influence of immersion prodigies, wished time to inform themselves on the subject before being baptized.

Our promise to assist Brother Wilkinson at this place compelled us to close our connection with the meeting on Wednesday night. Each member received was assigned either to Pine Grove or Flatlick church, as they desired, and the protracted meetings on the little Minden circuit have added one hundred and eight members to our church, besides those who will join other churches. "Bless the Lord, O my soul."

N. A. CHAVENS.

Jefferson's Sketch of Washington.

His mind was great and powerful, without being of the very first order; his penetration strong, though not so acute as that of Newton, Bacon or Locke; and as far as he saw, no judgment was ever sounder. It was slow in operation, being little aided by invention or imagination, but sure in conclusion. Hence the common remark of his officers, of the advantage he derived from councils of war, where, hearing all suggestions, he selected whatever was best, and certainly no general ever planned his battles more judiciously. But if deranged during the course of the action, if any member of his plan was dislocated by sudden circumstances, he was slow in a readjustment. The consequence was that he often failed in the field, and rarely against an enemy in station, as at Boston and York. He was incapable of fear, meeting personal dangers with the calmest indifference. Perhaps the strongest feature in his character was prudence, never acting until every circumstance, every consideration, was maturely weighed; refraining if he saw a doubt, but when once decided, going through with his purpose, whatever obstacles opposed.

His integrity was most pure, his justice the most inflexible I have ever known; no motives of interest or consequence, of friendship or hatred, being able to bias his decision. He was, indeed, in every sense of the word, a wise, a good and a great man. His temper was naturally irritable and high-toned; but reflection and resolution had obtained a firm and habitual ascendancy over it. If ever, however, it broke its bonds, he was most tremendous in his wrath. In his expenses he was honorable, but exact; liberal in contributions to whatever promised utility, but frowning and unyielding on all visionary projects, and all unworthy calls on his charity.

His heart was not warm in its affections; but he exactly calculated every man's value, and gave him a solid esteem proportioned to it. His person, you know, was fine, his stature exactly what one would wish; his deportment easy, erect and noble, the best horseman of his age, and the most graceful figure that could be seen on horseback. Although in the circle of his friends, where he might be unreserved with safety, he took a free share in conversation, his colloquial talents were not above mediocrity, possessing neither copiousness of ideas nor fluency of words. In public, when called on for a sudden opinion, he was unready, short and embarrassed. Yet he wrote readily, rather diffusely, in an easy and correct style. This he had acquired by conversation with the world, for his education was merely reading, writing and common arithmetic, to which he added surveying at a later day. His time was employed in action chiefly, reading little, and that only in agriculture and English history.

His correspondence became necessarily extensive, and, with journalizing his agricultural proceedings, occupied most of his leisure hours within doors. On the whole his character was, in its mass, perfect, in nothing bad, in a few points indifferent; and it may truly be said that never did nature and fortune combine more perfectly to make a man great, and to place him in the same constellation with whatever worthies have merited from man an everlasting remembrance. For his was the singular destiny and merit of leading the armies of his country successfully through an arduous war, for the establishment of its independence; of conducting its councils through the birth of a government, new in its form and principles, until it had settled down into a quiet and orderly train; and of scrupulously obeying the laws through the whole of his career, civil and military, of which the history of the world furnishes no other example.—Thomas Jefferson.

INCONSISTENCY of life is utterly destructive of peace of conscience. The two things are incompatible. They cannot and will not go together.

New View of the Great Pyramid.

A recent number of the *Scattered Nation* has an article entitled "The Great Pyramid the Greatest Architectural Wonder on Earth."

The material facts and statements given in the article are, it is stated, selected and condensed from several valuable publications, principally from "Life and Work at the Great Pyramid," three vols., 1867; "Our Inheritance in the Great Pyramid," both by C. Pinzzi Smith, Astronomer Royal for Scotland, who spent four months at the Great Pyramid, making the most particular and accurate measurements and observations of everything concerning it; and a work called "The Pyramid and the Bible," 1868, by a Scotch clergyman, of whom Pinzzi Smith says that he has thoroughly mastered the descriptive literature of the subject. There have been published recently several other works on the topic, the best and ablest of them agreeing in their conclusions. The Great Pyramid is that at Gizeh, above Cairo, near the Nile, and the writer holds that recent discoveries and verifications concerning it, by John Taylor, C. Pinzzi Smith, St. John Vincent Day and William Petrie—all within the last ten years—show it to be, at this moment, the most wonderful thing now in existence on the face of the earth, next to the Bible itself.

A careful induction, founded on certain facts observable in the very structure, fixes on eight hundred years before Moses, and two thousand one hundred and seventy years before Christ, as the date of the building. We extract from the article the following particulars in regard to its structure:

It is situated on a peculiar isthmus between Africa and Asia, across which lies the great highway from Europe and America to India, China, Australia and Japan, near where Alexander located the grand commercial depot of the ancient world, and where France has opened a ship canal which unites the five great divisions of the globe. It stands on the thirtieth parallel of latitude, with an equal amount of terrestrial semi-surface to the north and south of it. Its four sides face the four cardinal points of the compass with more exactness than can be determined by the compass itself, without the aid of calculation. It is "in the midst of the land of Egypt, and at the border thereof" (Is. xix, 19), midway between northern and southern Egypt, and on the border of the great desert on the west, and of the fertile plain on the east. The solid rock has been cut away to an exact level for its base. It is built of dressed and systematically adjusted limestone; and its most finished parts are of the finest granite, carried from quarries five hundred miles distant. It consists of seventy million cubic feet of masonry, the stones of which are seldom less than three or four feet thick, seven or eight long, and as many wide. It covers more than twelve acres of surface. Its height is four hundred and eighty-six feet, and its circumference three thousand and fifty-four feet. It is a perfect square in its base, the four corners being set in sockets accurately cut into the rock to receive its four foundation stones. It has four equal sides, terminating in a point at the top. The whole body of the structure was originally cased with polished marble from Mokattam, though most of this casing has been torn out to build Cairo.

The structure is solid masonry throughout. It has but one narrow passage, which pierces it on the northern side, directly on the plane of the meridian. The opening is considerably up the masonry, and runs at an angle pointing outward to the then polar star. A branch from this passage leads up to two small chambers in the center of the solid mass. The solid work is two thousand times more than the space occupied by all the known passages, chambers or openings in it. The upper chamber has been called the King's, and the lower and smaller the Queen's chamber. One solitary piece of furniture is all that the vast edifice contains, or is ever known to have contained. It was put in when the edifice was in course of construction, and cannot be removed. It is an ark of dry porphyry or granite—a chest or lidless coffer of exquisite finish—cut in one piece from some of the Sinaitic mountains.

Torrenso and striking is the following incident, mentioned in the life of Dr. Marsh: "When dangerously ill, in his eighty-eighth year, he mentioned, with an expression of anguish on his countenance, that once, at the sinful taunt of a butler, he uttered an oath. This man had said in the presence of several of the servants, 'Master William is not man enough to swear.' He fell into the snare laid for him, and with trembling lips, for the first time and the last, he took the name of God in vain. But he went out and wept bitterly; and the recollection, even after the lapse of eighty years, caused him keen distress."—Hall's Journal of Health.

RELIGIOUS INTELLIGENCE.

The Illinois synod of the United Presbyterian Church, at their late meeting, recommended an effort to raise by January next \$100,000 to push forward the work of church extension.

Dr. Renold Kossia, a Protestant pastor from Pesth, Hungary, is in America soliciting aid for the Protestant churches in that country. His application is approved by Drs. De Witt, Adams, Haldich, Mr. Dodge and others.

The Methodist Social Union of Boston is in a flourishing condition. It consists of about sixty members—ministers and laymen—and is a power for good in the church. It will yet originate and execute glorious things for our Methodist Zion.

The Illinois United Presbyterian synod has taken a step in advance by voting that men should be called by the board or assembly to enter the foreign mission field, and the responsibility of refusal thrown upon them, instead of leaving them to offer themselves for the work.

The Morning Advertiser states that the Dowager Marchioness of Queensberry, who seceded from Protestantism to Romanism only a few years ago, and has hitherto displayed the proverbial zeal of new converts, has openly proclaimed her rejection of the dogma of papal infallibility.

A new proposal for the location of the Syracuse University (Methodist) has been made by John B. Burnet, who tenders the gift of fifty acres of land, valued at \$50,000, and offers to meet the expense of the grading of the grounds. The land is situated on the Golden hills, west of the city.

MISS MARY CLARKE, of Bellows Falls, New Hampshire, has willed \$15,000 to the Missionary Society of the Methodist Episcopal Church and the Preachers' Aid Society of the Vermont Conference. Her brother, says Zion's Herald, gave to our church, for various benevolent objects, \$25,000. She was a regular subscriber for the Herald from the start, and has a file of it from 1823.

BIBLE CHRISTIANS.—The statistics of the late Conference of Bible Christians in England show 251 itinerants, 1,763 local preachers, 329 chapels, 393 deaths, 1,051 conversions, 25,750 members, 726 members on trial, 9,076 teachers, and 45,063 scholars. This is an increase of 13 chapels, 163 teachers, and 1,812 scholars; while there is a decrease of 3 itinerants, and 629 members and members on trial.

EARLIER CHURCHY's anti-Romanist campaign in Montreal has been interrupted by the destruction of his Kankakee mission property. His school house was burned about a fortnight ago, and last week his large church was likewise burned. The school house cost \$2,500, and the church \$6,000. The insurance on the former was only \$1,500, while the church could not be insured, as it was in court—the Bishop of Chicago having persistently sought to take it from Mr. Chiniqny and his flock, who built and paid for it. The intimation is that the origin of the fire was incendiary.

THE ENGLISH BIBLE REVISOR.—The attempt now making in England to revise the translation of the Scriptures is chiefly in the hands of a select few of the Church of England. Recently, however, some half a dozen dissenting divines were invited to a place on the committee, whereupon the American Churchman and one or two other Episcopal papers are greatly scandalized at the act. They say that it is utterly absurd to select "sectarians and heretics to revise the official translation of the word of God for a church which has so lost her self-respect, and her sense of her own duty and business in this world, that she cannot do it for herself!"

THE Christian World for September has a letter from Miss Rankin, dated Monterey, Mexico, detailing the conversion to Protestantism of a Jesuit priest, which, having stood the tests of a year's time, appears to be genuine. He had but barely completed his studies for the priesthood, and was on the very edge of ordination, when doubts began to arise in his mind, and he turned aside to seek light at the hands of the Protestant missionaries. He has suffered much persecution since, and has been in not a little danger of his life, but displays great confidence in God's protection, and not long since made a public profession of his new faith. Great interest is felt in his case, and he is regarded as a valuable accession to the cause in Mexico.

CANADIAN METHODISM.—The Northwestern, in an article on the Methodist Episcopal General Conference in Canada, says:

Among other changes it has placed the appointment of the presiding elders in the hands of the Bishops, and has adopted our liturgy; the marriage service included. With these changes, and the previous use of our hymn book, it will be rather difficult to distinguish a

Methodist Episcopal Church in Canada from one in the States.

Among minor matters the Conference passed a disciplinary revision, prohibiting the reception into an Annual Conference of any person who uses tobacco in any form. The Conference adjourned on the afternoon of Friday, September 9. The next session will begin at Nepesee, Lennox county, on the fourth Wednesday of August, 1874.

The Evangelical Alliance's farewell meeting, held at Association Hall in this city last Sunday evening, was notable not less for its significant speeches than for its packed and eager audience. (Dr. Treuhaus Prime dwelt upon the fact that this gathering was in his sense a substitute for the grand Protestant Ecumenical Council which the European war necessarily interrupted. "That is still to come," he added, "either in the city of New York or in the city of Rome (apocalypse) and if, within the next year, God will convert the Pope, we will make him the presiding officer of our council!" Dr. William Adams discovered a subtle meaning in the circumstance that the "death-blow" to France, "the great buttress of the papal power," occurred at Sedan, the seat of an old Huguenot school of theology. The foreign delegates who addressed the gathering included the Rev. James Davis and Drs. Koenig and Rével. The latter, especially interested his hearers by a luminous and liberal-historic statement of the recent progress of religious toleration in Italy.—*Christian Union*, October 1.

CHINESE IDOLATRY DECLINING.—A little item of news from China is encouraging. Unlike the Brahmans of India, the Chinese pay great and special honor to mothers; and any true instinct of human nature Christianity can readily use as a medium for its higher appeals to the spiritual Being. So we are filled with hope when we read that "all through the empire may be seen memorial arches reared by the command of the Emperor to celebrate the virtues of good mothers; and the mother of a distinguished officer is received with all the honors accorded to a mandarin. These things are unmistakable indications that the women of China exert a very powerful influence upon the nation. Congregations of Chinese women may be gathered without difficulty, and their influence will prove an invaluable aid in the evangelization of the country." From the Chinese Recorder we learn that since the annual meeting of the Methodist Foo Chow mission, at which Bishop Kingsley ordained seven preachers, the Rev. Sia Sek Ong, one of the number, has baptized fifty-eight persons on the Ngu-ka circuit. A very significant evidence of the decline of idolatry in China is the fact that many of the temples once held most sacred are now offered for sale, and in many cases the idols have been sold for the value of the metals of which they are composed. —*Northwestern Christian Advocate*.

SCOTTISH EVIDENCE.—Although the writings of Carlyle are distinguished by a strange distortion of the English tongue, his conversation is remarkably simple and straightforward; he talks right to the point. His hatred of affectation and show is openly expressed, careless whom he may offend. I remember one occasion, at Mrs. Basil Montague's, when some lady, famous for her "muslin theology," was bewailing the wickedness of the Jews in not receiving our Saviour, and ended her diatribe against them by expressing her regret that he had not appeared in our times. "How delighted," said she, "we should all be to throw our doors open to him and listen to his divine precepts! Don't you think so, Mr. Carlyle?" The sturdy philosopher, thus appealed to, said in his broad Scotch: "Madame, I don't. I think that, had he come very fashionably dressed, with plenty of money, and preaching doctrines palatable to the higher orders, I might have had the honor of receiving from you a card of invitation on the back of which would be written: 'To meet our Saviour'; but if he had come uttering his divine precepts, and denouncing the Pharisees, and associating with the publicans and lower order, as he did, you would have treated him much as the Jews did, and cried out: 'Take him to Newgate and hang him!'" —*Oliver Optic's Magazine*.

When will you do—smile and make your household happy, or be embroiled, and make all of these young ones gloomy and the elder ones miserable? The amount of happiness you can produce is incalculable if you show a smiling face, a kind heart, and speak pleasant words. Wear a pleasant countenance; let joy beam in your eyes and love glow on your forehead. There is no joy like that which springs from a kind act or a pleasant deed; and you will feel it at night when you rest; at morning when you rise, and through the day when about your business.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, OCTOBER 15, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.

Three Dollars per Annum, in Advance.

Address—REV. LINUS PARKER, 112 Camp Street, New Orleans, La.

AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEES.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. W. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To Subscribers.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office Order, Draft, or by Express. If this cannot be done, enclose the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

MONEY.

By way of gentle reminder we would say to those having funds for the Advocate that this is the hardest season of the year financially, and that we need every available dollar to tide us over the present financial stringency. Small sums in many hands make a considerable aggregate. Don't wait till Conference, but remit at once by registered letter, post office money order or draft.

DEATH OF GENERAL LEE.

By reference to our news columns it will be seen that Gen. Robert Edmund Lee died at half-past nine A. M. on the twelfth of October, 1870, aged sixty-three years, eight months and twenty-three days. His great and magnanimous spirit has passed away from earth, and his life becomes the property of history. Like all truly great characters, his will grow upon the appreciation of mankind as it recedes from the passions and prejudices of the generation in which its greatness was displayed. But even in the midst of the recent conflict, and in the few brief years which have followed, his bitterest enemies must concede to him the possession of the highest attributes of generalship, while they can bring no charge against his integrity and uprightness as a man. His exalted genius was only surpassed by his transcendent moral qualities. He was modest, pure and good. No stain rests upon his private life. For all the qualities of true greatness he will live in history with the most eminent. No event has ever so touched the heart of our people as the death of this distinguished soldier and citizen. His example and counsels have exerted a healthful influence upon the South since the surrender. His wisdom and goodness were trusted and respected by all, and his life and presence were felt to be a comfort and a blessing in the days of our adversity. While his death may be regarded as a national calamity, it will be felt as a personal bereavement by the millions who admired and loved him. There is in his case no occasion for labored vindication of his Christian character. He was a humble and devout follower of the Saviour.

We have received the minutes of the Lexington District Conference, held at Waynesboro, Augusta county, Virginia, August 25-28, 1870. It is a neatly printed pamphlet of thirty-five pages, and contains reports of committees and proceedings in full.

TIMID CHRISTIANS.

Among God's dear children there is a large class which comes under this description, and a class which comprises some of the most beautiful and consistent examples of genuine piety. Their timidity is something different from moral cowardice, and is perfectly consistent with the spirit of martyrdom. It is characterized by a disposition to shrink from the expression of the inward and deep experiences of the soul, and from anything like a public declaration of what is transpiring in the heart. There is a peculiar sensitiveness in reference to all religious emotions, and an almost uncontrollable desire to conceal the inward feelings as something too sacred to be divulged. This reluctance to reveal what transpires within is often associated with the greatest humility and self-abasement. A sense of unworthiness underlies the entire consciousness, and leads to the persuasion that so poor and mean a life had better remain without any formal profession.

Sometimes this timidity is accompanied by doubt and something akin to the spirit of bondage to fear. It shrinks from too bold a claim upon the mercies of an infinitely holy God as much as it retires from the gaze and cognizance of men. Not wholly assured in their relations to God, they tremble at the thought of bearing witness in a public manner to the Saviour whom they desire to serve. A low degree of assurance, or the absence of it altogether, is not always connected with this retiring disposition. We have met with persons who had evidently attained to a very high degree of holiness, who walked "in the fear of God and in the comfort of the Holy Ghost," and yet to tell their experience was more impossible than to be burned at the stake for their faith.

Generally religious and natural timidity are found united. The over-sensitive and modest exhibit these constitutional traits in their religion, but it is far from being a universal rule. The naturally fearful, after conversion become bold as a lion sometimes; and on the other hand those of the strongest nerve and most unquestioned courage fear to confess Christ before the world. With some natures there is no cross in this. They are not nervously organized, or they are not endowed with the same delicate sensibilities, or they may have a sturdier and more wholesome constitution, both mental and physical. The bold Christian may not be such altogether on the score of grace, and although his boldness is sanctified, he may be an entire stranger to all sense of unworthiness and incompetency. Forward to the verge of impudence, self-reliant and demonstrative, he knows nothing of that self-distrust which leads the timid soul to seek a place of silence and obscurity.

We have known so many of the excellent of the earth who are embraced in the class of timid Christians, that we have come to regard them not only with patience, but with sympathy and love. There are multitudes of them who are not known in the public exercises of the church, who rarely can be persuaded to lead in the prayer meeting or speak in the love-feast, and who are yet possessed of the graces of the Spirit, and live in a most exemplary manner. They would not do a wrong or mean thing, they would go to prison or to death for Christ, and yet to stand up for Jesus, in some of the ways we have indicated, is to them a felt impossibility. This timidity is often found in connection with the deepest spirituality, the sweetest and broadest charity, and the truest refinement and purity of soul. It is found in those whose garments are kept unspotted from the world, and whose lives are fragrant with the odors of a Christ-like benevolence.

We would fain encourage the timid Christian to overcome his timidity so far as to discharge the duties which he owes to Christ and the church. The conclusion may be a false one, that we are without a call or qualifications in this direction; and the evasion of so sore a

cross may often have much of selfishness and pride in it. The fact that it is a cross to pray in public, or to speak of the sacred experiences of the heart, indicates that there is a special blessing in them. The church needs their testimony, and the world needs it. The causes of their timidity, when overcome, contribute to the effect of their example. The humility and self-abasement which have hitherto kept them silent will impart peculiar force to their words. In the social meetings of the church we have often been impressed with the fact that those who might tell the most edifying experience, and pray the prayer of richest unction, are the ones from whom nothing whatever is heard. Let our timid brethren and sisters set before them the duty of taking up their cross, and then let them go to God for help. Let them be sure that there is no pride in the way, and then let them, with all humility, confess their Master, and contribute their part toward the edification of the disciples. In many instances, if not in all, this timidity may be overcome, not so as to banish modesty and shame-faceness, but so as to enable every humble believer to be strong and brave for the truth. The highest efforts in prayer must be directed to overcome the spirit of fear, and to attain "the spirit of power and of love and of a sound mind."

PUBLIC OPINION.

Public opinion, as an element of power, enters much more into the government of modern than of ancient societies. In politics public opinion is the opinion of the majority at the time. Jefferson says it is an essential feature of republics that majorities must rule. Outside of politics public opinion is the opinion of the majority of a class. These opinions are just as numerous as the classes into which men, by affinity, interest or necessity, have ranged themselves, the public opinion of one class exerting little or no influence upon other classes outside of its circle.

There is a public opinion among lawyers, physicians and merchants. So there is in an army, and so among sailors. These several opinions are confined almost exclusively to the classes in which they originate. Where public opinion expresses itself, and exerts its influence in the direction of manners and dress, it is called "the fashion." This is one of the most unstable and variable forms of public opinion, ever undergoing changes the most wonderful and unaccountable. In schools the students, male or female, have their public opinion, which, according to its character, is potent for good or evil, few having the courage to breast or disregard it. Hence if a school is under religious influence—if the majority are pious, or from their training are favorable to piety—the whole school will take a pious direction. The profession and the duties of piety will cost comparatively little cross to the piously inclined. But if the majority of the school are godless, if no favoring countenance is given to piety by the teachers, then the profession and practice of piety will require a most heroic moral courage—far more, indeed, than many boys and girls can put forth. This fact in regard to schools should be taken into serious account by all religious people who wish their children "brought up in the nurture and admonition of the Lord" not only at home, but at school as well.

Public opinion is not always the true or the right opinion, and good men have had in all ages to protest against it, and often fall victims to its blind and cruel power. Public opinion and public practice were all wrong in the days when the flood came upon the earth, for there were among the millions but "eight righteous persons." Public opinion was all wrong in Sodom, and the populous, opulent and corrupt cities of the plain. There were but three consistent and persistently pious persons whom the angel saved forth. Public opinion was all wrong when, in Jerusalem, they said of immaculate goodness embodied in the world's Redeemer:

"Crucify, crucify him; away with him; he shall not rule over us." And so all along the path of history, from the remotest past until now.

Public opinion is no correct standard of moral action. It tolerates in one age what it condemns in another. A hundred years ago scarcely any serious opposition was made to that honorable form of murder known as dueling. Public opinion is improving in this direction, and we hope its increasing brightness will ere long sweep this vestige of past darkness from the world. Public opinion utterly condemns and repudiates profanity and impurity in one sex, while it tolerates them in the other.

Again, public opinion is a low standard. It appeals to pride, to interest or to fear, to temporal and material motives; and no individual or community can ever be virtuous, in the high Christian sense, who base their virtue upon this foundation. The highest authority says, "Thou shalt not follow a multitude to do evil," no matter how safe, how profitable or honorable the multitude make evil-doing. No man is virtuous, in the Christian sense, who is so because public opinion may happen in his time to indorse virtue. No man is honest who is so merely because it's the best policy. The standard of right is the revealed will of God, and the voice of conscience instructed by his word and prompted by his Spirit.

It should be the constant labor of Christians, by example and precept, by the tongue and by the pen, to purify, elevate and Christianize public opinion. To wait for public opinion to reform the morals of men is to wait for a corrupt tree to bring forth good fruit—an impure fountain to send forth a sweet stream. Public opinion, in its widest acceptance, is the aggregate opinion of a community, a nation, the world. But men are morally corrupt. The fountain is corrupt; the stream of opinion flowing thence can never be other than the fountain—corrupt. Hence it is that inspired wisdom says: "Ye must be born again"—be "new creatures in Christ Jesus." It remains, then, that the great work to be done is to lead men to Christ. It is thus we lead them to newness and holiness of life.

DEATH OF A YOUNG PREACHER.

Mr. Editor: It is my painful duty to inform the church that Bro. Gilbert Guillet departed this life on last Saturday night, about midnight. He died of yellow fever. A more extended notice will soon be given. Brother Guillet was in charge of Washington circuit, St. Landry parish, as a supply.

B. F. WHITE.

OCTOBER 6, 1870.

YELLOW FEVER.—We give the number of deaths daily for the seven days since our last report:

October 6.....	15
October 7.....	19
October 8.....	15
October 9.....	10
October 10.....	4
October 11.....	14
October 12.....	11

Making a total of..... 78

There are no indications that the fever will spread much beyond the present limits. There is none to speak of outside of the hospital, shipping and the infected region near the French market.

DEATH OF A METHODIST PREACHER.—Rev. William Krebs, of the Baltimore Methodist Episcopal Conference, died on Monday, September 26, at his residence on Launvale street, in the fifty-second year of his age. He had been suffering with pulmonary affection for the past two years, and awaited his decease with Christian fortitude. He expressed a desire that his funeral might take place from Wesley chapel, corner of Sharp and Barre streets, of which church he had been pastor. Brother Krebs was an able minister of the New Testament—a man of sterling integrity of character, quiet, unobtrusive in manners and great fidelity to his holy vocation. His death is a public loss, while to his deeply bereaved family it is irreparable. —Baltimore Episcopal Methodist.

Enjoy the blessings of this day if God sends them; and the evils bear patiently and sweetly. For this day only is ours; we are dead to yesterday, and we are not born to tomorrow.

New Orleans District Conference.

This body met at the Carondelet Street church on Wednesday, the fifth instant, and adjourned on the night of the seventh. The devotional and business meetings were unusually well attended, and we trust that the conference has been one of interest and profit to the district.

The conference recommended that Greta, Carrollton and the German charge on Soraparu street be considered as missionary work, and that appropriations be made to them from the missionary fund by the Annual Conference.

It was resolved that a permanent committee of seven, on education, be appointed by the president from the various Methodist churches of the city, to take charge of the subject of Methodist education in this city, with power to institute schools as found expedient and practicable, and with power to appoint sub-committees to different schools, and that the committee have power to fill vacancies occurring in their body. The following persons were appointed on the Committee on Education: John G. Parham, John L. Dunnica, Dr. J. J. Lyons, J. C. Miller, W. H. Foster, W. R. Stuart and Richard Jones.

A resolution was passed appointing a committee of five to procure some eligible ground for a camp meeting on some railroad, at a convenient distance from the city, and to make all arrangements needful for the holding of a camp meeting annually. The following is the Committee on Camp Meeting: W. H. Foster, J. H. Keller, H. F. Given, D. A. Harris and Dr. John W. Adams.

The following resolution in reference to orphan's homes was adopted: Resolved, That as the Mississippi Conference meets before the Louisiana Conference, this District Conference request the Mississippi Conference to appoint a committee of three to confer with a similar committee of the Louisiana Conference upon the subject, with power to initiate the organization and institution of an orphan's home for the children of the Methodist churches and congregations of the two Conferences.

The presiding elder and preachers in charge were requested to adopt some plan for holding a series of meetings in the various charges of the district. The preachers were requested to preach on the subject of class meetings, and to read the pastoral address of the recent General Conference to their congregations.

The following lay delegates were elected to the Annual Conference: W. H. Foster, J. H. Keller, A. S. Helmie and J. O. Fuqua. The following are the reserve delegates: J. P. Harrison, Rev. J. D. Parker, R. L. Robertson and Louis Todswor.

The next District Conference is to be held in the Carondelet Street church, New Orleans, and it was moved that the presiding elder be requested to appoint the time in the spring of the year, and if practicable in the month of May.

The Sunday School Convention.

Mr. Editor: Please call the attention, through your valuable Advocate, of the Bishops and Annual Conferences to the Sunday School Convention provided to be held at Nashville, on May 18, 1871, that no Conference may fail to elect delegates thereto "from their most efficient Sunday school men, in the ratio of one member for every forty members of each Annual Conference; provided, however, that every Annual Conference shall be entitled to one representative."

Remind the Conferences also of the provision of the General Conference, "that each Annual Conference elect a corresponding secretary to represent the Sunday school interests of that Conference to the Sunday school secretary elected by the General Conference." And oblige yours ever, W. H. FOSTER.

NEW ORLEANS, October 11, 1870.

Visit the sick, the widows and the fatherless—this is one part of that religion that is "pure and undefiled."

A patriot may have joys as great as the welfare of his country is important.

Sunday School Convention Reports.

To the Superintendents of Sunday Schools of the Methodist Episcopal Church South: DEAR BROTHERS: At the Sunday School Convention to be held at Nashville, Tennessee, on Thursday, May 18, 1871, it is deemed highly important that full statistical reports be presented from all the various Sunday schools of our church.

The undersigned were appointed a committee to prepare a blank form for uniform report from all the schools, to which we desire to call your particular attention, and to request you to furnish full reports to each of the items thereof.

Please prepare your reports at as early a date as practicable after the first of January, 1871, and forward them to the address of the Sunday School Convention, care of Dr. A. H. Redford, agent, Nashville, Tennessee.

1. Name of school and Conference.
2. Name of place and location.
3. Date of organization.
4. Number of officers and teachers.
5. Do. under 15 years of age.
6. Do. from 15 to 20 years of age.
7. Do. from 20 to 30 years of age.
8. Do. from 30 to 60 years of age.
9. Do. over 60 years of age.
10. Do. members of the church.
11. Do. converted through the influence of the Sunday school.
12. Number of scholars on the roll book.
13. Do. in actual attendance.
14. Do. in average attendance.
15. Do. under 5 years of age.
16. Do. from 5 to 10 years of age.
17. Do. from 10 to 15 years of age.
18. Do. from 15 to 20 years of age.
19. Do. over 20 years of age.
20. Do. members of the church.
21. Do. converted through the influence of the Sunday school.
22. Do. converted the last year.
23. Do. connected with the Sunday School Missionary Society.
24. Number of volumes of books in library.
25. Do. of our church publications.
26. Do. of other books of all kinds.
27. Number of copies of the Visitor taken.
28. Do. of other papers taken.
29. Amount of moneys raised for the school.
30. Do. for other schools.
31. Do. for missions.

Presiding elders and preachers are particularly requested to give special attention to the above, and to see that the subject matter be brought to the knowledge of each of their superintendents personally, that the convention may be furnished full statistical reports accordingly.

Wm. H. FOSTER,

T. J. McCOY,

Committee.

NEW ORLEANS, September 15, 1870.

DEATH OF MRS. CROSS.

Just as we are closing up our columns we receive the sad news of the death of this cherished friend. We have no words to tell how much we esteemed her friendship—and no space now for the eulogy our heart is inditing. Earth's sunshine is not so bright as it was yesterday—heaven is dearer. The following letter, just received, tells the sad story of the saint's translation to a brighter world:

NOLAN, KY., Sept. 29, 1870.

MY DEAR DOCTOR: At a quarter before six this morning departed the peaceful spirit of your friend, my beloved wife. I arrived from Atlanta only last night, too late for everything except her recognizing "Yes," and the holding of her hand as she went down into the cold waters. How often have I heard her quote the words: "For so he giveth his beloved sleep." Never were they more beautifully realized than in her tranquil death. She literally "fell asleep," and now she lies before me with so soft a smile upon her face that one might well imagine her only in a happy dream. Tomorrow we shall carry her to Harrodsburg, and lay her beside her father and mother, where she will smile on under the sod till "the resurrection of the just." She had been ill for months, but was at length convalescent, and the day was appointed when I was to come and escort her to her Southern home, the hope of which filled her with reviving joy; but the angel convoy anticipated by six days my appointment, and Oh! how much better it is to be with Christ in paradise! You and thousands more will mingle your tears with mine; but we will not mourn without hope, for it is "the Resurrection and the Life" that "giveth his beloved sleep." Farewell, sweet saint of Jesus! We shall meet thee "in that day!" Yours with much love,

JOS. CROSS.

Southern Christian Advocate.

The great globe itself is not more interlaced with golden veins, and filled with precious things, than the field of revelation, the storehouse of the unsearchable riches of Christ.

THE ST. LOUIS CONFERENCE.

FIVE DAYS' PROCEEDINGS.

The St. Louis Conference convened in its twenty-third session at the city of Boonville, September 28, A. D. 1870, and was opened with religious services conducted by the presiding Bishop, H. N. McTyeire.

ADMITTED ON TRIAL.

Benjamin S. Robbins, from Versailles station; Thomas J. Stringfield, from Independence circuit; Milton G. McAdister, from Little Osage circuit; Hibbard Briggs, from Springfield station; Dixon F. Gouley, Charles E. Deviney, from Wesley chapel, St. Louis.

TRANSFERRED.

The Bishop announced the following as transferred to this Conference, viz: Marcus Arrington, from Arkansas Conference; N. G. Berryman, from Kentucky Conference; George A. Shaeffer, from White River Conference; and L. M. Lewis, from the Texas Conference.

SUNDAY SCHOOL CONVENTION.

The General Conference having provided for a delegated Sunday School Convention to meet at Nashville, the third Thursday in May, A. D. 1871, under which action this Conference being entitled to three members, the Conference elected the following delegates, viz: Rev. T. M. Finney, Judge Noah Handy and Rev. Joseph W. Lewis. Alternates: Samuel Cripples, J. C. Moore and Edward Windsor.

THE PROVISIO.

The Bishop submitted to the Conference the proviso adopted by the late General Conference in reference to the power of the Bishops to interpose objections to the legislation of the General Conference deemed by them to be unconstitutional. The vote of the Conference being taken, resulted—ayes eighty-one, nays one.

DIVISION OF THE CONFERENCE.

The following resolutions were offered:

WHEREAS, Our Conference has grown so large that it cannot be entertained except in our larger cities; and whereas, the General Conference has authorized us to divide our territory; therefore,

Resolved, That a committee of one from each district be appointed to take into consideration the propriety of dividing this Conference into two separate bodies.

Resolved, That should the Committee on Division determine to divide the Conference they shall report upon a line of division, and names and places of the next session.

A. M. RADER.

W. M. PERRY.

The resolutions, on motion, were referred to a committee, composed of one minister and one layman from each presiding elder's district.—*St. Louis Christian Advocate.*

Merchants' and Citizens' Meeting.

A meeting of the merchants and citizens of Galveston was held in the rooms of Mr. James Sorley, at eleven A. M., Wednesday morning, to take into consideration the present state of the health of our city, and to take such action as the commercial interests of the city and the State at large demand. Mr. T. H. McMahon was called to the chair, and Mr. John Thornton was elected secretary. After due deliberation Col. N. B. Yard, the president of the Howard Association, James Sorley, Colonel A. Somerville, T. H. McMahon, R. J. Willis and Mayor McKee were appointed a committee to communicate with the Governor and the authorities of the cities and towns in the interior which are exposed, and obtain such relaxation of the quarantine as will at once guard the health of the interior and meet the more imperative demands of business. As the unanimous sense of the meeting, the following preamble and resolutions were adopted:

WHEREAS, The city authorities, the Board of Health and the physicians of the city have failed to report any case of yellow fever within the past six days, and we have no knowledge of any sickness of epidemic character ourselves; therefore, be it

Resolved, That in the opinion of the meeting no yellow fever exists at this time in this city, nor has there been any in the past six days.

Resolved, That in the event it appears we pledge ourselves to give timely notice of it to the citizens of the interior.

We are fully satisfied that the above resolutions present the true state of the city as regards the epidemic at the present time. We are in a position that enables us to speak advisedly. Four cases were reported last Thursday. No more can be found in the practice of all the physicians in the place.

Should three days pass without any other cases being reported, we shall feel safe. The people abroad have, in the names of the committee appointed, an ample pledge that warning will be given should another case appear. A few days will decide the question.—*Texas Christian Advocate, Oct. 6.*

ALABAMA CONFERENCE.

Mr. Editor: Not long since appeared in the ADVOCATE an unadvised communication from Dr. Hamilton, concerning the collections for the Conference fund, which is responded to in a spirit of tantalization by several members of the Conference sojourning in the east. This is to give notice that in the Alabama Conference there is no east, no west, and that no sectional jealousies and animosities will be tolerated. Whatsoever interest shall threaten the unity of the Conference will be sacrificed. We will dwell together as brethren knit together in love.

ALABAMA.

Significant.—The people of Rome have voted almost unanimously in favor of union with the kingdom of Italy; in other words, against being longer left under the temporal rule of the Pope. This shows the respect in which his holiness is held by those nearest the throne, and who know best the character of his government. They have about the same respect for his infallibility, and his Jesuitical Council may as well blot out its record and disperse finally. It may do to set him up for the veneration of the people at a distance, but it's of no use in Rome, where he is known.

Other nations are rapidly coming to a right appreciation of him. Those which have clung to him longest and most obsequiously are failing him. Spain, and Austria, and France are breaking away from the spell of superstition in which they have been held; Providence is breaking their power to help him, if they were so disposed. The world is moving, and in no other respect so manifestly as from all darkness of the middle ages. *United Presbyterian.*

A SUNDAY SCHOOL SCHOLAR IN SPAIN.

A little boy in a Sunday school in Madrid wanted a Bible, but could not afford to buy one, as it cost nearly a shilling (twenty cents), and he earned only five pence (ten cents) a day, which he needed to feed and clothe himself with, for most of our little folks have to earn their own living independently of their parents. So what did he do? He went without his chocolate at breakfast for seventeen days, and ate dry bread alone. Poor, dear boy!—he who at best had only bread and chocolate in the morning, and a dinner of little more! With this sacrifice he saved up three reals (fifteen cents) in furthering pieces, and brought them to us for a New Testament. Of course, on learning all the facts, I gave him the Bible and took his money, for I thought it best not to weaken the effect of this noble act.—*Episcopalian.*

The promises in the Bible are not made to one act, but to the continued habit of prayer. It evinces more depravity not to repent of a sin than it does to commit it at first. A good man may be hurried away by temptation to commit a sin, but he will invariably repent of it afterward. To deny, as Peter did, is bad; but not to weep bitterly, as he did, when we have denied, is worse. One mark of a true convert is that he continues to repent of his sins, after he hopes that they are pardoned. The true Christian desires to be saved from sin; and his hatred of sin and repentance for it increase in proportion as his assurance of heaven increases.

The California Conference of the Methodist Episcopal Church adjourned on Monday last, after a pleasant and profitable session at Stockton. Revs. W. R. Goben and J. C. Pendergrass were present as fraternal delegates from our Conference, and the correspondent of the Alta says their address was greeted with applause. We have not yet seen the address. Rev. C. V. Anthony was appointed fraternal delegate to our approaching Conference.—*Spectator, September 29.*

Married.

In the Methodist Episcopal Church, Pensacola, Florida, September 8, by Rev. J. A. Pace, Mr. JOHN S. DANIELS to Miss HATTIE WILLIAMS, all of Pensacola.

At the residence of the bride's mother, September 15, by Rev. J. A. Pace, Mr. THOMAS McVAY to Miss INDIANNA HERNANDEZ, all of Pensacola, Florida.

On the fifth instant, at the residence of the bride's father, in Santa Rosa county, Florida, by Rev. J. A. Parker, Mr. M. B. MAXWELL, of Escambia county, Florida, to Miss ELIZABETH T. JOHNSON, of the former county.

Obituaries.

Died, at Happy Home, Bayou Wexia, St. Landry parish, Louisiana, October 4, 1870, MARY LACY, aetat twenty-five, beloved wife of Courtland LeG. Goodrich.

"Another gem in the Saviour's crown
And another soul in heaven."

Sister SARAH JANE HERRINGTON was born in the State of Mississippi, July 9, 1841. She was married to Brother Andrew Jackson in April, 1860; joined the Methodist Episcopal Church South in the fall of 1867, and died in Carroll parish, Louisiana, on the eighth of August, 1870.

Before her illness she seemed to have had a premonition of her early death, for after her burial her devoted husband found a letter placed away carefully and addressed to him, from which we make the following extract: "My dear husband, it is for your sake I bear all this suffering; and when I am gone I hope to be remembered by you, especially in your dark hours, for it is then I would cheer you if I were by your side. Be a father and mother to my little angels. Teach them the road that leads to heaven. Tell my dear old mother not to forget my babes."

She has thus passed away from this vale of gloom and death, we hope, to that wondrous sphere where all is life and love. May that dear husband, and the precious angel children, and the loving aged mother, be gathered too in due time.

JAS. E. BRADLEY.

Died, August 2, 1870, Mrs. EMILY A. WINE, in the twenty-fourth year of her age.

Sister WIRE was the second daughter of the late James Clark Wilson, and was born in New Orleans on the fifth of November, 1846. From her childhood she was a pupil in the Sunday school, and for several years before her death a teacher. On the fifth of May, 1867, she joined the Felicity Street church of New Orleans, and became a consistent and devoted member. Her conversion probably took place before she attached herself to the church, and she had a clear and comfortable assurance of pardon during the last four or five years of her life. She was most faithful and conscientious in all her duties to the church, to the Sunday school and to her family. She was the eldest of five orphan children, and for a number of years she devoted herself to the guidance and support of her brother and sisters. A purer and more unselfish spirit never lived. On the eighteenth of November last she was married to Mr. Benjamin F. Wire, of this city, and on the second of August last she passed from earth to heaven. Her dying hour was one of great peace and triumph, and her last words were: "So happy!"

LINUS PARKER.

Miss MIRANDA M. FEAZELL was born in Paulding county, Georgia, April 7, 1840. In 1850 her father moved to the State of Mississippi and settled in Clark county. From thence he moved to Smith county, where she resided with her parents until her death, which occurred August 14, 1870, aged thirty years, four months and seven days.

At the age of sixteen she joined the Methodist Episcopal Church South, under the administration of Brother James Turner, and no one ever found fault with her Christian walk. She was meek yet affable in her manner toward all with whom she met.

For two years she had been confined to the house, and for several months to her room. On the Friday before she died she became convinced that her stay on earth would be short, and began to view and converse retrospectively. She said: "My way is clear. All is well." She asked them to sing:

"O sing to me of heaven
When I am called to die," etc.

She then repeated the beautiful hymn, beginning—

"On Jordan's stormy banks I stand,"

A little while before she died she asked her father to raise her hands, that she might praise God before she died. He did so, and she clasped them together. He then remarked to her that she would soon be across the cold river, and she said: "Yes, pa, thank God!" And just as the gray dawn of the holy Sabbath was rising above the

eastern horizon she passed away, to rest in the paradise of God forever.
J. M. WEAVER.

"Southern Christian Advocate" please copy.

Departed this life, at St. Stephen's, Washington county, Alabama, on the twenty-eighth of June, Mr. BURNELL PITMAN BRANTLEY, aged sixty-nine years, six months and twenty-eight days.

He was born in Halifax county, North Carolina; removed to Alabama in 1828, and settled at old St. Stephen's, in Washington county, where he resided about four years. In 1832 he removed to Gainesville, and was a citizen of this place until last January, when he removed back to St. Stephen's. He was therefore one of the earliest residents of this town. He has been identified with almost every year of its past history. He was well known to all our people, and was universally esteemed. He was one of the kindest and most inoffensive of men—gentle and amiable in disposition, a lover of good men and a friend to all.

He ever maintained an upright and honorable character, had the confidence and respect of all who knew him, and leaves behind him very many warm friends who cherish his memory with sincere affection, and to his weeping family the inheritance of "a good name," which is rather to be chosen than great riches.

But we can say more than all this. He was a sincere, humble, consistent Christian. He made no pretensions, was quiet, meek and unassuming, but he gave every evidence of the sincerity of his profession, of the reality of his love to Christ, and of his willingness to promote his Master's cause to the extent of his ability. For thirty years he was a member of the Baptist church in Gainesville, Alabama, and always enjoyed the confidence and regard of his brethren and sisters. His removal was a loss to them which is now consummated by his death. But his Master has called him to a higher and more glorious position and service in his kingdom on high. His final sufferings were both severe and protracted, his attack lasting eighteen days; but he bore them with Christian fortitude and uncomplaining submission, and now he suffers no more. He has gone to the land whence sighing and tears have fled away, and the inhabitants never say: "I am sick." "Blessed are the dead who die in the Lord from henceforth; yea, saith the Spirit, that they may rest from their labors, and their works do follow them."

Mrs. ADALINE F. KENNON, wife of the Rev. H. J. M. Kennon, M. D., died at Westville, Dale county, Alabama, August 13, 1870, in the forty-sixth year of her age.

She was the daughter of the venerable Rev. William Mizel, deceased, and was born in Jones county, Georgia, October 24, 1824. In 1835 she removed with the family to Russell county, Alabama, and in 1855 to Dale county. In 1864 she was married to Dr. Kennon, a faithful and useful local preacher of our church. Within these brief dates is comprised a life of moral beauty, symmetrical in its proportions, and adorned by the graces and fruits of the Spirit.

Being surrounded from her infancy by excellent religious influences, and faithfully instructed by pious parents, she was early the subject of converting grace, and joined the Methodist Church at ten years of age, in the communion of which she lived and died. She was not very demonstrative in her religious experience and enjoyment, and often complained of what she termed her littleness of faith. Her religion did not rise and fall with the ebullition of feeling, but was a fixed principle in the heart, even and uniform in its flow, and exhibited itself in her every-day life.

Firm and unremitting in her affection, she studied the comfort of her husband, and strove to fill his home with sunshine and pleasure. For several years Brother Kennon has been the subject of severe bodily affliction, and with what tenderness and devotion she ministered to him he alone can tell. She filled the delicate and responsible relation of step-mother, and the children all revered and loved her as their real mother.

She was attacked with bilious fever, and was sick about two weeks. A high state of inflammation was superinduced, which was the immediate cause of her death. Seeing that her feet were fast going down into the cold waters of death, her husband approached her and told her that her days were well nigh numbered. She received the intelligence with perfect calmness, and bade him an affectionate farewell and requested him to meet her in heaven; and after taking leave of all around her, and exhorting them to meet her in a better world, she sweetly fell asleep in Jesus about three o'clock on the

morning of the thirteenth of August. She was borne to burial by a large concourse of friends, and her body sleeps in the graveyard of Pleasant Hill church, to await the sound of the archangel's trumpet.

Brother Kennon is the subject of deep affliction. During the last decade of years he has buried two wives and six children. But "these all died in faith." As his ties to earth are sundered, may heaven present to him greater attractions.

WESLEY B. DENNIS.

\$500 Reward offered by the proprietor of Dr. Sage's Catarrh Remedy for a case of Catarrh which he cannot cure. Sold by druggists or by mail—Sixty Cents. Pamphlet, giving symptoms and mode of treatment, sent free. Address Dr. R. V. Pierce, Buffalo, New York.

Publishers,

—No 24 3m. 68 Camp St., New Orleans.

J. W. BLACKMAN'S
COMMERCIAL COLLEGE.

61 CAMP STREET,
Corner Commercial Place, N. O.

Open day and evening the entire year. Penmanship, Book-keeping, Mathematics and Languages are practically taught by experienced professors. Persons from fifteen to fifty years of age attend. Instruction given privately to each student, who has a separate desk to himself, and is put through a thorough and systematic course of study to qualify him for the situation he intends to fill. Persons who have neglected their education are here speedily prepared for business. Students from the country may obtain board in the family of the principal.

Terms—Twenty per cent. less than other Commercial Colleges in this city. Cost of full Commercial Course only \$100. Average three to four months.

The principal has been a professional teacher in New Orleans since 1851.

For circulars address
J. W. BLACKMAN,
New Orleans.

SOUTHERN METHODIST
Male High School, New Orleans.

The exercises of the second session of this Institution will commence on MONDAY, the fifth day of September proximo, in the basement of the German Methodist Church, Dryades street, between Felicite and Enterpise.

The Principal, encouraged by the gratifying success of the past session, will in no respect relax his energy in the effort to make the school all that could be desired by its patrons; and to accomplish this end neither pains nor expense will be spared.

To furnish to those who desire it an opportunity to obtain for their sons a systematic course of instruction from the beginning, upon which a thorough education so much depends, Primary and Preparatory Departments have been established in connection with the High School.

In selecting professors and teachers the greatest care will be exercised in regard to not only their mental qualifications, but also their ability to impart instruction.

The rates of tuition have been fixed as low as is consistent with thorough instruction. For further information as to terms, etc., apply at the School.

D. I. RAST, Principal.

greatly facilitates the process of teething by softening the gums, reducing all inflammation; will allay ALL PAIN and spasmodic action, and is

SURE TO REGULATE THE BOWELS.

Depend upon it, mothers, it will give rest to yourselves, and

Relief and Health to Your Infants.

We have put up and sold this article nearly thirty years, and can say in confidence and truth of it what we have never been able to say of any other medicine—NEVER HAS IT FAILED IN A SINGLE INSTANCE TO EFFECT A CURE, when timely used. Never did we know an instance of dissatisfaction by any one who used it. On the contrary, all are delighted with its operations, and speak in terms of commendation of its magical effects and medical virtues. We speak in this matter "WHAT WE KNOW," after years of experience, and pledge our reputation for the fulfillment of what we here declare. In almost every instance where the infant is suffering from pain and exhaustion relief will be found in fifteen or twenty minutes after the Syrup is administered.

Full directions for using will accompany each bottle. Be sure to call for

"Mrs. Winslow's Soothing Syrup."

having the fac-simile of "CURTIS & PERKINS" on the outside wrapper. All others are base imitations.

SATURDAY, OCTOBER 15, 1870.

TEAR-DIMMED EYES.

Flowers look beautiful filled with listening dew. When the breeze gently blows what jewels they scatter, and load the air with richest perfumes! The dew is as necessary to their vigor as the sunlight, and hence they expand their leafy cups for its reception. Even their very petals seem to burst forth out of their abounding delight.

Luko, the evangelist, gives us a sweet picture of Simon's house—a poor woman washing the feet of Jesus and wiping them with the hairs of her head; in the adoration of her soul, kissing and pouring ointment upon them from the box of alabaster.

There was a lovely flower shaken by the presence of the Sinner's friend, while the Pharisee—proud, selfish, scornful—whispering in derision to his friends at Christ's unassuming such marked attention—wondered the sad background, making the scene complete in tender and impressiveness. The kisses never lost their sweetness, the tears their eloquence, nor the ointment its perfume. They never will.

Did you ever press close to Jesus—to bathe and kiss his feet, but to feel the beatings of his loving heart? Did ever the tears, big with gratitude, flow as you gazed upon the Sinner's Saviour? If not, from the bottom of my soul I pity you.

Conscience sometimes smites with the scorpion's lash, and all the hosts of forgotten duties and neglected opportunities come forth obedient to the mandate. And sins, gathered far, start up from their hidden slumber, flashing from their hidden eyes their withering, consuming fire.

Snow, deep, heart-deep, over-spreads us. The night seems fearfully dreary; the days never so long. The waters gurgle for us no longer. The twitter of birds is subdued and plaintive. Friendly smiles are tinged with melancholy. Between ourselves and God the distance widens and painfully increases. The sponge has been fastened on the reed. We drink the wormwood and the gall.

Now are raked together the ashes. Sprinkling them thickly upon our heads, we pull around us the sackcloth, refusing to be comforted. We are alone.

But floods of consecrated memory roll, and turning, we feel the touch of Jesus. Then, bending down, we passionately kiss them, and it is the old, old picture—Pharisee, alabaster box and all. "Thy faith hath saved thee; go in peace."

Our transgressions, which the mountain shadows could not hide, nor the waters of the universe wash away, are covered with the righteousness of Christ. His blood can cleanse from sin.—*Christ. Standard.*

"OUTSIDE WORKERS."—"Is Mr. Hayes a Christian?" I asked a friend.

"No, he is an outside worker, like myself."

"Outside worker! What do you mean by that?"

"Oh, Hays and I have classes in the Sunday school, because some of the Christians want to go home and get a warm dinner, and they can do no better than take us for teachers."

Then we sing in the choir, and sometimes, to help along, sing in the prayer meeting. We give something toward the minister's salary, etc. I don't know how they could get along," continued my friend, half jokingly, "if it were not for a few outside workers."

"Outside of what?"

"Why, outside of the church."

"Why not come inside?"

"Oh, I'm not a Christian. I can't do that. I think I can do as much where I am."

"That is not the first thing. It is what is right. Why not be a Christian; then you can do from love?"

"Oh, I don't know. I cannot do that. I mean to some time."

"When?"

You shake your head. Ah, my friend, do not stay outside too long. Some foolish virgins tried that, and they never got inside of the door. It was shut, and they had to stay outside forever.

Beware, lest you be left outside of heaven.—*S. R. M., in the Advance.*

SLEEP AND DEATH.—A German Fable.—The Angel of Slumber and the Angel of Death, fraternally locked in each other's arms, wandered over the earth.

It was evening; they reclined upon a hillside, and the habitations of men were not far off; a sad stillness pervaded the air, and the evening bell of the village was hushed. Still and silent, as in their manner, the two beneficent geni of mankind reposed in a mournful embrace, and the night came rapidly on.

Then the Angel of Slumber rose from his mossy couch, and softly scattered from his hand the invisible slumber-seeds. The wind of night wafted them to the quiet dwellings of the wearied husbandmen, and forthwith sweet sleep descended upon the inhabitants of the cottages, from the gray-haired sire to the cradled infant. The sick man forgot his pains; the unhappy his sorrows; the poor his cares; every eye was closed.

And now, his benign labors being ended, the kind Angel of Slumber again lay down by the side of his thoughtful brother, and said cheerfully:

"When the red morning awakes, then will mankind bless me as their friend and benefactor. Oh, how sweet it is to do good unseen and in secret! how delightful is our duty!"

Thus spake the friendly Angel of Slumber. The Angel of Death looked upon him with silent sorrow, and a tear, such as immortals shed, gathered in his large dark eye.

"Alas!" said he, "that I cannot, like thyself, rejoice in their gratitude; the earth calls me her enemy and the disturber of her peace."

"My brother," replied the Angel of Slumber, "will not the good which they awaken owe thee as their friend and benefactor, and will they not bless thee? Are we not brothers and messengers of our Father?"

Thus he spake. The eye of the Angel of Death sparkled, and he clasped his brother more fondly in his embrace.

WIT AND LOGIC.—An instance is related of a pious Irishman who was discovered by a priest reading the Scriptures in a cabin, to some poor Roman Catholics, who were delighted with hearing the pious truths of God's word. When the priest came in he asked him, in a most dictatorial tone: "How dare you read the Scriptures to any of my flock?" "Please, your reverence," said the man, with the readiness for which an Irishman is always distinguished, "I have got a search warrant to do it." "Produce it," said the priest. "I am sure it cannot be from the Bishop, or from his holiness the Pope." "No," said the Scripture reader, "it is from God; and here it is in John v. 30: 'Search the Scriptures.'"

A GREAT EVIL NOT REMOVED.—A Conference preacher one day went into the house of a Wesleyan reformer, and saw suspended on the walls the portraits of three expelled ministers.

"What," said he, "you have them there?"

"O yes, they are there," was the answer.

"But one is wanted to complete the set."

"Pray, what is that?"

"Why, the devil, to be sure."

"Ah," said the reformer, "he is not yet expelled from the Conference."

CHANGES.—It is said that since Queen Victoria took her place on the English throne, thirty-three years ago, every other throne in Europe, from the least unto the greatest, has changed occupants.

FAITH WHICH WORKS BY FEAR ONLY leads to a selfish, dishonest repentance; if to any, and leaves the soul at the gates of death.

BE ALWAYS AT LIBERTY TO DO GOOD; never make business an excuse to decline the offices of humanity.

THE BOTTOMS HORSE POWER GIN GEAR.

This Power is now put in three different forms—stationary, movable and mounted on wheels—all having the same action and capacity, differing only in peculiar movements and arrangements, all of which are covered by patents and covenants. Models and patents of the same may be seen by all interested by calling on me at the St. Charles Hotel; and to any one desiring to enter with a small capital, a new business, which will yield a sure fortune, I will give undoubted and unparalleled inducements, if immediate application is made.

J. W. HUNTOON, M. D.

WASSEE COLLEGE, MONROE COUNTY, EAST TENNESSEE.

Having taken charge of this school, I desire to invite the attention of friends in the Cotton States to the excellent location, delightful climate and cheap board. We are in the best part of East Tennessee, seven miles east of Sweetwater, on the great line of railroad, and two miles from Nashville, which is our post office.

The college has been in operation for twenty years, and has boarding arrangements for about fifty students. The steward supplies his table from his own farm, and gives the best that the country affords, well prepared, and furnished rooms at.

Two Dollars and a Half Per Week. Tuition is \$10 per annum. Students will be received at any time, and charged to the end of the term. For circular address, REV. F. M. CLAY, Madisonville, Tenn.

Never relax in adding to your stock of useful knowledge both by reading and meditation. If you read without meditating you preach only the thoughts of others; if you meditate without reading you will gain few ideas.—*Greedy.*

BOOKS AND STATIONERY.

STANDARD EDUCATIONAL WORKS

Guyot's Geographical Text-Books.

"Incomparably superior to anything published."—*Agassiz.*

Introduction to the Study of Geography.

Elementary Geography.

Intermediate Geography.

Common School Geography.

Guyot's System is approved and endorsed by the most distinguished literary and scientific men of our nation; such as Prof. Agassiz, Dana, Tenney, Henry and others, celebrated in science throughout Europe as well as at home.

The fact that ONE MILLION (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New System, for no other series of books ever published in America have ever secured so rapid and extensive a circulation. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; Cincinnati, Cleveland, Columbus, Springfield, Toledo, Marietta, and most of the other important towns and cities, numbering nine thousand schools in Ohio, and hundreds of towns and cities in the other Western States, while in the Southern States and California they are being extensively adopted.

Believing that the publication of Professor Guyot's series has marked a new and better era in the presentation of geographical science, that by it the pupils of this generation will obtain a clearer, more definite and exact knowledge of the world on which they live, and that it is so systematized as to render that knowledge more valuable and permanent, we commend it to the attention of all interested in educational improvements and progress.

FELTER'S POPULAR SCHOOL ARITHMETICS. First Lessons, (Illustrated.) Primary Arithmetic, (Illustrated.) Intellectual Arithmetic. Intermediate Arithmetic. Grammar School Arithmetic. Practical Arithmetic.

PROF. COOLEY'S WORKS ON NATURAL SCIENCE. A Text-book of Chemistry. A Text-book of Natural Philosophy.

SCHOOLS AND COLLEGES.

FLORENCE WESLEYAN UNIVERSITY,

FLORENCE, ALABAMA.

W. H. L. PETERSON, D. D., PRESIDENT.

This Institution of learning, so widely known through the South, will begin its 15th session on Wednesday, September 11, 1870.

The Faculty is composed of men of experience and ability. The course of study is comprised in the Literary Department, Law Department, Department of Biblical Literature and Department of Agriculture. The advantages of this University are seen in its healthful and attractive location, thorough course of study, excellent discipline, the character and success of its instructors, and the reasonable rates at which board and tuition are furnished.

Students in the military and sons of ministers in the regular work are admitted to recitation on paying the incidental fees.

EXPENSES PER SESSION OF FIVE MONTHS. Tuition in the University classes..... \$30 00 Tuition in Grammar School..... 25 00 Tuition in Law Department..... 40 00 Tuition in Agricultural Department..... 2 00 Tuition and incidental fee required in advance.

Boarding fee, paid once..... 5 00 Boarding can be had in the best families at from \$15 to \$20 per month.

For particulars see circular, or apply to the president, Rev. Dr. Anderson, or to Hon. W. B. Wood, Jy21 ly President Board of Trustees.

TUSKEGEE FEMALE COLLEGE,

TUSKEGEE, ALABAMA.

The Fifteenth Annual Session begins September 15, 1870, and continues forty weeks; divided into two equal terms.

REV. GEO. W. F. PRICE, M. A., President. REV. H. H. BOSS, M. A., Professor of Latin and Mathematics.

DR. S. M. HARTLETT, Director of Music, with Nine Assistants in the various departments of instruction and discipline.

The president calls particular attention to the fact that Rev. H. H. of the Alabama Conference, has accepted the professorship of Latin and Mathematics in the Institution. Brother Ross is a graduate of Lagrange College, Alabama. He was professor of Mixed Mathematics in that Institution for two years.

Subsequently he was president of Talladega Female Institute. His classical education, his experience in the practical business of teaching, his acceptable career of itinerant service, his many excellent personal

NEW ORLEANS MARKETS.

From the N. O. Price Current.

The general market has exhibited but little improvement since our last report. Only a limited business has been done in most branches of the wholesale trade, and operations in Western produce have been confined to supplying the local demand, the general movement being restricted by the quarantine at the gulf ports, and by fear of the fever, preventing the usual visits of country merchants. We notice, however, that the quarantine regulations at New Iberia have been repealed, which may be followed by a removal of the restrictions of other gulf ports, and restore trade to its usual channels. The receipts of new molasses noticed in our last report have been followed by some additional arrivals, which have met a ready sale from the landing at \$1.30 per gallon for primo molasses, and \$1.05 to \$1.15 for fair to prime sirup. We are still without any receipts of new sugar.

We have no change to notice in the weather calculated to affect the crops. We have heard of nothing of moment from the country, nor anything to change the views of cotton circles with regard to the crop, excepting that every day that passes without a storm or rain increases the probability of a liberal yield. Heavy storms how, in the exposed condition of the crop, would do incalculable injury, but if we should escape that calamity and picking be continued until December, we shall look for an encouraging increase.

The river is eleven feet ten inches below high water mark.

Corron.—The following are the arrivals since the seventh instant:

Louisiana and Mississippi bales.....	2,627
Mobile.....	632
Lake.....	48
Total.....	3,307

On Saturday the movement commenced with a fair degree of spirit, but later in the day the demand subsided, and although factors gave way $\frac{1}{2}$ to $\frac{1}{4}$ c, it failed to bring on buyers any more freely, and the business was confined to 2,100 bales, at an irregular falling off of $\frac{1}{2}$ to $\frac{1}{4}$ c, good ordinary closing at 13 $\frac{1}{2}$ to 14 $\frac{1}{2}$ c, low middling at 14 $\frac{1}{2}$ to 14 $\frac{3}{4}$ c, and middling at 14 $\frac{3}{4}$ to 15 $\frac{1}{4}$ c. On Monday, under heavy receipts, factors were compelled to make additional concessions, which, with the abundant supply, imparted more spirit to the demand, and the sales summed up 3,900 bales, at a further decline of $\frac{1}{4}$ to $\frac{1}{2}$ c, good ordinary closing at 13 $\frac{1}{2}$ to 14 $\frac{1}{2}$ c, low middling at 14 $\frac{1}{2}$ to 14 $\frac{3}{4}$ c, middling at 14 $\frac{3}{4}$ to 15 $\frac{1}{4}$ c, strict middling at 15 $\frac{1}{4}$ to 15 $\frac{3}{4}$ c, and good middling at 16 to 16 $\frac{1}{2}$ c. From these figures it will be seen that, in consequence of the increased supplies of the higher grades, caused by fine picking weather, the margin between them and the medium qualities has been considerably reduced. On Tuesday the market opened with an ample supply, which was further increased subsequently, and, in the face of the prospect of still more liberal receipts and discouraging telegrams from Liverpool and New York, factors found it necessary to meet the demand more freely, which stimulated the inquiry, and 4,100 bales changed hands, the heaviest business this season.

This makes an aggregate for the past three days of 10,100 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 54,313 bales, against 77,019 bales to the same date last year, and the decrease in the receipts at all the ports, up to the latest dates, as compared with last year, is 13,200 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 11,422 bales to Great Britain, and a decrease of 10,211 to France, and of 1,551 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary.....	10 $\frac{1}{2}$ to 11 $\frac{1}{2}$
Good ordinary.....	13 $\frac{1}{2}$ to 14 $\frac{1}{2}$
Low middling.....	14 $\frac{1}{2}$ to 14 $\frac{3}{4}$
Middling.....	14 $\frac{3}{4}$ to 15 $\frac{1}{4}$
Strict middling.....	15 $\frac{1}{4}$ to 15 $\frac{3}{4}$

Special Notices.

PENSACOLA DIST. CONFERENCE.

The Pensacola District Conference is postponed from September 28, as previously announced, to November 24. Programme as before announced. Postponement on account of sickness in Mobile and New Orleans.

My address, after October 10, will be P.O. Box 1, Alabama, to which point all communications will be addressed.

J. A. PARKER, P. E.

Pensacola District.

OCTOBER 3, 1870.

NOTICE.

The white preachers of the Mississippi Colored Annual Conference, on their arrival at Vidett, will be met at the depot by the chairman of the Committee of Arrangements. Otherwise they will call at the store of J. L. Cain & Co., where they will be assigned to quarters prepared for them.

T. C. PARKER, P. E.

Western Methodist please copy.

NOTICE.

The class of the first year, Alabama Conference, will meet the committee for examination on Monday, December 5, at ten o'clock A. M. Brother Cameron will examine the class on the Bible, historical and biographical parts; Wesley's Sermons, volume 1 of the four-volume edition. Brother Brown will examine on Clarke's Preachers' Manual. Theological Compend and English grammar. I will examine on Watson's Institutes, part 3, and Discipline and hymn book. We advise the class to study the new course also, if possible.

D. M. HUDSON, Chairman.

Lafayette Dist., Montgomery Conference.

The Christian Advocate.

SATURDAY, OCTOBER 22, 1870.

THE LOST SHEEP.

There were ninety and nine that safely lay
In the shelter of the fold;
And one was out on the hills away,
Far off from the gates of gold—
Away on the mountains wild and bare—
Away from the tender Shepherd's care.

"Lord, thou hast here thy ninety and nine.
Are they not enough for thee?"
But the Shepherd made answer: "This of mine
Has wandered away from me;
And although the road be rough and steep,
I go to the desert to find my sheep."

But none of the ransomed ever knew
How deep were the waters crossed;
Nor how dark the night that the Lord passed
Through,
Ere he found his sheep that was lost.
Out in the desert he heard its cry,
Sick and helpless, and ready to die.

"Lord, whence are those blood-drops all the way?"

"They were shed for one who had gone astray
Ere the Shepherd could bring him back."
"Lord, whence are thy hands so rent and torn?"

"They were pierced to-night by many a thorn."

And all through the mountains, thunder-
riven,
And up from the rocky steep,
There rose a cry to the gates of heaven,
"Rejoice, I have found my sheep!"
And the angels echoed around the throne,
"Rejoice, for the Lord brings back his own!"

Little Sower.

What is the Proper Basis of Assessments?

Mr. Editor: The sentiment of Protestantism on the subject of revenues is that the church is supported by voluntary contributions. All modes of raising revenue must therefore respect the right herein acknowledged, and conform to a custom too strongly sanctioned and well established. The sense of obligation to give, among devout and well informed Christians, is deeper than ecclesiastical enactments could reach, and stronger than public sentiment could make it. Therefore the expedient of assessing the expenses of the church upon the members accords with a proper respect for both the rights and customs involved, inasmuch as the design is to inform the church of what revenues are needed for its support, and to introduce aim and method in the habits of voluntary giving. The General Conference has given its sanction to the plan of raising revenue by means of assessments in its act of providing for episcopal salaries.

But the inequalities which usually impair the efficiency of this method, and which excite opposition to it as a settled plan, are occasioned by an arbitrary application of the principle of assessing, and this gross faultiness is nowhere more glaringly exposed than in the instance of the General Conference assessments to raise the Bishops' salaries. Evidently the Conference was governed by no rule of proportion or basis of equality. The distribution was purely arbitrary, without a reason to protect it from just criticism.

The amount was divided among the Conferences, but according to no proportion that applies to any other cases as respects either the number of ministers belonging to the Conference, or members of the church in the bounds of the Conference. An assessment to command respect and compliance must be governed by some rule of equality, either as to numbers, pecuniary ability or established liberality.

There is, however, but one basis for a just assessment of all general church expenses, such as episcopal salaries and our past missionary obligations, and that is the entire membership of the church. Taking our members as the basis, the amount per capita among the ministers for the salaries of our Bishops would be \$11, the per capita among the members six cents. Had the assessment been made upon either number, the rule could have been appended to as simple, intelligible and just. But as it is it affords a striking example of the untrustworthiness of the habit of guessing at proportions. The high character of this example, and the gravity of the interest involved, will draw to the plan of assessing the consideration it is entitled to, and suggest to the church a safer method than it has hitherto pursued. The assessments made by the General Confer-

ence range through twelve classes, from twenty-eight cents per member in the Columbia Conference to two cents per member in the Holston Conference, as follows:

CONFERENCES ASSESSED.	
Columbia	28 cts.
Pacific and Texas	12
Louisiana	11
West Texas	9
Mississippi	8
Baltimore, Missouri, Kentucky and St. Louis	7
Little Rock, Louisville, Montgomery, Illinois and South Georgia	6
North Carolina, Mobile, Trinity, East Texas and Northwest Texas	5
Virginia, Florida and Tennessee	4
Memphis and Arkansas	3 1/2
West Virginia, South Carolina and Holston	2

It might sound indelicate to speak of the liberality of our church, but it is not venturing too much to say that our people are just to ask of each member his equal share in the general expenses, and it will be given.

FINANCE.

EAST ALABAMA COLLEGE.

Mr. Editor: Through you I desire to address a few words to the friends and patrons of the above college, and to those who have sons to educate. We have had promises from one hundred and fifty persons, to whom personal appeals have been made, that they would send their sons here at the opening of this term. The majority of these persons have not yet complied with these promises, although many others are entering, and the opening is quite encouraging.

It is evident that the low price of cotton has depressed every interest, especially our educational institutions. Rather than our friends should sacrifice their cotton, if it will be any accommodation to them we will take their sons and credit them with the college fees until Christmas, or until the rise in cotton. Board, however, is due monthly, at \$16 to \$17 per month, including fuel and attendance. We can make this offer only to good and reliable parties, and hope that none but those who intend to comply will take advantage of it. We are making every effort to fill up our walls at once. We have ample room for three hundred or more students. Rare advantages will be found here. It is the healthiest point in the State. The class of students entered so far cannot be excelled. The best moral and religious restraining influences prevail, and thorough, judicious discipline is maintained.

We look to every member of the old Montgomery Conference to do his utmost to send us students, and to speak a strong word for us in every home circle where there are boys and young men. We have secured an accomplished professor in German, French and music, and are fully prepared to carry out our schedule according to the catalogue. Let every friend of this college rally at once to our aid. Let every young man in Alabama enter at once our walls, and not wait for Christmas, as many do.

We call upon the Methodists of Alabama to patronize our home institution, and not go by our very doors into Georgia and Virginia. Your sons will receive as good and thorough education here as elsewhere, and at less cost. If you thus persist in patronizing other institutions, when ours is better, you will seriously cripple us, and sacrifice the \$80,000 you have put in this magnificent building.

We want to make this the great institution of Alabama, and unexcelled at the South or North. To do this, all we want is your sons. The professors promise to do faithful work by those placed under their tuition and care.

A great revival is going on in the Methodist church here. There have been nearly fifty accessions so far. College prayer meetings are well attended, and the students are becoming greatly interested in them.

We hope the preachers will not forget to take up the collection for college repairs promised at the last Conference.

A. D. McVay.

ACHES, ALA., Oct. 11, 1870.

The Moravian says that Metz, which has witnessed the most bloody battles of the present war, is the city where the Romish priests, in 1685, burnt the Bibles of the Huguenots. It took twelve hours to consume the pile. Sedan was the seat of a Huguenot theological seminary.

PREPARATIONS FOR CONFERENCE.

Mr. Editor: I read some time ago, with considerable pleasure, an editorial in the Christian Advocate, published at Nashville, in reference to our Conference season. I was very much pleased at the timely suggestions offered. They were, I think, pertinent, and should be carried out in good faith by all concerned. It is very important, I think, that we should be fully prepared for our annual convocations.

We should not only be prepared by having done an honest, faithful work—winding up our affairs well, with perfect and satisfactory statistics, and all our collections, taken up and ready for delivery to those whose duty it is to receive and dispose of them, so that there shall be no friction or embarrassment there—but we should be prepared in heart and spirit; be indwelt with the Spirit of wisdom, love and of a sound mind; be filled with the anction of the Holy Ghost, so that our sessions shall be seasons of refreshing from the presence of the Lord—a season of revival power. The time was when the servants of God, as they came up to their annual reunion, expected it to be a time of the outpouring of the Spirit upon preachers and people, and they were not disappointed often—it was usually a time of spiritual power. While they tarried there they were freshly indwelt with power from on high—recommissioned for the great work in which they were engaged, and they would start out again upon the dangerous war-path of life, feeling that they had been greatly strengthened for the ensuing yearly campaign against the powers of darkness—the great enemy of souls. And not only this, but they would hold a kind of class meeting with each other, and in order to improve their time on these occasions to the very best advantage, they tried to be especially careful to set God before their eyes, and to redeem as much of the intermediate time for private devotion, as possible—praying for each other, and for a blessing upon all their deliberations.

They would often inquire of each other how their souls prospered, and if they were going on unto perfection—striving, looking, longing for full redemption. They felt and believed that these occasions should be improved to the glory of God and the good of the church, and they invariably left their impressions upon the people on all such occasions; and, as a matter of course, a revival influence. But how is it now with us? Most of us, I fear, go up to Conference simply as a matter of course, but poorly prepared for it in anything, and instead of regarding the occasion as holy and sacred to the Lord, we make it more a time for showing off and pleasure. And it cannot be expected to be otherwise hardly, at least under the present order of things in all our Conferences that I have had the pleasure of attending. It is contended that every member of the Conference should attend, and I think very justly. Every one should attend, be at his post and remain there until the close. And suppose they do? About ten or a dozen do all the business of the Conference, and the balance are merely lookers-on, have nothing to do at all but to "show off" and enjoy themselves. And it is not remarkable at all to me that we lookers-on should become a little restive and "stir around somewhat"—be out on the streets smoking cigars or the pipe, cracking jokes with each other, or with other friends "showing off and taking our pleasure," while those hard-pressed and overburdened "workers" in the Conference are transacting the business of the church. I heard one of these "overburdened packhorses" of the Conference say once to a crowd of jolly preachers on a street corner, "enjoying a good smoke": "Oh, you fellows are having such a nice time of it, while I, poor fellow, am tied down in the Conference room all day; I am nearly strangled. Why, I am chairman of two committees, and have to meet three others besides this afternoon and to-night, and ever so much other work to do."

The poor fellow needed help. Whether he wanted it is questionable. My own impression is, that if this state of things is to continue it would be economy, to say the least of it, for these "mere lookers-on" to remain at home and take care of the work, or make their arrangements for the next year, and have their appointments sent to them. There is another suggestion. Packhorses wear out, feed and favor them as you may, and I think it would be wise to be breaking in some others along, so as to be able to keep up the succession—not apostolic, but of Conference business men. I know that there is not business enough to employ every member of the Conference, but there is certainly enough to employ many of the younger men of the Conference, who feel, under the present state of things, that they have very little interest or business at Conference. And I would therefore suggest a distribution of the work, so that, while it may be preparing and qualifying our young men for such work, it may fall lightly on others, so that our present class of business men may not be "stove up" too soon. And I think the thing can be made to work.

I should be rejoiced to have some of our older brethren introduce a resolution at our next Annual Conference to that effect, something like the following:

Resolved, That it is the sense of this Conference that no member of this body shall be appointed on more than one committee during this session.

I would not be at all surprised if it should work well. I hope it will be tried.

Distribute the work as much as possible among the members, and you will make them all feel that they are identified and interested in the great moving machinery of the church. I believe it will have a good influence.

JACKSON, MISS., Sept. 21, 1870.

CONVERSION AND MEMBERSHIP.

Mr. Editor: In "News from the Churches" we sometimes read that a number of persons were converted, and that a greater number were received into the church on the same occasion. Statements in such language are apt to leave the impression, especially upon the minds of those not familiar with the methods of Methodism, that conversion from the world to the church, and conversion from the power of Satan unto God, do not necessarily involve each other. And it is a painful fact that many persons have been admitted to our communion who have "neither part nor lot in this matter," who, being unchanged by grace, either speedily turn again to that world which they had so solemnly renounced with their lips, or remain a perpetual hindrance and a scandal to the church; and although they may abstain from outward evil, do not continue to evidence their desire of salvation by practical and experimental piety.

Now I do not wish to dispute with the doctors concerning the scriptural guidance which we profess to follow; neither do I propose that we should prescribe any new standard by which all applicants for church membership shall be tested. No; the fault is not in our theory but in our practice. Let us more carefully follow the directions prescribed in our own admirable Book of Discipline as to whom we shall recognize as members of the church of Christ and bid welcome to all its privileges.

Herein do we find it provided that candidates for church membership shall, in order to their reception, give "satisfactory assurances of their desire to flee from the wrath to come and be saved from their sins"—that is, that they shall manifest evangelical repentance, which is the first part of conversion. But this is not all. Their assurances shall be equally satisfactory as to the genuineness of their faith. Now the well known Methodist or scriptural idea of faith is that it is more than a mere opinion; and especially if it have the quality of genuineness, I humbly judge that it must be "the substance of things hoped for"—that through which we are saved.

Now if a person gives these assurances and assumes the solemn vows of the baptismal covenant, unaided and unchanged, at least in some degree, by the Spirit of God, he is either ignorant, knowing not wherof he affirms, or insincere, drawing nigh unto God with his lips, while his heart is far from him. In either case there is little hope for him. But if he apprehend the nature of his own professions and vows, and be sincere therein, I cannot believe, in the light of gospel promise, but that he has passed from death unto life.

I would only suggest that pastors should always hold their candidates for church membership, as were held the catechumen of old, in a state of trial, under diligent spiritual instruction, until really well "satisfied on these points," until they evidence the sincerity of their repentance by ceasing to do evil, and "the genuineness of their faith" by learning to do well; until at least the day-star be arisen in their hearts, heralding the broader beams of the sun of righteousness; until assured that they will continue to "walk in the light, as he is in the light."

Unregenerate persons admitted to our communion may add to our wealth, and attend upon our ordinances, and well support our institutions, yet they seriously mar our purity, spirituality and power, and involve us in that Constantinian snare, the patronage of sinners, from the dire results of which God has so signally set us free by means of his servants—a Luther and a Wesley. Let us be not entangled again with the yoke of bondage.

NOVITUS.

NEWS FROM THE CHURCHES.

GORDO, ALA., Oct. 1, 1870.

Mr. Editor: We are having good times on Gordo circuit. I have held a series of protracted meetings this fall, resulting in about forty-five accessions to the church. Besides this, through the untiring energy of Brother McKee, local preacher, a new church has been organized. A meeting is in progress at that place now. Up to this time twenty-seven have joined there.

Our Baptist brethren are taking a curious and interesting stand. At their association near this place, a few days ago—I have it from good authority—they passed an *edict*, I suppose, prohibiting the children of their members from attending any but Baptist Sunday schools. It was not unanimous on the part of their preachers. Very high ground, that!

Yours very truly,

THOS. CAMERON,

North Alabama Conference.

Mr. Editor: For the benefit of our church and friends I will send you some revival news from a portion of the Autauga circuit, Wetumpka district, Alabama. I commenced a two days' meeting at Pine Level on the twenty-fourth of September. We protracted it nine days, and the Lord added forty-seven souls to the church and eight reclaimed, making fifty-five on their way to Zion. We had the services of Dr. James, local, three days, and Brother R. S. Woodward two days. These brethren did good work for the Lord. I preached at three churches on said circuit. At Cain's chapel there have been eleven accessions, making sixty-six on this portion of the work up to date. To God be all the praise.

A few words of instruction to our young ministers. The key to revivals is holy living, knee-work and generalship; and do not hasty in calling on ministers to preach as soon as they visit your revival meetings, but let them get the holy influence before you invite them to preach.

A few words for your members. Let every member pray for the minister and bear him up with their prayers; and after the close of the meeting you should watch after and pray for the prosperity of the church.

Yours in Christ Jesus, our Lord,

R. F. PIERCE.

NEVER indulge in what appears to be a little sin; it will harden the heart and lead to greater.

Bad ears are as bad as no ears.

A disease in the ear not infrequently leads to a disease of the brain, and the converse is also true.

A capacious ear brings on hardening of the brain; a dull ear softening of the brain.

Itching ears have come to be an epidemic. The witty preacher, the startling preacher, the preacher who gets his subjects anywhere but in the Bible and in the domain of conscience, who has little or nothing to say about spiritual ruin, redemption, regeneration and Christian experience, is sure to be in demand.

To be admired and to be useful, to be approved of God and of man, are two things which have no necessary connection. Ahab had four hundred preachers, and he liked them much, but they were false prophets.

"In at one ear and out at the other," is an ailment that has prevailed immemorially in Christian assemblies. It betokens a sad want of appetite for truth, and an indigestion that is alarming. *Biblic* aures are greatly to be desired; ears that eagerly drink in divine teachings. A horse that is in good condition usually points one ear forward and the other backward, to catch sounds from all quarters. As well be without these organs as not to use them. The great Teacher repeatedly employs the simple, solemn, proverbial injunction: "He that hath ears to hear, let him hear."

To what intent is this organ, if not to take in the words of him concerning whom the adorable Father said: "This is my beloved Son; hear him?"

John Newton says in regard to the Rev. Thomas Haweis, LL. B., that his preaching "had, like the report of a cannon, sounded through the country, and attracted vast congregations to Aldwinkle." He continued rector of that church in Northamptonshire for fifty-six years. Some of the most prodigious persons in the region were brought to repentance under his pungent appeals. Among them was an inn-keeper greatly given to intemperance, and violently opposed to evangelical truth. But he was fond of music; and hearing they had excellent singing at Aldwinkle, he went there one Sabbath, though six miles distant, to gratify his taste. The singing pleased him much. When that was over he secured his ears against the sermon with his forefingers. The sermon began with an earnest appeal to the hearers to attend to their souls' everlasting interests. A fly lighting on the inn-keeper's face, stung him sharply, and he withdrew one of his fingers in order to brush off the intruder. Just at that moment Haweis repeated with great solemnity the words of the text (Mark iv, 9), "He that hath ears to hear, let him hear." They entered the un-stopped ear like a clap of thunder. Presently the man withdrew the other finger, and listened with deep attention. The result was a revolution of character and habits. He would drive the six miles, whatever might be the weather, to worship and to listen with eager ear in the church where he first received saving impressions. For eighteen years he maintained a walk with God, and died in hope.

"He that hath ears to hear, let him hear; what good can preaching do you?" said a gentleman to a poor Scotch woman who was busy on Monday at the bleaching ground, watering her webs of linen cloth, and who could not remember even the text of a sermon heard the day before—"What good can preaching do you if you forget it all?" "Ah, sir," she replied, "if you look at this web on the grass, you will see that as fast as ever I put water on it the sun dries it all up, and yet, sir, I see it gets whiter and whiter."—*Congregationalist*.

Dr. Robinson, lately of Paris, tells in the interior of a sad story of the suspicion and persecution which since the beginning of the European war has been the lot of the French Protestants. The son of a wealthy man in the Reformed church of Alsace was accused of being in certain nets unpatriotic. The mob violently. But in repudiating the acts he used the unfortunate expression: "One who would do such things might as well shout *Vive la Prusse!*" In an instant the infuriated populace began to stone him, declaring that he cheered for Prussia. The poor fellow tried to run. A stone hit his head and stunned him. He fell, and the brutes caught up his still living body, threw him upon a great brush-heap, and literally burned him to ashes.

On a tombstone at Florence, Italy, is this inscription: "Here lies Salvo Armato d'Armato, of Florence, the inventor of spectacles. May God pardon his sins. The year 1318."

The apple crop in New Hampshire will be immense, and the market is already glutted with the fruit, fifty cents a bushel being the ruling price at present.

EARS AND NO EARS.

BY REV. A. C. THOMPSON, D. D.

Bad ears are as bad as no ears. A disease in the ear not infrequently leads to a disease of the brain, and the converse is also true. A capacious ear brings on hardening of the brain; a dull ear softening of the brain.

Itching ears have come to be an epidemic. The witty preacher, the startling preacher, the preacher who gets his subjects anywhere but in the Bible and in the domain of conscience, who has little or nothing to say about spiritual ruin, redemption, regeneration and Christian experience, is sure to be in demand. To be admired and to be useful, to be approved of God and of man, are two things which have no necessary connection. Ahab had four hundred preachers, and he liked them much, but they were false prophets.

"In at one ear and out at the other," is an ailment that has prevailed immemorially in Christian assemblies. It betokens a sad want of appetite for truth, and an indigestion that is alarming. *Biblic* aures are greatly to be desired; ears that eagerly drink in divine teachings. A horse that is in good condition usually points one ear forward and the other backward, to catch sounds from all quarters. As well be without these organs as not to use them. The great Teacher repeatedly employs the simple, solemn, proverbial injunction: "He that hath ears to hear, let him hear."

To what intent is this organ, if not to take in the words of him concerning whom the adorable Father said: "This is my beloved Son; hear him?"

John Newton says in regard to the Rev. Thomas Haweis, LL. B., that his preaching "had, like the report of a cannon, sounded through the country, and attracted vast congregations to Aldwinkle." He continued rector of that church in Northamptonshire for fifty-six years. Some of the most prodigious persons in the region were brought to repentance under his pungent appeals. Among them was an inn-keeper greatly given to intemperance, and violently opposed to evangelical truth. But he was fond of music; and hearing they had excellent singing at Aldwinkle, he went there one Sabbath, though six miles distant, to gratify his taste. The singing pleased him much. When that was over he secured his ears against the sermon with his forefingers. The sermon began with an earnest appeal to the hearers to attend to their souls' everlasting interests. A fly lighting on the inn-keeper's face, stung him sharply, and he withdrew one of his fingers in order to brush off the intruder. Just at that moment Haweis repeated with great solemnity the words of the text (Mark iv, 9), "He that hath ears to hear, let him hear." They entered the un-stopped ear like a clap of thunder. Presently the man withdrew the other finger, and listened with deep attention. The result was a revolution of character and habits. He would drive the six miles, whatever might be the weather, to worship and to listen with eager ear in the church where he first received saving impressions. For eighteen years he maintained a walk with God, and died in hope.

"He that hath ears to hear, let him hear; what good can preaching do you?" said a gentleman to a poor Scotch woman who was busy on Monday at the bleaching ground, watering her webs of linen cloth, and who could not remember even the text of a sermon heard the day before—"What good can preaching do you if you forget it all?" "Ah, sir," she replied, "if you look at this web on the grass, you will see that as fast as ever I put water on it the sun dries it all up, and yet, sir, I see it gets whiter and whiter."—*Congregationalist*.

Dr. Robinson, lately of Paris, tells in the interior of a sad story of the suspicion and persecution which since the beginning of the European war has been the lot of the French Protestants. The son of a wealthy man in the Reformed church of Alsace was accused of being in certain nets unpatriotic. The mob violently. But in repudiating the acts he used the unfortunate expression: "One who would do such things might as well shout *Vive la Prusse!*" In an instant the infuriated populace began to stone him, declaring that he cheered for Prussia. The poor fellow tried to run. A stone hit his head and stunned him. He fell, and the brutes caught up his still living body, threw him upon a great brush-heap, and literally burned him to ashes.

On a tombstone at Florence, Italy, is this inscription: "Here lies Salvo Armato d'Armato, of Florence, the inventor of spectacles. May God pardon his sins. The year 1318."

The apple crop in New Hampshire will be immense, and the market is already glutted with the fruit, fifty cents a bushel being the ruling price at present.

Bad ears are as bad as no ears.

A disease in the ear not infrequently leads to a disease of the brain, and the converse is also true.

A capacious ear brings on hardening of the brain; a dull ear softening of the brain.

Itching ears have come to be an epidemic. The witty preacher, the startling preacher, the preacher who gets his subjects anywhere but in the Bible and in the domain of conscience, who has little or nothing to say about spiritual ruin, redemption, regeneration and Christian experience, is sure to be in demand.

To be admired and to be useful, to be approved of God and of man, are two things which have no necessary connection. Ahab had four hundred preachers, and he liked them much, but they were false prophets.

"In at one ear and out at the other," is an ailment that has prevailed immemorially in Christian assemblies. It betokens a sad want of appetite for truth, and an indigestion that is alarming. *Biblic* aures are greatly to be desired; ears that eagerly drink in divine teachings. A horse that is in good condition usually points one ear forward and the other backward, to catch sounds from all quarters. As well be without these organs as not to use them. The great Teacher repeatedly employs the simple, solemn, proverbial injunction: "He that hath ears to hear, let him hear."

To what intent is this organ, if not to take in the words of him concerning whom the adorable Father said: "This is my beloved Son; hear him?"

John Newton says in regard to the Rev. Thomas Haweis, LL. B., that his preaching "had, like the report of a cannon, sounded through the country, and attracted vast congregations to Aldwinkle." He continued rector of that church in Northamptonshire for fifty-six years. Some of the most prodigious persons in the region were brought to repentance under his pungent appeals. Among them was an inn-keeper greatly given to intemperance, and violently opposed to evangelical truth. But he was fond of music; and hearing they had excellent singing at Aldwinkle, he went there one Sabbath, though six miles distant, to gratify his taste. The singing pleased him much. When that was over he secured his ears against the sermon with his forefingers. The sermon began with an earnest appeal to the hearers to attend to their souls' everlasting interests. A fly lighting on the inn-keeper's face, stung him sharply, and he withdrew one of his fingers in order to brush off the intruder. Just at that moment Haweis repeated with great solemnity the words of the text (Mark iv, 9), "He that hath ears to hear, let him hear." They entered the un-stopped ear like a clap of thunder. Presently the man withdrew the other finger, and listened with deep attention. The result was a revolution of character and habits. He would drive the six miles, whatever might be the weather, to worship and to listen with eager ear in the church where he first received saving impressions. For eighteen years he maintained a walk with God, and died in hope.

"He that hath ears to hear, let him hear; what good can preaching do you?" said a gentleman to a poor Scotch woman who was busy on Monday at the bleaching ground, watering her webs of linen cloth, and who could not remember even the text of a sermon heard the day before—"What good can preaching do you if you forget it all?" "Ah, sir," she replied, "if you look at this web on the grass, you will see that as fast as ever I put water on it the sun dries it all up, and yet, sir, I see it gets whiter and whiter."—*Congregationalist*.

The Christian Advocate.

SATURDAY, OCTOBER 22, 1870.

THAT DAY.

Thou inevitable day,
When a voice to me shall say:
"Thou must rise and come away."
All thine other journeys past,
Gird thee, and make ready fast
For thy longest and thy last."
Day deep hidden from our sight,
An impenetrable night,
Who may guess of thee aught?
Shall I lay my drooping head
On some loved lap; round my bed
Prayer be made and tears be shed?
Or at distance from mine own—
Name and kin alike unknown—
Make my solitary noon?
Little skills it where or how,
If thou comest then or now,
With a smile or an angry brow.
Come thou must, and we must die;
Jesus, Saviour, stand thou by
When that last sleep seals our eye.
Words of Hope.

HELEN CHALMERS.

BY REV. T. DE WITT TALLMAGE.

We are told that when a man is dead, he is dead, and that he never again appears in mortal spheres. While we cannot accept the theory of the transmigration of souls, we find that, in some strange way, every good and great soul, after leaving this world, comes back again. When Roderick Dhu wound his horn among the Highlands, Ben-jedi and Ben-venne thing back not so many echoes as there are reverberations and resurrections of a great life. Not only these multiplied and shattered echoes of good, but almost always some one grand embodiment of the good. John Knox died, but he thundered again in Scotland when Thomas Chalmers spoke. They seem to be one, and the same dauntless, uncompromising, lion-hearted nature.

In a pleasant house in Leamington Terrace, Brumfield Place, Edinburgh, more than anywhere else, are to be found the literary remains of Thomas Chalmers; his library not large, but read till the type is dull and the covers worn off; the wall hung with the faces of his contemporaries and friends—Macintosh, and Jeffrey, and Wilson, and Hugh Miller; autograph letters in which Edward Irving poured out his sorrows against what he calls an ungenial age, and Elizabeth Fry blends her philanthropies, and Hallam talks of his literary projects, and Thomas Carlyle breaks forth against metaphysics as a universe of cobwebs. Then we had lifted for us the lid of the big box in which Thomas Chalmers had tumbled his sermons, many of them already by the printing press scattered the world over; many of them in hieroglyphics that never will be deciphered—sermons an hour long, written in short-hand, on two sides of a small letter-sheet. The books, the papers, the surroundings suggestive of the times which put Scotch ministers to the bitter test. But more than all we were interested in the sketches and diagrams of what is known as his "Territorial scheme," the plan by which he proposed to divide the masses of Edinburgh, Glasgow and London.

Another echo! Thomas Chalmers' soul comes back again. It shall not stand in the Tron pulpit, nor sit in professorial chair, but in the person of his daughter Helen, his great, philanthropic soul must find embodiment.

In one of the alleys running off from Fountain Bridge, a street crowded with drunkenness and pollution, is the low-roofed building in which this good woman is spending her life to help men and women out of their miseries. Her chief work is with drunkards, their wives and daughters. Some of the poor women of the neighborhood who have sober husbands complain against her, saying: "Why do you pass us? because our husbands are good, and do not care for us. If we had married some worthless sot you would then have taken care of us in our poverty."

In the winter, when the nights are long and cold, you may see Helen Chalmers with her lantern shining through the lanes of the city, waiting up the depraved, and bringing them out to her reform meetings. Insult her, do they? Never! They would as soon think of pelting an angel of God. Fearless and strong in the righteousness of her work, she goes up to a group of intoxicated men, shakes hands with them, and takes them along to hear the Thursday night speech on temperance.

One night, as she was standing in the street, talking with the intemperate father, and persuading him to a better life, a man kept talking up and down the room, as though uninterested in what was said; but finally, in his intoxication, he turned to her and remarked: "I shall get to heaven as easy as I will; do you not think so?" She answered not a word, but took her Bible, and pointed to

the passage: "No drunkard shall inherit the kingdom of God." The arrow struck between the joints of the harness, and that little piece of Christian stratagem ended in the man's reformation.

Helen's ideas of mercy and helpfulness are intensely practical. She has established a self-supporting institution chiefly for the relief of the wives of drunkards. We saw the hall crowded with these women. She buys all kinds of goods for them, and requires that they pay for them. It is often in installments of a half-penny each; but in this way their feelings of self-respect are preserved. These people could not gather up enough money to make the purchases at once, and their ignorance might be imposed upon by traders. Helen stands up as their defender, their savings bank, their counselor in all things. On Monday afternoons she has them together, and as they sew, the children are entertained in an adjoining room, while Helen reads to the mothers a story, or talks to them of their welfare, or explains a chapter of the Bible. Her whole theory is that the poor can take care of themselves if you only give them a chance. A more practical scheme of relief we never saw. Scores of men have by this Christian woman been reclaimed, and as many homes reconstructed.

Helen feels she is only carrying out the plans of her father. She is the most unassuming of women. Many do not understand her. Opposition enterprises have been started, but in quickness; yet, with all the holy obstinacy of a Scotch Christian, she goes right on to perform her heroic and self-denying mission. The exquisite traceries of Holyrood Abbey, the strength of Edinburgh Castle, the monumental glory of Calton Hill, the indescribable splendor of this the grandest city our eyes ever rested on, have not so profoundly moved our soul as the quiet but stupendous work of Helen Chalmers.—*Heart and Home*, Edinburgh, June 30, 1870.

AD. CAPTAIN.—We clip the following piece of Biblical criticism from the Boston Investigator:

"Take no thought for the morrow, for the morrow shall take thought for the things of itself.—Matt. vi. 34.

"This is bad to practice, especially by farmers, mechanics, sailors or other laboring men, nor does it agree with the story of the five virgins, who were called foolish because they took not sufficient thought for the time to come, and so were shut out from the marriage."

A little investigation would have shown the Investigator that the word translated "thought" does not mean simply deliberation or care. Suppose that we substitute *solicitude*, then what advice could be better "to practice" for "farmers, mechanics, sailors or other laboring men?" The farmer would sow his seed and leave the weather to God; the mechanic would do his work with a cheerful heart, reposing on the Builder of the Universe; the sailor would take calm and storm as they came from him who holds the waters in the hollow of his hand; and the laboring man would enjoy his hard-earned living none the less because he did not anticipate trouble. There may be other "investigators" who would criticize Christ in this style, but as Christians we retain our composure, for "sufficient unto the day is the evil thereof." We need add neither our conjectures nor our fears to the evil which we see.—*Christian Union*.

SCIENCE AND FAITH.—In a review of Mr. A. R. Wallace's recent work on the Theory of Natural Selection the Nation says: "It is not a little singular that within a year two of the greatest thinkers of the day, who have gone furthest on the road which is generally believed to lead inevitably to atheism, have in earnestness, and in the true scientific spirit, declared that their studies have given them the abiding conviction that there is, beyond this range of physical events, an intellectual guiding force. Our author believes that all force is 'will force,' the will of a supreme intelligence; and Julius Robert Meyer, who has carried the idea of a correlation of forces to that point where the short-sighted believed he had left nothing but machinery in the universe, has declared that beyond all these phenomena must lie the infinite mind, and that his work, so far from supplanting his only strengthened the foundations of religion."—*Medical and Surgical Reporter*.

WE HAVE heard of "mildly modesty," but do not believe in it so fully as the old bachelor who said that giving the ballot to women would not amount to anything practically, because they would keep denying they were old enough to vote until they got too old to take any interest in politics.

It must have been the same elderly old bachelor who believed that Adam's wife was called Eve because when she appeared man's day of happiness was drawing to a close.

DOING SOMETHING FOR JESUS.

Brook Village was blessed with a faithful under-shepherd, who not only aimed to do what he could personally, but strove to lead others to like earnest efforts for the good of souls.

A steady work of grace for a long time went on, touching one heart here, another there; startling those who, heretofore resting on the false foundation of their own good works, now for the first time realized their need of a Redeemer.

Among those thus brought to a newness of life was Kate S., a young girl of a peculiarly gentle and retiring disposition, and to whom the very venturing into the presence of strangers was a severe trial.

But with love for Jesus came the desire to do something for him, and again and again the inquiry was made: "What shall I find to do?" At last she went to her pastor, and laid the question before him.

"She came to me," said that pastor recently, "her shrinking timidity overcome by love for her Saviour; and with a quivering voice questioned: 'What can I be doing for Jesus? I want to be doing something for Jesus. I would like to be a missionary, but I have neither strength nor education sufficient for such a work; yet I must do something.'"

"I said: 'If you can't be a foreign missionary, be a home laborer; try and gather a class of girls into the Sabbath school. There are scores of young people in the factory village who never enter either church or school room.'"

"This was only a seed, but it had fallen into good soil, and it brought forth fruit in due season. Sunday after Sunday Kate appeared with the trophies of her week's labors, till her class numbered fourteen members, girls from twelve to eighteen years of age. There was no fear when talking for Christ, all the old painful diffidence seemed as a thing of the past, and Kate was all unconsciously to herself doing a great work among the young people around her. For three years she used faithfully the talents God had given her, and then went to be with him she loved, for ever and ever.

"Four of her class had entered upon a Christian life ere her departure, and she died confident that the rest would be brought in. Now each one of those fourteen pupils is a living trophy of her teacher's faithfulness; and her faithfulness unto death they are truly striving to emulate. Eternity alone will show the widespread influence of her humbly wrought labors for him she adored and strove to imitate."

I listened as Kate's pastor told the story of her useful life and happy death, and the lesson that it taught was a pleasant one, for it is indeed sweet to know that none are so weak or lowly as to find the search in vain for duties that may be accomplished for him who lived and died for us. If we ask God for work, he will find for us that which is the best suited to our individual strength and powers of mind.

Think of the stars in the crown of rejoicing a Father's hand has surely placed on the head of his faithful child, poor, weak, diffident Kate S., and then ask yourself, What have I done, or am I doing for him who has done so much for me?

"Ye are bought with a price; therefore glorify God in your body and in your spirit, which are God's."—*A. M. L., in American Messenger*.

The ritual commission of the English Church, after a series of meetings extending over more than a year, has at last handed in the most complex and contradictory report of which we have ever heard. The report is signed by 27 of the 30 members, and is half a page long; but the expressions of dissent occupy 27 pages. All of them dissent once; 16 twice; 3 three times; and 2 of them 5 times. What is most wonderful, 17 of them, a majority, protest against the action on the Athanasian Creed. Practically the commission, from which so much was expected, has collapsed. Its recommendations are unimportant, and no agreement could be come to on important questions. The immediate occasion of its appointment was the felt necessity of some modification of the "Ornaments Rubric," but no alteration is proposed, so that the ritualists are free to continue their practices. The rubric is retained, which classifies the unbaptized with the excommunicated, and forbids them the use of the burial office; but permission is given, though with some dissent, to employ an abbreviated form. The keenest discussion was on the Athanasian Creed. They retain it; but add an explanatory note, to the effect that its dogmatic clauses are only to be understood "as a warning of the peril of those who will fully reject the Catholic faith." Dean Stanley contributes 16 objections to the Creed and 11 to this note. There is no probability that the report will become the law of the church.—*Independent*.

DEATH may remove from us the great and good, but the force of their actions still remains.

CHARACTER OF ELIZABETH.

Not from any sympathy with the views either of Luther or Calvin, she chose her party at her accession. She found herself compelled against her will to become the patron of heretics and rebels, in whose objects she had no interest, and in whose theology she had no belief. She resented the necessity while she submitted to it, and her vacillations are explained by the reluctance with which each successive step was forced upon her, on a road which she detested. It would have been easy for a Protestant to be decided. It would have been easy for a Catholic to be decided. To Elizabeth the speculations of the so-called divines were but as ropes of sand and sea-slime leading to the moon, and the doctrines for which they were reading each other to pieces as a dream of fools or enthusiasts. Unfortunately her keenness of insight was not combined with any profound concern for serious things. She saw through the emptiness of the forms in which religion presented itself to the world. She had none the more any larger or deeper conviction of her own. She was without the intellectual emotions which give human character its consistency and power. One moral quality she possessed in an eminent degree; she was supremely brave. For thirty years she was perpetually a mark for assassination, and her spirits were never affected, and she was never frightened into cruelty. She had a proper contempt also for idle luxury and indulgence. She lived simply, worked hard, and ruled her household with rigid economy. But her vanity was insatiable as it was commonplace. No flattery was too tawdry to find a welcome with her, and as she had no repugnance to false words in others, she was equally liberal of them herself. Her entire nature was saturated with artifice. Except when speaking some round untruth, Elizabeth never could be simple. Her letters and her speeches were as fantastic as her dress, and her meaning as involved as her policy. She was unnatural even in her prayers, and she carried her affectation into the presence of the Almighty. She might doubt legitimately whether she ought to assist an Earl of Murray or a Prince of Orange when in arms against their sovereign; but her scruples extended only to the fulfillment of her promises of support, when she had herself tempted them into insurrection. Obligations of honor were not only occasionally forgotten by her, but she did not seem to understand what honor meant.—*Froude, in History of England*.

A PEOPLE ON STILTS.—The pictures of Rosa Bonheur have made us well acquainted with the singular habits which the shepherds of the lands south of Bordeaux have adopted of passing the greater part of their lives on stilts. The first time that a group of these people are seen there is a curious emotion in the mind, as of a strange prodigy. Dressed in sheepskins, worn by time, knitting stockings or spinning thread, they gravely pass over the reeds and furze—the spectator unried, as it were, in the bushes; they lifted nearer the sky, on the verge of the horizon. The long stick, which they handle with so much address, serving as a balancing pole or a support for the arm, contributes still more to the strangeness of their appearance; they look like gigantic crickets preparing to spring. In the lands of Medoc, not only the shepherds, but every one uses this style of locomotion; the children have no fear, and the women, who are invariably dressed in black, resemble large ravens perched on dead branches. The origin of stilts is unknown, but it is probable that they were not in use before the middle ages, as ancient authors make no mention of them. In the patois of the country they are called change, which would seem to fix their origin in the period of the rule of the English, deriving it from our word shank; probably some inventive British mind gave them this servicable mode of progression. Perched on these borrowed legs the shepherd watches over his charge, concealed in the brushwood, crosses uninjured the marshes and quicksands, fears not to be torn by thorns or dry twigs, and can at any time double the speed at which he ordinarily walks. Whether it has any effect on the character cannot be denied; but certain it is that these people are distinguished by their wild, savage nature. They have a horror of strangers, and when they perceive a traveler coming toward them they hasten to flee into concealment.—*Chambers' Journal*.

REPORTERS are often unconsciously satirical. A morning paper says in an obituary: "Mr. — was an estimable citizen. He lived uprightly. He died with perfect resignation. He had, recently been married." Which reminds us of an equally innocent item found a few days ago in the local columns of a Kansas paper. The reporter sentimentally remarked: "Mr. Black ate twelve ears of corn the day before he died."

RELIGIOUS INTELLIGENCE.

The religious papers of Wurttemberg represent the Methodists in their country as in a prosperous condition.

The Board of Trustees of the Illinois Wesleyan University have voted to admit ladies into the institution.

A REVIVAL is in progress in the Fintaw street Methodist Episcopal church, Baltimore. One hundred and fourteen have already been converted.

The statistics of British Wesleyan Methodism, just published, show the number of members to be, including probationers, 613,071; ministers, 3,267.

The largest membership at any single church among the Presbyterians is that of Dr. Cuyler's, of Brooklyn. The full number of membership is 1,375.

At the Vermont Methodist Convention five gentlemen pledged \$500 each toward raising \$40,000 for the endowment of Vermont Conference Seminary at Montpelier.

The Rev. Titus Coan, a well known missionary to the Hawaiian Islands, was expected to arrive in New York last week, after a continuous absence of thirty-six years at his post of labor. During this time he has received thirteen thousand of the islanders into the communion of the Protestant Church.

MARTIN HARRIS, who was one of the "three witnesses" to the Book of Mormons, still lives, although in his eighty-eighth year. He lately visited Salt Lake City and is represented as still holding firmly to his forty years' old story of the angels that appeared before him and showed him the tablets on which the characters of the Book of Mormons were inscribed.

CHRISTIANITY has had wonderful success among the Shanars, a large tribe of degraded devil-worshippers in Southern India, who, when heathen, had scarcely any idea of God. They have now over five hundred native preachers, and one hundred thousand nominal Christians who have abandoned heathenism, and formed themselves into congregations for Christian worship.

Six young Wesleyan missionaries sailed from London, September 14, to enter the large and growing field in the colonies of Australia and New Zealand. They were all selected from the students who had been thoroughly trained in the Richmond Theological School. Our English Wesleyan brethren do grandly and generously by their foreign missionary work in sending many of their most promising young men as reinforcements.

A CONGREGATIONAL church in Iowa has decided that the invitation to the communion table shall be given in the subjoined terms: "All who believe themselves to be the followers of Christ are cordially invited to partake with this church of the sacred emblems." Against the arguments of a minority who sturdily opposed this step it was claimed that a large charity should be exercised toward those who, while they hope they are Christians, yet for various reasons decline to make a public profession of their faith. To win all these classes a new form of invitation was desirable.

The Baptist denomination of Nova Scotia dates back a century, but its chief progress has been since 1820. According to a report made at a recent meeting of the Central Association in Halifax the total membership is eighteen thousand. The Baptists are especially strong in the western part of the province.

In the eastern part of Nova Scotia there is a powerful Presbyterian element. The clergy are mainly from Scotland and are disposed to keep up a transatlantic connection. Among the Nova Scotia Episcopalians, the Broad Church party is the most aggressive, and has recently made great progress.

AN ENGLISH clergyman recently attempted to bring the schoolmaster of the parish to a fitting sense of his duties by such a vigorous process that the magistrates, on an investigation of the case, fined the pugnacious guardian of public morals one pound and costs. Thereof the gentleman's unsanitary treatment of his refractory schoolmaster reminds the Graphic of an old agricultural laborer's equally muscular method of evangelizing his family. Being remonstrated with by the pastor for not "bringing up" his boys as he should, he replied: "I dinno ow 'tis, sir; I order 'em down to pray night and mornin', and when they won't go down I knock 'em down—and yet they ain't good!"

THE AMERICAN Board of Commissioners for Foreign Missions commenced its sessions in Brooklyn, last Tuesday. In the evening a business meeting was held, after which the annual sermon was preached by Dr. Stearns. A very interesting programme was announced. The board now supports missions in India, China, Turkey, Africa, the Sandwich Islands, Japan, and among the Indians, and raises

annually for this purpose about \$500,000. It is understood that the New School Presbyterians, who have hitherto joined with the Congregationalists in furthering the interests of the society, will now withdraw in consequence of their union with the Old School, leaving the Congregationalists to carry on the work by themselves.—*Methodist*, October 8.

GOOD WORDS FROM SWEDEN.—That faithful Baptist missionary, Rev. A. Wiberg, writes from Stockholm of a great work of grace under the fourteen evangelists sustained by the Stockholm Missionary Union, and quotes the resolution of thanks passed by that Union "To the American Tract Society for their generous donation of \$200 to aid in printing and circulating tracts in this country."

Gladly would the committee greatly enlarge their grants to such men as Wiberg and Oenken, to aid in the struggle of evangelical truth with formalism in these nominally Christian lands, with an enlarged liberality of those who appreciate this work enable the society to do more for northern Europe?—*American Messenger*.

A MARRIAGE of a highly independent and extraordinary character recently took place at Ravenna, Ohio. Walter Pierce, the bridegroom, drew up a paper in which he declared his willingness to accord to the woman whom he had selected as his bride, "equal rights, socially, religiously, and politically," with himself. This being read the lady responded: "I take Walter Pierce, whom I now hold by the hand, and whom I intelligently, religiously and spiritually love, to be my companion through life; and I agree not to usurp over or transcend him in any particular." Then standing before the mayor, they said: "By this voluntary and premeditated act, in your presence, we declare ourselves religiously, philosophically and scientifically married." Apparently convinced that Mr. Pierce would not be "trumped," the mayor declared the marriage valid.

SPEECH-MAKING IN PRAYER.—Should prayer offered in public be an oration? A few months ago we went to church on a Sunday evening in a large country town, and heard something which so impressed us that we have since thought about it very often. It was not the sermon; there was nothing specially memorable in that. It was a prayer, or at least when the minister began it he said, "Let us pray," and the people bowed their heads as if in supplication. Then we heard, first, a brief eulogy upon human nature, setting forth its dignity and independence. Then there was a description of the horrible and enslaving effects of superstition, and of false views of the character of God which have always been entertained in the Christian church. After this the results of modern theological criticism were summed up, and the prayer concluded with a sketch in outline of the state of things in the "good time coming, when man will be emancipated from the bondage of traditions, and rites and superstitious usages, and will reverence and worship only the Divine in his own nature." This is no caricature; it is an accurate report of what we heard on the occasion referred to, and in important respects it is much like what we have often heard in our own denomination and in others. There is a great deal of prying in public that closely resembles speech-making. Of course we intend no criticism of the obvious ideas and opinions of the minister whom we heard; we only ask whether such an oration can properly be called a prayer?—*Liberal Christian*, New York.

THE BAPTISTS of Georgia propose to remove Mercer University from Pennington to the more central location of Macon. Their Board of Domestic Missions last year nearly encumbered a debt of \$17,500, and supported a force of 64 missionaries, against 26 the year previous. They have in the State the enormous number of 1,218 churches, with 115,198 members, of whom 39,070 are colored. Besides these there are 205 colored churches, with a membership of 27,758; 362 anti-missionary churches, with a membership of 11,249; and 288 regular Baptist churches, with 15,913 members.

TO CURE NERVOUS HEADACHE.—Take a dessert-spoonful of common soda, such as is used in making bread, and dissolve it thoroughly in a quart of cold water. With this thoroughly shampoo the head for about five minutes, scratching the skin of the head and the back of the neck well with the finger-nails. Then rinse the head with clear cold water. Major Brown says he has used this remedy in perhaps a thousand cases since 1853, and never once failed to give relief in five to ten minutes. This remedy is for nervous headache, and is not for those afflictions of the head arising from deranged stomachs.

The Christian Advocate,

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, OCTOBER 22, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.

Three Dollars per Annum, in Advance.

Address—REV. LINUS PARKER, 112 Camp Street, New Orleans, La.

AGENTS—All the members of the patronizing Conference.

CONFERENCE PUBLISHING COMMITTEE

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. W. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
REV. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENE, D. D.
REV. J. R. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a POST OFFICE ORDER, DRAFT, or by EXPRESS. If this cannot be done, REGISTER the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

MONEY.

By way of gentle reminder we would say to those having funds for the ADVOCATE that this is the hardest season of the year financially, and that we need every available dollar to tide us over the present financial stringency. Small sums in many hands make a considerable aggregate. Don't wait till Conference, but remit at once by registered letter, post office money order or draft.

YELLOW FEVER.—Since our last report the fever has been steadily declining. The weather is now bright and nearly cool enough for frost, and we have every reason to believe that the fever will disappear altogether in a week or two. We do not think that unacclimated persons incur much risk at this time. The deaths from fever for the week ending on the nineteenth instant are as follows:

October 13.....	6
October 14.....	7
October 15.....	12
October 16.....	12
October 17.....	3
October 18.....	5
October 19.....	7

Making a total of.....

DR. GEORGE H. CLINTON.—It will be observed that Dr. Clinton is announced in the list of appointments in connection with the First Church, as supernumerary. His health has not been sufficiently restored to justify his taking charge of so large a society; otherwise he would have been continued in that appointment. During his connection with it, for two years past he has rendered the church invaluable service, and has endeared himself universally to the people of his charge and the large congregation to which he has ministered in the most acceptable manner. The suspension of his active ministry is very deeply regretted throughout the entire church and Methodist community here. We hope it may be temporary, and that he may soon be able to resume his labors in our city, where his ministry has been so pleasant to himself as well as profitable to the church. By the advice of his physicians he will spend the winter in the South, at his father's residence, and takes his departure this week. His post office address will be Darlington, Louisiana. He takes with him, for himself and family, our affectionate sympathies and our prayers for his return to us with restored health and strength. *St. Louis Christian Advocate.*

No one loves to tell a tale of scandal but to him who loves to hear it. Learn, then, to rebuke and silence the detracting tongue by refusing to hear. Never make your ear the grave of another's good name.

Look not mournfully into the past; it comes not back again. Which improve the present. It is thine. Go forth to meet the shadowy future without fear, and with a manly heart.

PERSONAL ACCOUNTABILITY.

The most complete isolation of man lies in this feature of his responsibility. The final account will be intensely personal. Every one of us shall give account of himself to God. Others may be instrumental in molding our characters and in giving direction to our lives; they may be the means of leading us away from virtue and piety, and plunging us into vice and crime, but still every one shall give account of himself. Judgment by proxy is impossible. All must stand before the judgment seat of Christ, and every individual of the myriads of earth must then answer absolutely for himself. Parents cannot respond for their children, nor children for their parents. Every man shall bear his own burden, and no one in the universe can assume any part of it. What others may have contributed to our downfall and misery they must answer for, while this fact takes nothing from the weight of our own condemnation. Our ruin is not the less terrible because some other accountable being has led us into it. In justly blaming others we do not relieve ourselves of guilt.

It is very common for men to attempt to shift this accountability from themselves by ascribing their faults and sins to their fellow-men. Adam was the father of us all in this as in other respects, and Eve acted as her children have acted ever since. We are always endeavoring to place the responsibility somewhere besides in ourselves.

"The woman whom thou gavest to be with me, she gave me of the tree and I did eat." How else should our first mother escape but by answering her Maker: "The serpent beguiled me, and I did eat?" True as these answers were, they did not relieve our first parents of their personal guilt, and the curse was pronounced upon them. People are ready to lay their sins at the door of circumstances, to the charge of seducing spirits and peculiarities of temperament. Here is a man who complains that no one cares for his soul; parents, ministers, friends have neglected his spiritual interests. He knows himself to be a sinner, but feels that somebody else is to blame for it, and that somehow he shall escape on this score. It is seldom, indeed, that we cannot find some scape-goat of this sort—something that must exculpate, or somebody who must answer for us. The feeling is not uncommon that God himself is responsible for what we are, and that a rigid personal accountability is therefore unreasonable. Sin ceases to be sin when God becomes its author, and the creature stands acquitted by the Creator's own act. Whether we

rest in the conviction that our character and conduct are determined by divine or human agencies, the conclusion reached is that we are not responsible. Life has been a failure and a crime, but the responsibility rests upon others, and if there be any retribution, upon them it must fall. Men persuade themselves that they cannot help being what they are, and that, if wrong, an overwhelming necessity shunts them up to the dominion of passion and error. They resist the convictions of conscience, the declarations of inspired authority and the consciousness of guilt until they come to believe that a fatal and final condemnation is impossible.

In opposition to all such delusions is the testimony of the Scriptures. Each individual must answer for himself as to character, belief and conduct. The presence of a corrupt nature may be intensely powerful, the perplexities of opinions and doctrines apparently inextricable, and the obstacles to uprightness seemingly insurmountable, but yet the demand of faith and obedience is not relaxed. The creature of God, and in a universe of intelligences acting upon him, and here with an unmistakable bias to evil, man is free, and he will be held to a strict account. If he continues in ignorance and disobedience the peril is his own; if he runs into error he must assume the consequences; if he yields to temptation, though the temptations

be of the form of an angel of light, it is his own undoing. Everything is at his own risk. He may fall with others and by others, and yet he destroys himself. He may charge his ruin upon the appointment of God, the malice of devils, the inconsiderateness of friends, the selfishness of kindred, and yet the sinner, however lost, must give account of himself to God. His destruction may deepen the remorse of others, without in the least alleviating his own. He must stand on that day as completely alone as if God and himself were the only beings in the universe.

The awful truth that we are personally accountable may well lead us to pause and examine the grounds of our hopes. These cannot be taken second-handed from the teachings of men or of churches. They cannot be assumed from the convictions and opinions of the world. Whatever we adopt, whatever we follow, it is all at our own risk. God has given us his revealed word, his quickening Spirit, the use of our reasoning faculties, and amid these conditions of light and grace we are left to elect life or death. Where opinions and doctrines are manifold and contradictory, where parties and sects disagree, we are still compelled to choose. The difficulty may be admitted, but we must overcome it, and if a serious mistake is made the consequences rest upon us. If without thought, investigation and prayer we accept the creeds and conclusions of falsehood, no companionship in error will clear us of the guilt and its results. In all essentials we can be right and must be right. God requires no more than that we do justly love mercy and walk humbly with him, but he does demand this. To do and to believe as well as we can is not the standard, unless the doing and the believing come up to the purity and faith of the gospel. Otherwise the creature becomes the law-giver, and the Creator's throne becomes the plaything of human caprice and folly.

THE MINISTRY AND OLD AGE.

The extracts which we give below, about preachers who have been overtaken by old age, will be read with serious thought by some. For old men like Dr. Sprague and Dr. Barnes, who retire from the active ministry with abundance of temporal comforts, no sympathy is needed. Their circumstances are most enviable. It is for the aged servants of God who are left in poverty that our pity should be excited. There is no office work for them when voice and limbs fail them for the pulpit and pastorate. They are laid aside with little consideration, and perhaps the terms "turned out to die" are not too harsh. Few of our middle-aged ministers can hope for a comfortable old age, and they must cheer themselves with the reflection that the most of them will be called home to heaven before the grasshopper becomes a burden. A writer from New York in the Boston Journal makes the following statements:

Dr. Sprague, of Albany, has removed to this locality. He has bought a comfortable home in Flushing, and will spend the remainder of his days quietly in retirement. For thirty-five years he was regarded as the most accomplished pastor in the State. Genial, gentle, manly, elegant and eloquent, his correspondence was probably larger than that of any clergyman in the country. He made his church celebrated through all lands by his ability as an author and preacher. Men will grow old; old friends will die; young people will rise in their places, like republics, are notoriously nugatory. They get all they can out of a man when he is young and popular, and turn him aside when he is old. The blow came on Dr. Sprague unexpectedly, and mortified him intensely. A meeting of his parish was called to provide means to pay for a mission chapel, which has been erected. One of the members, to the astonishment of the meeting, boldly announced that Dr. Sprague ought to leave; that he was an old man; that he had outlived his usefulness; was in the way; he should give place to a younger man, the congregation would fill up at once, and there would be no trouble about finances. A relation of Dr. Sprague, who was present at the meeting, reported the proceedings, and the doctor immediately resigned. He was too proud

to occupy the position from suffering. One of the most popular preachers ever settled in Boston spent his declining years in this city, and would have lived in want if prominent merchants had not settled on him an annuity. One of the most popular preachers that Brooklyn has ever had, who for years preached to the fashionable Presbyterian church in the city, who lived in fine style, and was the most famous platform speaker of the age, is now an old man without a settlement, whom no one cares to hear preach, and has scarcely any income. There are at least a dozen ministers who, since I was correspondent of the Journal, were settled over fine congregations with large revenues, but are now clerks in the customhouse, and thankful for that.

A gentleman whom all Boston knew as the pastor of one of the wealthiest churches in that city, thankfully accepts the pittance paid to city missionaries, to keep his family in bread. The church that he attends raised its pew-rents, a short time since, to give its pastor a large salary. The missionary was unable to pay the advanced rent, and so was turned out of doors.

Troy had a very fine preacher, gave him a very fine salary and a parsonage to live in. He was thought too old for his place, trouble was created—which can be easily done when men are disposed to make trouble—and the pastor resigned. He had always enjoyed a large salary, lived in good style, and never knew want. He is now in absolute penury, and thankfully accepts a Sabbath's preaching at small pay.

In the privacy of New York, where men are as solitary as if they were in the center of a dense forest, men turn from the ingratitude of the world in seclusion among the multitude of our people. These cases are only specimens.

The Western Christian Advocate contains the following extract and observations in the same line of thought:

Rev. John Todd, D. D., of Pittsfield, Massachusetts, and Rev. Albert Barnes, of Philadelphia, have each recently made contributions to the newspaper literature of the day concerning old preachers. Neither of them take the most cheerful views of extreme old age, though Mr. Barnes exhibits a spirit rather more elastic than Dr. Todd. The latter, in enumerating the trials of clergymen, has this in his list:

"The first great trial of the old preacher is, to feel that he has done his work—is no longer needed, and must be set aside. The world no longer looks to him. When a lawyer retires from public speaking he can go to his office and do office business. Probably eight-tenths of all the law business in the Commonwealth is done in the office. When a physician retires from visiting his patients he can go to his office and still carry on his consultations; but when the minister has done public speaking he has no such resource."

Not "in any way to prove a distress to his people," Dr. Todd has tendered his resignation, the same to take effect January 1, 1871. Both Mr. Todd and Mr. Barnes are over seventy, but both continue to write abundantly and with vigor. In their retirement as public speakers we trust many years may be granted both to speak through their eloquent pens.

The churches take care of their servants very much as other employers take care of theirs. When from any cause they become incapable of effective labor, they are set adrift and left to shift for themselves. It will be long before an adequate support will be provided for worn-out ministers in any church, and in the order of providence many of the most devoted and useful are pining in neglect and actual want. Either the preachers must be more provident and take care of themselves, or they must look forward with resignation to a decrepitude which shall be aggravated and engloomed by positive destitution. While looking at the darker side of the subject, however, we should not forget that it has some brighter aspects. For the many aged ministers who are spending their last days in cheerless destitution, there are probably many more who have all temporal as well as all spiritual consolations. Then the aged minister ordinarily has a supporting rather than a dependent family. And his average condition is perhaps better than that of men in secular pursuits. How many professional men or merchants are better off in their old age? Although the preachers are precluded from any considerable effort to provide for old age, they come off in the end about as well as those who have spent their lives in the attempt to

CIRCUITS AND STATIONS.

These two appellations designate two important fields of Methodist ministerial labor. As population becomes more dense, commercial, manufacturing and educational necessities demand and create villages, towns and cities. These must have pastors, and hence stations are ever increasing in our ecclesiastical system. The differences between the two fields of ministerial labor are considerable and various. We think, for reasons satisfactory, that a consideration of the differences may not be unprofitable or uninteresting, especially to our younger preachers.

Men who have had no opportunity to familiarize themselves with the facts are apt to think that "the station preacher," as he is called, has an easy and enviable position. Let us see. First, as to the matter of study. He must be a student if he is a success in the pulpit. He cannot get through one year with less than seventy-five sermons; if he has little assistance, then a hundred or more will be demanded. Here is a vast and brain-wearing labor. There must be variety, for a preacher attempts to be a hand-organ, with a few stereotyped tunes, he will soon weary the ears and thin the benches of his congregation. There must not only be variety, but suitable, matured, instructive variety. The hearers in stations are not, may be, more intelligent than those on the circuits; but then they are not shut up to the necessity of hearing you. There are other preachers, perhaps men of ripe classical and theological culture. With these (not in the bad sense) you have to compete, or lose your hearers. On the circuits a much smaller stock of sermons will take you respectably and usefully through the year. The strain on your brain will be very much less. But suppose the pastor returned to the same charge for several consecutive years—how must his toils increase to meet the ever-recurring demands of the pulpit! The physical and mental labor of preaching sermons that have not been worn on the mind long enough to fit easy, is much greater than to preach those with which we are familiar.

Then consider that his pastoral labor is very much greater and more taxing—especially if his charge be a large town—than are the pastoral labors of the circuit. On the circuit the visits are pleasant occasions; you share the hospitalities of the family and you meet the gentlemen of the house. But in stations you must visit monthly or quarterly a large list of families. In these visits you rarely meet the brethren. They are at their places of business, and too busy to talk to you in their offices, shops and counting houses. Towns and cities contain a vast number more of very poor and afflicted and suffering people than the country populations. The pastor's sympathies are much oftener stirred and painfully moved than the pastors of circuits.

Large towns and cities present a great appearance of wealth, and those who do not know are apt to think that station preachers are enjoying fat salaries, and likely laying up something for a rainy day. To a man in the country, whose expenses are comparatively small, two or three thousand dollars seems a mint of money, and he wonders what the preacher can be doing with it if he does not lay it up. But when such are sent to the towns, and have to buy at a high price every stick of wood they burn, every drop of milk, every pound of butter, every egg, bean, potato, apple or peach they eat, they become ill-minted. Then your family have to be in company, and yourself every day in the year. This necessitates much greater expense in the matter of dress. The writer spends more money in simply getting about on pastoral duties than he used to receive on a circuit for a whole year's toil. If a man remains in a country parsonage, with woods, fields and garden attached, for four years, he has some little chance to accumulate. He has his fuel, his fruit, his garden, his cow and poultry. Many

of our preachers in the country have little homes, perhaps almost equally convenient to two or more circuits, or districts. Here their families can live for years, acquire comforts, and increase "a basket and store." This can never be done in the stations.

In a sanitary point of view the circuit has the advantage over the station. The travel, the variety, the change of air, are all favorable to health, promoting appetite, cheerfulness and sleep. Mr. Wesley attributed his cheerfulness and vigor at fourscore to constant variety and travel.

Let brethren or circuits who have sometimes, may be, considered that their lot was a hard one—for harder than their brethren in the towns and cities—consider these items, and learn to be content and charitable.

ST. LOUIS CONFERENCE ITEMS.

This body adjourned on the fourth instant. We give some additional items of interest in addition to last week's report. We copy from the St. Louis Advocate of the twelfth instant.

DIVISION CONFERENCE.—The following resolution determining the constituency of the District Conferences was adopted, and made the law for both Conferences, as divided, viz:

Resolved, That the membership of the District Conferences, as provided for by law of the late General Conference, shall consist of all the traveling and local preachers in each presiding elder's district, and superintendents of Sunday schools who are members of the church, the district steward of each circuit and station, and two laymen as delegates, to be elected by each quarterly conference.

RECEIVED FROM THE METHODIST CHURCH.—Rev. G. N. Keener, an elder of the Methodist Church, was introduced to the Conference, and stated his desire to unite with the Methodist Episcopal Church South, and to join the Conference, and having assumed our ordination vows, was admitted into the Conference.

DIVISION OF THE CONFERENCE.—The Committee on Division of the Conference made the following report which was adopted, as follows:

The committee raised by resolution of the Conference to inquire into the expediency of dividing the St. Louis Conference, and if found expedient to designate a boundary line and other arrangements incident to such division, beg leave to report for adoption the following resolutions, viz:

Resolved, That under authority granted by the General Conference the St. Louis Annual Conference shall be divided into two Annual Conferences, to take effect from and after the adjournment of its present session, the division line being as follows, to wit: Commencing at the mouth of the Gasconade river, and following its course to the mouth of the Big Piney, thence along the course of that stream to its headwaters at or near Cedar Bluffs, and thence in a straight line to and southward along the east line of range eleven to the southern boundary line of the State of Missouri.

Resolved, That the Conference lying eastward of said division line shall be named and known as the St. Louis Conference, and that lying westward of said division line as the West St. Louis Conference.

Resolved, That the first session of the St. Louis Conference shall be held in the city of St. Louis, at the Centenary church, and of the West St. Louis Conference, at Kansas City.

Resolved, That the assets and liabilities of this Conference shall be divided equally between the two Conferences thus formed; the amount of assets and liabilities falling to each to be ascertained and announced respectively by the Board of Missions concerning missionary accounts, by the Committee on Education respecting the Central College building debt, and in reference to the Conference fund by the Board of Trustees of this Conference.

Resolved, That the two Conferences shall each hold to the Central College and to the Southwestern Book and Publishing Company the same relations as now exist between these institutions and this Conference—the St. Louis Christian Advocate being hereby recognized and adopted as the organ of each of the Conferences, and entitled to their patronage and support.

Resolved, That the books of record, papers and entire archives of this Conference, together with the Conference trunk, be turned over to the new St. Louis Conference.

Resolved, That the constitution of the Board of Missions, adopted at the last Conference, shall be accepted and be in force for both of the Conferences as divided.

Resolved, That the presiding Bishop be requested to hold the Conference in session after the appointments of the preachers are announced, in order to elect the boards of missions and of finance and the examining committees for each Conference.

All of which is respectfully submitted.

T. M. FENNEY, Chairman.

Nashville, Oct. 1, 1870.

Nashville Publishing House.

We have received through your body a communication from our Publishing House at Nashville, containing a gratifying exhibit of its success during the past year, and setting forth its plans for the future.

These plans we are prepared to aid as far as we can consistently with our fidelity to other interests. The communication referred to announces an enlargement of the Nashville Christian Advocate, accompanied with a reduction in the price, and a promise that when the subscription list is carried up to twenty thousand it shall be sold for \$1.25 per annum. We are sorry to observe that this fact has in some measure served to prejudice the minds of ministers and laymen in our Conference against the said paper, as though the deficit arising from its publication at these figures was to be made up, and the enterprise sustained by the exorbitant prices of hymn books and Disciplines sold by the same establishment. We sincerely hope that these suspicions are wholly without foundation. As to the books referred to, we are bound to reiterate our conviction, expressed at our last annual session, that the time has come when the prices should be somewhat reduced. Till this is done their free circulation among our people must be seriously obstructed.

MEMORIAL.—On the official announcement of the death of Dr. William A. Smith, a special committee was appointed to prepare a memoir, which was reported and adopted, as follows, viz:

The Committee on Memoirs beg leave to report:

Not only the St. Louis Conference, but our entire church, has been called to mourn because one of her strong pillars has been thrown down.

The death of Dr. W. A. Smith is a sorrow felt through all our borders, as his name and his life-deeds are the property of the whole church.

He was not permitted to labor long with us in this Conference—hardly long enough for personal friendship to mature—and yet in finishing his work, he engraved his name so deeply upon the institutions of Missionary Methodism that it cannot be effaced.

We wish to place upon our Conference journal something more than a history of his short stay with us, and make a record worthy of the man.

A very full and faithful memoir of his entire life was carefully prepared by Rev. Dr. Granberry, of the Virginia Conference (and none were more fitted by life-long friendship for that work,) and published in our St. Louis and other Advocates. Your committee recommend the Conference to adopt that memoir as our record, and that it be printed in our minutes.

PERIODICALS.

THE SOUTHERN FARM AND HOME.

This is one of our best agricultural periodicals, and is published by that most enterprising firm, J. W. Burke & Co., Macon, Georgia. The number for October is filled with matters of practical interest and information for planters, horticulturists and housekeepers. When copy is wanted for our agricultural column we never fail to consult the pages of the Southern Farm and Home.

THE MANUFACTURER AND DEALER.

Western & Co., publishers, 37 Park Row, New York. This is truly a magnificent work in every respect, and one that every architect, musician and artist should have. Its engravings are of great value, and there is a vast amount of scientific information presented in a popular style. All the latest discoveries and inventions are exhibited in those pages. The October number is one of the best.

OLD AND NEW.—The October number has several very suggestive articles, such, for example, as "The Future of Protestantism and Catholicism," "Herbert Spencer" and "Faith and Knowledge." The Examiner contains an elaborate notice of the McFarland trial, and some carefully prepared book notices.

Mrs. Stowe's endless story of "Pink and White Tyranny" goes bravely on, and so does "She Writes" and "The Church of the Light-day Stars." John Whopper, the News-boy, has reached its last number. The poetry is generally very good.

G. W. F. 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

Handsome printed, profusely illustrated. Among other titles of value we have marked some of special interest, as, "Among the Butterflies," "Sketches from Nature," "Swallows," "Four Months in Camp" and "At the Back of the North Wind." Good Words for the Young is edited by George MacDonald, and published by J. B. Lippincott & Co., Philadelphia.

The SUNDAY MAGAZINE, edited by Dr. Guthrie, and Good Words, edited by Norman Macleod, D. D., and both republished by Lippincott, contain the usual quantity of illustrations, and the cream of a pure and choice literature. The parts for October are not inferior to their predecessors. There are "Songs and Verses by Jean Ingelow" in Good Words, not equal to some things from that gifted muse, but still such verses as Jean Ingelow alone can write.

J. L. DUNNICK & Co.—This well known firm, dealing in flour and provisions, but never in whisky, have a full stock, and are prepared to fill both city and country orders.

Planters, commission merchants and families can bestow their patronage on none more worthy to receive it. Their place of business is No. 50 Tchoupitoulas street, New Orleans. See their card in this week's Advocate, under the head of new advertisements.

ALABAMA CONFERENCE.

The members will call at the Methodist Episcopal Church South on their arrival in the city. Those who intend bringing their wives must give timely notice.

JOHN MATHEWS.

MONTGOMERY, ALABAMA.

THE DEATH OF THE WICKEDEST MAN.—John Allen, noted two years ago as the "wickedest man in New York," died on the sixteenth of last month, at West Perth, in this State, where his father resides. John, it may be remembered, kept a dance house and a drinking saloon in Water street, and turned his establishment into a place of daily prayer, under the influence of several gentlemen connected with the Howard Mission. More than a year ago he moved into a large brick building, which he had erected at Roosevelt and Batavia streets, and kept a grocery on the ground floor. The upper stories he rented to families. At first he attended to business and prospered; but after the death of his wife his old habit of drinking overcame him. He lived in idleness for six months previous to his death, and his store was without goods. In August he went to his father's farm and remained there until his decease. He leaves over \$100,000, earned chiefly in his numerous Water street pursuit. While residing in Roosevelt street he frequently visited the Howard Mission in his sober moments, and professed religion. —New York Sun.

TEN THOUSAND CABINET ORGANS PER ANNUM.—Mason & Hamlin, the famous cabinet organ makers, are again obliged to add to their manufacturing facilities, which have been doubled about every three years since they commenced business. So great is the reputation of their work and so large the demand for it that there has been no time for years when they have not been largely behind orders. Recently they purchased some two acres of ground in Cambridgeport, on which is now completed another large new factory. This, with their other factories, will give them capacity to produce two hundred cabinet organs each week, or over ten thousand per annum. They are, of course, much the largest manufacturers of this class of instruments in the world.

They are introducing improvements in their organs, the present season, which they regard as very valuable and for which patents were granted them in June and August last. —Boston Advertiser.

WE HAD THE PLEASURE last week of visiting the warerooms of Mr. Philip Werlein, the extensively known piano, organ and music dealer, Nos. 80 and 82 Baronne street, of this city. We find that he is making extensive preparations for a large winter and spring trade, and his stock is now coming in by almost every arrival. Mr. Werlein's trade is rapidly increasing, and he is undoubtedly a man of the times. Persevering and indefatigable in his efforts, he is fully entitled to the brilliant success which marks his business career. It is unnecessary for us to comment on the superior qualities of the pianos and organs sold by this reliable house. They are to be found in Louisiana, Texas, Arkansas, Mississippi, Alabama, Florida and Georgia, and they speak for themselves. —New Orleans Times.

ANNUAL CONFERENCES.

Obituaries.

Died, at Pawpaw Island, Louisiana, August 24, 1870, TALLIEA CATHARINE, daughter of S. D. and M. A. Smith, aged five years, seven months and six days.

That sweet and lovely angel, who but a short time ago was a sunbeam in the home of her now desolate parents, gladdened their existence by her sprightliness of mind and amiable disposition, unusual in one of such tender years, endearing herself to all by her winning ways, has glided over our pathway like a meteor at evening, and set in the deep shadows of night. S. A. TEE.

TRIBUTE OF RESPECT.

The following resolutions were passed at the first quarterly meeting, held at Big Cane, May 7, 1870:

WHEREAS, Our heavenly Father, in his inscrutable yet wise providence, has taken from our beloved brother, Brian W. ROBERTS, who was a member of this quarterly conference; therefore,

Resolved, That in his death the Methodist Episcopal Church South has lost a faithful and generous member, society a useful and honorable citizen, this quarterly conference a discreet counselor, and his bereaved family an affectionate, just and beloved husband and father.

Resolved, That we cherish his memory and sincerely deplore his departure, and that we extend our heartfelt sympathies to his bereaved wife and children, and commend them to the prayers of the church and to the mercy of Him whose ear is ever open to the cry of the afflicted.

Resolved, That a copy of these resolutions be sent to the NEW ORLEANS CHRISTIAN ADVOCATE for publication.

J. E. MARSDEN, P. E.
S. P. WARD, Rec. Sec'y.

MRS. EDJAZ ANN REESE, COBBOFT OF

Dr. A. J. Reese, of King's Landing, Dallas county, Alabama, died September 19, 1870, of bronchitis.

For many months she had been the subject of painful affliction from paralysis, rheumatism and bronchitis. She visited the Meriwether Springs, Georgia, was somewhat improved, but reached home only to die. Mrs. Reese possessed many noble elements of mind and character. Her charity and benevolence were proverbial, reaching far and wide, and many a silent tear will fall when this intelligence reaches those who have shared in her liberality. Her loss will be greatly felt, not only in her desolated home, but in the community, and by the Methodist Episcopal Church South, of which she had been a consistent member from her girlhood. Her religious deportment was quiet and unobtrusive, like the gentle stream that waters and refreshes as it passes, without noise or ostentation. May her exemplary piety and kind-heartedness be imitated by her children.

J. A. SPENCE.

Departed this life, on the morning of the fourth instant, on Bayou Waxia, St. Landry parish, Mrs. M. LACY GOODRICH, nee Rogers, in her twenty-sixth year.

Sister Goodrich united with the Presbyterian Church at the age of fifteen, and was happily married to Courtlandt Le Grand Goodrich soon after the close of the late war, and with her husband and his mother's family came to this parish. I cannot speak too highly of her Christian virtues. She was eminently prepared to work in God's vineyard, both intellectually and religiously. With her husband, his mother and sister, she united by letter with our branch of the church in 1868. From that time until her death I have known her well, and can testify to her faithfulness in every department of Christian duty. Truly we have lost one whose place will be hard to fill. Especially do we miss her in the Sabbath school, where she delighted to labor. This star went down not in gloom, but, brightening as the night of death approached, it melted into the glory of eternal day.

P. P. WARD.

St. Louis Advocate please copy.

REV. F. L. THOMPSON.

This beloved and devoted minister committed suicide on Friday, September 17, at New Orleans, Miss. app. He

had been strangely affected for some time previous to the fatal act, but not so as to arrest his labors on the circuit, or to produce any serious apprehensions on the part of his friends. His physician pronounced his disease a softening of the brain.

Brother Thompson was born in Monroe county, Mississippi. He was converted and joined the Methodist Episcopal Church South about twenty-two years ago, after which he obtained license to preach, and joined the Alabama Conference, and has remained a faithful and useful member of the itinerancy ever since. I do not recollect the precise year when he joined the Conference, but it was not a great while after he professed religion. He was about forty-five years of age at the time of his death. His presiding elder, Bro. Stone, writes me as follows about his end: "At his third quarterly meeting, two months ago, I found him in a state of almost despair. He had come to the conclusion that he was doing no good, and ought to leave the work. The people, however, giving him assurance of their high appreciation, closed his month; but the impression was still there. I advised him to go to the mountains, but he said: 'No; I will preach as long as I can.' For the last two months he has been engaged in revivals. Brother Ellis, his assistant on the work, informs me that he has never known a more devoted man. He preached the night before his death, and closed a meeting about twelve miles from his home. Next morning he insisted very much that Brother Ellis should accompany him home, showing that he had no idea then of committing the act. A young man, who went with him to within two miles of the place where he hanged himself, told me that he talked about as usual. The minister passed after he had dismounted, while he was standing under the fatal tree, and Brother Thompson spoke to him, remarking that it was a warm day. His physician thinks he had no idea of hanging himself until he saw the tree. Then the thought of putting an end to his life was the only one that possessed him; and he gives it as his opinion that Brother Thompson felt it his duty to hang himself then and there, just as much as ever he felt it his duty to preach."

Thus has this noble, devoted, self-sacrificing man of God passed away from the walks of earth. Who can doubt his happy translation to the home of the blessed? I have known him long and intimately, and loved him sincerely. Peace be to his soul! May God, who comforts those who are cast down, remember and comfort and graciously provide for his desolate wife and bereaved children.

GEORGE S. SHAFER.

If you have Sallow Color of Skin, or yellowish brown spots on face or body, dizziness, drowsiness, frequent heart palpitations, bad taste in mouth, orange colored stools, head, unsteady appetite, low spirits, poor forebodings, you are suffering from a complaint or biliousness, and our new medicine will relieve and cure you so speedily and permanently as Dr. Parke's Kidney and Bladder Medicine. Sold by druggists. A pamphlet sent free. Address: R. V. Pierce, Buffalo New York.

FIVE CENTS ADDITIONAL.

will buy shoes with Silver or Copper Tins, which will save the buyer the price of a new pair of shoes. Compared with ragged toes and dirty stockings, they are beautiful, to say the least. Parents, try it. Sent 3c.

The Child's Corner.

LIFTED UP.

BY GEORGE COOPER.

I was glad the day was over,
For my heart was sick and sore,
With the troubles and the trials
And the burdens that it bore.

When I left the world behind me,
Not my pleasant household nest,
Nor the prattle of our children,
Seemed to give me any rest.

Then my wife, in watchful kindness,
Saw the cloud upon my brow,
And she chid our merry darlings,
Saying: "Papa's weary now."

So the children lingered round me,
In their quiet, sad surprise!
O the yearning love and pity
That were mingled in their eyes!

In the silence came the baby,
And the group he toddled through,
Saying, both his arms outreaching:
"Baby's tired; lift, papa, do!"

O the trust! the sweet reproving!
O the warm, the dear caress!
Then I prayed my heavenly Father
Lift me up in my distress!

Little Corporal.

How Willie Took Care of Nettie.

BY ANNIE BELL.

"Take good care of Nettie, my son," said Mrs. Rowland, as she fastened her glove and stooped down to kiss Willie.

"Yes, ma'am," he replied, not speaking very heartily, but returning the kiss. "I'll try, though I do wish I could go."

Willie's mother stroked his hair, gave Nettie one more hug, and walked out to the carriage.

Nettie and Willie stood by the window to watch her.

"We can't go, can we, Willie?" said Nettie, as her mother rode swiftly out of sight.

"I could, if it wasn't for you," answered Willie, with a frown.

"Yes," said Nettie, gravely; "but now you have to stay and tend to me. I suppose you don't like it pretty well."

It was foolish for Willie to care because his four-year-old sister said this, but he felt just like losing his temper, and so he made a naughty speech.

"I want you to shut up, Nettie. It's bad enough to stay here all day, without having you twit me of it. I wish you'd run off and let me alone."

Nettie smoothed down a little wrinkle in her white dress, and replied: "Well, I will. I shan't stay where folks don't want me. I'm going right away."

You would have laughed if you could have seen her turn about when she got to the door, and add, with a queer little assumption of dignity:

"If anything happens to me, Willie Rowland, and I go killed, I shall just tell mother you're to blame, because you let me."

She was such a funny little girl, with such funny ways, that Willie almost felt good natured to see her; but he had so much bad in his heart that all the right feelings were choked back, and he let her pass out of the room without saying one word more.

Presently he heard her laughing and chatting with Norah, in the kitchen, and then he lay down on the sofa and began to think how absurd he was. Talking to himself, this is what he said:

"All the boys in the village are ready to go by this time. I've been counting on a good time for three weeks; and just because mother took a freak I must stay home and tend to Nettie. It's right mean, there."

And Willie tossed about fretfully, and then grew quiet, and listened to the drowsy hum of insects in any but a pleasant mood.

You see Mrs. Rowland's only sister had been west two years, and was now coming back for her health, so Mrs. Rowland drove to the city, six miles away, to meet her; and Willie had to give up an expected pleasure, and "stay home with Nettie."

The boys of his acquaintance had been intending to go to the woods on this day, and have a "time." They had made benches, they had put up a swing, they had made many graceful decorations. Their indulgent mothers had provided rations, and were to be invited to a supper of the boys' own getting. Stump speeches, flags, drums and so forth, were a part of the programme. There was a "splendid day" in anticipation. Now Willie was usually a good tempered boy, loving his sister dearly, but he thought this disappointment was more than he could bear. Perhaps if his life had been less easy he would have been more patient; but he had his dead father's hair and eyes, and his mother may be pardoned for having been a little over-indulgent. To-day she had been as firm as she could be when she thought it best, and the result was as cross a boy as you can imagine.

He had thought it over and over, till half an hour slipped by, and he heard quick feet outside. He knew

they were coming for him, and went out to meet them.

"Hurry, Willie," said Fred. Baker.

"It's pretty late," answered Willie, sulkily.

"Can't go!" exclaimed four voices; "why not?"

"Mother said I should stay and take care of Nettie."

"If that ain't mean!" came from one of the four.

"I'll tell you what," said Fred.

"It's not fair that we should carry all these traps, and you're in honor bound to go and help us, whether you stay or not."

Willie hesitated, declared he couldn't, listened to their arguments, and finally consented "just to help, and make haste back again."

On their way he made the explanation called for by their questions.

"Where's your mother?" asked one.

"Gone to the city," was the reply.

"Why couldn't she go some other day?"

"Annt Mary's coming on the noon train."

"Well, for pity's sake, couldn't she ride in the stage?"

"She's sick, and mother thought she could ride easier in the carriage."

The matter made clear, they pursued their way, talking of this and that, and laughing merrily. All the while something kept telling Willie that he ought to have staid, and he determined to hurry home as soon as his bundles were disposed of.

Arrived at the woods, however, the boys renewed their coaxing, urging him to stay to help them, here with a rope and there with a seat, until nearly two hours were gone. All this time he kept declaring he would go directly; that Nettie would think he was lost; and finally, at about eleven, he started.

In the meantime, where was Nettie? She went about singing and happy for a long time, and by and by ran down to the gate and peeped through the pickets. She stood there only a little while, for a butterfly (what a beautiful creature he was!) lit on the fence close beside her. Instantly her chubby hand reached out to get him, but he was not to be caught so easily. He flitted above her in a tantalizing way, till, when she knew she "most had him, he flew over the fence, and, never caring for his fine dress, settled down in the very middle of the street.

Nettie swung the gate open and stepped softly out, her bright hair pushed back, her face flushed and eager. On she went, close to the prize, and just as she was about to be absorbed, a terrible thing happened. Round the corner dashed a runaway horse, with a broken buggy dangling at his heels. Nobody could tell just what did it, but when they picked her up, Nettie's white dress had an ugly stain of blood upon it from a wound in the temple. They carried her into the house, and following the frightened and weeping Norah, placed her on her own little bed. There was a great deal of confusion at first, in the midst of which some one sent for the doctor, who, when he came, said very tenderly (for every one loved her):

"I will do what I can, but I fear Nettie will die."

So kind hands bathed the wounded head and brushed back the tangled hair. They put on her snowy night dress, opened the clasped hand and tearfully removed the crushed butterfly, darkened the room and waited for Mrs. Rowland.

Before Willie had time to return the terrified mother had come, and began her sorrowful watching. Just as the clock struck twelve the unconscious brother walked discontentedly into the yard. He had loitered along, and now went straight up stairs, intending to go to his room. When he came to the door of his mother's chamber he found it open, for air, though the shutters admitted no light. He paused a moment, and in that moment Mrs. Rowland came forward.

Dear, tender mother! With all her anxiety for her darling girl, she did not forget her darling boy. She folded him lovingly in her arms and kissed him. What was coming would be punishment enough.

Willie looked up bewildered and wondering.

"What's the matter, mother? Where is Nettie?" he questioned.

For all answer she led him forward to the bed where Nettie lay, and he saw the pale face and bandaged head. What a wild cry he gave. He had a crazy wish to run off somewhere and never come back. He would have given his life, he thought, if he could see Nettie as she stood at the door that morning. The childish words that she had spoken rang in his ears: "If anything happens to me, Willie Rowland, and I go killed, I'll just tell mother you're to blame, because you let me."

"O, mother!" he cried, "is she dead? Have I killed her? Please scold me, or whip me, for I can't stand it."

Very gently Mrs. Rowland's hand lay on his head while she answered:

"No, Willie, she is not dead, but she is hurt very, very badly, and you must help me nurse her well."

I might write a great deal more, and tell you how, after many days of hope and fear, Nettie began to grow better; how Willie watched and tended her till he grew pale himself from the confinement, and yet refused to leave her; how thankful he was when she could talk and smile faintly.

That was a good many years ago, when he was twelve years old, and he is a man grown now, while Nettie is a young lady. But the experience of those weeks taught him a lesson he has never forgotten, and I have written the story for you—*The Little Corporal*.

The Farm and Garden.

FARM WORK FOR THE MONTH.

The gathering of the cotton crop is still the principal object of the farmer's care, absorbing nearly all his time, and needing all his attention. Every fine day should be devoted to this important work. As fast as the cotton opens it should be picked, and not left upon the stalk to fall out, become discolored and waste, until, as is often said, "we can get round to it."

Prompt, clean picking, skillful handling and good ginning will always be found to pay well; whereas, on the contrary, farmers lose many a dollar by the slovenly, careless manner in which they gather a crop which has cost them so much trouble, labor and money to make. Let no hulls, trash or leaves be gathered with the cotton. In fact, hurried picking they are almost unavoidable, but they depreciate the staple, and consequently depreciate the value. It is very probable that this year buyers will be unusually fastidious, and that the discrimination in favor of fair cotton will more than pay for the labor of clean picking.

If the cotton be picked damp it is very desirable that it be carefully sunned before it is put away in bulk, otherwise it may mold and have its color destroyed. Every good farmer should have a spacious platform attached to his gin house, and should see to it that all cotton picked in the early morning, and after wet weather, be well aired and dried in the sun before it is put away in any quantities.

GATHERING THE CORN CROP.—Corn does not suffer as much as cotton from exposure to the weather, but it does suffer both in quantity and quality if allowed to remain in the field. The sooner it is gathered and carefully secured in good cribs the better. There are many days when the cotton is too wet to pick, when corn can be gathered without any injury to it. We do not recommend that corn be put away in the cribs in large heaps when the shucks are damp, although some people pretend that the heating which corn thus housed will undergo will destroy the weevil without damage to the grain.

We also recommend that all corn cribs be supplied with good locks. It is astonishing how they make a pile of corn "hold out."

PEAS.—Whenever a spare hour presents itself let it be employed in gathering peas. There is no more wholesome food for man or beast than the field pea. Ground with corn they are the best and strongest food for working horses or mules, and pea meal cooked is beyond all comparison the most milk-producing food for milk cows. Thanks to favorable seasons, the pea crop this year is above an average. Gather all you can, and make the effort to gather them all.

WHEAT.—Toward the middle or the end of this month is the best time to sow the earlier varieties of wheat. We hope that the readers of Farm and Home have all resolved to raise a sufficient crop of this excellent cereal to supply their own wants at least, if they cannot conveniently do more. In those portions of Georgia which are suited for wheat, we are satisfied that in a series of years wheat raising would be found to be more profitable than cotton. The acreable return for one year might not sustain this opinion, but when the amount of labor and expense necessary to raise wheat is compared with that required for the culture of cotton, and when the benefit to the land, the time saved to collect and make manure and generally improve the soil, are all taken into the account, we doubt not that our belief is correct.

We do not mean, by raising wheat, sowing three pecks or a bushel of any sort of seed upon a rough, unbroken and grassy field, and then scratching it with a scotter plow. But we mean preparing the land thoroughly by deep, close, even plowing, so that it be perfectly pulverized and deeply broken; we mean liberal manuring with cotton seed or richly ammoniated superphosphates; we mean sowing in drills about half a bushel per acre of the best and cleanest seed that can be found; and we mean covering it carefully and then

rolling with a well adjusted horse-roller.

We have found the white Tappan-hannock wheat to be better than any other variety we have seen.

As a preventive against smut, the seed should be soaked in limestone water or strong brine for twelve hours, and then rolled in lime or plaster. The old advice to "sow wheat in dust"—that is, when the ground is thoroughly dry—may be followed with the best advantage.

BARLEY AND RYE.—Those who have hitherto neglected to sow a barley or rye patch should not lose another moment. There is nothing about a farm which "comes in handier" or pays better than these patches. It is entirely useless to attempt to raise barley either for pasture or seed on poor ground. If you are liberal in manure, prepare your ground well, sow a couple of bushels of seed per acre, and cover nicely, you will rarely fail to have an excellent winter pasture, which will prove a most timely and efficient auxiliary to the corn crib and the fodder stack.

OATS.—Again we earnestly recommend our readers to sow largely of this admirable grain. It is not yet too late, though it were better that the sowing had been completed last month. The same remarks as to the care in the preparation of the ground for wheat, apply to this crop.

SWEET POTATOES.—As soon as the first frosts have nipped the vines the sweet potatoes should be dug. It does not do to wait until the vines are killed, because in that case the frost has penetrated the earth and caused many of the potatoes to rot.

CLOVER AND GRASS SEEDS.—During this month, and in the early part of the next, is the best time to sow clover and the grasses. It is better to sow them with either wheat or barley, but they are frequently sown alone.

Will those who believe that Dr. Voelcker is "an old humbug, who don't know nothing of farming in Georgia," and who have no faith in the fertilizing properties of clover, make the experiment for themselves on a small scale this year? Just try one acre.

PLANTATION MILLS.—We advise those farmers who live at a distance exceeding a mile from a town, and who have Bottoms, or some other good adjustable horse-power, to buy a plantation mill and grind their own meal. The saving in toll will soon pay the cost of the mill, not to speak of the loss of time of men and animals hauling the grain to the mill and hauling back the meal.

COTTON SEED.—As you proceed with the ginning, save with utmost care your best seed for planting your next crop, and save the rest for sale or for manure. In no case let any be exposed to the weather. Even those intended for manure are deprived of half their fertilizing properties by exposure during the winter.—*Southern Farm and Home*.

"HE PRAYED SO LONG."—A few weeks ago a clergyman—we will not mention his name—was visiting in a Christian family. After the evening meal was finished, a hymn was sung, a short portion of Scripture was read, and then, by invitation, the minister led in prayer. With a heart full of joy and gratitude he poured out his soul in praise and in petition. Arising from their knees, all in that group of devout worshippers seemed to be quite affected. Among them was a little boy about four years old; the little fellow was weeping.

"What was the matter, Jannie?" inquired the loving father.

"O, he prayed so long!" sobbed the child.

The father tried, in courtesy to the guest, to cover up the remark, but it was quite impossible. The fact was out, and that, too, as plainly as words could make it. The child had been prattling and playing all day long. He had frolicked with the visitor, and seemed to enjoy his company as much as any others in the family. But his time for rest had come, and to remain upon his little knees, as he had been taught, and listen to the evening prayer without being restless, when that prayer was longer than usual, was trying to him, and hence his tears and complaint—"He prayed so long!"

Let this be a lesson to all who lead in prayer.

AN OLD INDIAN, who had witnessed the effect of whisky for many years, said a barrel labeled "Whisky" contained a thousand songs and fifty fights.

THE BOTTOMS HORSE POWER GIN.

GEAR.

This Power is now put up in three different forms—stationary, movable and mounted on wheels—all having the same action and capacity, differing only in the arrangement of the gears and the mode of operation.

The same may be seen by all interested by calling on me at the St. Charles Hotel; and to any one desiring to enter, with a small capital, a new business, which will yield a sure fortune, I will give unobscured and unparalleled inducements, if immediate application is made.

J. W. HUNTOON, M. D.

MUSICAL INSTRUMENTS.

PHILIP WERLEIN.

SOUTHERN MUSIC HOUSE.

80 & 82.....BARONNE STREET.....80 & 82

New Orleans.

The house of WERLEIN is the oldest established Music House in the South. Its present reputation shall be sustained and increased by every effort.

The best PIANOS AND ORGANS that this country affords are being sold at from ten to twenty per cent. under current rates, in consequence of systematic management of business and low expenses.

PIANOS, ORGANS, MELODEONS.

HARPS, MUSIC, BRASS AND GERMAN SILVER INSTRUMENTS.

Strings, Violins, Guitars, Banjos, Flutinas, Accordeons, Drums, Piano Stools and Covers, and

MUSICAL MERCHANDISE.

OF EVERY DESCRIPTION.

P. S.—Persons not acquainted with me, favoring other houses, will please send for price lists before ordering. Our Pianos and Organs are imported to this market in sailing vessels, and special low freight contracts are made with the view of selling at the very lowest rates and competing with Northern markets. Every Piano and Organ fully warranted. Second-hand Pianos at very low prices. Pianos repaired at our factory.

Very respectfully,

PHILIP WERLEIN.

Southern Agent for Dunham & Sons, Marshall & Miltner, and Hale Piano Manufacturers, New York; and Needham & Son, manufacturers of the celebrated Silver Tongue Organs and Melodeons.

Beautiful first class Pianos, seven octave, rich rosewood case, carved legs, front round corners, serpentine moldings, possessing sweet, powerful and deep tone, with perfect touch..... price \$150 00

Style 6 Organ—Five stops, diapason, violin, octave, piano and tremolo, five octave, two sets reeds, with "on and off" tremolo and combination swell, oil-finished black walnut case, paneled all around, with moldings, brackets and engraved ornaments, music desk and carpeted double blowing pedals..... 150 00

Style 10—Six stops, two sets reeds, 165 00

Style 13—Eight stops..... 185 00

Style 26—Eleven stops..... 365 00

Please send for price lists of Pianos and Organs. noll 1y

BELLS—BELLS.

CHURCH BELLS. CHURCH BELLS.

We are prepared to furnish Church Bells, of Steel Composition, having a rich, deep tone, at the following prices, which place it within the power of all Churches to be provided with a good Bell:

Weight.	Wt. of Bell and mounting.	Price.	
28-inch Bell.....	250 lbs	400 lbs	\$65 00
36-inch Bell.....	650 lbs	800 lbs	135 00
40-inch Bell.....	800 lbs	1000 lbs	175 00
48-inch Bell.....	1200 lbs	1500 lbs	265 00

These Bells are warranted for one year against breakage in ordinary use.

WHITWORTH FEMALE COLLEGE.

BROOKHAVEN, MISSISSIPPI.

On the New Orleans, Jackson and Great Northern Railroad, one hundred and twenty-eight miles north of New Orleans, and fifty-seven south of Jackson, will reopen on

The 21st of September, 1870.

Thorough instruction in all the branches given. Charge for board, tuition in English, English text books, school-room stationery, washing, fuel, lights, medicine and medical attendance, \$263 for the term of forty weeks. The languages taught include, extra, a deduction of \$30 made for pupils of churches.

Number of pupils last term, 165.

For catalogue address

Jy30 3m H. P. JOHNSON,

President.

EAST ALABAMA COLLEGE.

PRITCH, ALABAMA.

The next annual session will open on the FIRST WEDNESDAY in October, with a full faculty.

Boys and young men at every stage of advancement can be received either in the Preparatory, Junior or Senior Departments. Additional schools of Modern Languages, Civil Engineering, and Commercial Arithmetic and Book-keeping, have been established.

Economy, health, efficient faculty, good society, thorough discipline and the best religious privileges are the peculiar advantages of this place.

It is just the place to train well-edited boys, and there is room for three hundred. Every preacher and layman will work for us to secure students we will open with two hundred.

For full information or catalogue address the Secretary of the Faculty,

DAVID CLOTON,

President Board of Trustees.

MISCELLANEOUS.

THE ARROW TIE.

FOR RAILING COTTON THE ARROW TIE is the most popular, being the best Cotton Tie in use.

Planters and Cotton Press men everywhere prefer it to all others.

The Christian Advocate.

SATURDAY, OCTOBER 22, 1870.

THE CHURCH OF THE STRANGERS.

On Sunday last the church presented by Commodore Vanderbilt to Rev. Dr. Deems, hitherto known as the Mercer street Presbyterian church, located between Waverly place and Eighth street, was reopened under the new regime with appropriate services. The large congregation present included many prominent citizens, among them the generous donor of the church, who was, of course, with his family, the observed of all observers. Dr. Deems was in his usually happy mood, and was encouraged by the presence and aid of clergymen of different denominations. The opening sermon was preached by Rev. R. S. Moran, an alumnus of the Wesleyan University, formerly connected with the Genesee Conference of the Methodist Episcopal Church, and now a prominent presiding elder of the North Carolina Conference of the Methodist Episcopal Church South. The sermon was learned, instructive and eloquent, and was listened to with marked attention. Rev. Drs. Holdich and Durbin participated in the devotional services. In the afternoon the sacraments of baptism and the Lord's Supper were administered. In the latter service the pastor, Dr. Deems, was assisted by several distinguished clergymen of different evangelical churches. The evening sermon was by Dr. John Cotton Smith, rector of the Church of the Ascension of the Protestant Episcopal Church; Rev. Dr. Philip Schaaf, of the Union Theological Seminary, and Rev. Dr. Hutton, of the Reformed (Dutch) Church, aided in the services.

On Monday evening a public meeting was held with a view to raise means for the endowment of the church. We go to press too early on Monday to state results. The programme of the exercises places Rev. Chancellor Ferris in the chair, supported by a long list of prominent and wealthy citizens as vice presidents, and names Rev. Drs. Deems and Crooks, Rev. Randolph Koenig, of Hungary, Rev. Dr. Noah H. Schenck, of the Protestant Episcopal Church, Brooklyn, and Rev. Dr. Prime, of the New York Observer, as engaged to take part in the speaking and other exercises.

The printed programme states the purpose and plan of the church in the following words:

"The Church of the Strangers is a Christian communion composed in part of persons who have been members of the Episcopal, Methodist, Baptist, Presbyterian, Congregational, Lutheran and other denominations; and in part of those who have made a confession of faith under the ministry of the pastor. We believe ourselves to be the first 'undenominational church' established in America. Our symbol of faith is the Apostles' Creed, our ritual is simple, our communion is open, and our seats are all free. We are at war with no existing denomination of the Christian church, but are endeavoring to supplement the labors of all, and are at perfect peace with all who 'love our Lord Jesus Christ in sincerity.' Our aim is to demonstrate the practicability of Christian unity, to keep up a free Christian church in this city, and to furnish a Sunday home for strangers whom pleasure or business may bring to the metropolis."

We heartily congratulate Dr. Deems on the very greatly improved aspects of his growing work, and wish him and his associates abundant success.—*New York Christian Advocate*, October 6.

A CURIOUS PRAYER.—In the State of Ohio there resided a family consisting of an old man by the name of Beaver and his three sons, all of whom are hard "pots," who had often laughed to scorn the advice and entreaties of a pious though very eccentric minister, who resided in the same town. It happened one of the boys was bitten by a rattlesnake, and was expected to die, when the minister was sent for in great haste. On his arrival he found the young man very penitent and anxious to be prayed with. The minister, calling on the family, knelt down and prayed in this wise:

"O Lord, we thank thee for rattlesnakes; we thank thee because a rattlesnake has bit him. We pray thee send a rattlesnake to bite John; send one to bite Sam; and, O Lord, send the biggest kind of a rattlesnake to bite the old man, for nothing but rattlesnakes will ever bring the Beaver family to repentance."

A SARDONY was told by his mother that God would not forgive him. "Yes, he will." "Why do you think he will?" she asked. "Cause that's what he's for." Sound theology.

LITTLE local noises denude the loudest distant ones; and so it is that this world shuts out from the ears of men as it does the voice of almighty God.

Scientific.

NINE THOUSAND MILLION TIMES.—A microscope has recently been constructed in New York which magnifies objects nine thousand million times. At this rate of enlargement an ordinary fly could cover a space equal to New York city below Wall street; a man would appear more than a hundred miles high, and a hair of the ordinary length from a lady's head would reach half way from New York to New Haven. Yet, under this enormous magnifying power, the creations of the Lord only display new beauties. A microscope shell, called an *angulatum*, of which about one hundred and forty, placed end to end, will reach an inch, and which, when examined under ordinarily powerful microscopes, is simply marked with lines of the most exquisite delicacy, exhibits under the new instrument half globes of white silk, whose diameters appear to be an inch and three-quarters, and of which only fifteen can be seen at once. In reality the point of a cambric needle is larger than the circle upon which these fifteen half globes exist, and yet that circle appears like a desert plate covered with lady apples.

THE FACULTY OF SCENT.—It is well known to the lovers of flowers that their fragrance is far more perceptible at nightfall than during the day. Perhaps by some diurnal chemical change the odor may be at that time more fully elaborated, or more profusely poured out; but it is more likely that the moisture of the evening air has principally to do with it by way of bringing the scent into contact with the organ of smelling. Many objects are comparatively odorless in the dry state, which develop strong odor on being moistened. The mineralogist breathes upon his stony specimen to make it give out its perfume if it have any. This subject is further illustrated by the statements of a writer in Putnam's Magazine on the fox. "In cold, dry weather the fox will sometimes elude the hound, at least delay him much, by taking to a bare-plowed field. The hard, dry earth seems not to retain a particle of the scent. The fact that any dry, hard surface is unfavorable to the hound, suggests, in a measure, the explanation of the wonderful faculty that all dogs in a degree possess to track an animal by the scent of the foot alone. Did you ever think why a dog's nose is always wet? Examine the nose of a fox-hound, for instance; how very moist and sensitive! Cause this moisture to dry up, and the dog would be as powerless to track an animal as you are! The nose of a cat, you may observe, is but a little moist, and, as you know, her sense of smell is far inferior to that of the dog. Moisture, your own nostrils and lips, and this sense is plainly sharpened. The sweat of a dog's nose, therefore, is no doubt a vital element in its power, and, without taking a very long logical stride, we may infer how a damp, rough surface aids him in tracking game."

The British War Department has investigated a recent invention of a locomotive without rails, and it is pronounced in official reports far more useful than any horse. The superintendent of machinery says he has "come to the conclusion that the question of steam traction on common roads is now completely solved," that the application of the India rubber tire is a perfect success; that it opens up an entirely new field, and that he looks upon this application as a discovery rather than an invention. In the course of experiments witnessed by Mr. Anderson, the engine went up a zigzag labyrinth of courts, and it can describe any figure almost in a space of twice its length. The boiler employed is an independent invention adapted to the carriage. Its chief peculiarity is the copper pot used for holding water within the furnace, and it is so contrived that if the boiler contains any water the pot will have a full supply. This arrangement keeps the center of gravity low, and allows the engine to run up hills of one in ten, or go along an angle of thirty-five degrees. The wheel and its tire may be described as consisting of a broad iron tire with narrow flanges, upon which is placed a ring of soft vulcanized India rubber. This ring, about twelve inches in width and five in thickness, which thus surrounds the iron tire, is kept in its place by the flanges; then over the India rubber there is placed an endless chain of steel plates, which is the portion of the wheel that comes in contact with the rough road, the reticulated chain being connected by a sort of vertebra at each side of the wheel. The India rubber tire and this ring of steel plates have no rigid connection, but are at perfect liberty to move around as they please, without consulting each other, or even without the concurrence of the inner ring of the wheel, which they both inclose.

A MILITARYMAN'S joys may rise as high as the well-being of the joys is precious.

Continental School Geography.

Guyot's System is approved and endorsed by the most distinguished literary and scientific men of our nation; such as Prof. Agassiz, Dana, Tenney, Hensley and others, celebrated in science throughout Europe as well as at home.
The fact that ONE MILLION (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New System, for no other series of books ever published in America has ever secured so rapid and extensive introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; Cincinnati, Cleveland, Columbus, Springfield, Toledo, Marietta, and most of the other important towns and cities, numbering nine thousand schools in Ohio, and hundreds of towns and cities in other Western States, while in the Southern States and California they are being extensively adopted.
Believing that the publication of Professor Guyot's series has marked a new and better era in the presentation of geographical science, that by it the pupils of this generation will obtain a clearer, more definite and exact knowledge of the world on which they live, and that it is so systematized as to render that knowledge more valuable and permanent, we commend it to the attention of all interested in educational improvements and progress.

II. WASSER COLLEGE,
MONROE COUNTY, EAST TENNESSEE.

Having taken charge of this school, I desire to invite the attention of friends in the Cotton States to the excellent location, delightful climate and cheap board. We are in the best part of East Tennessee, seven miles east of Sweetwater, on the great line of railroad, and two miles from Madisonville, which is our post office.

The college has been in operation for twenty years, and has boarding arrangements for about fifty students. The standard supplies his table from his own farm, and gives the best that the country affords, well prepared, and furnished rooms, at

Two Dollars and a Half Per Week
Tuition is \$10 per annum. Students will be received at any time, and charged to the end of the term. For circular address

REV. F. M. GRACE,
Madisonville, Tenn.

CENTENARY MALE INSTITUTE,

SUMMERFIELD, ALABAMA.

reopens on the FIRST MONDAY of next October.

The school is in good condition. It has had a steady increase every year since it has been in the hands of the present teachers. Its total expenses from October to July will be only \$231.60.

Hacks will run daily between Summerfield and Selma at the opening of the session.

JOHN MASSEY,
Principal.

MEMPHIS CONFERENCE FEMALE INSTITUTE, JACKSON, TENN.

This old and popular institution affords all the advantages of a first class Female College, and is steadily improving.

Charges are moderate. Fall session begins September 5, 1870.

For catalogues address the President,
REV. A. W. JONES, D. D.

SCHOOLS AND COLLEGES.

FLORENCE WESLEYAN UNIVERSITY,
FLORENCE, ALABAMA.

W. H. ANDERSON, D. D., PRESIDENT.

This Institution of learning, so widely known through the South, will begin its next session on Wednesday, September 14, 1870. The Faculty is composed of men of experience and ability. The course of study is comprehensive in the Library Department, Law Department, Department of Biblical Literature and Commercial Department. The advantages of this University are seen in its beautiful and attractive location, thorough course of study, excellent discipline, the character and success of its instructors, and the reasonable rates at which board and tuition are furnished.

Students in the ministry and sons of ministers in the regular work are admitted to recitation on paying the incidental fees.

EXPENSES PER SESSION OF FIVE MONTHS.
Tuition in the University classes.....\$30 00
Tuition in Grammar School.....25 00
Tuition in Law Department.....40 00
Incidental fee.....2 00

Chemical fee, paid once.....5 00
Boarding can be had in the best families at from \$16 to \$20 per month.

For particulars see circular, or apply to the President, Rev. Dr. Anderson, or to Hon. W. H. Wood, GEO. W. FETTER, President Board of Trustees.

TUSKEGEE FEMALE COLLEGE,

TUSKEG

NEW ORLEANS MARKETS.

From the N. O. Price Current.

The general market has shown very little improvement since our last report. There has been rather more done by some branches of the wholesale trade in the execution of orders, but the movement, nevertheless, has been on a limited scale. The first receipts of new sugar were on Monday, which was two days earlier than last year. There have been some limited arrivals of new molasses, which have commanded full prices. Western produce has continued inanimate, but provisions have been firm, and in some request for the local trade.

Frosts were reported in the country, and also in the vicinity of the city, on Friday morning, but nothing has transpired to show any damage to the crops. The universal complaint is "deficiency in the number of laborers, and inefficiency in those at work. The weather in the city has indicated a change, with slight showers on Monday and early on Tuesday morning, since which it has been clear and warm.

The river is eleven feet ten inches below high water mark.

Corros.—The following are the arrivals since the fourteenth instant:

Louisiana and Mississippi bales, 1,490
Mobile, 1,721
Lake, 121

Total, 14,752

On Saturday the movement commenced with considerable spirit, and continued active throughout the day, and the supplies being more liberal, the sales summed up 4,100 bales, at an improvement in the medium and better grades of $\frac{1}{2}$ c., good ordinary closing at $\frac{1}{2}$ c., to $\frac{1}{4}$ c., low middling at $\frac{1}{4}$ c. to $\frac{1}{2}$ c., and middling at $\frac{1}{4}$ c. to $\frac{1}{2}$ c.

On Monday operators were checked by scant supplies, and as the demand continued lively prices ruled still more in favor of factors, showing a partial improvement of $\frac{1}{4}$ c. on the previous advance, good ordinary closing at $\frac{1}{2}$ c. to $\frac{1}{4}$ c., low middling at $\frac{1}{4}$ c. to $\frac{1}{2}$ c., and middling at $\frac{1}{4}$ c. to $\frac{1}{2}$ c. The business was again on a liberal scale, embracing 3,450 bales, which took nearly or quite all offering at the ruling rates. On Tuesday the market opened with a very active demand, which continued until about noon, when, under scant supplies and a decline in foreign exchange, buyers drew back, but on more samples being opened the movement resumed its previous activity, which continued to the close, resulting in sales of 5,550 bales, which is much the heaviest business reported this season. In the morning factors realized an advance of $\frac{1}{4}$ c. to $\frac{1}{2}$ c., but during the full prices lost some of their buoyancy, and, notwithstanding a subsequent rally in exchange and renewal of the demand, the net advance at the close was hardly over $\frac{1}{4}$ c.

This makes an aggregate for the past three days of 13,050 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 77,168 bales, against 100,733 bales to the same date last year, and the decrease in the receipts at all the ports, up to the latest dates, as compared with last year, is 10,848 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 21,861 bales to Great Britain, and a decrease of 22,225 to France, and of 7,493 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary, 102 to 112
Good ordinary, 14 to 14 1/2
Low middling, 14 1/2 to 14 3/4
Middling, 14 3/4 to 15
Strict middling, 15 to 15 1/2

COTTON STATEMENT.

Stock on hand Sept. 1, 1870, bales, 20,696

Arrived past three days, 14,752

Arrived previously, 70,240—84,992

105,688

Exported past three days, 11,530

Exported previously, 42,579—54,109

Stock on hand and on shipboard, 51,579

FLOUR.—The market has again continued very dull.

MONEY.—Gold, 112 to 112 1/2.

American silver half dollars, 107 to 107 1/2, and Mexican dollars at $\frac{1}{4}$ to $\frac{1}{2}$ per cent. premium in gold.

The stock market has continued quiet, the only sales reported being 300 shares Ship Island Canal, on Saturday, at 27 1/2 c., and at a succession sale, 55 shares Mechanics and Traders' Insurance Company at 86; 50 Canal Bank, on Monday, at \$41, 100 Mississippi Valley Navigation Company at \$2.50, and 150 Levee at \$3; and 100 Ship Island Canal, on Tuesday, at 26 c.

City Treasury notes are quoted at 18 to 19 per cent. discount.

CATTLE MARKET.

NEW ORLEANS, OCT. 18, 1870.

The Christian Advocate.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, OCTOBER 29, 1870.

NO. 41.

NEWS OF THE WEEK.

DOMESTIC

LYONS, Oct. 24.—The Lychnburg papers to-morrow will contain a call from General Early for a conference of the officers and soldiers of the Confederate army, especially those of the army of northern Virginia, at Richmond, November 3, to take measures for a memorial to General Lee. All from the Southern States, who can, are invited to attend.

PRINCETON, Oct. 25.—A fire broke out in the bonded warehouse of R. F. Mears, Steubenville, Ohio, this afternoon. Loss on building and stock, \$10,000. Fully insured.

LOUISVILLE, Oct. 25.—The Democrats of Jeffersonville, Indiana, are having a grand procession to-night in honor of the recent Democratic victory in that State. Many persons are present from different parts of Indiana, and a number from this city are also in attendance.

HIGH GELROY, aged thirty-seven years, while employed to dig blasting rock in the Louisville and Portland canal, was struck on the head by a rock weighing five pounds, fracturing his skull and causing instant death. The deceased leaves a wife and children in this city.

NEW YORK, Oct. 25.—The Cooper Institute was crowded last evening, the occasion being memorial ceremonies to General R. E. Lee. John E. Ward was president of the meeting. Among the vice presidents were Peter Cooper, ex-Governor of New York, and General J. D. Imboden. After prayer by the Rev. Dr. Carter, the president referred to the sympathy everywhere which the people felt at their great loss.

A series of eulogistic resolutions were passed enthusiastically. Thos. A. Hoyt delivered a beautiful eulogium on the character of the deceased soldier. The Rev. Dr. Marshall, of Mississippi, and Rev. Dr. Duke, of New York, spoke.

NEW YORK, Oct. 25.—The Republicans of this city have nominated Horace Greeley, Thomas Stewart and George Wilkes for Congress. Population of New York city, 269,910.

CINCINNATI, Oct. 25.—The convention, composed of delegates from several States, favoring the removal of the national capital from Washington, will convene here to-day.

Horace Greeley has written a letter favoring the removal of the capital to New York.

CINCINNATI, Oct. 25.—The United States Court yesterday mulcted Mowry, in the car-wheel patent case, the sum of \$120,000. Mowry will appeal to the Supreme Court.

WASHINGTON, Oct. 25.—Senator Morton, of Indiana, has formally defined the mission to England.

FOREIGN

LYONS, Oct. 22.—The armistice between the Prussians and the French expired yesterday. The Prussians will not resume the bombardment until they are reinforced. The French force is computed at one thousand, composed of fragments of various regiments.

The Prussians are three kilometers from Amiens. General Bourbaki has sixty thousand men.

LYONS, Oct. 22.—The iron ship *Acuba* from Calcutta, July 1, for New York, foundered at sea. No particulars received.

TORONTO, Oct. 22.—The following is official: Neuf Chateau, Friday, October 14.—Marshal Bazaine made a sortie with eighty thousand men, pushed the Prussians and captured one hundred and ninety-three loaded wagons.

Sickness among the besiegers is increasing. They have been forced to renew their army around Metz.

The siege of Verdun has been interrupted by its vigorous defense. The environs have been inundated.

FLORENCE, Oct. 22.—Austria's acceptance of the candidature of the Spanish throne is officially announced.

TORONTO, Oct. 22.—The Prussians, twenty thousand strong, have surrounded Chartres.

The Prussians destroyed the bridge at Clery and returned to Saugency.

LONDON, Oct. 22.—A careful search of the waters on the coast has discovered any trace of the *Cambrin*.

TORONTO, Oct. 22.—Lord Lyons announced his wishes to the government here, to effect an armistice for the elections.

Lord Lyons desires the aid of Austria and Italy, and assures the government that Russia will act in the same direction.

The government withholds its answer.

The journals of Lyons demand immediate defensive measures for that city; they say the Prussians are turning Besancon and other strategic points, and may march direct upon Lyons.

LONDON, Oct. 22.—The twenty-five barrels of gunpowder lately seized at a Fenian store in Ireland were taken to Woolwich, opened, and found to contain lucifer matches and nails in considerable quantities, mixed through the powder. All were placed on an old barge and sunk in the river.

LONDON, Oct. 22.—M. W. Balfe, the well known composer of music, is dead.

LONDON, Oct. 22.—The loss of the steamship *Cambria* is no longer doubted. McGartland, the sailor who was picked up in one of the boats, states that the steamer was going very rapidly when she struck, being under full sail and steam.

She began to fill instantly after striking, and is no doubt hopelessly lost. Four crowded boats were launched, but the weather was so heavy, being little short of a gale, that McGartland thinks that all the boats were swamped, and that he is the only survivor. His boat capsized and he was for a time insensible, but clung to the boat.

LONDON, Oct. 22.—Cruisers from the vicinity of the disaster report that they found only broken spars and a few barrels of flour.

ROME, Oct. 22.—The Pope has formally suspended the session of the Ecumenical Council.

TORONTO, Oct. 24.—Some of the journals give the particulars of alleged assassinations at the capture of Soissons. Soldiers were shot down in the woods and killed in cold blood. The government has asked an explanation, with a view to retaliation.

A dispatch from Rouen says the women, children and clergy have risen against the Prussians. There will be a desperate struggle.

The ministry publish the following:

"The Prussians who were preparing to besiege La Fort St. Aubin retreated suddenly toward Laon."

It is reported that the Prussians have been defeated, with heavy losses, in the neighborhood, and their troops hastily withdrawn to reinforce the defeated army.

BESANCON, Oct. 24.—The Prussians were defeated at Chatillon.

The bombardment of Schlestadt commenced on the eighteenth.—Some houses were burned.

TORONTO, Oct. 24.—M. Pourtales, editor of *La Verite*, has been imprisoned for publishing false news. An explanatory letter, published in *La Verite*, says:

Chevalier Wyckoff furnished the notes for which Pourtales is punished.

The *Figaro* issues the details of the affair of Marguerite Bellanger, proving that she assumed the maternity of the child of a great lady and the Emperor to calm the jealousy of the Empress.

The publication of the private documents found in the Tuileries has been continued. Letters from Clement Duvernois to M. Olivier clearly establish the liberal views of the former.

Private and unofficial accounts praise General Trochu for good judgment and unrelenting activity. His energy prevails over everything, and his popularity is unbounded. Paris feels the utmost confidence in his patriotism and ability.

News has been received from Verdun that the garrison made a sortie, in which they drove the enemy from some of their fortifications, killing many and capturing mortars and twenty-two cannon.

NEW YORK, Oct. 25.—Herald's special, dated London, October 25, says: The city is very excited over the French loan of ten millions sterling, from the fact that this is the first time the French ever offered a loan outside of their own territory. The loan has been received with great favor. Subscriptions are already very large.

BERLIN, Oct. 25.—The Tours government permits all exportations except cereals to Switzerland.

The Danubius deny any investment on account of Napoleon.

Remnants of the *Cambria* have been washed ashore on the Irish coast.

LONDON, Oct. 25.—The Times has a Berlin special to the effect that the latest peace negotiations have been defeated by Prussia's demands for French territory. The Times editorially advises the British government to cease its efforts to stop the war, saying that if England per-

sists she must be ready to stake something on it.

The Standard says that Eugene and the powers at Versailles are actively negotiating with the view of her resumption of the regency, and the negotiation of peace. If the Empress did not depart last night, her departure may be expected at any moment.

LONDON, Oct. 25.—Thiers accepted the mission to negotiate an armistice only, but still remains at Tours, awaiting safe conduct to Paris.

Negotiations for the surrender of Metz progress slowly. Bazaine ignores the provisional government in his communications.

BERLIN, Oct. 25.—The *Gazette*, reviewing the conciliatory efforts of the government, says: The government entertains them to avoid the further loss of valuable lives.

Schlestadt capitulated yesterday, after a severe bombardment, with two thousand four hundred prisoners and one hundred and twenty cannon.

FLORENCE, Oct. 25.—Recent events in Italy have broken up the old political organizations, and a general reconstruction of parties on a new basis is imminent.

TORONTO, Oct. 25.—Late Paris advices say sorties of the twenty-first were exceedingly successful. Many Prussians killed and wounded.

No balloons have left Paris for several days, the wind being unfavorable.

Up to the present time the Prussians have been unable to erect a battery menacing the city.

Even in the vicinity of Versailles the Prussians are constantly annoyed by franc-tireurs, who keep up an active guerrilla warfare, killing numbers every day.

LONDON, Oct. 26.—The arrival of Thiers at Versailles is expected to-day.

The Tours government is firm in its refusal to enter into any negotiations involving the surrender of territory. Bismarck's constant answer to importunities daily made him for peace, is that the election by the French of some authorized government is an indispensable preliminary.

BERLIN, Oct. 26.—Provincial correspondence says: On the fact of an armistice there is little hope to be founded, as the French refuse to recognize the hopelessness of their cause.

The delay in the bombardment of Paris is due to the imperfect state of our preparations and to political considerations.

TORONTO, Oct. 26.—The government has sent a frigate to Marseilles to protect Austrian subjects.

MADRID, Oct. 26.—The vomito has appeared again at Barcelona, and the mortality is increasing.

LONDON, Oct. 26.—The Parisians have removed the art treasures from Sevres to Marseilles.

LONDON, Oct. 26.—Lefevre, a member of Parliament, made a speech last evening to his constituents at Reading. He said since the proclamation of the French republic, Prussia, by persisting, had become the aggressor; and that English sympathies, originally with Prussia, were now transferred to France. Leaving the subject of the war, he rejoiced in the departure from the rule of marrying English princesses exclusively to German princes.

Sir Francis Head writes to the Times, to-day, deprecating the English protest against the annexation of Alsace and Lorraine to the Germans, seeing that England has captured and annexed more millions of men than all Europe together.

LONDON, Oct. 26.—The Prussians again announce that fire will be opened on Paris on the twenty-ninth instant.

One thousand stoves have been ordered for the huts of Prussians besieging Metz.

General Combriac claims a victory for the French at Chatillon-le-duc. Belgium is again sending troops to the frontier.

VERSAILLES, Oct. 26.—General Von Moltke celebrated his seventieth birthday and received congratulations from the King and Crown Prince.

The principal officers of the army and all princes and statesmen are now at the royal headquarters.

In the combat at Airy, on the twenty-second, the Germans lost about one hundred killed and wounded. The French loss was serious.

BERLIN, Oct. 26.—Jacoby and seven other political prisoners have been released.

LONDON, Oct. 26.—Viscount Aron Moore is dead; Major Yelverton succeeds him.

Correspondents report that Paris

is girdled with ruins, and that the country without the walls for miles is desolate.

TORONTO, Oct. 26.—A balloon hence for Paris was carried against a tree and badly damaged. Another effort will be made to-morrow.

LONDON, Oct. 26.—The Marseilles troubles are increasing. The "Reds" are largely in the ascendant, and openly rebelling against the Paris and Tours authorities. They offer a reward for Gambetta's head.

Gustave Florens has been finally discharged.

A free pass for M. Thiers to enter Paris is not expected under a week. Orleans is still occupied by the Prussians.

There are no indications of an immediate advance on Blois or Verdun.

The Prussians are levying heavily upon the people around Chartres.

HOLSTON CONFERENCE.

The Holston Conference held a delightful session at Wytheville, Virginia, October 5-11. Bishop Kavanaugh presided. We are obliged to the secretary, the Rev. T. N. Price, for a copy of the minutes—

save the memoir and numbers in detail, which we suppose will soon be forwarded, with other official matter. The following were admitted on trial: G. A. Frazier, J. K. Wolf, W. J. Phillips, R. E. Smith, C. B. Fugate, W. C. Carden, W. B. McElvey, J. M. Keith and G. W. Simpson; discontinued, I. R. Ellis and P. H. Frazier; admitted into full connection, D. H. Atkins, W. D. Mitchell, L. L. Carlock and E. F. Hoss, J. K. P. Ball, H. W. Bays; local preachers elected deacons, T. P. Summers, A. J. McBride; traveling preachers elected and ordained elders, W. H. Weaver, J. T. Frazier, G. W. Martin, F. D. Crumley, J. A. Wiggins; local preachers elected and ordained elders, J. Fisher, A. Fisher, A. G. Atkins, J. Huffaker, J. M. Keith, F. Alexander—elected, not ordained, J. S. Brooks, W. P. Cooper; located, J. N. Summers, G. M. Massey, J. T. Freeman; supernumerary, J. Reynolds, J. Haskew, T. Snellins, W. B. Winslow, T. K. Munsey, L. W. Crouch, J. Brillhart; died, J. K. Stringfield. Numbers: 29,473 white, 190 colored, 82 Indian members, 221 local preachers. Infants baptized, 1,147; adults, 1,340; Sunday schools, 388; teachers, 2,640; scholars, 18,044. Amount necessary for claimants, \$1,650; collected, \$857.25; for domestic missions, \$1,294.90; foreign, \$558.40. The next session is to be held at Morristown, Tennessee.—*Nashville Christian Advocate.*

MISCELLANY.—The amount of water on our globe is estimated at 1,210,000 of the whole weight.—A discussion is going on in the Scientific American regarding the safety of using tin cans for fruit. It appears that when cheaply made for the use of those who put up vegetables and fruits they are apt to have much poor solder about them, the lead of which dissolves in the acids, poisoning the contents. At any rate, if a metallic taste is perceptible in such food it is cheaper to throw it away than to save it by eating. It would also be wisdom to note the brand and buy no more of the same dealers.—Many years since it was discovered that the leaves of the coffee plant were available for a drink similar to tea. The idea was for commercial reasons discouraged by dealers in the berry, but now these leaves are coming into vogue in England for sale to the poorer classes, under the name of "Assam tea." The leaf is thick, and when dried has to be broken to pieces instead of being rolled.—A German has invented a speaking machine which also laughs and sings. Germany should be the last place to have demand for any such device, unless indeed, in spite of all their industry with the tongue, there remains so much yet to be talked as to call for labor-saving machinery.

Fair and works were well illustrated by a venturesome little six-year-old boy who ran into the forest after a team and rode home upon the load of wood. When asked by his mother if he was not frightened when the team came down a very steep hill, he said: "Yes, a little; but I asked the Lord to help me, and hung on like a beaver."

It is not enough to learn that which is good; we must continue it, unto the end.

ILLINOIS CONFERENCE, METHODIST E. CHURCH SOUTH.

The following items are condensed from the report in the St. Louis Christian Advocate of the nineteenth instant. The Conference, we believe, now numbers over sixty effective preachers.

The fourth session of the Illinois Conference was held at Kimmunity, in the Cumberland Presbyterian church, commencing October 12, Bishop McTyeire presiding, and was opened with religious exercises conducted by the Bishop.

REMAINING ON TRIAL.—G. T. Nichols, William B. Lewellin, W. L. Corbin, Thomas M. Ragsdale.

ELECTED DEACONS.—Traveling preachers: John S. Kean, W. D. Ward, William B. Lewellin. Local preachers: L. D. Tarrant, from London City circuit; Henry Watts, from Rome circuit; A. D. Hocker, from Murfreesboro circuit, and D. Best, from New Douglas circuit.

ADMITTED INTO FULL CONNECTION. Robert Tucker, J. L. Branstetter, John S. Kean.

RECEIVED FROM OTHER CHURCHES. Rev. William C. Blundell, formerly an elder in the Methodist Episcopal Church, and latterly of the Christian Union Church, was admitted into the Conference and his orders duly recognized. Rev. Austin F. Rodgers, late an elder in the Methodist Episcopal Church, was also admitted and his orders duly recognized.

ELECTED ELDERS.—Traveling preachers: J. L. Branstetter, Thomas A. Seragius, William B. Beagle, John A. Beagle, Thomas R. Kendall, M. R. Gohagen. Local preachers: John Smith, from London City circuit; J. R. Edmonson, from Marion circuit.

LOCAL PREACHERS' ORDERS RECOGNIZED.—The orders of the following local preachers, having united with our church, were duly recognized, viz: Rev. R. Gillespie, a deacon, formerly of the Methodist Episcopal Church South and latterly of the Christian Church; Daniel Dilling, an elder from the Methodist Protestant Church, and Silas Veitch and Annis Merrill, elders from the Methodist Episcopal Church.

ADMITTED ON TRIAL.—Andrew D. Hocker, from Murfreesboro circuit; William Thurman, from Nashville circuit; Richard Gillespie, from Jacksonville station; William Y. Gray, from Cuba circuit; Randolph P. Jones, from Salem circuit.

STATISTICAL SECRETARY'S REPORT. The statistical secretary presented a report, which exhibits the following summary:

Members, 4,933; local preachers, 49; adult baptisms, 420; infant baptisms, 180; Sunday schools, 76; superintendents and teachers, 615; scholars, 2,890; volumes in library, 1,880; requisites, \$20; papers taken, 650; moneys expended, \$562.48; number of churches, 34; sittings, 8,000; value of churches, \$69,300; parsonages, 3; value of parsonages, \$2,600; other church property, \$1,410; Bishops' fund, \$178.80; Conference collection, \$43.65; missions, \$274.70; other objects, \$156.02; amount of books sold, \$355; periodicals taken, 321; salary and traveling expenses of presiding elders, \$2,086.45; receipts, \$1,877.22; deficiency, \$209.83; salary and traveling expenses of preachers in charge, \$14,081.07; receipts, \$9,889.86; deficiency, \$5,191.21.

The Board of Finance made a report, which was adopted, as follows, viz: The Board of Finance report the collections for Conference fund, \$43.65, and for Bishops' fund, \$158.90. The board, upon investigation, find that the widow of Brother John F. Posey is the only claimant upon the Conference, and estimated her claim at \$100. The board recommend that the funds on hand be placed in the hands of Brother D. T. Sherman to be paid over to her at the earliest practicable period.

CONSTITUTIONAL PROVISION.—The Bishop submitted to the Conference the constitutional proviso adopted by the late General Conference, and it was adopted by this Conference unanimously—forty-one voting in favor of it.

PLACE OF NEXT SESSION.—Ashley and Rushville were nominated, and Ashley was chosen.

DISTRICT CONFERENCES.—The following resolution was adopted determining the constituency of the District Conferences, viz:

Resolved, That the District Conferences, in addition to the traveling and local preachers of the district, be composed of two laymen from each station, circuit or mission, elected by the quarterly conference

at its first session after the adjournment of the Annual Conference, and the superintendents of the Sunday schools and exhorters.

SABBATH SERVICES.—The churches of the various denominations were courteously tendered for the use of the Conference, and were occupied by appointments of the Committee on Public Worship. Our new church edifice was gotten ready for the Sabbath services, which commenced with an interesting love-feast at nine o'clock. It was dedicated at the eleven o'clock service, Bishop McTyeire preaching an appropriate and forcible sermon, and Dr. McFerrin taking the collection, amounting to about \$1,000, and sufficient to discharge the remaining indebtedness on the building. The elders were ordained at three o'clock, preceded by an able sermon by Brother Rush, of the Missouri Conference, and the deacons at night, followed by a sermon full of pathos and power by Dr. McFerrin, after which the Conference was called into session.

THE OLD DEBT.

Mr. Editor: You have doubtless noted with what promptness the Annual Conferences, thus far, have met the proposition to divide out and pay off the old missionary debt. We have reports from Western Virginia, Kentucky, Louisville, Missouri, St. Louis, White River, Tennessee, Holston and Illinois; all these have taken action, and will bring up their assessments by the first of January. In nearly every instance individuals—preachers or laymen—have become personally responsible, so that where the money may not be contributed by those benevolent persons who are able to lend a helping hand, it is made certain by personal pledges. Where Conference agents have been selected they are busy at work. In Conferences where the full proportion of the old debt had been met, according to the division made by the General Conference in 1866, action has been taken still to assume the amounts assessed in the late arrangement—all are determined that the church shall be rid of this trouble, and that those who have so long indulged the society shall be paid. The Methodist Church South never entertained for a moment the idea of repudiating the debt.

We are confident that the Conferences yet to meet will come "into line," and that each body will address itself to the work, and clear ourselves of the distressing burden without delay. This out of the way, an open field is before the church for great usefulness—for an enlargement of our missionary efforts. Mr. Editor, if we had the means, one hundred men, in addition to those already engaged, could now be employed in the ministry in domestic fields and on the frontier work, to say nothing of our foreign mission.

May the Lord baptize the whole church with the spirit of missions! A zealous, faithful ministry and a benevolent, liberal membership would cause Zion to move forward, leaning upon her Beloved, "fair as the moon, clear as the sun, and terrible as an army with banners."

J. B. McFERRIN, Sec'y.
MISSION ROOMS, Nashville, Oct. 19.

GRAMMATICAL AND SOCIAL.—It has been said that in theory sometimes man is a noun and woman simply an adjective that agrees with the noun. I believe, however, the case is otherwise. In practice man is a noun, and a noun of the masculine gender; and he is also a noun in the objective case governed by the verb woman. Practically, women govern men all over the world. You or I may not admit it openly, and some of you may make vehement protestations to the contrary; but what is the actual state of things? In India ninety-nine husbands out of every hundred are practically governed by their wives. Is not that the case in England, too, and in all civilized countries? From early infancy to mature age the influence of mother, sister or wife, and female society generally, has always continued to be felt and prized. By their gentle, soft, sweet tempers women exert an irresistible influence over men. If, then, we must be governed by women, are we to govern absolutely in all matters? No. In those things where man excels woman let man's voice be heard; where woman excels man let her voice be heard. The true prosperity of society depends on the harmony of the sexes.—*Keeshub Chunder Sen.*

Spectre has vanished from France, and the towns of Normandy are preparing to issue paper currency

SATURDAY, OCTOBER 29, 1870.

Straight, straight is the road, but I falter
And oft I fall out by the way;
Then lift your lamp higher, my brother,
Lest I should make fatal delay.

Upon the dark mountain they stumble:
They are bruised on the rocks, and they lie
With their white pleading faces turned up-
ward.

I think, were they trimmed night and morn-
ing,
They would never burn down or go out,
Though from the four quarters of heaven
The winds were all howling about.

How all the dark places would brighten !
How the mist would roll up and away ?
How earth would laugh out in her gladness
To hail the millennial day !

THE ATONEMENT.

The atonement, considered as

The atonement, considered as a

Remove the atonement from the Old and New Testament scriptures as miraculous, in origin and operation, and they become a dead letter, and Christianity is presented as nothing better than a living superstition. If Christ be not risen, then is our preaching vain, and ye are yet in your sins. Remove this miraculous agency, and fallen humanity is remanded back to pagan darkness and shut up to the gloomy heritage of eternal death, from which no system of natural or human agency can redeem it. What man wants to redeem him from the mental, spiritual and physical diseases which are in nature must come from above. This want is met in the supernatural man, and in his work—the atonement. In Him and through it the lame walk, the deaf hear, the blind see and the dead are raised up. Before their sublimely powerful tremble, upon it angels wait.

To be the beneficiaries of the atonement, in all the amplitude of its provisions, soul and body must feel the miracle-working power of its author, our Lord and Saviour Jesus Christ.

MR. ENRTON: We have seen that

Go into almost any church, Sunday school or family, to say nothing of the libraries and the pulpits, and you will find not a few who will tell you that the *Jewish Church*, for sufficient cause, ceased to exist, and the *Christian Church*, a totally different and entirely new institution was created in its stead. They will tell you that this new church began with twelve members or thereabouts, none of whom were, of course, previously members of this church, though they might have been previously members of the old defunct church. They will tell you this new church had its own new laws—wholly and entirely new—prescribed to it by Jesus Christ, and that the old church from this time was utterly repudiated by Christ, and continued only as a false church under Jewish auspices. They will tell you, further, that this new church so commencing with twelve original members, increased by accession from without, from the old church and elsewhere, under the prescribed rules of its organization, and so continued.

This supposed new church law, and new church order, is, to all those matters complained of, precisely what the Bible, a supposed revelation, is to Christianity. Remove that, and there is nothing to talk about. Does Christianity claim anything except on the ground of a divine revelation? Nevertheless, it claims that revelation accords with reason and rational thinking. And in like manner, does Romanism—any form of High Churchism claim anything except on that ground that is specifically or virtually found in the church's original organization then and there? It is clear they do not.

Then, as this whole supposition is about a *new church*, it every sense and form in which it can be viewed, is wholly, baldly and undeniably false, where would these errors be found if you expose the falsehood, and show that there is no truth in it? It would be where anything else would be if you wholly destroy its foundation.

Then why not let that be done?

In the face of a single word of exposure such a claim would be ridiculous. It might as well be claimed that he made civil governments, appointed and crowned kings, ordained military tactics and built railroads. Among the few things he did, there are a few things we know he did not do; at least we know he did not organize a church.

CAMP MEETINGS.

Brother H. Williamson, whose age, experience, long observation and sound judgment give his opinions great weight where he is known, saw the necessity of a camp meeting on his work, Greenwood and Conflwiler, appointed a camp meeting to be held on the Tallahatchee River, near Fort Pemberton, embracing the second Sunday in October, 1870. It was held in the swamp, in the midst of much great difficulties than could surround an all appointment. It was a success, not in the great number of conversions, though there were conversions, but a success in putting slight the notion that camp meetings are impracticable. The eight holders who supported the meeting, whose wives and daughters cheerfully spread their tables, by a unanimous vote decided to have a camp meeting in 1871. They are enthusiasts, seeing all the hobgoblins in the way of camp meetings as shadows. It was a success in the religious power manifested in the awakening of many to a sense of their condition, who crowded the altar with penitent hearts the night of the meeting. Let friends of camp meetings cheer and move early in the coming campaign. The enemy will meet feeble resistance to the resolute.

Yours, etc., W. P. BARTON

"MY MASTER IS ALWAYS IN."

"Johnnie," said a man, wink-
sly to a lad of his acquaintance,
"you must give me extra meas-
ure, your master is not in."

Johnnie looked solemnly into man's face and replied : " My Master is always in."

Johnnie's master was the all-wise God. Let every one, when tempted, adopt Johnnie's motto, " My Master is always in." It will save him from many sins.

JOHN B. BARKER says "that if man proposes to serve the Lord like to see him do it when measures come as well as when hollers glow-hall-layers."

at Exton: Here is a good C

We have about two thousand inhabitants in the winter season, and being a place of summer resort, we have in the summer months from five to eight thousand. There are many nice buildings—but few brick. The town is five or six miles long—probably seven, including the two extreme suburbs—it being long and

nearly all one street, except about two miles of it on each side of Main street. In this place is the Methodist Episcopal church—that is, at the corner of Main and Toulmin streets—and in about the best location, as it is in the principal part of town, and about the proper distance from the railroad. The town is the county site, is incorporated and has all of its municipal officers properly authenticated by the Legislature and has a fire company. The front street is a shell road. Above all, it is a very healthful situation. Many invalids seek this part in pursuit of health, and generally find it; though like all seaport towns and water-side places, it is subject to the common diseases that infest New Orleans and such places; but it is free from malarious diseases, it being a location free from lowlands and marshes, the greatest part of it, and having the exhilarating south-east breeze continually pouring in from the front as it faces the south.

As for amusements, I can say it seems to be the place for more than anything else; and I am sorry to say that Sunday is the main day for these amusements, such as balls, picnics, concerts, and various other diversions, which are very good. Christian will say is no credit to the place; though Sunday can be observed by all good people. It is the main day for business at present, but I am persuaded that in a few years will change the present condition of morals. God grant that it may soon come. Fishing can be had at almost any time, and as desired, any one can have the pleasure of catching them.

There are few Methodists, Baptists, few Presbyterians, Episcopalians, and many Catholics, which is doubtless caused from the fact of the Protestants and ten of the Roman Catholics. In the aggregate the Roman Catholics have about two-thirds of the dwellers in winter and one-half in summer. They have large buildings for schools, and but a small number of pupils. Their curiosity rises high in the air, and the Methodist, the only Protestant church, seems to hang its head as if described by its own Confession and preachers, having the sermon the gospel only once in the month. What a pity to have such a church on a circuit! The Protestant has one very good day school, conducted by Mr. Barry, and two family schools, not numbering more than fifty; there is also a high school of between one and two hundred scholars. There is a printing office, from which the *Unmuzzed Gazette* makes its appearance, and the business is conducted by our esteemed and friend, Frank Heiderhof.

We have all grades, classes, qualities of people, and not only whisky shops and gambling saloons—the ruination of this place. May the good Lord send something to dispense with the nuisances and convert the place into a city.

But, to show more imp
still, Sheldsboro is growin
notice more every day. It is
sible by land and by water
Mobile, Chattanooga and N
lowing railroad power lines
and then inundated, in th
for several miles and bac
handed to the sea.

road crosses the lake end of the bay, and diagonally across Toulme's wharf. The bridge across the bay is two miles long. The whole road is to be finished in a few weeks, so that passengers can travel. This road runs from New Orleans to Mobile, and connects with roads at both termini. Then we have the Morgan line of steamers, and smaller steamers and vessels plying to and fro to nearly all points, so that passengers are facilitated in their business or travels either by rail or leaving the waters of the wild waves as the snow-like caps sparkle with phosphorescent glow before and after the proud craft as she glides along under the moon's silvery rays.—While I write I can hear the moaning waves heating the sea-worn shore with slow but steady roar, and can look out and see the canvas masts as the vessels plow the deep blue waters, reminding me of the ships of Tarshishi, and St. Paul's indomitable spirit exulting in the power of God to save, even under the trying circumstances while pursuing his journey from Agrippa's court to the bar of Caesar to declare the councils of God in Rome. The scenes of nature, brought into use by the art of man, remind one of the pleasant reminiscences of the days of Christ and his disciples, the apostles—Peter upon the water, and the Lord extending his all-powerful arm to save him. How they should stimulate the poor huckstering and sinking-hearted Christians! Then the imagination is upon the net and fishes; the money taken from the fish's mouth to satisfy the avarice of a country; Jesus, tired, the thronging multitude, going out into a ship; Jonah and the whale, the great miracle of the Red Sea, away back to Moses in the bush, and the miracles of our Lord in regard to the great deep.

But with all these inducements there is a great impediment to happiness of the place—that is, perfidious and radical wickedness in the high as well as the low places. After these reflections it is evident what kind of a minister should have sent here. He should be willing to follow a secular pursuit such as building up a high school. He should be very zealous for the cause of God, and have the power not only of Methodism at his command but Protestantism. He should be energetic, vigilant, fearless, indefatigable, polite and agreeable, having nothing in hand but what he will carry out well. He should be well educated, and calculate to build up the Church and school.

I have taken up a subscription with the assistance of others, raised money enough to remain at church, which is now being bought and sold, with our worth respected and generous friend, Captain J. Bradford, as the employer, hands and planner of the work. I hope these remarks are satisfactory and will induce the Conference to make some wise provisions for supply of the gospel to a place which needs it. I make this statement from a sense of duty, and, believing the Protestant families have the necessity of a regular minister for our church, it being the Protestant church here.

Your brother in Christ,
 HENRY P. POWEN, P
 BAY ST. LOUIS, October 19, 1870.

SINGING IS A DUTY.—Singing, as we have seen, is a duty of the church, and is a gospel ordinance, an ordinance of God, and appointed for his people. It should be practised both for the spiritual and social edification of the congregation, and it is as much their duty to attend to it as to the Word of God. Singing to God by proxy is the general duty of the church.

fashionable way; but it is not the right way. As well might you set the Lord's table by proxy; you might you go to baptism by proxy or hear and pray by proxy, attend any of the ordinances by proxy. If you allow a choir to praise for you, you are not a worshiper. Listening to the singing of the choir is not a devotion, for devotion requires you to fix our thoughts upon spiritual objects. The mind must be wandering. True worship consists of *individual acts* of devotion to the abundance of the mercy of our God. "The abundance of the mercy of our God is such that,"—Christians

CLINTON, LA., Miss. CONF.

CLINTON, LA., MISS. CONF.,
October 18, 1870.

Mr. Editor: The church in these parts is in a healthy and an improving condition. In the town of Clinton we have received twelve persons during the year by letter and by baptism together. In the country around Clinton there have been some revivals. At Oak Grove Brother Ballard, of the East Feliciana circuit, has received fifteen new members. At Olive Branch he had a meeting, embracing the fourth Sunday in September, which was attended with good results. There was quite a revival among the members, and there were forty-five added to the church. There were a great many conversions, but the number is not known. W. B. LEWIS.

PLEASANT HILL, LA., Oct. 10, 1970

Mr. Ebbors: The Denian camp meeting has just closed, and we are happy to say that in our humble opinion it was a decided success. The good Lord visited us in great power, and many were heard to cry out, "Mon and brethren, what shall we do to be saved?" Brothers Pipe Moss, Fulton and Adair preached with much power, and were successful in pointing penitents to the "Lamb of God, that taketh away the sin of the world."

Our meeting resulted in the addition of forty-eight members to the church, many of whom were happily converted, and the church generally built up. We are happy to say that our camp fires are burning brighter than ever. And here let us define our position, which is in favor of camp meetings. To God be all praise. Yours in Christ,

OAK GROVE CHURCH, SUGARTOWN
September 28, 1901

Mr. EDITOR: Please inform through your columns, the children of our beloved Zion that her King has triumphed most gloriously over the powers of darkness in this community when her sons willingly suffered themselves. Last night I closed a meeting that commenced at night on the twenty-third instant. Many convictions and a goodly number converted, who were strengthened and encouraged wonderfully the children of Zion that in the fullness of their souls they were constrained to sing "Glory to God in the highest strains of holy triumph and exultation. There were twenty-six additions to the church. At the close the altar was thronged with weeping and broken-hearted penitents. It pleased the Lord to pour into the troubled hearts the oil and wine of gospel grace. Brother Frank Miller, circuit preacher from the Andover circuit, and Brother Halfway, a laborer from the Spring Creek circuit, did us much service. May the Lord richly reward them for their labors of love. The members of the church acted their part bravely and were greatly benefited.

A two days' meeting at the Grove church, No. 2, on this side of the city, on the 13th and 14th of August, was an occasion of great interest and profit to that community. Eleven accessions to the church were made on that occasion. Thirty-eight persons were baptized, thirty-one adults and seven children. A strong and widespread spiritual interest prevailed, and indications of great good were manifest in this far-off backwoods country. Let the Zion of our joy, and her sons and daughters shout aloud for joy, for the God omnipotent reigneth and his hearts are glad. Praise the Lord for his wonderful works and wonders on the children of men, who can be numbered as the sand of the sea.

Yours in Christ,
J. A. MONROE.

A WEALTHY PARISHIONER consoled a poor pastor on the grounds which he breathed in his parish; the latter replied: "Your air would be good enough if I only live upon it."

The German wit Saphir, speaking of the Bavarian character: "When a Bavarian gets up in the morning he is a beer barrel; when he goes to bed at night he is a barrel of beer."

The Christian Advocate.

SATURDAY, OCTOBER 29, 1870.

A GEM.

If a pilgrim has been shadowed
By a tree that I have nursed;
If a cup of clear cold water
I have raised to lips athirst;
If I've planted one sweet flower
By an else too barren way;
If I've whispered in the midnight
One sweet word of day;
If in one poor bleeding bosom
A weeping chord have stilled;
If a dark and restless spirit
I with hope of heaven have allied;
If I've made for life's hard battle
One faint heart grow warm and strong—
Then, my God! I thank thee—bless thee—
For the precious gift of song.

American Board of Foreign Missions.

The annual meeting of the American Board of Missions, held in Brooklyn during last week, was one of remarkable interest. The chief sessions were held in the Academy of Music, although second and even third meetings were in progress at the same hour in different churches. The attendance was exceedingly large. There were not less than five thousand delegates and friends from abroad. About fifty returned missionaries, including their families, were also present. A tinge of sadness pervaded the entire convention by reason of the withdrawal of the New School Presbyterians from the board. This withdrawal was not the result of any disaffection, but only the legitimate result of the union of the New and Old School Presbyterians in one body. The Presbyterians who had formerly acted with the board would now naturally co-operate with the missionary society of their own church. The most cordial affection for the organization, and the greatest sorrow in feeling obliged to sever their active connection with it, was expressed by the Revs. William Adams, Albert Barnes and others. They still remain as honorary members of the society, and will not cease to take an interest in its welfare. As a result of this peaceful and providential separation, some of the mission fields, with their missionaries, will change their relations. The very interesting Syrian mission, with its schools and its churches, its printing press and its college, under the shadows of Lebanon, the "crown jewel" of the American Board, passes now under the patronage of the Presbyterian Missionary Society.

Much interest was added to the meeting by the presence and eloquent addresses of the deputation from the London Missionary Society. This deputation included the learned editor of the British Quarterly Review. The greatest interest, however, centered in the foreign missionaries who were in attendance. As report after report was read of different missions, the living men, in many instances, who had labored and were still laboring in connection with these missions, were called forth and made short addresses—men, heroes, who had toiled twenty, thirty, forty, fifty years in foreign lands, to give the gospel to those who had it not. It was like reading the book of the "Acts of the Apostles" with the living men before you, thrilling the very soul. In this manner the Madras and Ceylon missions of India, the Gaboon mission in equatorial Africa, the missions in Persia, in Syria, in Turkey, and in other countries, were represented.

Representatives were also present from the Micronesia Islands in the South Pacific, five thousand miles beyond San Francisco. In these far-off islands, where they receive the mail but once in the year, where the missionary's wife was the only white woman, glowing accounts were given of the saving power of the gospel of Christ. But the interest in these reports culminated in the representation of the work in the Sandwich Islands. The Rev. Mr. Coan, who with his wife had labored thirty-five years among this people, spoke with reference to this mission. There were none lower or viler than these heathen at the beginning of his missionary labors among them—addicted, as they were, even to cannibalism—although the way had been somewhat prepared by missionary effort for the fifteen preceding years. He gave a simple but wonderful account of the great revival in those islands, how himself, after careful and repeated examinations, having baptized seven hundred converts in one day. As he expressed it, the tears upon that occasion were as plentiful as the water used in baptism. He received into the Christian Church in all twelve thousand, lacking forty; and the converts remain. There is no State where a larger proportion of the population read and write. Schools, enterprise, civilization in its highest sense, have here followed in the wake of missionary Christianity. The islands are now Christianized. The proportion of the population who are church members is larger than in the United States

or Great Britain. The churches are supplied with native pastors, and are self-sustaining. And the Sandwich Islands are now dropped from the list of missions of the American Board, simply because the work is done. They need no further foreign help. The venerable chairman of the meeting, President Hopkins, of Williams College, declared there had been no such results following the preaching of the gospel since the days of the apostles. "A nation was born." The veteran missionary was invited to come forward; the immense assembly rose to their feet and united in singing the hymn commencing:

How beautiful are their feet
Who stand on Zion's hill—
Who bring salvation on their tongues,
And words of peace reveal!

The effect was overwhelming. Old and young were alike melted into tears, and it seemed as if the days of the apostles and of the Holy Spirit's power had come again. The converts of the Sandwich Islands are missionary Christians. They are sending native missionaries, two thousand and twenty-five hundred miles, to islands of the sea still in heathenism, and the apostolic missionary goes back to reside over the Missionary Board of these islands, and to die among the thousands of his beloved spiritual children.

After a three days' harmonious session, the final meeting of the board was called at eight and a half o'clock on Friday morning at the Academy of Music. At that early hour the immense edifice was thronged. Farewell addresses were made by the president, by Dr. Badington, representing the churches of Brooklyn, and by several missionaries who were to go back to their life-work. After singing the hymn commencing:

Blest be the tie that binds
Our hearts in Christian love,
Amid tears and prayers, the vast concourse separated, to go to different parts of our own land—to Europe, Asia, Africa and the islands of the sea.

Thus ended the last session of the united American Board.—*New York Christian Advocate, October 15.*

THE "REAL PRESENCE."—An anecdote of Gideon Ouseley.—Several years ago, at one of the great missionary anniversaries of the British Wesleyan Methodists, held in Exeter Hall, London, Rev. W. Reilly, of Dublin, told the following anecdote: "When he (Mr. Reilly) and Gideon Ouseley were traveling together in the south of Ireland they were staying one night at the house of a gentleman, when the parish priest, who was a person of talent, entered and immediately attacked them. The priest and they argued for nearly four hours and a half. 'Why, sir,' said the priest at last, 'could you see all the books that I have seen in Franco, piled from floor to ceiling, volume upon volume upon the subject of the Real Presence, you would be afraid to speak a word upon it yourself.' 'O,' said Mr. Ouseley, 'there are some things which a child may know as well as an archangel. Now, how many panes of glass are there in that window?' 'O,' said the priest, 'that's easily seen—that is a physical fact.' 'Well,' said Mr. Ouseley, 'is it not equally clear that John the Baptist was not the son of the Virgin Mary?'—'Indeed it is.' 'Why is that so?' 'Because he never was born of the Virgin Mary.' 'Well,' now, said Mr. Ouseley, 'I have you; nothing that was not born of her could be her son—not enough. Well, then, the wheat that grew last year, and was ground by the miller, and was baked by the baker into bread, could never, by any consecration, become the son of the Virgin Mary.'—'Indeed, sir,' said the priest, 'you are very right; some people here say that all things are possible with God, but still he could not make two hills without a hollow between them.' Next day the priest visited the house again, and he said to the son of the gentleman of the house: 'Mr. James, those Methodist preachers are queer fellows; they confound me.' 'Well, Father Glyn,' said Mr. James, 'what do you think of your own argument?' 'O, if it were not for the bit of bread,' replied the priest, 'I would never celebrate another mass in the whole course of my life again.'"

"I went to the Legislature last year," said a Georgian. "Well, I went to Augusta and took dinner at a tavern. Right behind me sat a member of one of the back towns who had never before taken dinner at a tavern. Before his plate was a dish of peppers, and he kept looking at them. Finally, as the waiter was very slow in bringing on things, he up with a fork and in less than no time sopped one into his mouth. As he brought down his grinder the tears came into his eyes. At last, spitting the pepper into his hand, he laid it down by the side of his plate, and with a voice that set the whole table in a roar, exclaimed: 'Just lay there and cool!'"

God's promises are as certain as his actual performances.

HISTORY OF CHURCH PEWS.

Concerning pews, Dr. Doran tells us that they were first placed in English churches by the Norman nobles; but it is certain that for many generations these private boxes for public worship were neither numerous nor allowed to persons of inferior grade or gentility. Even to the close of the Plantagenet period, Christians of all degrees, save the highest, were content to be equal in the house of God, so far as seats were concerned.

Mirk's "Instructions for Parish Priests" makes no mention of pews, and enjoins the laity, when in church, to remain on their knees, and abstain from leaning against pillars and walls; but the "Book of Nature," by Russell, "sum tyme wythe Duko Vmfrey, of Gloucester"—a work which, like the "Instructions," was published in the first half of the fifteenth century—directs the chamberlain of a great man to take due care for the arrangements of his patron's pew:

"Prince or prelate if he be, or any other potentate,
Ere he enter into church, be it early or late,
Perceive all thynges for his pew, that it be made preparate;
Both cushion, carpet and curtain, beads and book, forget not that."

But though pews were introduced before the Reformation, they were reserved even so late as the opening of Elizabeth's reign for persons of undeniable quality. Before the close of her majesty's life, however, they had become comparatively common; and in James the First's time the church warden's pew of St. Margaret's church had become so unclean and populous with fleas that sixpence was paid for its purification. The seventeenth century, which witnessed so many changes in ecclesiastical matters, saw pews come into such vogue that a modish person would as soon have gone to church without his proper garniture of point-lace, as have sat out a service on the old-fashioned stool or more modern bench. "Stately pews," remarked Bishop Corbett, protesting against the innovation by which worshippers in velvet protected their gentility from personal contact with worshippers in homespun, "are now become tabernacles, with rings and curtains to them. There wants nothing but beds to hear the word of God on. We have casements, locks, keys and cushions—I had almost said bolsters and pillows; and for these we love the church! I will not guess what is done to them; who sits, stands or lies asleep at prayers, communion, etc.; but this I dare say—they are either to hide some vice or to proclaim one; to hide disorder or proclaim pride."—*London Athenaeum.*

MANUFACTURE OF TEETH.—It is stated that at least three millions of teeth are annually made in this country alone. The first operation, according to the method of manufacture pursued at one of the most extensive and celebrated establishments, is the choosing of the materials. These are foldspar, silica and clay. To these are added various metallic oxides to produce any shade of color desired. The foldspar, clay, etc., are ground to an impalpable powder under water, dried and made into paste. That composing the body of the tooth is of different material from that composing the base or enamel. The teeth are made in brass moulds, and this is quite a delicate process. The enamel is first put in place with a small steel spatula; the platinum rivets, by which the teeth are fastened to the plate, are placed in position; and then the body is pressed into the mould. They are then submitted to powerful pressure and dried.

After being dried they are submitted to a process called biscuiting, in which they can be cut like chalk. They are then sent to the trimmers, who scrape off all projections, and fill up all depressions which may have been left in the operation of molding; and then wash them with what is technically termed enamel. This is composed of various substances, more fusible than the tooth itself, and answers the glaze in common porcelain making. It is ground to a fine powder and suspended in water, and is laid on with a camel's hair brush. They are now sent to the gummers, who apply the gum. This is chiefly composed of oxide of gold, and is applied in the same manner as the enamel. After being dried they are burned. This operation is carried on in a muffle. The teeth are placed on a bed of crushed quartz, which is placed on a slab of refractory clay. After being exposed to an intense heat for some hours they are taken out, cooled and assorted.—*Journal of Applied Chemistry.*

He that pursues honor, applause or worldly reputation is like the foolish schoolboy running after the butterfly and neglecting his book; both meet with disappointment, dissatisfaction and reproof.

He alone is truly wise who is wise unto salvation.

HOW TO FILL UP A CHURCH.

Mr. Spurgeon, in an address delivered in Music Hall, Edinburgh, said:

"Sometimes, as the president of a college, I have letters sent to me asking for ministers in something like these terms: 'Dear sir—Our chapel is very empty; our last minister was a very excellent man, but an unpopular preacher, (I may say, by way of parenthesis, that I suppose he was of those men that would make good martyrs—so dry that they would burn well,) and our congregation is very small; can you kindly send us a minister who will fill the chapel?' On one occasion I replied that I had not a minister large enough to fill a chapel. Of course there came an explanation that they did not expect him to fill it corporally, but to fill it by bringing others to listen to him, and retaining them as seat-holders. Then I wrote, and to gain this opportunity my first joke was perpetrated, reminding the friends that it was quite enough for a pastor to fill the pulpit well, and that the filling of the pews depended upon the zeal, the earnestness and the diligence of those with whom he commenced his ministry; if they would support him by their earnest co-operation the meeting house would soon be full. I remember when I came first to London, preaching to eighty or ninety in a large chapel, but my little congregation thought well of me and induced others to come and fill the place. I always impute my early success to my warm-hearted people, for they were so earnest and enthusiastic in their loving appreciation of 'the young man from the country' that they were never tired of sounding his praises. If you, any of you, are mourning over empty pews in your place of worship, I would advise you to praise your minister. There can be no difficulty in discovering some points in which your pastor excels; dwell upon these excellencies and not upon his failures; talk of the spiritual benefit which you derive from his sermons, and thus you will induce the people to come and listen to him, and at the same time you will do him good, for the full house will warm him up and make him a better preacher, and you yourself will enjoy him the more because you have thought and spoken kindly of him. Believe, then, that the filling up of the church is not alone the pastor's work. Remember the word 'universality,' and let no one try to find a loophole to escape his duty. All Christians ought to be doing something for Jesus, and to be always doing something."

PAINTING ON MARBLE.—Says the New York Times of September 26: The art of painting on marble in durable colors, if ever known, has been lost. For years past Dr. Asa Hill, of Norwalk, Connecticut, has been experimenting in this matter, and with the aid of Mr. W. R. Miller, a well known artist of this city, has at last brought the art, if not to perfection, at least so near it that ultimate success is no longer doubtful. Yesterday we were shown at Mr. Miller's studio, in Dodworth's building, Broadway, some thirty specimens of painting on marble—figures, landscapes and marine pieces—which in brilliancy of color were equal to oil paintings. The pigments, when once fixed, are permanent, and cannot be injured by the action of the atmosphere, water or by acids. If desirable the surface of the marble can be polished. The colors used in painting on marble are mixed neither in oil nor in water. The method of preparation is at present the secret of the inventor. Nor can the ordinary brushes be used in laying on the colors. This at first presented an almost insurmountable difficulty, but, like all others, it was at last overcome, and a substitute for a brush was found in a material which at first sight would seem but little likely to be available for such a purpose. The chief difficulty, however, was the fading and change of the colors first used. Blues turned into greens, yellows into blacks, and browns into reddish purples. This difficulty has also been almost entirely surmounted, and now, with the exception of a strong permanent green, all the other colors have been obtained.

A story has been told of a graceless scamp who gained access to the Clarendon printing office in Oxford when the forms of a new edition of the Episcopal Prayer Book had just been made up and were ready for the press. In that part of the "form" containing the marriage service he substituted the letter k for the letter v in the word live, and thus the vow "to love, honor, comfort, etc., so long as ye both shall live," was made to read "so long as ye both shall like!" The change was not discovered until the whole of the edition was printed off. If the sheets, thus rendered useless in England, be still preserved, it would be a good speculation to have them neatly bound and forwarded to Indiana and Connecticut.—*World.*

RELIGIOUS INTELLIGENCE.

AN EXCHANGE paper states that seven clergymen of the Established Church of England are now seeking admission into the Roman Catholic Church.

During thirty-five years of the continuance of the Mercer street Presbyterian church, New York, the plate collections have amounted to \$300,000, and the aggregate of its contributions has exceeded a million.

The Western Presbytery of the Reformed Presbyterian Church has joined the synod of Illinois, in connection with the United Presbyterian Church—a body formed a few years since by a union of two Scotch denominations of Presbyterians.

At the recent session of the French Methodist Conference the following statistics were given: Churches and other preaching places 184, ministers 30, local preachers 101, members 2,049, and 53 Sunday schools, with 5,539 scholars.

The Methodist Episcopal Church, which was commenced in Germany only a few years since, has now a Conference, 30 church edifices, 37 preachers, 7,250 members, and 8,378 scholars in its Sabbath schools. It is doing a good work in that country.

A MADRID DISPATCH, dated October 3, says: "A decree signed by the Regent Serrano has been published permitting religious teaching in the schools, but exempting from its operation the children of parents who make objection to their instruction therein."

The Gaboon mission, in Western Africa, with its missionary, the Rev. Alfred Bushnell and wife, were lately transferred by the American Board to the Presbyterian Board. The mission is near to that of Corisco, and, like that, needs immediate reinforcement.

DISSENTING PRACTICE OF WORSHIP.—In Great Britain the term "Dissenters" embraces all that stand aloof from the Established Church. In England and Wales alone this class of the people, the largest portions of whom are Methodists, Baptists, Independents and Presbyterians, have nearly eighteen thousand places of public worship erected and sustained by voluntary contributions.

CHURCH AND STATE.—The Legislative Council of Jamaica has just passed a bill providing for the gradual disestablishment of the church in that island. The council of the State of Neuchâtel, Switzerland, has voted, by a large majority, in favor of an entire separation of the church and state. Evidently this is rapidly becoming the sentiment of the world.

A PRECIOUS revival has recently been experienced by the Cumberland Presbyterian church of Liberty, Missouri. It has resulted in fifty professions of religion and forty accessions to the church. "The converts, for the most part, are from the ranks of wicked men, some of whom are heads of families. The convictions appear to be deep and pungent, and the conversions clear and satisfactory."

The Central church of Brooklyn, New York, Rev. T. Do Witt Talmage's, has just completed a house of worship, which was dedicated last Sabbath week. The edifice is circular in form and one story in height. The size is one hundred by one hundred and fifty feet. The walls are of double sheets of corrugated iron, the space between the inner and outer sheets being filled in with brick, thus making the building absolutely fire-proof.

The total of Baptists for the Pacific coast is 116 churches, 5,117 members, 115 ministers, and 10 home missionaries. Less than one-half the ministers are pastors, and not one-sixth are wholly sustained by their churches. Nevada, with a population of 100,000, is without a Baptist church; and, so far as is known, has not a single Baptist minister devoted to his calling. In Washington Territory there are three churches, seventy members, two ministers, and one missionary.

The College Courant states that the Rev. Dr. Woolsey will resign the presidency of Yale College at the close of the present collegiate year, when he will have completed an official term of twenty-five years. The Courant mentions among those who are talked of in private as possible candidates for the succession, Prof. Porter ('31), Prof. Thacher ('35), Prof. Dwight ('49), and Prof. Gilman ('52), all members of the university faculty. Outside the faculty are Rev. Dr. Thompson ('38), of New York, and President Andrew D. White ('53), of Cornell University. Yale has never yet had a president who was not a Congregational minister, and we venture the prediction that the precedent will not be disregarded in the choice of a successor to Dr. Woolsey.

The Welsh Calvinistic Methodists in their own country are now being courted by the Presbyterians, who claim them as identical with themselves in church government. The American branch of this body has 133 churches, 110 ministers, and

10,000 members. It has just held its Annual Conference in Pittsburg, Pennsylvania, which we see that the Herald and Presbyter gives a full account of, under the title of "The Welsh Presbyterian General Assembly of the United States." A delegate from the Presbyterian Church was present, and the agent of Marietta College (Presbyterian) presented its claims for aid as an institution where many young Welshmen have been educated. There will, no doubt, be an effort made here before many years, as in England, to effect an absorption of the Welsh Calvinistic Methodists into the great Presbyterian Church. Independent.

THE Protestant Churchman tells of a curious story of episcopal authority at a recent consecration of a church:

"A venerable presbyter took the service at the Crood; but, instead of standing at the reading desk, stood with his back to the congregation and facing the communion table. The Bishop said, in a clearly audible voice: 'Dr. — will read the Creed facing the congregation.' No attention, however, was paid to this intimation; and Dr. — commenced the prayers facing in the same direction. The Bishop then said, in a louder tone: 'Dr. — will read the prayers facing the congregation.' The suppressed excitement at this point was intense. The doctor continued in the same position. The Bishop then exclaimed: 'Dr. — will read the prayers facing the congregation. I command obedience.' This time the firmness and decision of the Bishop had its effect. Dr. — rose meekly, went to the reading desk, and there continued the service."

CONTENTMENT.

Traveling not long since with Judge S. in a railroad car the conversation was turned on the value of contentment, and the judge remarked that it is hard to find any one who is content with his lot. A man offered his farm to anybody who was content. He would make a free gift of it to any happy soul that was entirely satisfied with the allotments of Providence. Accordingly, a person who had heard of the generous overture called on him and claimed the farm. "I am come," says the visitor, "to accept that offer of your farm."

"Are you content?"
"Certainly I am."

"Then what do you want with my farm?"

This is an old story, but he gave us a new one. A Philadelphia lawyer, well known as a successful advocate and attorney, encountered at a fashionable watering-place three New York nabobs with whom he was well acquainted. He amused himself by listening to their financial plans and projects for adding to the colossal fortunes they had amassed, and at last, in a brusque way, offered to bet a basket of champagne that he had more money than any one of them.

They looked at him and smiled incredulously.

"Earnest, Harry?"

"Yes, of course it is earnest."

"Well," said one, "I think I will take that."

Number two intimated that he would be happy to do likewise, and number three was not afraid to follow suit.

In rotation they made a statement as nearly accurate as they could of the amount of their means.

"Now show your hand," said number one.

"I have all the money I want," was the reply, "and by your own showing that is more than you have."

If the lawyer had all the money he wanted, it is hoped that the three additional baskets gave him all the wine that was necessary to fill his cup of contentment. Betting, even under such circumstances, is a practice for which we know no apology. The lawyer was smart, at any rate. *Christian Intelligencer.*

ROWLAND HILL was in the habit of taking everything he saw or heard into the pulpit and using it in his sermons. When preaching on the government of the temper he said: "I once took tea with an old lady who was very particular about her china. The servant, unfortunately, broke the best bread and butter plate; but her mistress took very little notice of the circumstance at the time, only remarking: 'Never mind, Mary; accidents cannot be avoided.' My word, but I shall have it by and by," said the girl when she got out of the room. And so it turned out. The old lady's temper was coked up for a season, but it came out with terrible vengeance when the company retired."

AN OLD MAN recently turned up at Quincy, Illinois, who is unable to give any more information about himself than that he used to be called "old man." He rode into the city upon a vehicle drawn by four dogs, and exhibited a drove of Guinea pigs to the crowd at ten cents a head.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, OCTOBER 30, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.

Three Dollars per Annum, in Advance.

Address—Rev. LINUS PARKER, 112 Camp Street, New Orleans, La.

AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEE.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. W. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
V. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To Subscribers.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a POST OFFICE ORDER, DRAFT, or by EXPRESS. If this cannot be done, enclose the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

GENTLEMEN'S FURNISHING GOODS.

The attention of our readers is specially directed to the card of Mr. J. A. Perkins, which appears in our advertising columns this week. We have been among Mr. Perkins' customers for a good while, and he is most favorably known to many of our preachers in the country. Gentlemen wishing anything in his line, from the latest necktie to a set of superior shirts, should not fail to call at 120 Canal street. They will find the proprietor courteous, accommodating, and thoroughly acquainted with his business. Remember the place, No. 120 Canal street, New Orleans.

LOUISVILLE CONFERENCE ITEMS.

The Bishop submitted to the Conference the question of investing the Bishops with a veto power, as provided for by the last General Conference. The vote was unanimously in favor of concurring with the General Conference.

The statistical secretary read a recapitulation of his report, of which we append the following summary: White members, 25,354; colored members, 261; local preachers, 186; adults baptized, 1,318; infants baptized, 644; Sunday schools, 173; superintendents and teachers, 1,265; scholars, 9,619; volumes in library, 24,447; requisites, 1,510; visitors taken, 2,390; moneys expended, \$3,748.35; number of churches, 282; number of sittings, 77,575; value of churches, \$564,956; number of parsonages, 24; value of parsonages, \$31,400; value of other church property, \$26,042.50; Bishops' fund, collected, \$1,777.35; Conference collection, \$1,852.90; missions, \$4,074.75; tracts, \$108; poor, \$648.50; other objects, \$10,700.15; amount of books sold, \$1,211.30; periodicals taken, 960; claims of preachers, \$74,465; receipts, \$56,821.46.

CENTRAL CHURCH, BALTIMORE.—A telegraph dispatch has been received from Bishop McTyeire, announcing the transfer of Rev. Dr. Linn to the St. Louis Conference, and his appointment to the Centenary church in the city of St. Louis. Rev. Dr. Munsey has been appointed by the Bishop to take charge of Central Church in Baltimore. Dr. Munsey will immediately assume the duties of his charge in this city.—Baltimore Episcopal Methodist.

The Southern Christian Advocate, of October 14, says: "We learn from the Rev. W. C. Dunlap that the meeting at Payne's chapel, Atlanta, is still progressing with extraordinary results—one hundred and seventy-five conversions up to last week—between two and three hundred conversions—no likelihood of its closing."

A MAN may as well bear his cross patiently while on the road to wear his crown.

The children of God have much in hand and much in hope.

CHILDLIKENESS.

The evangelical prophet, in his vision of Messiah's kingdom, describes the greatest triumph over most discordant characters when he tells us that "a little child shall lead them." The wolf is to dwell with the lamb, the leopard is to lie down with the kid, the calf and the young lion and the fating are seen in companionship, and a little child leads them all. The child-leader is in the foreground of this sweet picture, and is in strong contrast with the turbulent and rugged forms which quietly submit to his guidance. The dimpled arm is laid upon the lion's mane, and the leopard and the wolf yield to the soft caress. Savage malignity, and the mightiest forces of cruelty and hate, are held in abeyance by the fascinating spell of innocence. All these symbols of lordly power, and all prevailing discord, are held in complete subjection by this type of humility.

The prophet's vision and the Saviour's symbolical action are in perfect harmony. The little child which Christ placed in the midst of his disciples carries our minds back to the imagery of Isaiah, and we see in both the exhibition of the same great essentials of the gospel kingdom. In both it is the little child that leads, that "is greatest in the kingdom of heaven." The only greatness is humility, the only real strength is meekness and docility of mind. Christ insists that without this childlikeness entrance into the kingdom is impossible. It must be received as a little child, and "except ye be converted and become as little children, ye shall not enter into the kingdom of heaven." Doubtless one of the chief hindrances of many unconverted people is their pride. But for this they would have sought and found peace long ago. They are unwilling to be led and taught of God, and to yield implicit obedience to the demands of the gospel. They are too wise in their own opinions and conceits, and trust too much in their superior cultivation and intellect. The deep self-abasement of repentance and the entire self-renunciation of a thorough spiritual awakening are far from them. The difficulty in their case is to get low enough—in a word, to receive the kingdom "as a little child." If it could be obtained in a learned way, in a dignified and philosophical manner, with no sense of sin and with no confession of guilt, the matter would be settled. Pride of intellect, and the fancied possession of superior parts and attainments keep many from that spirit of inquiry which would result in their speedy salvation. Candor and simplicity are associated with humbleness of mind. Thorough honesty with himself is rare with the sinner. He may be honorable and upright in his social relations, but he is not true to himself. He persists in disguising the guilt and corruptions of his heart, and clings tenaciously to the notion of his own righteousness. He is wanting integrity in dealing with God and his own soul. He is a sinner, a great sinner, but unwilling to admit in the secret thoughts of his heart that he needs the mercy of an offended law-giver. The great obstacle to entrance into the kingdom is this self-exaltation. He would receive it as a man of learning, as a man of wealth, as a scholar, thinker, moralist and gentleman; in any way except as a little child. Docility and transparency of mind, and thorough honesty of soul, are the sure precursors of the new birth.

If the spiritual kingdom is entered as a little child, it is also maintained in the same manner. The maturest Christian life is noted for its profound humility; not the affected humility of cant and hollow profession, but that lowliness of mind which sits in the dust before God. Faith is always humble. The Syro-Phoenician woman and the centurion were distinguished by this trait. Such faith had not been seen in Israel, nor such humility. "We cannot conceive of faith as separated from this deep self-abasement. In such characters as Moses and Abraham, men of princely greatness, and possessed of the loftiest attributes of mind, humility is the inseparable attendant of their faith. Evangelical faith embraces perfect teachableness, unquestioning obedience and unflinching trust. We may be tempted to enter the regions of speculation, and to wander in the mazes of skeptical philosophy. We may endeavor to construct a religion of science, and to affect a higher wisdom and a better understanding in theological lore than others, but we shall be compelled at last to come back to the starting point of simple reliance upon God. After searching through the universe for something more satisfactory, we come back to the feet of Jesus and return to God as the rest of the soul. After all our efforts to be great and wise and knowing, we find that the highest and divinest life is to be converted and to "become as little children."

OUR CHURCH PAPERS.

It has been demonstrated that too many church papers are an evil. They are not so able and interesting as they would be if more talent, labor and money were devoted to them. They have to struggle with financial difficulties for a bare existence, and are not able to secure first class talent in the staff editorial or in the corps of contributors, and in the end are liable to break down altogether for want of means to go on. This evil cannot be remedied, however, by running from one extreme to another, as some seem to think. If our papers, that represent each some four or five Conferences, should be suspended to unite upon one great central organ, which could not doubt be furnished cheaply by this centralization, we should by no means have so much instructive and useful reading as our various church papers now furnish.

In our ecclesiastical system, as now worked, there are a vast number of comparatively local and Conference items that could not be crowded into one central organ—the reports of district meetings, for example. We have—without counting the colored Conferences—some thirty-four Conferences. These, at an average of six districts each, would give us over two hundred district meetings. Then we have, and hope we ever shall have, revivals in all our districts annually, that ought to be noticed to encourage hope, animate faith and awaken zeal.

In a membership of more than a half million there are numerous examples of holy living, hundreds of whom are annually called from labor to reward from the church militant to the church triumphant. A brief account of their virtues, zeal and hopeful deaths ought to be published as a part of the cumulative evidence of the divinity of our holy religion, and to edify and comfort the whole body of Christ.

These items, in the aggregate, are numerous—quite too numerous to put them into one church paper. It would reduce that paper to a mere chronicle and church gazetteer. It could no longer fulfill the mission of a religious educator—no longer be a preacher to the multitudes by means of the printed page. It would necessarily have to exclude from its columns foreign and general intelligence, with the scientific and literary departments. Readers will not consent to such a deprivation, and if our church organs do not furnish them with it they will seek this various and useful reading elsewhere. They will subscribe for other papers, and there will be a loss rather than a gain in the direction of economy, besides sending the money out of our own communion to build up interests perhaps not the most favorable to us.

If, then, we would have a church paper something more than the weekly bulletin of a church intelligence office—if we would have it filled with all the items of local interest, and at the same time a good family newspaper, replete with all manner of useful reading; superseding the necessity of taking other papers—then we must have several church organs.

We have some eight or nine papers distributed among our thirty-four Conferences, allowing an average of four Conferences per paper. These papers we ought to sustain. Many of our people take two or three of them. We must sustain them; but they cannot be kept going at lower prices than now asked for them. But when we consider their necessity and value, surely no lover of the church or of good reading will hesitate to sustain our papers in order to save a paltry dollar or two per year.

We hope our preachers in the various Annual Conferences, as they are held this fall, will see the importance of the points we have suggested, and will take such action as shall promote the growth and prosperity of their own organs.

FROM BISHOP McTYEIRE.

We take the liberty of publishing the following private note from Bishop McTyeire, as it contains favorable mention of several of our most worthy New Orleans Methodists. The obituary of that estimable Christian lady will appear in our next issue.

ARKANSAS CONFERENCE.

Mr. Emory: The Arkansas Conference adjourned on last evening. I herewith send you the appointments. The missionary meeting, on Saturday, yielded \$753 for the old debt. During the Conference we have had an excellent meeting. The preachers are a noble body of men, full of the spirit necessary to reduce this new country to the rule of the Master. Without adequate support they toil on. The most of them are in the vigor of life. The country is filling up rapidly from the older States, and with the mover, and indeed far in advance of him, the itinerant is to be found. The work these men are accomplishing for this State cannot be overestimated. They are emphatically the "salt" of it—the light of a wide region. I write with but little time at command. The call for episcopal service is not easily met. It amounts to a sermon at every point where one alights. I intend, as soon as possible, to give your readers a more minute idea of the varied resources of this Western State. It is awakening with the scream of the locomotive, and getting up with the strength of a giant who has slept soundly. Helena, Jacksonport, Batesville, Searcy and Clarksville

are all points of interest. Methodism here (at Clarksville) is very promising. A fine brick church is under way, and the friends expect to build a brick academy for the Conference by its next session. I am most truly yours, J. C. KEENER. CLARKSVILLE, October 18, 1870. APPOINTMENTS OF THE PREACHERS. CLARKSVILLE DISTRICT.—John J. Roberts, P. E. Clarksville, Nathaniel Futrell; Spadra, Charles H. Gregory; Dover, William R. Knowlton; Gally Rock, Isaac L. Hicks; Lewisburg station, Isham L. Burrow; Lewisburg circuit, Abel C. Ray, Stephen P. Parish, supernumerary; East Fork, Coleman H. Ford; Clinton, Wm. E. Whittenburg; Dardanelle station, John F. Hall; Dardanelle circuit, William J. Dodson; Danville, George F. Fair; Bluffton, John M. Bewley; Quitman Institute, Peter A. Moses. FORT SMITH DISTRICT.—William M. Mathis, P. E. Fort Smith station, Harvey M. Granade; Fort Smith circuit, Sidney S. Key; Greenwood, Francis A. Taff; Waldron, Thomas J. Reynolds; Rich Mountain mission, to be supplied by Jonas B. Frost; Shoal Creek, Henry M. Youngblood; Ozark, Harlston R. Withers; Van Buren station, Sidney H. Babcock; R. A. Allison, snp.; Van Buren circuit, Gideon H. Warren; Booneville, William H. Corley.

FAYETTEVILLE DISTRICT.—Thomas Wainwright, P. E. Fayetteville, Jerome Haralson; Viney Grove, John M. Clayton; Evansville, Robert O. Atchley; Mayeville mission, Isaac T. Rice; Center Point, Thomas J. Smith; Bentonville, Edward J. Dawne; Richland, Jesse M. King; White River, David Starkey; Huntsville, George R. Bryce.

YELLEVILLE DISTRICT.—Francis M. Moore, P. E. Yelleville, Benjamin F. Hall; Crooked Creek, Hugh A. Barnett; Carrollton, Alexander Mathis; Jasper mission, Daniel W. Evans; Berryville, James A. Walden; Mountain Home, Van Buren Tate, Eli C. Jones, sup.; Centerville mission, John H. Wade; Marshall, James Grant; Flatwoods, John H. Hall.

TRANSFERRED.—Jesse Griffin, to White River Conference, and appointed to Big Creek; William R. Foster, to White River Conference, and appointed to Searcy station.

LOCATED.—Nathan E. Fair, at his own request.

SUPERANNATED.—M. B. Pearson.

FROM BISHOP McTYEIRE.

We take the liberty of publishing the following private note from Bishop McTyeire, as it contains favorable mention of several of our most worthy New Orleans Methodists. The obituary of that estimable Christian lady will appear in our next issue.

NASHVILLE, TENN., Oct. 24, 1870. Mr. Editor: I send you inclosed the obituary of Mrs. Price, written by her friend and pastor, Dr. Kelly. You will transfer it to your columns with sad pleasure, I know. It is a gem of truth and beauty and of characterization. I remember the Murphy family, as we first met them, enjoying their elegant wealth and dispensing their bountiful hospitality, at the Franklin Conference. That Conference was in all respects a delightful one. Brother Cravens was our host and gave us all good homes, from which flow pleasant memories.

Let me thank you for that biographical sketch of Richard Keen, which you gave in the editorial columns of the Christian Advocate. I knew him well. Your sketch is in nothing exaggerated. He deserves to be held in honorable memory by us all. Let us glorify the grace of God in him.

There is one portion of Scripture in connection with which I have often thought of Brother Keen. He illustrates it. I believe that humble, working, good man went before the Master, saying: "Lord, thy pound hath gained ten pounds." Such a man is eminently the product of Christianity. I knew a case where, on his way to early morning work, he called in at a newly converted neighbor's, and taught them how to hold family prayers; and this he did until they got in the way of it. He did it literally, *en passant*. He was a hearty worshiper. I loved to see him in the congregation, for you were sure to hear him too. Once I was reading, as the lesson, the thirty-fourth Psalm. He could not contain. With his rough, honest hand he brushed away the tears, and said aloud: "Yes, Lord, that is so—this poor man has tried it."

I hope the memories of others who deserve well of the church for their labors and lives in founding New Orleans Methodism will yet be embalmied in the Advocate—as Theresa Canoe, William Deacon, Charles Waters, Judge Clark, Mr. R. L. Robertson, Thomas K. Price and others, who have not lived in vain. Yours very truly, H. N. McTYEIRE.

are all points of interest. Methodism here (at Clarksville) is very promising. A fine brick church is under way, and the friends expect to build a brick academy for the Conference by its next session.

I am most truly yours,

J. C. KEENER.

CLARKSVILLE, October 18, 1870.

APPOINTMENTS OF THE PREACHERS.

CLARKSVILLE DISTRICT.—John J. Roberts, P. E. Clarksville, Nathaniel Futrell; Spadra, Charles H. Gregory; Dover, William R. Knowlton; Gally Rock, Isaac L. Hicks; Lewisburg station, Isham L. Burrow; Lewisburg circuit, Abel C. Ray, Stephen P. Parish, supernumerary; East Fork, Coleman H. Ford; Clinton, Wm. E. Whittenburg; Dardanelle station, John F. Hall; Dardanelle circuit, William J. Dodson; Danville, George F. Fair; Bluffton, John M. Bewley; Quitman Institute, Peter A. Moses.

FORT SMITH DISTRICT.—William M. Mathis, P. E. Fort Smith station, Harvey M. Granade; Fort Smith circuit, Sidney S. Key; Greenwood, Francis A. Taff; Waldron, Thomas J. Reynolds; Rich Mountain mission, to be supplied by Jonas B. Frost; Shoal Creek, Henry M. Youngblood; Ozark, Harlston R. Withers; Van Buren station, Sidney H. Babcock; R. A. Allison, snp.; Van Buren circuit, Gideon H. Warren; Booneville, William H. Corley.

FAYETTEVILLE DISTRICT.—Thomas Wainwright, P. E. Fayetteville, Jerome Haralson; Viney Grove, John M. Clayton; Evansville, Robert O. Atchley; Mayeville mission, Isaac T. Rice; Center Point, Thomas J. Smith; Bentonville, Edward J. Dawne; Richland, Jesse M. King; White River, David Starkey; Huntsville, George R. Bryce.

YELLEVILLE DISTRICT.—Francis M. Moore, P. E. Yelleville, Benjamin F. Hall; Crooked Creek, Hugh A. Barnett; Carrollton, Alexander Mathis; Jasper mission, Daniel W. Evans; Berryville, James A. Walden; Mountain Home, Van Buren Tate, Eli C. Jones, sup.; Centerville mission, John H. Wade; Marshall, James Grant; Flatwoods, John H. Hall.

TRANSFERRED.—Jesse Griffin, to White River Conference, and appointed to Big Creek; William R. Foster, to White River Conference, and appointed to Searcy station.

LOCATED.—Nathan E. Fair, at his own request.

SUPERANNATED.—M. B. Pearson.

FROM BISHOP McTYEIRE.

We take the liberty of publishing the following private note from Bishop McTyeire, as it contains favorable mention of several of our most worthy New Orleans Methodists. The obituary of that estimable Christian lady will appear in our next issue.

NASHVILLE, TENN., Oct. 24, 1870. Mr. Editor: I send you inclosed the obituary of Mrs. Price, written by her friend and pastor, Dr. Kelly. You will transfer it to your columns with sad pleasure, I know. It is a gem of truth and beauty and of characterization. I remember the Murphy family, as we first met them, enjoying their elegant wealth and dispensing their bountiful hospitality, at the Franklin Conference. That Conference was in all respects a delightful one. Brother Cravens was our host and gave us all good homes, from which flow pleasant memories.

Let me thank you for that biographical sketch of Richard Keen, which you gave in the editorial columns of the Christian Advocate. I knew him well. Your sketch is in nothing exaggerated. He deserves to be held in honorable memory by us all. Let us glorify the grace of God in him.

There is one portion of Scripture in connection with which I have often thought of Brother Keen. He illustrates it. I believe that humble, working, good man went before the Master, saying: "Lord, thy pound hath gained ten pounds." Such a man is eminently the product of Christianity. I knew a case where, on his way to early morning work, he called in at a newly converted neighbor's, and taught them how to hold family prayers; and this he did until they got in the way of it. He did it literally, *en passant*. He was a hearty worshiper. I loved to see him in the congregation, for you were sure to hear him too. Once I was reading, as the lesson, the thirty-fourth Psalm. He could not contain. With his rough, honest hand he brushed away the tears, and said aloud: "Yes, Lord, that is so—this poor man has tried it."

I hope the memories of others who deserve well of the church for their labors and lives in founding New Orleans Methodism will yet be embalmied in the Advocate—as Theresa Canoe, William Deacon, Charles Waters, Judge Clark, Mr. R. L. Robertson, Thomas K. Price and others, who have not lived in vain. Yours very truly, H. N. McTYEIRE.

NEW PUBLICATIONS.

A MANUAL OF THE DISCIPLINE OF THE METHODIST EPISCOPAL CHURCH SOUTH, including the decisions of the College of Bishops, and rules of order applicable to Ecclesiastical Courts and Conferences. Holland N. McTyeire, D. D., of the Bishops of the Methodist Episcopal Church South, Nashville, Tennessee; Publishing House of the Methodist Episcopal Church South.

We are indebted to R. J. Harper the New Orleans Depository, for a copy of the new edition of this valuable work. We believe that it has been carefully revised since the adjournment of the General Conference, and conformed to the latest legislation of that body. The increased bulk of the volume consequent upon the broad margins not to our mind. Nearly one-half of the book is taken up with the spacious margins, rendering a place for it in a presiding elder's pocket altogether impracticable. The copy of the Manual has been passed upon in these columns already. The more we have occasion to examine it, the more are we impressed with its exceeding value, and the greater the debt which the church owes the author. Our preachers should not try to get along without it.

work, and every intelligent layman interested in the church and polity, should not fail to order a copy at once. Our lay brethren find it a great assistant in enabling them to meet the grave responsibilities of their new position in the councils of Methodism. It can be had at our Depository, 112 Canal street, in any style of binding, muslin, \$1; roan, \$1.25; Tuckermore, extra gilt, \$3; with a discount to preachers.

A SCHOOL HISTORY OF THE UNITED STATES, from the discovery of America to the year 1870. David B. Scott. New York: Harper & Brothers, publishers.

This volume is a 12mo of one hundred and twenty-five pages, illustrated with numerous woodcuts, well printed and substantially bound. The most of the work is very like all school histories—a species of machine prose, terse, dry, lifeless. Nearly one-fourth of the work occupied with the affairs of the war. The author views the matter through Northern spectacles, course, and his views are necessarily distorted and erroneous in many particulars. He does not, however, deal in coarse abuse, nor call names, and he evidently aims at fairness and truth, however he has come short of them. For sale by George Ellis & Brother, Camp street, New Orleans.

WILSON'S INTERMEDIATE FIFTH READER. On the original plan of school and family series, embracing in brief the principles of rhetoric, criticism, eloquence, oratory, as applied to both prose and poetry. The whole adapted to elocutionary instruction. Marcus Wilson. New York: per & Brothers, publishers.

A nice 12mo of three, four, and seventy pages, full of choice tracts for declamation, as good hundreds of other works of the same sort, and good for some or nothing, according to one's estimate of such publications. For sale by Ellis & Brother, Camp street, New Orleans.

MENTAL ARITHMETIC. By John French, LL. D. New York: per & Brothers. 1870. 12mo.

An excellent work for beginners and prepared with much pains and good sense. For sale by Ellis & Brother, Camp street, New Orleans.

AN INDEX TO HARRIS'S NEW MORAL MAGAZINE, volumes 1 to 40. New York: Harper & Brothers, publishers. 1870.

An octavo of over four hundred pages, of great value to those who have the bound volumes of the Magazine, and making the position of them far more desirable. It would otherwise be the case, as we have not the names of the Magazine, we should be happy to give our copy of the index to some one who has bought of Ellis & Brother, New Orleans.

We have also received from publishers, Harper & Brothers, through Ellis & Brother, of the following: all in paper covers: Charles Dickens: The

of his Life, by the author of the Life of Thackeray; The Mystery of Edwin Drood, by Charles Dickens; Recollections of Eton, by an Etonian; A Dangerous Guest, by the author of Gilbert Ruggie, etc.; Veronica, a novel; Estelle Russell; The Heir Expectant; Tom Brown at Oxford; by the author of Tom Brown's School Days.

THE STRUGGLE IN FERRARA. A story of the Reformation in Italy. By William Gilbert. Philadelphia: J. B. Lippincott & Co. 1871.

This story has but recently been concluded in the Sunday Magazine, edited by Dr. Guthrie, and is a work of the highest merit. All will be the better for reading it. For sale by Gresham, Camp street, New Orleans.

THE SONG OF THE REDEEMED: SALVATION TO GOD AND THE LAMB. By Rev. J. W. Harsha, A. M., Philadelphia: J. B. Lippincott & Co. 1870.

This appears to be a practical and earnest work by a very spiritual and devout author. The headings of the chapters will indicate to our readers the general contents: "Salvation the Theme of our Song; The Great Salvation; Neglect of Salvation; Salvation to the Utmost; All Invited to Salvation; Difficulties of Salvation," etc. A profitable volume for all who wish to save their souls. For sale by Gresham, New Orleans.

MISTAKEN, OR THE SKEMING AND THE REAL. By Lydia Fuller. Philadelphia: J. B. Lippincott & Co. 1870.

A beautifully bound 12mo, religious, somewhat mystical and cleverly written—of a Swedenborgian tendency, and stimulating to stagnant hearts and intellects. For sale by Gresham, New Orleans.

From the publishers, A. S. Barnes & Co., through A. Eyrich, we have received:

A CONDENSED ETYMOLOGY OF THE ENGLISH LANGUAGE FOR COMMON SCHOOLS. By William W. Smith. THE NORMAL GRAMMAR, ANALYTIC AND SYNTHETIC. Illustrated by diagrams. By Stephen W. Clark, A. M.

Both of these works appear to have been prepared with great care, and are doubtless worthy of an examination by our educators.

THE SOUTHERN REVIEW. Volume 8, No. 16. A. T. Bledsoe, LL. D., editor. October, 1870. Baltimore: Poiss & Roszell, 49 Lexington street.

Contents: 1. The Spirit of Rationalism; 2. Robert Young Haynes; 3. History of Stenography; 4. Hellenism, Old and New; 5. The Plurality of Worlds; 6. The Cometary Universe; 7. The Education and Influence of Woman; 8. The Southern Review; 9. Poem; 10. Notices of Books. These articles furnish a rich repast of the choicest reading. They abound in depth and strength, but nowhere in heaviness. "The Spirit of Rationalism" is by the accomplished editor, and the article on the Southern Review is also from his pen. We wish our space would allow us to copy the latter entire, as it reveals the finest qualities of Dr. Bledsoe's character, and shows that he can be fully trusted as the expounder of Methodist theology. We propose to make liberal extracts from it hereafter. The next number begins a new volume, under the new regime as indicated and adopted by the Methodist Episcopal Church South. We doubt not the Review will receive the hearty support which its great merit deserves, and that it will prove a blessing in many ways to our church.

A FRIEND communicates the following to the National Baptist: Prof. K., who is not a novice in punning, never perpetrated a better one than this: Being requested by the class in Greek to state the Baptist view regarding baptism, he complied, setting forth the basis on which they rest their belief in immersion. "But suppose, professor," said Mr. F., a Presbyterian, "that a man should say that in the passage, 'They went down into the water,' the Greek proposition *eis* means in, and not into, what would you reply?" "I should say," responded the doctor, with the merriest twinkle of the eye and the happiest twitching of the muscles of his face, "I should say, sir, that he had slipped up on the *eis*."

A QUEER SIGHT.—To see grass eating animals; to see animals eating grass is common enough, of course!

OLD JONAS.—There was an old man once—he was called "Old Jonas"—who made his living and spent all his life-time in hunting in the gutters of the city for things that were lost. And though it may seem strange, yet it is true that in his old age Jonas had laid up quite a sum of money that he had made in this way, for during his long life he had picked from the gutters many a coin, and rescued from filth many a precious jewel.

"It seems strange to me," said a wealthy banker to old Jonas one day, "how any one could have grown rich over a gutter."

"O, sir," said old Jonas, "it's not where you work, it's what you work for, that does it. I worked all my life to be rich, and I am; so do you, and you are; but we work in very different places."

Alas for the wealthy banker and miserly old Jonas! It never came into their heads that there were better things in this world to work for than riches; more precious things lost, sometimes, than jewels—even souls. And O it matters not where you work, whether in poverty and filth, or cleanliness, wealth and luxury. If you but work in humble faith for the saving of a soul you will receive a large and glorious reward.

POINTED.—Frederick the Great was plain-spoken, and could also enjoy plain speaking at his own expense. The Bishop of Ermeland had had his office curtailed by order of the King, and on coming into his presence was thus accosted: "I suppose your reverence is not over friendly to me." "I shall ever prove loyal to your majesty," was the evasive reply. "Very well," said the King; "if some day St. Peter should refuse to admit me to heaven I hope you will smudge me in under your cloak." "Your majesty," answered the bishop, "has cut off so much of my cloak that it will hide no contraband articles."

Obituaries.

Our community was made sad, a few days ago, by the sudden death of JOHN DAVID NASH, son of Brother H. R. and Sister E. S. Nash, aged eight years and three days.

Johnnie was kind-hearted and affectionate, sweet-spirited and intelligent above many of his age. He loved to go to church, and delighted in the Sabbath school. But just as he was being trained and educated for a life of usefulness here, to take a position in society, the great Shepherd above, who ever regardeth in love the lambs of his flock, took his sweet spirit to rest. His sufferings were soon over—two or three days of sickness, and his last moment came. O what a sad one it was to those weeping around. Yet they sorrowed not as those who have no hope, for we shall see him again.

FRED. WHITE.
SPRING CREEK CH. LA. CONF.
September 18, 1870.

Sister MARY A. LOFTIN, daughter of Edward and Turner Blount, and consort of Brother J. P. Loftin, was born in East Baton Rouge parish, Louisiana, April 12, 1820.

When three years of age her parents moved to the State of Indiana, where she remained until she was fourteen years old, when they moved to Covington county, Mississippi. She was married July 9, 1838; joined the Methodist Episcopal Church South October 18, 1838, and died August 27, 1870, aged fifty years, four months and fifteen days.

Sister Loftin's health was very bad for several years; but about twelve months before she died she became the subject of pulmonary consumption, and never left her room again until borne to the silent tomb a lifeless corpse. She was an humble and devoted Christian, perfectly resigned to the providence of God; and when the summons came for her to quit this mortal existence she murmured not, but calmly bade farewell to all around, and passed away to rest in the arms of Jesus forever. Her husband and only surviving child, with many relatives and friends, mourn her loss. Weep not, dear friends! She only waits to welcome you on the shores of sweet deliverance.

JAMES M. WHEAT.
MT. CARMEL, MISS. Oct. 15, 1870.

Sister HARRIET FRIEDLAND was born in West Feliciana parish, Louisiana, on

the seventeenth of November, A. D. 1798; was married to Mr. John Freedland May 16, 1816, and departed this life on the seventh of September, 1870, at Whistler, Alabama.

She was the daughter of a Methodist minister, whose name is Gabriel Blackburn. Having been raised by pious parents, she sought God early in life, and lived in the enjoyment of his love. Her religion was no burden to her, but was the joy and comfort of her heart and life. She possessed the happy capacity of adapting herself to the varied characters with whom she met in life so as to secure to herself the love and esteem of all. As she lived, so she died—full of faith and the Holy Ghost. About one year before her death, while conversing with her upon the subject of religion, she expressed herself as only waiting for her Redeemer, and feeling that "to live was Christ and to die was gain;" "to be absent from the body was to be present with the Lord." She said that she had but one desire to live, and that was to see her aged husband and her children all converted. She believed in the power of prayer, and felt that though she might pass away, yet the Lord would answer her prayers in the conversion and salvation of those for whom she had so long prayed. She bore all the afflictions and sufferings of this life with Christian fortitude and patience, feeling that "all things work together for good to them that love God," and hence she was willing to suffer and trust that Saviour to whom she had committed all things.

Her religious life was consistent and uniform. "Her adorning was that of a meek and quiet spirit, which in the sight of God is of great price." Having finished her course and kept the faith, when death came its sting was gone and its fears dissipated. She leaves to her husband and children a life of faith and good works, and she, being dead, yet speaketh. She was kind and gentle in her disposition, and exhibited the spirit of her Master. Those left behind should follow her as she followed Christ. She is not dead, but asleep, and those who sleep in Jesus will God bring with him. May the God of all grace comfort the hearts of the bereaved, and may we all meet her in glory.

J. J. GRACE.
REV. BENJAMIN CROFT has gone home—ceased from labor and entered into rest.

He was born in the lower part of Georgia in 1763, and in 1816 moved to South Carolina, and at a quarterly meeting held at Perryburg, by William Capers, presiding elder, he was convicted, and led to repentance and faith in Christ by a sermon from Bishop Capers, then presiding elder, from these words: "Fear not, little flock, for it is your Father's good pleasure to give you the kingdom." His convictions were deep and pungent, and his conversion was clear and brilliant. With his decision and firmness of character, he was at once a servant of God, and enlisted for life. About four years thereafter he was licensed to preach, and feeling the burden of the great commission upon him, he went out into the highways and hedges, and preached Christ in a clear, practical and impressive manner.

He was a man of fine personal appearance, well educated and refined, and with his unspotted moral qualifications he commanded the respect, the confidence and the love of all with whom he mingled. His influence was felt; it was seen in every community in which he lived, gradually raising the standard of morals, as well as bringing many to a knowledge of Christ.

At the age of forty-four he moved to Alabama and settled near Glenview. A few years afterward he moved near Columbus, Georgia, on the Alabama side, where he lived for a number of years, and where no man has more true and devoted friends. Here he buried his companion, the wife of his youth, who had traveled with him for nearly fifty years over the journey of life. He left now old and full of sorrows, befitting the old homestead, and came to Pensacola to live with his daughter, Mrs. Davis, where in great affliction he passed the remnant of his days. It was my privilege to know him about fifteen years—the first ten a most noble, earnest, faithful laborer in the vineyard; the last five a great sufferer from a cancerous affection, from which he died September 25, at eight P. M. But in all his suffering there was a patience, a peace and a joy that told more than words could utter. I asked him, on visiting him, if he was not lonely, knowing his former active life. "Lonely?" said he; "I am never alone. Jesus is always here with me; and I find now that I can suffer his will as well as do his will." He loved to talk of the future. He would tell of his family. He had raised up a large family of children, and the most of them, with his companion, had crossed over. He was

waiting with the daughters still living; but he had put his house in order; they were all converted, and now he was waiting to visit those on the other shore. Death had to him no terrors. He died in great peace. To his friends he bade me say: He died at his post, with his armor on. J. A. PAGE.

Don't hawk, hawk, spit, spit, blow, blow, and disgust everybody with your Catarrh and its offensive odor, when Dr. Sage's Catarrh Remedy will speedily destroy all odor and arrest the discharge. The proprietor offers \$500 for a case he cannot cure. Sold by druggists or by mail—sixty cents. Pamphlet free. Address Dr. R. V. Pierce, Buffalo, New York.

FIVE CENTS ADDITIONAL will buy shoes with Silver or Copper Tips, which will save the buyer the price of a new pair of shoes. Compared with ragged toes and dirty stockings, they are beautiful, to say the least. Parents, try it. \$17 31/2

NEW ADVERTISEMENTS.

SEASON OF 1870-71.

MASON & HAMLIN CABINET ORGANS.

IMPORTANT IMPROVEMENTS.

Patented June 21 and Aug. 23, 1870.

REDUCTION OF PRICES.

THE MASON & HAMLIN ORGAN CO. have the pleasure of announcing IMPORTANT IMPROVEMENTS in their Cabinet Organs, for which patents were granted them in June and August last. These are not merely superficial attachments, but enhance the substantial excellence of the instruments.

They are also enabled, by increased facilities for manufacture, to make from this date a FURTHER REDUCTION OF PRICES on several leading styles.

Having completed and added to their former facilities a LARGE NEW MANUFACTORY, they hope hereafter to supply all orders promptly.

The Cabinet Organs made by this Company are of such universal reputation, not only throughout America, but also in Europe, that few will need assurance of their superiority. For years the Company have been unable to supply the constantly increasing demand for their instruments, being always largely behind orders, though producing about twice the amount of work of any other maker of instruments of the class. This extraordinary demand is evidence that they have been successful in carrying into effect two rules which it is their purpose to adhere to rigidly, so that they may be able to be principles of their business. These are:

1. To make every best work, and only the best; availing themselves of the best results of inventive genius, every improvement, wherever effected, and every facility which the highest skill, ample experience and liberal use of abundant means can command.

2. To sell every one of the best possible organs, reserving to themselves the least remunerative profit. As cost of production is diminished prices are reduced, and they always price their lowest prices, which are therefore subject to no discount. The extent of their business, and enormous number of Cabinet Organs which they now have occasion to produce, enables them to employ various machinery, and a division of labor which would not be possible in a smaller business. They are thus enabled to make the present reduction in prices, and to sell their work at even less than the prices commonly demanded for inferior instruments, and less than the cost of production without such extraordinary facilities.

They now offer Four-octave Cabinet Organs, in quite plain cases, but equal according to their capacity to anything they make, for \$50 each. The same, Double Reed, \$65. Five-octave Double Reed Organs, Five Stops, with Kneewell and Tremulant, in elegant case, with several of the Mason & Hamlin improvements, \$125. The same, extra, with new Vox Humana, Antemantic Swell, etc., \$160. The same, Resonant Case, with new improvements, \$200. Five Octaves, Three Stops, Seven Stops, with Euphone, a splendid instrument, \$225. Two Manual Cabinet Organs, Four Full Sets of Reeds, Nine Stops, \$375. The same, Resonant Case, with the new improvements, the finest instrument of the class made, \$425, etc. Many other styles in preparation.

A new illustrated Catalogue, with full information and reduced prices, is now ready, and will be sent free, with Testimonial Circular, presenting a great mass of evidence as to the superiority of these instruments, to any one sending his address to the MASON & HAMLIN ORGAN CO., 154 Tremont St., Boston, N. Y. 022 31 P

BY THE DEATH OF MR. G. W. HUNTINGTON the firm of PAYNE, HUNTINGTON & CO. is dissolved, taking effect from and after the thirty-first ultimo. All their business will be attended to and liquidated by their successors, PAYNE, DAMERON & CO.

The undersigned, surviving members of the late firm of PAYNE, HUNTINGTON & CO., will continue the Cotton Factories and Commission business at the old office, Nos. 64 and 66 Baronne street, under the same name and style of PAYNE, DAMERON & CO. J. U. PAYNE, WILLIAM H. DAMERON, HENRY M. PAYNE. NEW ORLEANS, Sept. 1, 1870. 0215 1m

SALESMEN Wanted

For the beautiful Steel Engraving, "Christ Blessing Little Children."

J. W. BLACKMAN'S

COMMERCIAL COLLEGE,

61 CAMP STREET,

Corner Commercial Place, N. O.

Open day and evening the entire year. Penmanship, Book-keeping, Mathematics and Languages are practically taught by experienced professors. Persons from fifteen to fifty years of age attend. Instruction given privately to each student, who has a reputation to himself, and is put through a thorough and systematic course of study to qualify him for the situation he intends to fill. Persons who have neglected their education are here speedily prepared for business, and the country may obtain benefit in the family of the principal.

Terms.—Twenty per cent. less than other Commercial Colleges in this city. Cost of full Commercial Course only \$100. Average time, three to four months.

The principal has been a professional teacher in New Orleans since 1851.

For circulars address J. W. BLACKMAN, New Orleans. 021 1 P

SOUTHERN METHODIST

Male High School, New Orleans.

The exercises of the second session of this institution will commence on MONDAY, the 11th day of September proximo, in the basement of the German Methodist Church, Dryades street, between Felicite and Bulerie streets. The principal, encouraged by the gratifying success of the past session, will in no respect relax his energy in the effort to make the school all that could be desired by its patrons; and to accomplish this end neither time nor expense will be spared.

To furnish to those who desire an opportunity to obtain for their sons a systematic course of instruction from the beginning, upon which a thorough education so much depends, Primary and Preparatory Departments have been established in connection with the High School.

In selecting professors and teachers the greatest care will be exercised in regard to their moral qualifications, but also their ability to impart instruction.

The rates of tuition have been fixed as low as is consistent with thorough instruction.

For further information as to terms, etc., apply at the school.

D. L. EAST, Principal.

CHILDREN TEETHING.

Mrs. WINSLOW'S SOOTHING SYRUP, FOR CHILDREN TEETHING.

greatly facilitates the process of teething by softening the gums, reducing all inflammation; will allay ALL PAIN and spasmodic action, and is

SURE TO REGULATE THE BOWELS.

Depend upon it, mothers, it will give rest to yourselves, and

Relief and Health to Your Infants.

We have put up and sold this article nearly thirty years, and can say in confidence and truth of it what we have never been able to say of any other medicine—NEVER WAS IT FAILED IN A SINGLE INSTANCE TO EFFECT A CURE, when timely used. Never did we know an instance of disqualification by any one who used it. On the contrary, all are delighted with its operations, and speak in terms of commendation of its magical effects and medicinal virtues. We speak in this matter "WHAT WE KNOW," after years of experience, and pledge our reputation for the fulfillment of what we here declare. In almost every instance where the infant is suffering from pain and exhaustion relief will be found in fifteen or twenty minutes after the Syrup is administered.

Full directions for using will accompany each bottle. Be sure to call for

"Mrs. Winslow's Soothing Syrup."

Having the fac-simile of "CURTIS & PERKINS" on the outside wrapper. All others are base imitations.

Sold by Druggists throughout the world. 0215 6m

ONE DOSE OF DR. SHALENBORGER'S

FEVER AND AGUE ANTIDOTE

ALWAYS STOPS THE CHILLS.

This medicine has been before the public fifteen years, and is still ahead of all other known remedies. It does not purge, does not sicken the stomach, is perfectly safe in any dose and under all circumstances, and the only medicine that will

Cure Immediately and Permanently every form of Fever and Ague, because it is a perfect Antidote to Malaria.

Sold by all Druggists. 021 1 P

AGENTS WANTED FOR

GOD-IN-HISTORY.

A grand theme, and the grandest book of modern times. All history analyzed from a new standpoint. God rules among the nations. An OPEN BIBLE is every land. No other book like it. Approved by over one hundred divines and all the leading papers. The best terms to Agents ever before given. Our new plan insures a sale in every family. Address, at once,

J. W. GODSPEED & CO.,

37 Park Row, New York, or

The Child's Corner.

GARDEN SONGS.

Old Ben of Bumblebee bumped his nose
In trying to light on a daisy rose.
He bumped his nose, but he didn't care
As he pitched about in the dizzy air.
Whenever he tried to fly, he'd
He'd shoot ahead and pass her by;
So he tumbled at last on a larkspur near.
And buzzed his business into her ear.

Little green Hummer
Was born in the summer;
His coat was as bright
As the emerald's light.
Short was his song,
Though his bill it was long—
His weight altogether
Not more than a feather.
From dipping his head
In the sunset red,
And gliding his side
In its fiery tide,
He gleamed like a jewel,
And darted around,
Twist sunlight and starlight,
Never touching the ground.
Now over a blossom,
Now under, now in it;
Here, there and everywhere,
All in a minute.
Ah! never he cared
Who wondered and stared—
His life was complete
Of pleasure and sweetness;
He revelled in lightness,
In sweetness and brightness,
This sweet little Hummer
Who came with the summer.

Quick! quick! From under a log,
Leaping and squatting, comes Flueky the
frog.
Wide is his mouth, and spreading his toes,
Very elastic and shiny his clothes;
Of lily his jumpings, and brazen his stare;
Yet he sees not the hummer that flits in
the air.

Two little frogs they slipped to one another:
"Our puddle is all liquor and no meat."
Let it sit upon the bank, where the lovely
"and is shining."
And maybe we'll see something good to
eat.

Forty little ants said softly to their mothers:
"O mother! we are going to the bog."
But the forty little ants never dreamed they
were going.

Just to make a dainty dinner for the frogs,
Lard and Honey.

About Harry's Visit to His Grandmother.

I stayed a whole fortnight at
Grandma Martin's. It was perfectly
splendid. Grandma always has a
jar in the pantry full of cookies, and
you can help yourself; and apples
and nuts and everything. O, I did
wish Nelly was there.
Grandma is an old lady. I be-
lieve she is almost a hundred. Any-
way she's seventy. She's very fond
of me, and she knits all my stock-
ings and mittens, and she plays
checkers with me. But I can beat
her just as easy as anything. She
hardly ever gets any kings, and then
she forgets to put crowns on them
unless I tell her. And once we were
playing and we couldn't seem to
jump each other, or do anything;
and by and by I found that I had
set my men on the black spots, and
grandma had put hers on the white
ones, so neither of us could have
beaten if I hadn't found it out.

I like to go and see grandma. You
go in the cars, and then the house
is only a little way from the depot,
about as far as from here to the
corner. No one lives with grandma
but Aunt Rachel and Penny—she's
a black girl. Then there's Minerva,
the cat. I asked Aunt Rachel if it
wasn't rather a long name for such
a small cat, and she said Brother
Dick named her so when he came
down shooting, but I might call her
Minnie, if I wanted to.

Penny came from the South. She
says her name is Penelope, but I be-
lieve she is only in fun. Any way,
I never heard such a name.
One day I was looking at Penny.
I was thinking about her hair, and
I suppose I stared at her, and she
asked me why did I look at her so,
and I said: "Penny, what is your
hair made of? Is it cotton or wool
or what?"

And she said she reckoned 'twas
wool. And I said why didn't she
knit some stockings of it, then?
And she sat right down on the floor
and laughed, and said she would
knit me a pair of mittens for Christ-
mas. I didn't say anything, but I
hope she won't, for pity's sake.
O, but how grandma does love her
spectacles! And I find them for
her. She says her father always
used to lose his spectacles, and now
she does. But the truth is, she
always lays them right down any-
where. Once she put them in a
chair, and I said: "Grandma,
haven't you a pocket in that dress?"
And she looked as surprised as
anything, and said: "Yes, I believe
so. Why?"

And I said: "Haden't you better
put your spectacles in your pocket,
grandma, and then you'll know
where to find them?"
And she said I was a little Solo-
mon, and she would take my advice,
but very soon she laid them in her
lap, and then got up for something,
and they dropped on the floor, and
she was just going to step on them,
if I hadn't picked them up.
I used to take care of grandma's

fire, sometimes. A wood fire is very
nice to roast apples by, but it is a
good deal of trouble.

One day, as I was making a boat,
and grandma was knitting, and just
as I was going to fasten in the mast,
grandma asked me to put a stick of
wood on the fire. So I put it on,
and picked up the coals, and made
a beautiful fire, and then went back
to my work again. And just as I
had cut out the sail, and put a little
paste on the edge, and was going to
stick it to the mast, grandma said:
"Harry, put on some more wood for
grandma."

So I had to leave my work again,
and the sail dropped, and the paste
side stuck on my shoe; but I took
it off and made the fire. And then,
just as I was painting the flag,
grandma spoke to me again, and said
her fire was almost out. I like to
take care of her fire, of course, but
I knew I never should get that boat
done, so I said to myself: "This
won't do. I must make a fire that
will last awhile."

So I put on about eight sticks, I
believe. Grandma didn't notice,
because she had dropped a stitch,
but it made a most tremendous
blaze. I almost knew she wouldn't
like it, and when she saw it she said
it would set the chimney on fire, and
she sent me to call Penny. And
Penny came and took off all but two
of the sticks, and dipped them into
a bucket of water.

It put them out, but it made a
big smoke in the room, I can tell
you. I had to come home then, be-
cause it was time for school to be-
gin, but grandma wants me to go
down next Christmas. Well, good
by.—Little Corporal.

Tired Suddenly.—A very little
girl, whom we personally know, had
a habit of suddenly becoming "tired
and sleepy" whenever her aunt, with
whom she lived, desired her to do
anything that was not to her taste.
One day her aunt said: "Come,
Annie, I want you now to come and
have your face washed." "O,"
groaned Annie, "I am so tired and
sleepy." And she dropped down in
her little chair in a very limp condi-
tion, and could not be easily moved.
"Well," said her aunt, "no matter,
then. I intended to put on your
pretty new dress and take you to
visit your Cousin Alice, but you are
too tired; you need not go, and I will
go alone." "Oh! I didn't know
that," cried Annie, "but I didn't
say I was so drearily tired. I only
said I was tired." Do you ever sud-
denly become tired when asked to
help mamma?—Little Corporal.

A Bit of Good Advice.—Boys
sometimes get a notion into their
heads that it is a manly thing to
chew and smoke. You never made
a greater mistake in your life. To
be under the dominion of any appe-
tite is a most unmanly and degrad-
ing thing. And boys, I beseech
you, keep out of the ranks of to-
bacco lovers. No man attains the
highest manhood he is capable of,
until he masters himself, and can
say to every appetite or desire of
mind or body: "Stand aside; I
will not be governed by you; I am
master here." A lover of tobacco
can never do this.—Little Corporal.

A SPELLING LESSON.—A little girl
in a primary school, who was dili-
gently printing out a letter to be
sent to a friend, puzzled her teacher
by wanting to know how to spell
"tunkin." Light broke in when it
was found that she wanted to tell
her friend that she loved her "more
than 'tunkin' tell!"

A NAUTICAL ADVENTURE.—A dense
fog was setting in when we got un-
der way, and the wind, south south-
east when we started, gradually
veered around to southeast by south,
half south, a little northerly, I think
you. But by bowing down to the
cat harpings, lashing the spanker to
the main royal truck, letting the
gafftopsail jibe, hauling taut the
weather ear-ring, and rigging a
futtock shroud athwart the star-
board jibboom, marlinespike-wise,
we managed to clear our hawse and
stand weatherly out to sea with a
wet sheet and a flowing clew-line.
It was thought at one time that we
should have to get an extra pull on
the bight of the larboard cathead,
as a bark was seen bearing down on
us, about four bells of the dog-
watch. But we got out of the mess
by jamming a dead-eye in the fore-
foot, which relieved the fore-castle
some, and gave us a better look to
windward, after which a pull at a
small flask in Prof. Osgood's port
pocket brought us up all right and
set the heel of the mizen-topmast
a-shivering. It may be that I've got
the sea terms and nautical manue-
verings a little mixed, but they're all
there. Arrange them to suit your-
self, if you think you can make bet-
ter sense of it than I have.—John
Paul, in the Tribune.

There is not a grace that can
adorn the Christian character but
you will have need to appear in it
at some time or other; therefore seek
the whole, that you may stand per-
fect and complete in all the will of
God.

The Farm and Garden.

TIM BUNKER ON OLD CORN.

"Any corn to sell?" asked Jake
Frink of Deacon Smith one hot July
morning—hot enough to scorch en-
cumbers from the vine.

"Perfect ruin to sell old corn at
this time of year," answered the
deacon. "If I had a thousand
bushels I shouldn't sell till next win-
ter. It's bad to sell grain of any
kind out of a farm, but old corn is
ruin."

"I've heard 'em call the corn ruin
when they worked it into likker, but
I never knowed as the grain was
ruin," said Jake, meditating.

"Ruin to the man that sells it,"
said the deacon with great empha-
sis. "You see, neighbor Frink, you
sold new corn last fall, about as
soon as it was off the cob, at a low
price, and you now have to buy old
at a high price comparatively. That
is bad. You fattened your hogs and
beef and poultry on new corn, and
they were not more than half fattened,
and you had to sell them a cent a
pound under the market. And that
was worse still. You have been do-
ing this straight along ever since
you have been farming; making
poor-moats, and selling them under
the market—making poor grain
crops, and selling them, when you
ought to have bought. You see,
neighbor Frink, there is considera-
ble philosophy about farming,
although it seems to be so plain
that a wayfaring man, though a
fool, couldn't err therein." Old corn
is better than new to make any kind
of meat of. I've tried it forty years,
and know. It is solid, and somehow
it seems to stick by the ribs better
than anything else. Green stuff
and roots will keep hogs thriving,
but when you come to laying on fat
there's nothing like old corn."

"It's revarsin' the Scripture order,
deacon, 'new wine in new bottles,'"
said Jake.

"Not at all," the deacon contin-
ued; "I put the old corn into old
hogs, and that is Scripture and com-
mon sense too. Ye see I don't kill
pigs. That's on the new corn plan,
exactly. If there is profit in keep-
ing a pig nine months, gaining a
pound a day, while he is making
his frame, I think there must be still
more profit in keeping him the sec-
ond nine months, when his frame is
already made, and you have nothing
to do but to lay the flesh and fat
right on to it. The bone and offal are
dead loss to producer and consumer,
and that is nearly all made in the
first nine months. I think I get
more flesh for my feed, the second
nine months, than the first, a good
deal. Then there is some satisfac-
tion in turning out from your pens
a hog weighing six hundred pounds
instead of two hundred and fifty.
With a dozen such animals in your
pen every fall you have something to
sell and keep Thanksgiving on."

"Jesse so," said Jake, scratching
his head as if some new ideas were
working. "I never had that kind of
feelin', but I should think it would
be awful good. Ye see I never had
a hog that would weigh over three
hundred and fifty, and two-year old
at that. I am allers afeard of gittin'
out of corn, so that I darstent feed
high."

"And that is one of the strong
pints in the philosophy of old corn,"
said the deacon. "You see, if you
keep the old on-hand, you always
know you have got the new crop to
fall back on, and you don't think of
stinting till the old crop has gone,
and that never comes with me.
There isn't any profit in short feed
any way. It takes just about so
much to sustain animal life and
keep the machine running. If you
only feed up to that pint you get
nothing back but the manure. All
that you feed over that goes to milk,
flesh or fat, which has a market
value, and can be turned into money."

"I see that plain as a pike-staff,"
said Jake. "I guess I have been
runnin' the machines most of my
days. I haint sold much, that's
clear."

I guess the deacon's philosophy
of old corn is pretty sound. He
practices on it, and nobody has any
better pork than Deacon Smith, or
gets any higher price. I've known
him to get fifteen cents when Jake
Frink got only thirteen. The win-
men folks on Hooktown street say
that his pork always swells in the
pot, whether it's killed in the old
or new of the moon. Thoro ain't more
than half of 'em believe the moon
has anything to do with pork. Sev-
eral other old wives' fables have
failed since I was a boy.
Yours to command,
TIMOTHY BUNKER, Esq.
American Agriculturist.

old specimens being highly orna-
mental for their leaves, and surpass-
ingly beautiful when they throw up
their enormous panicles of white
flowers. Our purpose is to speak of
it as a useful rather than as an orna-
mental plant. An article on try-
ing materials induced Mr. James T.
Worthington, of Chillicothe, Ohio,
to present the claims of the Yucca
as a superior article for bands and
strings. Mr. Worthington considers
it of great value not only to the
gardener, but to the farmer, and ad-
vocates its cultivation for its useful
leaves. He states that when the
plant is well established, or the third
year after planting out a shoot or
sucker, hundreds of leaves may be
removed without injury. He sets
the plants four feet apart each way.
Mr. Worthington, in a communica-
tion to the Scioto Gazette, upon the
same subject, says: "For all pur-
poses where a string is needed, from
a bouquet to a bacon ham, including
bands for grapevines and shocks of
corn, and for garden vegetables, it
has no equal, and requires only to
be generally known to be univer-
sally cultivated." We have known
the Yucca to be used in some of the
Missouri vineyards, and thank Mr.
Worthington for calling attention to
its availability for other purposes.
Plants are sold by most nurserymen,
the catalogue price being fifty cents
each.—American Agriculturist.

How DEEP SECURE POLLEN TO THEIR
THINGS.—In feeding a flower this
spring my attention was attracted
by the large number of bees hover-
ing on wings, just over it and a few
inches above it, almost stationary,
now and then alighting for an in-
stant, while some of them would
merely touch the flower, and rise
again, without stopping. Upon close
examination I saw that their feet
were going in as rapid motion as
their wings, and that they were
engaged in securing the flower to
their thighs. They take up the
flower or pollen with their fore feet,
rise on wing, and with a rapid mo-
tion of their legs, convey it and
secure it to the receptacle on their
hind legs while flying. In gather-
ing pollen from flowers they collect
all they can with their mouth and
fore feet, and while passing to
another flower and hovering over it
for an instant, convey it to their
baskets and secure it there. The
peculiar noise or humming made
while securing the pollen we do not
hear when gathering honey alone.

Mathematicians tell us of the great
wisdom and ingenuity manifested in
the construction of the cells of the
honey combs, so as to use the great-
est economy in the space with the
greatest possible strength; and now
we see in this wonderful insect the
wise provision of the great Creator
for the economy of time. No time
is lost by having to stop within
the flower to secure the golden-col-
ored treasure; but it is secured on
wing while passing in search of
more.—T. Smith, in American Bee
Journal.

Scientific.

A WRITER in *Nature* gives an inge-
nuous explanation of color-blindness.
It is known that some eyes fail to
distinguish between complementary
colors, and especially between red
and green. This writer supposes
that in the case of such persons,
when they look at red, the produc-
tion of the complementary color in
their eye is almost instant, produc-
ing a gray by the mingling of the
two colors. This subjective produc-
tion of the complementary color
takes place to some extent in all per-
sons. If we look steadily at a bright
color it becomes less bright; and
when we turn the eye away on a
white ground we see the complemen-
tary color upon it. If this pro-
duction of the complementary color
be instant and intense, it would
nearly counteract the impression of
the true color and produce color-
blindness. The color-blind should
judge of color by only the shortest
glance at the object.—Independent.

The statement has been quite
often made that under pressure wa-
ter increases so much in density as
at last to be heavier than the metals.
It has been suggested that at a cer-
tain depth in the ocean substances
dropped into it would float—that
bodies buried at sea and weighed
down with cannon balls would reach
a stratum where they would float
forever, like Mohammed's coffin.
These notions are utterly false. Wa-
ter has no such power of contraction
as is here supposed. When the in-
closed air is removed it is al-
most entirely incompressible. The
dredging operations in water have
never been troubled by this diffi-
culty, though the Swedish expedi-
tion reached three miles, and the
last English expedition nearly two
miles in depth. In both cases forms
of animal life were brought up with
the dredge of such a specific gravity
as to show that the water at the
bottom of the ocean is very nearly
of the same density as that at the
surface. The blunder in such no-
tions consists in supposing that a
law similar to Mariotte's law for the
density of gases governs that of
liquids.

MUSICAL INSTRUMENTS.

PHILIP WERLEIN.

SOUTHERN MUSIC HOUSE.

60 & 62.....BARONNE STREET.....90 & 92
New Orleans.

The house of WERLEIN is the oldest es-
tablished Music House in the South. Its pre-
sented reputation shall be sustained and increas-
ed by every effort.

The best PIANOS AND ORGANS that this
country affords are being sold at from ten to
twenty per cent. under current rates, in con-
sequence of systematic management of busi-
ness and low expenses.

PIANOS, ORGANS, MELODEONS,
HARPS, MUSIC, BRASS AND GERMAN
SILVER INSTRUMENTS.

Strings, Violins, Guitars, Banjos, Flutinas,
Accordeons, Drums, Piano Stools and Covers,
and

MUSICAL MERCHANDISE
OF EVERY DESCRIPTION.

H. F. JOHNSON,
President.

EAST ALABAMA COLLEGE.

AUTHEN, ALABAMA.

The next annual session will open on the
FIRST WEDNESDAY in October, with a full
faculty.

Boys and young men at every stage of edu-
cation can be received either in the
Preparatory, Junior or Senior Departments.
Additional schools of Modern Languages,
Civil Engineering, and Commercial Arith-
metic and Book-keeping have been estab-
lished.

Economy, health, efficient faculty, good
society, thorough discipline and the best
religious privileges are the peculiar advantages
afforded.

It is just the place to train Methodist boys,
and there is room for three hundred, if
every preacher and layman will work for us
to secure students we will open with two
hundred.

For full information or catalogue, address
the Secretary of the Faculty.

MISCELLANEOUS.

THE ARROW TIE.

FOR BALING COTTON THE ARROW TIE
is the most popular, being the best Cotton
Tie in use.

Planters and Cotton Press men everywhere
prefer it to all others.

THE ARROW TIE

was used to cover MORE THAN HALF THE
CROP OF 1869, giving entire satisfaction.

The patentee and manufacturer of the cele-
brated ARROW TIE, J. J. McCOMB, formerly
of New Orleans, now residing in Liverpool,
having control of the best and most exten-
sive Belling Mills in Europe, is constantly
importing large stocks of this popular Tie,
manufactured of the very best quality of
English iron, to meet the increasing demand
for it throughout all the Cotton States.

Planters can buy or order the ARROW TIE
of all dealers in Iron Ties, and of country
merchants generally, at the lowest market
price; and we respectfully solicit the patron-
age of Planters and Factors everywhere.

H. T. BARTLETTE and
R. W. BAYNE.

General Agents for the Arrow Tie,
1618 1y 124 Carondelet St., New Orleans.

BRACES AND TRUSSES.—DR. JOHN C.

DANIEL informs the medical profession
and others that he has constantly on hand
and for sale a complete assortment of BRAC-
ES, TRUSSES, Spinal and Shoulder
Braces, and other appliances for the preven-
tion, relief and cure of general debility, re-
laxation and weakness of the limbs, spinal
weakness and deformity, dyspepsia and ter-
rible rheumatism, constipation and chronic dis-
placements of the womb, HERNIA, Piles,
protrusion of the rectum, and weakness of the male
and female system.

These light, cool and springy appliances
are the special favorites of the profession;
they are wisely common-sense and rational in
their action; supply a missing link in treat-
ment; place the above affections in a safe
and more hopeful light, and often com-
plete cures where medicine can only mitigate,
more than it can cure a hernia or a dislocated
joint.

He specially desires an examination of
these appliances by the profession and others.
Where necessary the professional appli-
cation of the above braces will be under
his supervision or that of the family physi-
cian.

These valuable appliances are sent
by a large number of the medical profes-
sion in the United States and Europe as the
best adapted to fulfill the purpose for which they
are intended, and the Trusses and Braces
advised by the Medical States Government
and the use of the Army and Navy. Terms of
consultation free. Send for their pamphlet.
It is better to call.

Office and residence, 152 JULIA STREET,
near Camp, New Orleans. Jellly

Rocky Mountain Indian Salve,

FOR CORNS, BUNIONS AND PILES.

This Indian Salve cures Corns, Bunions
and Piles in a few applications, radically.
The buyer will apply the Salve but two or
three times, when the inflammation

The Christian Advocate.

SATURDAY, OCTOBER 29, 1870.

HOUSEKEEPERS' DEPARTMENT.

SOMETHING ABOUT PICKLES.—It is a little singular that a large share of the questions put to the household department at this season should be about an article which is not nourishing—pickles, which to the best stomachs are only appetizing, and to the weakest positively injurious. Still people will eat pickles, and whatever our "physiological" friends may say, we do not doubt that things so generally craved have some use in the animal economy. When our boys in the army had the chronic diarrhea our army surgeons usually allowed them to eat pickles and other things that under ordinary circumstances would be considered fatal, and to the surprise of everybody the hopeless patients often recovered. So without discussing the dietetics of the matter, we accept pickles as a fact. To look at the matter philosophically, a pickle is a mere vegetable sponge to hold vinegar. Any vegetable tissue that is not so fibrous or tough as to be unpleasant to masticate, and which has no disagreeable flavor of its own, will answer for pickling. If the article has an acceptable flavor of its own, all the better. It is the possession of this that makes the cucumber the most popular of all pickles. Vegetables which have no marked taste, such as green muskmelons, are made flavorful by the free use of spices—like the sailor's wonderful stone, which would make a nice soup when the farmer's wife allowed him to gather the odds and ends of her kitchen and garden to boil with it. It is customary to salt pickles before putting them into vinegar. Why do we? It is not for the purpose of flavoring them with salt, for this can be added to the vinegar. This matter of salting pickles brings up the question of osmosis, which we cannot find space to discuss. Briefly, when a fresh vegetable is placed in salt and water an interchange takes place between the juices contained in the tissues of the vegetable and the brine by which it is surrounded. The natural juices pass out and the brine passes into the vegetable; the brine being denser, it, according to a well known law, passes in more slowly than the juices of the vegetable pass out, and the salted things survive. When salted pickles are placed in water the case is reversed; their shriveled tissues are full of brine, much heavier than the water by which they are surrounded, the brine passes out, and the water goes in and restores the plumpness. Soaked pickles with their tissues full of water, being put into vinegar, readily become penetrated by that liquid. The question of salting pickles has nothing to do with flavor, as the finest pickles are those from which the salt is most completely saked. One of the most frequent questions is: "How can I make pickles like those put up at the factories?" We have answered this more than once, but will repeat, that the pickles referred to are put up in colorless vinegar made from whiskey. Diluted whiskey will make a vinegar which is almost colorless and of a pure sour taste. Cider makes a vinegar which has a color, it is true, but a most agreeable flavor. Homemade pickles should be prepared with regard to flavor rather than appearance. As a general rule vegetables to be pickled are first put into brine, then soaked to freshen them, and then placed in vinegar, which may be speeded or not, according to taste. One point is to be noticed: when freshened pickles are put into very strong vinegar, the water with which their tissues are filled so weakens the vinegar that the pickles are not only not sour enough to the taste, but not enough so to keep well. It is not necessary to enumerate the things that may be pickled, as there are but few fruits or vegetables that are not so treated—pickled peaches are delicious, and pickled purslane is not to be despised—a wide range surely. Some good housekeepers have, besides the regular cucumber and other standard pickles, a jar of

punch, "too much of lemons, sugar and whisky, and not enough water." One recipe gives: Vinegar, six pints; salt, one-half pound; bruised ginger root and whole mustard seed, two ounces each; mace, one ounce; shallots, one-half pound; Cayenne pepper, a dessert spoonful, and some sliced horse-radish. Simmer together for a few minutes, then put into a jar and cover close. Another, claimed to be "very superior," directs for each gallon of vinegar six cloves of garlic, twelve shallots, two sticks of sliced horse-radish, four ounces bruised ginger, two ounces whole black pepper, one ounce allspice, twelve cloves, one-quarter ounce Cayenne pepper, two ounces mustard seed, one-quarter pound turmeric. All the above, except the mustard and turmeric, are put into the jar with cabbage, cauliflower and other pickle vegetables, and the vinegar boiled and poured over them. The ground mustard and turmeric are to be made into a paste, with cold vinegar added.—*American Agriculturist.*

AMERICAN BIBLE SOCIETY.

The stated meeting of the Board of Managers was held at the Bible House, Astor Place, on Thursday, the sixth instant, at half-past three o'clock P. M. William Whitlock, Jr., Esq., one of the vice presidents, in the chair, assisted by Norman White, James Snyden, E. L. Fancher and A. Robertson Walsh, Esqs., vice presidents.

Rev. John N. McLeod read Psalm lxxii and offered prayer. Seven new auxiliaries were recognized, one in each of the States of Minnesota, Missouri, Tennessee, Texas, Georgia, Alabama and Mississippi.

Communications were received from Mr. Andrew M. Milne, of Monte Video, S. A., reporting a great increase in the demand for the Scriptures, and announcing a further postponement of the Exposition at Cordova; from Henry C. Hall, Esq., inclosing a communication from Mr. Lawrence, of Barcelona, Spain, advising us of the safe arrival of books, and the hindrances arising from political troubles and the existence of yellow fever, but yet presenting features of encouragement in the work; from Rev. B. G. Snow, asking authority to print the gospels of Matthew and Luke in the Kusaian language; from Rev. J. F. Pogue, of Honolulu, desiring a grant for printing one thousand copies of Matthew and Mark in the Ponape language, Ascension Islands; from Colonel F. W. Hankin, Montreal, returning thanks for a grant of five hundred French Testaments to the French Canadian Missionary Society; from Rev. John Beveridge as to our work in Mexico, and Dr. Prevost, in reference to plans for further prosecuting our labors in that country; and from Hon. E. J. Royce, president of the Liberian Republic, returning thanks for a presentation copy of the Holy Bible.

It was resolved to make arrangements for electrotyping the Armenian Scriptures at Constantinople. Grants of books were made to Mr. J. S. Pierson, marine agent of the New York Bible Society, for vessels sailing to foreign ports; to our agent for New England, Rev. W. H. Gilbert, for a colony of Chinese at North Adams, Massachusetts; to Rev. A. H. De Mora, for distribution in Lisbon, Portugal; to the Valparaiso Bible Society, South America, for local demands; to Rev. J. de Palma, for circulation among Cubans in New York city; to the Baptist Sunday School Union in New York, and to others.

The whole number of volumes granted is four thousand and fifty-three, including five volumes in raised letter for the blind; besides which there were granted to various auxiliary societies Bibles and Testaments to the value of \$1,285.75. For foreign work, in funds, the following grants were made: To the Missionary Society of the Protestant Episcopal Church, \$1,300; to the Missionary Society of the Methodist Episcopal Church, \$600; to the Hawaiian Evangelical Association, \$211.75, for printing Matthew and Luke in the Kusaian language.—*Christian Advocate*, N. Y.

A SINGULAR WILL.—The Times says that Mr. Weare Marston, of North Hampton, lived and died not only as a good, useful and honest man, but as a consistent and unyielding Democrat. In his will he provided that his body should be borne to the grave by six true Democrats, to whom he ordered six dollars should be paid for every man from his estate, and that no funeral services should be held over his remains unless some minister of the gospel could be found to conduct such services who had never preached political or war sermons. On the thirtieth the request of the deceased was obeyed to the letter, six true Democrats being easily chosen in the out-and-out Democratic town of North Hampton. No clergyman that fulfilled the requirements of the will could be found.—*Concord N. H.*

BOOKS AND STATIONERY.

STANDARD EDUCATIONAL WORKS.

PUBLISHED BY

CHARLES SCRIBNER & COMPANY.

634 BROADWAY, NEW YORK.

Guyot's Geographical Text-Books.

"Incomparably superior to anything published."—*American*.
Introduction to the Study of Geography. Elementary Geography. Intermediate Geography. Common School Geography.

Guyot's System is approved and indorsed by the most distinguished literary and scientific men of our nation; such as Prof. Agassiz, Dana, Tenney, Henry and others, celebrated in science throughout Europe as well as at home.

The fact that ONE MILLION (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New System, for no other series of books ever published in America have ever secured so rapid and extensive introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; Cincinnati, Cleveland, Columbus, Springfield, Toledo, Marietta, and most of the other important towns and cities, numbering nine thousand schools in Ohio, and hundreds of towns and cities in the other Western States, while in the Southern States and California they are being extensively adopted.

Believing that the publication of Professor Guyot's series has marked a new and better era in the presentation of geographical science, that by its pupils of this generation will obtain a knowledge of the world on which they live, and that it is so systematized as to render that knowledge more valuable and permanent, we commend it to the attention of all interested in educational improvements and progress.

H. WASSER COLLEGE,

MONROE COUNTY, EAST TENNESSEE.

Having taken charge of this school, I desire to invite the attention of friends in the Cotton States to the excellent location, delightful climate and cheap board. We are in the best part of East Tennessee, seven miles east of Sweetwater, on the great line of railroad, and two miles from Madisonville, which is our post office.

The college has been in operation for twenty years, and has boarding arrangements for about fifty students. The steward supplies his table from his own farm, and gives the best that the country affords, well prepared, and furnished rooms, at

Two Dollars and a Half Per Week

Tuition is \$40 per annum. Students will be received at any time, and charged to the end of the term. For circular address

REV. P. M. GRACE,

my21 ly Madisonville, Tenn.

WESLEYAN FEMALE INSTITUTE,

STANTON, VIRGINIA.

will begin its next session September 20, 1870, and close June 22, 1871.

REV. WILLIAM A. HARRIS, President.

With Thirteen Professors, Teachers, etc., etc.

Than this no College for Young Ladies ranks higher. System of teaching like that pursued in the University of Virginia. French is taught by a native master of the language. Professor in Department of Music has no superior in any school; among others, is assisted by the distinguished vocalist, Madame Bertha Knib. This is one of the healthiest climates in America, and young ladies who come here from the South with feeble constitutions are entirely restored to health. The grounds are large and beautiful; buildings stately and elegant, flanked by the purest breezes, overlooking the entire city, and commanding the most magnificent rural and mountain scenery for thirty miles along the beautiful Valley of Virginia, making it one of the most delightful college homes in the Union.

(From Judge John N. Hendren, M. A., University of Virginia.)

I regard the Wesleyan Female Institute in this place, under the management of Rev. William A. Harris, as one of the very best and most attractive schools in the State.

(From Hon. John B. Baldwin.)

The Wesleyan Female Institute is surrounded by influences which make it in all respects a most desirable place for the care and education of the daughters of Christian parents.

(From Prof. William E. Peters, LL. D., University of Virginia.)

Young ladies committed to the care of Prof. Harris will enjoy advantages of an intellectual and moral training rarely found.

(From Rev. William E. Munsey, D. D.)

I believe that as the president of a female college Rev. William A. Harris has no superior; indeed within the purview of my acquaintance he has no equal.

(From Bishop E. M. Marvin, D. D.)

The Wesleyan Female Institute is an honor to the church. Instruction is thorough. All classes stand high. In music advantages are offered of a very high order. The most experienced professors are employed, and neither pains nor expense are spared to make this department eminent. The school is very prosperous, and deserves to be so.

TERMS FOR THE ENTIRE SCHOOL YEAR. Board and tuition in the College and Course of \$225. Music and other extra studies moderate.

For catalogues address

REV. WM. A. HARRIS,

my21 ly Stanton, Virginia.

EMORY AND HENRY COLLEGE, VIRGINIA.

The Fall session begins August 18, and closes January 11, 1871.

One Hundred and Fifteen Dollars will cover the necessary expenses of the session, including tuition, board, fuel, room, and washing and contingent fees.

For catalogue or for other information address

E. E. WILEY, President,

SCHOOLS AND COLLEGES.

FLORENCE WESLEYAN UNIVERSITY.

FLORENCE, ALABAMA.

W. H. ANDERSON, D. D., PRESIDENT.

This institution of learning, so widely known through the South, will begin its next session on Wednesday, September 14, 1870. The Faculty is composed of men of experience and ability. The course of study is comprised in the Literary Department, Law Department, Department of Biblical Literature and Commercial Department. The advantages of this University are seen in its healthful and attractive location, thorough course of study, excellent discipline, the character and success of its instructors, and the reasonable rates at which board and tuition are furnished.

Licentiate in the ministry and sons of ministers in the regular work are admitted to recitation on paying the incidental fees.

EXPENSES PER SESSION OF FIVE MONTHS.

Tuition in the University classes.....\$30 00

Tuition in Grammar School.....25 00

Tuition in Law Department.....40 00

Incidental fees.....2 00

(Tuition and incidental fee required in advance.)

Chemical fee, paid once.....5 00

Boarding can be had in the best families at from \$10 to \$20 per month.

For particulars see circular, or apply to the president, Rev. Dr. Anderson, or to Hon. W. B. Wood.

my21 ly President Board of Trustees.

TUSKEGEE FEMALE COLLEGE,

TUSKEGEE, ALABAMA.

The Fifteenth Annual Session begins SEPTEMBER 15, 1870, and continues forty weeks; divided into two equal terms.

REV. GEO. V. F. PRICE, M. A., President.

REV. H. H. ROSS, M. A., Professor of Latin and Mathematics.

DR. S. M. BARTLETT, Director of Music.

The president calls particular attention to the fact that Rev. B. B. Ross, of the Alabama Conference, has accepted the professorship of Latin and Mathematics in the Institution. Brother Ross is a graduate of Lagrange College, Alabama. He was professor of Mixed Mathematics in that institution for two years. Subsequently he was president of Talladega Female Institute. His classical education, his experience in the practical business of teaching, his acceptable career of itinerant service, his many excellent personal traits, all entitle him to the unlimited confidence of our people.

The college has just closed a most successful year. Its prospects were never more flattering. The present organization of the Institution combines all the best features for securing the thorough instruction and efficient discipline of its pupils. The Faculty contains none but tried and trained teachers, whose success has been tested by years of service. The boarding arrangements are under the immediate control of the president, who resides in the building, and supervises the social recreations and the professional duties of the pupils. The health of the girls is in charge of an experienced matron. The table, kitchen and laundry are in care of thoroughly trained housekeepers. Miss Sheldon, who resides in the building, and brings to the office high social position, experience as a teacher, liberal education, and matured Christian character. The pupils are trained in gymnastic and calisthenic exercises, and in developing their physical powers, strengthening their constitutions, and imparting grace and dignity to their movements. Religion is the basis of the system of education, and girls are taught that "the truth as it is in Jesus" is the highest attainable wisdom.

CHARGES FOR SCHOLARSHIP YEAR OF FORTY WEEKS.

Tuition, according to grade, from \$25 to \$60.....\$60 00

Tuition in music.....50 00

Tuition in art, from \$20 to.....40 00

Tuition in languages.....20 00

Board, washing and fuel.....220 00

Instruction in vocal music, free of charge.

Instruction in calisthenics, free of charge.

J. V. F. Price, President.

Use of library of reference, free of charge.

No incidental charges of any kind.

Tuition for each term payable in advance.

NEW ORLEANS MARKETS.

From the N. O. Price Current.
The removal of the quarantine at Galveston and Pensacola has imparted a better feeling to every department of trade, but especially in those branches which usually do a large business with Texas merchants, and under its impulse flour has advanced twenty-five cents per barrel, and other articles of Western produce have been in more lively request at firmer prices. The general movement, nevertheless, is still checked by the absence of country merchants, although rather more has been done in the execution of orders by mail. Sugar and molasses have come forward rather more freely. In the absence of buyers for the West, the demand has been principally confined to the local trade. The latter has sold more freely, but at easier prices.

The weather, which has assumed unusual importance in view of the exposed condition of the cotton crop, was clear and pleasant on Saturday, but a drizzling rain commenced at an early hour on Sunday evening, and continued throughout the night. On Monday it was rainy and stormy, but on Tuesday it cleared up during the morning, and was variably cloudy and fair for the rest of the day. It has been apprehended that the recent rainy and stormy spell has extended to the cotton districts, in which case it may have done some serious damage. As yet, however, we have no particulars.

The river is eleven feet eight inches below high water mark.

CORRIG.—The following are the arrivals since the twenty-first instant:

Louisiana and Mississippi bales, 11,942
Mobile, 912
Lake, 35
Total, 12,994

On Saturday the demand continued active throughout the day, and nearly all that was offered found purchasers at stiffening rates, low middling selling in the morning at 14½ to 15c, but closing at 15 to 15½c, good ordinary at the same time being quoted at 14½ to 14¾c, and middling at 15½c. The sales were on a liberal scale, summing up 4,700 bales. On Monday the movement was stimulated by the exciting accounts received from New York, and the demand was still more animated, while prices exhibited such irregularity that it was difficult to give regular quotations. Operations being restricted by scant supplies, the business did not exceed 3,550 bales. On Tuesday the market opened with the movement checked by the scant supply on sale and the high pretensions of factors, but the demand being active, prices were paid above the outside figures of the day previous. Owing to the extreme prices asked, and the moderate extent of the offerings, the sales were confined to 3,900 bales.

This makes an aggregate for the past three days of 11,150 bales. The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 100,852 bales, against 129,376 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 3,944 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 25,798 bales to Great Britain, and a decrease of 27,260 to France, and of 6,554 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary, 12½ to 13½
Good ordinary, 13½ to 14½
Low middling, 14½ to 15½
Middling, 15½ to 16½
Strict middling, 16½ to 17½

COTTON STATEMENT.

Special Notices.

ALABAMA CONFERENCE.
The members will call at the Methodist Episcopal Church South on their arrival in the city. Those who intend bringing their wives must give timely notice.
JOHN MATTHEWS.
MONTGOMERY, Alabama.

PENSACOLA DIST. CONFERENCE.
The Pensacola District Conference is postponed from September 28, as previously announced, to November 24. Programme as before announced. Postponement on account of sickness in Mobile and New Orleans.
My address, after October 10, will be Pollard, Alabama, to which point all communications will be addressed.
J. A. PARKER, P. E.,
Pensacola District.

OCTOBER 3, 1870.

NOTICE.
The class of the first year, Alabama Conference, will meet the committee for examination on Monday, December 5, at ten o'clock A. M. Brother Cameron will examine the class on the Bible, historical and biographical parts; Wesley's Sermons, volume 1 of the four-volume edition. Brother Brown will examine on Clarke's Preachers' Manual, Theological Compend and English grammar. I will examine on Watson's Institutes, part 3, and Discipline and hymn book. We advise the class to study the new course also, if possible.
D. M. HUDSON, Chairman.

New Orleans Dist., Louisiana Conference.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, NOVEMBER 5, 1870.

NO. 42.

NEWS OF THE WEEK.

DOMESTIC

WASHINGTON, Oct. 29.—The Mediation Convention between Spain and the South American Republic opened here to-day, Secretary Fish presiding. All powers were represented except Bolivia, for whom the convention adjourned three weeks. The Secretary of the Navy has directed Admiral Glisson to bring from Liverpool a number of Blakely guns and other naval war material belonging to the Confederacy, but recently surrendered by England.

NEW YORK, Oct. 29.—The Italians celebrated the unification of Italy and the liberation of Rome from the Pope's sway by a grand concert, public meeting and ball.

William C. Bryant addressed the meeting.

Dr. Megi, of Boston, violently denounced Victor Emmanuel, eulogized Garibaldi and Mazzini, and hoped for a republic. These sentiments offended General D'Luca, Italian consul, who protested, and was with difficulty prevented from retiring. Nothing else marred the harmony of the meeting.

WHEELING, October 29.—Marion county gives 5 Republican majority, Lewis county 150 Democratic majority, Kanawha county 85 Republican majority, Cabell county 150 Democratic majority, Lincoln county 100 Democratic majority, Boone county 100 Democratic majority.

WHEELING, Oct. 29.—Incomplete returns from 20 counties, embracing two-thirds of the State, show large Democratic gains; enough to warrant the announcement that the State has been carried by the Democrats by a small majority—perhaps 1,000 to 1,200. This the Republicans concede.

The Democrats elect two Congressmen from the first and third districts, and by large gains will be enabled to control the next Legislature, which elects a successor to Senator Wiley.

The interior counties have not been heard from for several days, on account of the lack of telegraphic communication; but their returns will not materially change the result.

LEXINGTON, VA., October 31, via Staunton.—General G. W. C. Lee, the second son of General Robert E. Lee, and professor in the Virginia Military Institute, was unanimously elected to succeed his father as president of the Washington College. Prof. Pratt, of South Carolina, was elected professor of applied chemistry.

The board also changed the name of the college to the Washington-Lee University.

The family of General Lee have come to the final and unalterable determination to let the remains of General Lee remain where they are in the chapel designed and erected by himself.

CLEVELAND, OHIO, Oct. 31.—There was a terrible storm here last night. The propeller Neptune, with two lumber barges in tow, cast off barges, and in making port bent against the dock until she sunk. The Neptune belongs to the Erie Transportation Company and hails from Detroit. No sailing vessels reported as wrecked.

A considerable part of Winslow's block, on River street, was blown down.

BUFFALO, Oct. 31.—There has been a terrible gale here since last night from the south and east. The water in the lake is higher than ever before this season. Several vessels wrecked. It is feared that great damage will be done to the lake shipping.

MEMPHIS, Oct. 31.—Rev. Richard Hugh Bagley, a Baptist minister, well known throughout the South, died here last night.

Jefferson Davis is here.

FOREIGN

LONDON, Oct. 27.—The English ministry are met by the guarded, but absolute refusal of Russia to co-operate with them in the peace movement they are now making.

The chancellor of the Russian cabinet has been to Berlin and Tours, and is now expected at London. It is inferred that Russia contemplates isolating England from both France and Germany on the Eastern question. The steps taken by the English government, it is felt, have resulted in mortification for the Gladstone ministry, showing the weakness of England's influence in continental affairs.

LONDON, Oct. 27.—Foreign ministers at Madrid have been advised by the Spanish government of the nomination of the Duke of Aosta as a candidate to the throne of Spain, and they have communicated the in-

telligence to their respective capitals. The Duke of Aosta has signified his acceptance of the crown in case of his election and approval thereof by the great powers. It is certain that Prussia and England have committed themselves in his favor.

Four missing boats of the Cannibria were found empty to-day on the Giant's Causeway. No trace of passengers or crew.

Greece has recognized the French republic.

The dock yards and iron foundries at Marseilles are wholly devoted to the manufacture of cannon and mitrailleuse. All other work, including ship building, has been suspended.

Volunteers for the French army have arrived from Martinique.

The garrison of Tonkin has been sent into the field, the National Guard taking its place.

Schneider, president of the last Corps Legislatif, in a letter to Louvain, financial agent of France, declares that the national debt must be held sacred by every Frenchman.

The Prince and Princess of Wales are visiting Eugenie in Hazelhurst.

LONDON, Oct. 28.—The French captured the German vessel Hero, off the Bahama Islands, with seven hundred barrels of powder.

Correspondents intimate that Napoleon will go to Elbe early next month, as his health requires a warmer climate.

Berlin, Oct. 28.—The newspaper Anzeiger says: In regaining Metz, Germany has the strongest point on the Moselle, and must retain it.

St. Petersburg, Oct. 28.—The Czar has removed certain anti-German governors in the Baltic provinces.

LONDON, Oct. 28.—The Times thinks England, like America, should abandon scrupulous neutrality and supply both the belligerents.

At Orleans the Prussian bands play every evening, but the people remain housed. The shops are closed, and the women wear black.

LIMESBORO, Oct. 28.—The corporation of this city protest against the Italian incorporation of the Papal States.

LONDON, Oct. 28.—The capitulation of Metz was signed yesterday. The Prussians will occupy Metz tomorrow.

The whole number of prisoners is 143,000, including 3 marshals and 6,000 officers.

A dispatch from Tonn says: The government continues to withhold the news from the army of the Loire. It is only known that a vast number of troops has been maneuvering for some days, and great battles imminent near Lemoins and Orleans.

Nothing official from Paris to-day. The capitulation of Schlestadt is officially announced.

Thiers has gone to Paris.

MADRID, Oct. 28.—It is reported that the great powers returned a favorable answer to the candidature of Aosta.

LONDON, Oct. 28.—A Berlin dispatch to the Times says the French rejected the terms of an armistice, but thinks the fall of Metz will lead to a reconsideration.

Lord Lyons, English minister to France, has engaged quarters for the legation at Bordeaux.

It is certain that the Italian Parliament will be dissolved and a new ministry formed.

LIVERPOOL, Oct. 29.—A telegram has been received here describing the scenes around Metz at the time of the surrender.

A frightful storm had raged for several days all over the north of France. The entire country was under water, and everything was literally drowned. The telegraph wires were prostrated in all directions.

BERLIN, Oct. 29.—The news of the capitulation of Metz was communicated to Napoleon at Wilhelmshöhe yesterday. The Emperor's household is in great suspense and consternation.

LONDON, Oct. 31.—Dispatches from the East state that the persecution of Christians has been revived in Damascus, and so great is the irritation of the natives against them that a general massacre is feared.

LONDON, Oct. 31.—The first India mail via Brindisi, Italy, was dispatched from there on the twenty-fifth instant.

The event was celebrated by a large banquet, at which Edmund Tates, post office agent, spoke for England.

LONDON, Oct. 31.—The Prussians have repaired the railroad from Chalons to Paris.

Official accounts show that Germany has furnished \$65,000 men to the French war, including 116,000 from South Germany.

The Swiss government asks the Prussians to allow a weekly courier from Paris with dispatches to neutral powers.

MADRID, Oct. 31.—A formal approval by England, Prussia, Italy, Austria and Russia, of the Duke of Aosta's candidature to the Spanish throne has been acknowledged by the Spanish government.

BERLIN, Nov. 1.—The Empress Eugenie has arrived at Wilhelmshöhe. She visited the Emperor, in company with Bismarck, on Sunday last.

BRUSSELS, Nov. 1.—General Boyer, in a letter defending Bazaine from Gambetta's charges of treason, concludes with the words: "We capitulated to famine."

LONDON, Nov. 1.—The probabilities are that Lyons will be selected as the next place for the French government.

BRUSSELS, Nov. 1.—The Prussians entered Metz yesterday afternoon. The prisoners will go to Germany in small detachments. The French officers, after a pledge in writing not to engage in the war again, will be allowed their side arms and baggage, in token of the courage displayed in defense of the city.

LONDON, Nov. 1.—A dispatch from the British government, recommending the holding of elections for members of the Constituent Assembly immediately, has reached Prussian headquarters. The Prussians had already sent a similar suggestion to Paris.

The proposition of the Prussians for an armistice for forty-eight hours, in order to facilitate elections, was instantly rejected by the Paris government. It is said that the advice of influential Americans hastened the rejection.

Gambetta left Paris expressly to prevent the elections.

BRUSSELS, Nov. 1, evening.—The delay which has occurred in the occupation of Metz has given rise to disquieting rumors. It is simply attributable to the extensive preparations necessary for the reception and transport of the prisoners. The capitulation will be complied with in every particular.

Baron Von Beust is busy in attempting to bring together a European congress which will guarantee the safety, independence and support of the Pope.

LONDON, Nov. 2.—A dispatch from Versailles says: "The Paris besiegers possess one hundred and eighty heavy guns, mounted on field carriages. These carriages have a peculiar construction, allowing an elevation of an angle of forty-five degrees. The heaviest of these guns throw seventy pound shells, while many others only throw twelve pound projectiles. They have, besides, two mortars, throwing two hundred pound shells."

The range of the batteries at St. Cloud, Beugnot and Garches is from three to five kilometers, and can reach as far as the west and southwest curtains of Mont Valerien.

The range of those at Meudon, Bois de Meudon and Clamont is from four to five kilometers, and will reach Forts Issy, Vanvres and Montrouge.

There are no German troops in the peninsula of Genevilliers, which is wholly occupied by the French, who have completed their strong works at Courbevoie, Colombes and Genevilliers, by filling the gap between Mont Valerien and St. Denis.

The nearest German works to these posts are at Howelles Chateau and Carrières de St. Denis, between Mont Valerien and Fort Issy.

The French forts are armed with 64, 72, 9 and 10 inch guns, ranging from 7,925 to 9,000 yards, and throwing from 75 to 200 pound shells. The Prussian batteries at Clamont and Meudon are subject to a double line fire from the French forts. The weights and range of the French guns are greater than those of any batteries the Prussians have yet planted.

LONDON, Nov. 2.—Commander Woodworth, of San Francisco, reports much suffering among the poor in Paris.

The escape of Americans from Paris is due entirely to the firmness of Mr. Washburne, who waited on Favre and said: "After great exertion and trouble I have succeeded in gaining from the army which is investing Paris permission for a number of American families to pass through the lines. This is a great favor, as the object of the enemy must be to keep as many persons here as possible. You now refuse these families the privilege of leaving and securing their safety. I beg to-day that unless you instantly allow their departure I will withdraw myself and cease all diplomatic relations with you, and report the

facts to my government in Washington." Favre immediately granted the required permission.

LONDON, Nov. 3.—Refugees from Paris say that the Parisians are really discouraged by the anarchy which pervades France.

Advices from Rome state that the Italians continue the Pope's orders excluding Protestant worshippers from the city. The Protestant chapel remains outside the walls.

While the Pope's political authority has been abolished, now and hereafter, his ecclesiastical rights will be maintained. These constitute sovereign prerogatives.

He will have special postal and telegraph service, and territorial immunity will be accorded the Holy See, so that, being independent at home and abroad, he may take care of the interests and authority of the church.

All prelates, cardinals, bishops, spiritual ladies and ecclesiastical societies will enjoy immunity at the place of residence of the supreme head of the church, whether summoned for council or any other purpose.

Representatives from foreign powers to the Holy See will enjoy complete liberty. Messengers to and from the Pope shall have egress and ingress. Italy will consider the Pope as a foreign sovereign, and he will be treated and honored as such throughout Italy.

The appendage of the Pope and his courts will be furnished by Italy, and Italy also assumes the debts heretofore contracted by the Pontifical States.

For the full tranquillity of the Catholic world, Italy will guarantee the liberties of the church and the independence of the Pope by an international treaty. It is believed that the Pope will accept the situation.

LONDON, Nov. 3.—It is reported that Thiers' proposition to Prussia has or will be accepted for an armistice on the basis of that made by England.

Minister Washburne is preparing to leave Paris. The last batch of Americans will leave this afternoon.

THE CHATTANOOGA RAILROAD.

DRAWING THE LAST SPIKE.

It is not quite ten months since work was commenced on the Chattanooga railroad, and to-day the whole distance of one hundred and thirty-nine miles is completed. The last rail was laid yesterday (Saturday) morning at half-past ten o'clock, and a few hours afterward the ceremony of driving the two last spikes into the road was to take place.

Trains with invited guests left Mobile and New Orleans to meet at a point in the vicinity of Chef Menteur, some twenty-seven miles from this city.

The train from our city started from the foot of Canal street shortly before two o'clock. It was in charge of Mr. J. B. Franklin, one of the conductors of the road. We noticed on board the train Messrs. Roundtree, C. R. Bailey, F. Folger, Andrews, Allen, Hearsey, Jones, Judge D. Able, Judge Robinson, John L. Lee, J. Hardie and others who had been invited by Major Williamson, the superintendent of the road. The Mobile train was in charge of Conductor Murray. Among those on board were Mr. James Mitchell, one of the engineers of the road, and J. O. Balenrue, the resident engineer at Bay St. Louis.

The trains arrived at the place of rendezvous shortly after four o'clock, and at five o'clock the ceremony of driving the last spike took place. A golden spike was driven into the road by Mr. Martin Van Brocklin, the division engineer of the Mobile division, and a silver spike by Mr. R. W. Rogers, the resident engineer.

There was a silence almost solemn when the slow, measured strokes of the hammer which adjusted the two last spikes in their places announced that the Crescent City was united with the Gulf City by strong iron bands. Every one present felt the importance of the event, and all appeared rejoiced at the opening of this new highway of travel.—New Orleans Picayune, October 30.

There eloquence I find to be none but the serious and hearty love of truth; and that whose mind soever is fully possessed with a fervent desire to know good things, and with the dearest charity to infuse the knowledge of them into others, when such a man would speak, his words, like so many nimble and airy servants, trip about him at command, and in well-ordered files as he would wish, fall aptly into their own places.—Milton.

THE FLOODS IN TEXAS.

FURTHER DESTRUCTION.

Our Austin exchanges continue to report widespread destruction to crops, fencing, etc., but happily very little loss of life, from the recent flood in the Colorado. The river was again within its banks on the eighteenth. The Austin Journal, of the twenty-second, says the overflow was very disastrous. A number of lives were lost. Scores of families have been rendered homeless, and hundreds have seen all their property swept away.

The stage that was caught by the flood in the river bend at Nash's, unable to either advance or retreat, carried over two thousand pounds of mail matter. The river came up to the house and swept away all the hay and most of the crops at that point.

Felix Smith, on the Austin and Lockhart road, lost three thousand pounds of fence, eighteen yoke of oxen, eighty head of hogs and other live stock by the recent overflow of Onion creek. The water ran more than fifteen feet deep over his farm.

On Brushy and Lake creeks, says the Austin Republican, the overflow, in some places, made a clean sweep of everything. The Brushy swept off the mill and machinery of Mr. Ephraim Blair, at Round Rock, and done much other damage in that long, wide and fertile valley. Below Round Rock a freedman was drowned.

The Milan Telegram says there was not a dry spot in the bottom of Little river, between Cameron and the opposite bank of the river. All the farms in the bottom were flooded. In places where the current was not so swift as to carry the cotton off, not much damage was done.

The Gonzales Index has the following:

The buildings of the manufacturing company of Messrs. Walker & Titcomb were surrounded by water on Tuesday, the eighteenth. The current, as it swept madly on, tore away fences and bore down the crops standing in its way. Much stock has been drowned, as drift was seen floating down carrying chickens and pigs. Within a few hours the water rose twenty or twenty-five feet perpendicularly.

Larkin's mill, on the San Marcos, has been entirely swept away; and it is said that this end of the San Marcos bridge, the apron, about thirty feet in length, is gone. That river was four feet higher than during the overflow last year. About two-thirds of the cotton crop was gathered. The remaining one-third, it is thought, is lost.

We hear of no loss of life except Mr. Walker's little son. His body has not yet been found.

We have just learned that the whole Guadalupe valley was submerged. A negro man was drowned. The San Marcos bridge is not so seriously injured as at first thought. It is reported that Mooney's factory at Prairie Lea, on the San Marcos, is gone.

A New Braunfels dispatch, dated the eighteenth, to the San Antonio Express, says:

The Guadalupe river rose yesterday some two feet higher than last year's overflow; the Comal bridge is badly injured; one life lost. Crops along the river destroyed—loss on them immense.

THANKSGIVING PROCLAMATION.

WHEREAS, It behooves a people sensible of their dependence on the Almighty, individually and collectively, to acknowledge their gratitude for his merits, and humbly to beseech for their continuance; AND WHEREAS, The people of the United States during the year about to end have special cause to be thankful for the general prosperity, abundant harvest, exemption from war and civil strife;

Now, therefore, Be it known that I, U. S. Grant, President of the United States, concurring in any similar recommendations from the chief magistrates of the States, do hereby recommend to all citizens to meet in their respective places of worship on Thursday, the twenty-fourth day of November next, there to give thanks for the bounty of God during the year about to close, and to supplicate for its continuance hereafter. In witness whereof I have hereunto set my hand and caused the seal of the United States to be affixed. Done at the City of Washington, this twenty-first day of October, in the year of our Lord one thousand eight hundred and seventy, and of the Independence of the United States the ninety-third.

(Signed) U. S. Grant.

By the President: HAMMONS PISK, Sec. of State.

Preachers' Aid Society, Alabama Conference.

Mr. Editor: At a meeting of the members of this society, held in Union Springs, Alabama, in December, 1869; notice was given, according to article fourteen of the constitution of the said society, that at the next annual meeting of the society the following change in the constitution would be proposed, viz:

"That article two of the constitution of the Preachers' Aid Society be amended by the addition of the following words, viz: 'Provided, That every member so paying shall, on the death of any other member of the society, pay to the treasurer thereof the sum of \$5, which sum or sums so paid shall be paid to the widow and orphan or orphans of the deceased member; and if there be no widow and orphan or orphans, then the amount so paid shall be subject to the order of the Board of Directors, as the other funds of the society. On the death of a member the treasurer shall notify each surviving member thereof by publication in the official organ of the Conference.'"

Respectfully submitted at the request of the society.

J. A. PARKER.

NORTH ALABAMA CONFERENCE.

I wish to say to the brethren of the North Alabama Conference that upon their arrival at Gadsden they will report at the Methodist church to have their homes assigned them.

I have made arrangements with some of the railroad companies on our bounds; and also the steamboat upon the Coosa, from Rome, Georgia, to Gadsden, for the members of Conference to pay full fare as they go, and have a free ticket as they return. I hope to be able to make this arrangement with all the railroads upon which the brethren may have to travel to reach this point. I have also made arrangements with the stage contractor upon the line from Atlanta to Jacksonville, by the way of Gadsden, to furnish upon Monday and Tuesday, the fourteenth and fifteenth of November, additional hacks at each of those places, to convey them at once to Gadsden.

The brethren, if any, from east Alabama would do well perhaps to come by the way of Atlanta and to Rome, Georgia, and then upon the boat; and remember, brethren, that the boat leaves Rome, Georgia, every Tuesday morning only. I still urge that the presiding elders send on to me at once the names of all who expect to attend the session of Conference. Only Brothers Whitten, Boland and Mabry have yet complied with my request in this regard.

R. R. TIMMONS, Pastor, Gadsden Station.

GADSDEN, ALA., October 15, 1870.

The Rev. John A. Reynolds, of the North Georgia Conference, as the Sunday school secretary informs us, has recently died. He was admitted on trial in the Georgia Conference, December, 1859, at the same time with Dr. Haygood and a score beside—many of whom are now dead! Brother Reynolds was stationed at Colartown. He was a devoted, self-sacrificing and successful minister. We greatly mourn his loss.—Nashville Christian Advocate.

The Rev. Adam S. Riggs has been very sick since Conference. Brother Fisher wrote us, a few days ago, that he was still confined to his bed; and he was staying with him. We hope that the Head of the Church will spare the valuable life of his devoted servant. Since this was in type we learn that he died on Wednesday. Particulars may be expected next week.—Nashville Christian Advocate.

ACTION.—The life of man, in its true sense, consist only in constant, active exertion, not only of the body, but also of the mental faculties. He is a stranger to happiness who passes his days in listless inactivity. This man cannot possess true joy, who directs all the energies of his soul and body to mere sensual gratification and vain ambition. He is a great object and source of scorn to the faithful of the world.

Our faith, like water, is to cleanse, purify, and sanctify.

The Christian Advocate.

SATURDAY, NOVEMBER 5, 1870.

FORERUNNERS.

BY HUGH MACMILLAN.

Besides famous waterfall I've stood,
More than a thousand feet in giddy height,
And gazed far up to where the foaming flood
Burst from the sky-line on my awe-struck
sight.

So vast its volume, and so fierce its shock,
No power at first its headlong course might
stay;

It seemed as if the everlasting rock
Before its furious onset would give way.

But as it fell it lingered in mid-air,
And melted into lace-like wreaths of mist,
Decked by the sun with rainbow colors fair,
And swayed by passing breezes as they'd
list.

And when at last it reached the dimpled pool,
Hid in its granite basin far below,
Its spray fell softly as the showers that cool
The sultry languor of the summer glow.

The aspen-leaf scarce quivered to its sound,
The bluebell smiled beneath its bosom;
And all the verdure of the forest round
A fresher greenness from its baptism won.

So have I watched for coming sorrows dread,
With heavy heart for many a weary day,
Foreboding lest the torrent overhead
Should bear me with overflowing flood
away.

But when the threatened evil came, I found
That God was better than my foolish fears;
The furious flood fell gently to the ground,
And blessed my soul with dew of grateful
tears.

God mingles mercy with each judgment stern,
Brings goodness out of things we evil see;
Then let us from our past experience learn,
That as our day our promised strength
shall be!

PROVIDENCE.

The works of God are marvelous
to contemplate. His declarative
glory is set forth in every line of
light, in every circling wave of
sound, in every throb of the great
heart of the universe. External ob-
jects, which are but dimly appre-
hended through the senses and
made more plain by the light of
reason, still are invested with a
beautiful mystery which declares
him to be "glorious in holiness,
fearful in praises, doing wonders."

The counterpart of his wondrous
works is the marvel of his ways.
"His judgments are unsearchable
and his ways past finding out;"
"For who hath known the mind of
the Lord?" "Who, by searching,
can find out the Almighty to per-
fection?"

"But O the glories of thy mind
Leave all our soaring thoughts behind."

Our minds are often confused
and filled with doubts by dealing
in subtleties and abstractions. That
which is most palpable, and occurs
to us in our simplest, plainest
moods, is generally the most whole-
some food for the mind.

That our heavenly Father takes
knowledge of the "sparrow that
falls to the ground," and "num-
bers the hairs of our head," is an
exhibition of wonderful condescen-
sion and fatherly consideration that
fills the heart with love and praise.
Blind and callous as we are, unper-
ceived the operations of Divine
Providence move efficiently forward
in the accomplishment of purposes
of wisdom and mercy. As the
spheres move on in their great des-
tiny without din or jar, whether we
wake or whether we sleep, so the
hidden hand of God is moving
among his people. "What I do
thou knowest not now, but thou
shalt know hereafter," says God.

Perhaps the hint is here thrown out
that our blessed employ in eternity
will be to trace out and compre-
hend the intricate chain of Divine
Providence as it appertains to this
world, and the complex and strange
fortunes of its inhabitants.

To trace the hand of God on the
face of the heavens, amid its shin-
ing orbs; to trace his footsteps on
every continent and ocean of earth;
to trace his presence in the forma-
tion of ores and minerals, and ob-
serve with what precision the differ-
ent strata of the earth are laid; to
realize his awful presence in all the
vitalizing forces of nature, is a sub-
lime and blessed employment. But
to have discovered to us his hidden
power and secret workings in the
world of spiritual intelligences en-
wraps the soul in the sublimest con-
ceptions of his character. To real-
ize that in our lives there are the
leadings of a strange and inscruta-
ble Providence, that

"Shapes our ends,
Rough hew them as we may."

is to the Christian a solace, a stay, a
staff amid the labyrinthian mazes
of life's strange and checkered
scene.

Perhaps every child of grace who
has much experience in the "deep
things of God" can advert to inci-
dents of marvelous deliverances from
trouble and death which stand forth
as Ebenezers of the past; and, when
involved in trouble again, the argus
eye of faith retrospectively sees these
marked instances of divine interpo-
sition, and we stand firm, for "hith-
erto the Lord hath been our
helper."

The proud ocean steamer that
was to bear the young mother to a
distant port to join her absent hus-
band, who had not yet looked on the
face of his first-born, is driven by
the furious storm, and all is lost—
not one left to tell the story. The
existence of yellow fever renders
quarantine regulations necessary at
that port; this prevents her em-
barkation. She is deeply afflicted
and almost inconsolable. The pas-
tor, visiting her at this time, says:
"Wait; be not disconsolate; see if
there is not a gracious Providence
in it." A letter is received in two
or three days after the departure of
the steamer, saying that the hus-
band, with his vessel, was engaged
to set sail for another Atlantic port,
and for the wife to join him there.
A satisfactory solution of the disap-
pointment was at once made; but
after the lapse of a few weeks it is
ascertained that the vessel is lost
and all on board have perished.

How strange a providence! Now,
with hearts all mellowed and eyes
filled with tears, the grateful prayer
is offered by herself and relatives to
him whose "loving kindness is over
all his creatures, and who guides by
his counsel." Truly,

"He plants his footsteps in the sea,
And rides upon the storm."

The angel of death flaps his wings
at the threshold, and after a short
delay enters the dwelling where the
little family group abides in love.
At one fell stroke the strong arm is
powerless, or the fond mother's
placid smile fades from view, or the
child of hope and promise is the
mark of death's unerring shaft. O
how strange and inscrutable the
providence! And yet in after years,
and by subsequent developments,
the veil of mystery is lifted, and we
observe the providential dealings of
a wise and merciful God. Again is
demonstrated that oft-used phrase:
"Too wise to err, too good to be
unkind."

"Judge not the Lord by feeble sense,
But trust him for his grace;
Behind a frowning providence
He hides a smiling face."

LETTER FROM MANSFIELD.

MANSFIELD, LA., Oct. 20, 1870.

MR. EDITOR: We have been at
home for some days to rest and re-
cruit from our labors on the dis-
trict, which we would have enjoyed
much more had we not been afflict-
ed literally with "a thorn in the
flesh," but we do not complain, as
we have had grace to bear it. This
being the last evening which we
shall have to spend at home for
some time, and being undisturbed,
we propose penning a few random
thoughts for the Advocate.

For two weeks past the District
Court has been in session in our
town. The courthouse is a place
we rarely visit; but having to pass
through the clerk's office to return
the marriage certificate of a young
pair whom we had the pleasure of
coupling a few evenings before, we
stopped to hear the sentence passed
by Judge Levisse upon two crim-
inals, both of whom had been con-
victed for murder. The jury hav-
ing returned a verdict of "murder
without capital punishment," the
only alternative for the judge was
to sentence them to the State prison
for life. He added a very appro-
priate exhortation to them, that
they would repent, reform and do
better.

We have been reading, this week,
three prize essays on the subject
of systematic beneficence, and we
are more than ever impressed with
the great contrast in the practice of
the church and what the Bible requires
on the subject of giving. We have
sketched a skeleton of a sermon on
the subject, to be filled out and
preached. What more can we do

than to give line upon line and pre-
cept upon precept, here a little and
there a little?

The financial committee of our
late District Conference made a
good report on the subject, and we
are in hopes that the secretary will
furnish you with a copy for publica-
tion.

As you have had no account of
our late District Conference, suffice
it to say that we had a very pleas-
ant meeting, which resulted in
eleven accessions to the church and
a number of conversions. The usual
committees were appointed. The
chairman of each would inquire of
each preacher, as he gave an ac-
count of his work, of all that refer-
red to the subject of his committee.

The Committee on the Spiritual
State of the Church inquired:—
"How many model or specimen
Christians are on your work in pro-
portion to the number?" Toward
the last a brother, being asked this
question, said he would have to fix
a standard. "If I take that brother's
standard over there, who re-
ports four hundred members and
\$175 for support, and his work not
self-supporting, and still one-tenth
of his members model Christians;
or if I take that brother's standard
over there, some of whose members
drink whisky for the sake of the
dram, then I may also report model
members. My church supports me
better than that; and though some
of my members drink whisky, they
have neuralgia, and therefore have
an excuse to render. But if I take
Paul's standard, I know not that
any come up to his idea of model
Christianity."

We still occasionally agitate the
subject of temperance. At our last
monthly meeting we had a good
address from the Hon. J. L. Seales.
We hope to get a great deal of in-
formation on this subject from the
preachers at our next Annual Con-
ference, from their respective works.
President Stuart hopes to be able,
ere long, fully to discuss the reli-
gious aspect of the subject through
the columns of the Advocate.

The honorable Governor War-
moth is up in this part of the State,
and, strange to say, he made a po-
litical speech last Sabbath. It is
humiliating to think that our high-
est official of State has no more re-
gard for God or civilization than to
desecrate the holy Sabbath by mak-
ing political or Radical speeches.
We hope in the future, though he
may have no fear of God or regard
for man, that for the sake of his
constituents he will set a better ex-
ample.

No doubt the friends of the Mans-
field Female College will be grati-
fied to learn that the fall session
has opened favorably, especially as
so many fears were entertained, and
justly too, with regard to its suc-
cess after the death of Mrs. L. L.
Stuart, one of its oldest and most
efficient teachers. There is a larger
number of matriculates now than
any one year since the war as early
as this after the opening session.

We did think of calling the atten-
tion of your patrons, and especially
parents, to the revolting practice
of snuff-dipping among the fair ones,
and especially as it is a growing
evil, and is obtaining a place among
the girls of the land. The switch-
brush in the mouth and snuff-bottle
in the hand, even among young la-
dies, is often the case. The effect
is apparent. The sallow, swarthy
complexion produced by its use is
enough to remind one of a moving,
galvanized corpse. But having oc-
cupied more space than we intend-
ed, we will leave this evil for some
one else to expose. MANSFIELD.

A LITTLE BOY nine years old, a
member of the Band of Hope, was at
a dinner party a short time ago,
and those present wanted to test
the strength of his principles. A
half sovereign was put into the bot-
tom of a tumbler, which was then
half filled with ale. "Now," said
they, "if you'll drink that you shall
have what is at the bottom."

"No," replied the noble little fel-
low, "nor a dozen half sovereigns
shall make me break my pledge!"
Surely the "root of the matter" was
in him. That noble child will make
a noble man.

OF POLITICAL hypocrites their
name is legion who make promises
before elections and turn them to
lies after.

Conference Reports and Annual Exam-
inations of Character.

MR. EDITOR: The subjects of this
heading, it seems to me, need some
ventilation in our Conferences, or
at least a change in the proceedings
generally had. I think a change for
the better might be made. The sta-
tistics are not full by a great deal,
in many instances, while the exam-
inations of character call forth such
remarks as leave us in the dark as
to what the brother has done. Hence
I have been thinking a change after
this sort might or ought to be
made, viz:

When the name of John West is
called, and it is said there is noth-
ing against him, let him arise in his
place and read his report:—"At the

last session of our Conference I was
appointed to Jamestown circuit. I
reached it on the fourth day of Jan-
uary, and found I had eight appoint-
ments to fill in the month. I filled
all the appointments at Shilo, and
held a meeting of eight days, at
which sixteen were converted and
fifteen joined the church. I preached
ten times during the meeting. I
filled all the appointments at Bethel
but one, which was prevented by
rain. I held a meeting of ten days,
at which twenty were converted and
twenty-two joined the church. I
preached twelve sermons at it. I
filled all the appointments at Union,
and held a meeting of six days,
which resulted in twelve conver-
sions and ten additions to the
church. I preached eight times at
that meeting. I filled all the ap-
pointments at Shady Grove but two;
family affliction kept me from them.
Yet at a meeting of ten days there I
preached fifteen times. There were
thirty conversions and twenty-five
accessions to the church there. At
Hood's chapel I missed two regular
appointments, occasioned by rain
once and personal sickness once. At
a meeting of nine days there I
preached ten times. Some eighteen
were converted and twenty joined
the church. At Bunche's school
house I failed to fill three appoint-
ments—once to attend quarterly
meeting, once to assist in a meeting
on Ashland circuit, and once the
rain kept me away. At a meeting
of twelve days there I preached fif-
teen times. There were twenty-five
conversions and twenty-two joined
the church. At Wesley chapel I
failed four times to fill the regular
appointments—once to attend quar-
terly meeting, twice to continue
meetings at other places, and once
to attend a sick child—yet succeeded
in having three of these filled by a
local brother. A meeting of six
days there resulted in nine conver-
sions and ten accessions to the
church. I preached nine times at
that meeting. At Mount Zion I
failed at three of the regular ap-
pointments—by protracting meet-
ings twice, and once at quarterly
meeting. A meeting of eight days
there resulted in twelve conversions
and fifteen accessions to the church.
I preached ten times at that meet-
ing. A destitute neighborhood was
visited, where I preached some eight
months regularly, and report a mem-
bership of eighteen members, and
return it as a regular appointment
on the circuit. Thus, including four
sermons at quarterly meetings and
ten off the circuit, I have preached
one hundred and seventy-nine ser-
mons. There have been one hun-
dred and fifty-two conversions, and
one hundred and fifty-seven acces-
sions to the church. I found two
hundred and forty members on the
church books. Of these, six have
died in great peace, ten have re-
moved, and one was expelled, re-
ducing the number to two hundred
and twenty-three. Add the one
hundred and fifty-seven, and we
have three hundred and eighty mem-
bers. I have visited two hundred
and ninety families, and made five
hundred and eighty visits, and trav-
eled three thousand five hundred
miles. I have baptized forty-five
children and twenty-seven adults.
Raised for missions \$160, for Con-
ference collections \$160, for Bishops'
fund \$75, for building a church
\$2,000, for a parsonage \$1,500; re-
ceived as salary \$1,000."

It seems to me that a report of
that sort, with such remarks as
might often be made by the brother

and others present, would be more
interesting than what is generally
said in our Conferences. Will some-
body move to have such a plan, as
this adopted in the Mississippi Con-
ference?

The plan would make some men
take notes and make reports who
do not come up fully to the work
now.

P. S.—The report might be put
in tabular form, and, when read, re-
marks made and incidents related.

MOSES AND GEOLOGY.

MR. EDITOR: If the disclosures of
nature—the older revelation of God
—are opposed to the teachings of
the Scriptures—the younger revela-
tion—all truly enlightened minds
ought to regard the former as inex-
plicable, and the latter as an inge-
nuous myth. What profound intel-
lectual interests cluster around our
use of *if*! Though we thus write,
we are abidingly persuaded that all
things above and below perfectly
accord with Moses, properly under-
stood. We shall allow him to speak
for himself, and to interpret his own
statements:

Genesis i, 1—"Bereshith (in the be-
ginning) Elohim (God) bara (made)
eth (the substance of) *hashamayim*
(the heavens) *ve-eth* (and the sub-
stance of) *haarets* (the earth.)" The
time of the origin of the solar sys-
tem is denoted by *Bereshith*. *Bara*
not only expresses the intensity of
make, but of form. *Shamayim* and
arets include the sun, planets, satel-
lites and comets. The substance
(*eth*) of all these was made of pre-
existing matter which was origin-
ally created, far beyond the dawn-
ing of the first day. Moses, as we
shall immediately see, speaks posi-
tively and conclusively as to the
making of all things, to the exclu-
sion of "creating out of nothing."

Verse 21: "And God made (*bara*)
great whales." They were made of
water, pre-existing, by the word of
his power. Verse 27: "So God
made (*bara*) Adam in his own im-
age, in the image of God made
(*bara*) he them." In the previous
verse we read: "Let us make the
Adam (first couple) in our image."
Their history shows that they were
made of pre-existing material, not
"created out of nothing." Chapter
ii, 3: "And God blessed the sev-
enth day, because that in it he had
rested from all his works which
God formed," (*bara*) to make. The
meaning is obvious. The first man
(*ish*) was formed, and then made a
living creature by an act of breath-
ing. Another example is unneces-
sary. Chapter v, 1, 2: "In the day
(sixth) that God made (*bara*) Adam,
in the likeness of God made he him,
male and female made (*bara*) he
them, and called their name Adam
in the day when they were made,"
(*bara*.) In this we have *bara* used
three times to express an act of
making. Thus have we the true
import of the first verse of Genesis:
"In the beginning God made the
substance of the heavens and the
substance of the earth."

All fossils, not in accordance with
the Mosiac narrative, must be classi-
fied with anterior conditions or
transformations of the earth. There
is not one passage in the Holy
Scriptures to confront the enter-
prise.

How confirmatory the declara-
tion: "Thus *hashamayim* and *ha-
arets* were finished, and all the *tsaba*
of them!" *Shamayim*: Sun, Mer-
cury, Venus, moon, Mars, Jupiter,
Saturn, Herschel, Ceres, Pallas,
Juno and Vesta; *arets*: our planet;
Tsaba: satellites and comets. The
substance of each was made at the
commencement of the first day. At
the close of the sixth all were per-
fect. The whole amount of time
in actual labor was seventy-two
hours. The six indefinite periods
of geologists are six unscriptural
and unreasonable errors.

If agreeable to the mission of the
Advocate, we would give a brief
comment on every verse of the first
chapter of Genesis. ADAM.

THE Indians under Red Cloud
have manifested a very powerful
spirit for more than five months—
since their chief's visit to Washing-
ton.

SEASONABLE ADVICE—Have your
census about you

PENSACOLA DISTRICT.

MR. EDITOR: The good news which
comes to us through the columns of
the Advocate, from all parts of our
church, is, in the midst of the dark
and perilous surroundings of these
"evil days," as rays of light to a
wanderer in the darkness.

For three years a few of us have
been working for the resuscitation
of our church in the Florida part of
the Alabama Conference. Brother
Dennis and his faithful co-workers
on the Mariana district seem to be
holding on to the right, and, with
the blessing of the good Lord upon
their labors, to be advancing their
Master's kingdom.

I have just completed the tour of
this district, and find in most places
that the work has not been in vain.

In Pensacola, where two years ago
there was no church organization,
we now have a membership of over
seventy, and Brother Pace, by his
zeal and acceptability, has succeed-
ed in erecting a neat church house
sufficiently large for our purposes
there at present. His success has
been far greater than we at first
hoped for. While all needed praise
is due to those who succeed, those
who assist should be remembered.

Brother Pace's success is owing
largely to the co-operation of the
citizens of the city. During last
year Rev. E. B. McClellan succeed-
ed in getting together about forty
names, which was all Methodism
held in Pensacola until Bro. Pace
began his work last January. Now
we have, I think, over seventy mem-
bers, have paid a debt of over
\$1,500, and have built, furnished,
seated, painted, and paid for a house
of worship. It was dedicated last
May. The charge is a missionary
field, and must be for some years
to come; but still our church in
Pensacola is a live church.

Pollard circuit, for two years un-
der the pastoral charge of Brother
Mountain, has been worked up from
a mission to a self-sustaining cir-
cuit, and the membership increased
from two hundred and eighty to four
hundred members. In addition to
this work, Black Water mission,
which was formed by Bishop Paine
last winter, has been served by Bro.
Mountain, and one now society or-
ganized. The services at Spring
Hill, on the mission, last Sunday,
were of a very interesting and pro-
fitable character.

At Walnut Hill, on Pollard cir-
cuit, the Sabbath before last, a more
thorough moving of the hearts of
the people I never witnessed. It
was truly a melting down of stub-
bornness, and a breaking up of the
"fallow ground" of sinners' hearts.
There were three accessions at each
of these meetings, and twenty-five
baptisms at the two.

Yellow River mission has not been
occupied for want of funds in the
missionary treasury.

Milton has grown steadily on, and
is now in as good condition as any
church of its numbers in the Con-
ference. The average payment per
member is about \$2. Whose charge
beats that?

The impossibility, at present, of
occupying all the territory in the
district suggests the propriety, it
seems to me, of merging this into
the Mobile district, especially since
the recent change in our Confer-
ence lines and the completion (to
the M. and M. railroad) of the Pen-
sacola and Louisville railroad places
all the appointments now occupied
in the Pensacola district within
easy reach of railroad or river
navigation.

I am happy to report the entire
district (?) in a prosperous condi-
tion. Truly yours,

J. A. PARKER, P. E.

A GOOD RESPONSE—Hahnemann,
the founder of the homeopathic
school, was one day consulted by a
wealthy English lord. The doctor list-
ened patiently to the statement which
the patient made to him. He then
took a small vial, opened it and held
it under the lord's nose—"Snell!
Well, you are cured!" "The lord
asked in surprise: "How much do I
owe you?" "A thousand francs,"
was the reply. The lord immedi-
ately rolled out a bank note and
held it under the doctor's nose—"
Snell! Well, you are paid!"

God forbid that the manly energy
of Christian speech should sink into
hypocritical cant.

The Christian Advocate.

SATURDAY, NOVEMBER 5, 1870.

OLD TIMES.

There's a beautiful song on the slumberous air,
That drifts through the valley of dreams;
It comes from a clime where the roses were,
And a tuneful heart and bright brown hair
That waved in the morning beams.

Soft eyes of azure and eyes of brown,
And snow-white forelocks are there;
A glimmering cross, a glittering crown,
A thorny bed and a couch of down,
Lost hopes and leaflets of prayer.

A breath of spring in the breezy woods,
Sweet wafts from the quivering plumes;
Blue violet eyes beneath green hoods,
A bud of brooklets, a scent of buds,
Bird warblers and clambering vines.

A rosy wreath and a dappled hand,
A flag and a slighted vow—
Three golden links of a broken band,
A lay track on the snow-white sand,
A tear and a slumberous brow.

There's a thine of grief in the beautiful song,
That sob on the slumberous air,
And loneliness felt in the festive throng,
Slaves down on the soul as it trembles along,
From a clime where the roses were.

We heard it first at the dawn of day,
And it mingled with mirth and merriment;
But years have distanced the beautiful lay,
And its melody flows from the far away,
And we call it now Old Times.

FARADAY.

Michael Faraday, the eminent chemist and discoverer, was born in 1791, in Newington. His father was a blacksmith, and could afford to give Michael only a very ordinary education. At the age of thirteen, when he was engaged to a book-seller as shop-boy, he was only imperfectly acquainted with the rudiments of reading, writing and arithmetic. He soon rose to the position of bookbinder, and had two boys under his direction. In the mean time his thirst for knowledge and great desire for experiment led him to embrace every opportunity for their gratification. "Whilst an apprentice," said he, "I loved to read scientific books which were under my hands, and amongst them delighted in Marcell's Conversations in Chemistry, and the electrical treatises in Encyclopædia Britannica. I made such simple experiments in chemistry as could be defrayed in their expense by a few pence per week, and also constructed an electrical machine, first with a glass plial, and afterward with a real cylinder, as well as other electrical apparatus of corresponding kind."

His master allowed him to go occasionally on an evening to hear lectures on natural philosophy, his expenses being generally defrayed by his brother. At this time he read Watt's On the Mind; and an article on electricity in an encyclopædia he was binding, he says, first set him to thinking and turned his attention to science. His desire was to escape from trade, which "I thought vicious and selfish, and to enter into the service of science, which I imagined made its pursuers amiable and liberal." He was brought under the notice of Sir Humphry Davy, whose lectures he had been attending, and the latter had him appointed his assistant in the laboratory of the Royal Institution, at a salary of twenty-five shillings a week. Davy's opinion of Faraday's scientific knowledge was such that in a few weeks after his installment in the Institution he engaged him in some scientific investigations which required great skill and knowledge to pursue. The experiments proved a complete success, and in 1813 Davy took Faraday abroad with him as an assistant and amanuensis. The tour lasted a year and a half, during which time he kept a journal, in which he described all he saw, and gave full particulars of the discoveries of Davy.

On his return home his salary at the Royal Institution was raised to thirty shillings per week. A somewhat singular occurrence took place while Davy and Faraday were abroad. Professor de la Rive gave a dinner while they were at Geneva, to which he invited both Davy and Faraday, but the former refused to dine with his assistant, whom he regarded in some respect as his servant. De la Rive, who recognized the genius of Faraday, then remarked that he should have the pleasure of giving two dinners.

In 1816 Faraday began to lecture at the City Philosophical Society. In 1821 he married. "The first or introductory period of his scientific activity had now commenced, and in the ten years which followed his marriage he was constantly engaged in preparing himself for the great discoveries which afterward awaited his labors."

"The first scientific honor which Faraday received, out of a total of ninety-five honorary titles and marks of merit, was in 1823, from the Cambridge Philosophical Society. When asked what were his titles: 'One title—namely, that of F. R. S.—was sought,' said he, 'and paid for; all the rest were spontaneous offerings of kindness and good will.'"

THE STATE OF THE DEAD.

In 1831 Faraday began the greatest work of his life—Experimental Researches—the manuscript of which, consisting of eight large volumes, he bequeathed to the Royal Institution. He completed the whole work in about twenty-five years. In the meantime he prosecuted with great perseverance and success his researches on electricity.

"The strain which the labor of the last ten years had put upon Faraday proved too much for his frame to bear. Long ago he had complained of loss of memory, and now, in 1841, when he was fifty years of age, giddiness and mental depression altogether stopped his experimentalizing. For the four following years, with the exception of an inquiry into the cause of electricity produced in Armstrong's steam electrical machine, no researches in electricity were published. He rested entirely for a year, and went to Switzerland for three months. When he began to work again he returned to his investigation of the liquefaction of gases."

In 1845 he again began his researches in electricity, which lasted for a period of ten years.

"Early in his career Faraday had to decide whether he should make wealth or science his pursuit in life; he could not serve both masters. After his discovery of magneto-electricity, the commercial world would hardly have considered any remuneration too high for the aid of such abilities as his. He might easily have made his professional business yield him £5,000 a year; his accounts plainly show how and when he made his choice, for in 1832 his business income, instead of rising to £5,000, diminished from £1,090 4s. 0d. to £155 9s. 0d., and in 1833 it fell to zero, at which point it remained for the rest of his life, with trifling exceptions."

"Taking the duration of his life into account, this son of a blacksmith and apprentice to a bookbinder had to decide between a fortune of £150,000 on the one hand, and his undivided science on the other. He chose the latter, and died a poor man. But his was the glory of holding aloft among the nations the scientific fame of England for a period of forty years."

BOOKS.

The Southern people want books. As far as our observation extends, there is a lamentable deficiency of something to read in the homes of even our most cultivated people. The war destroyed books and cut off the supply of them. After the war the attention was necessarily absorbed upon repairing the spoiled farms and dilapidated homes and war-worn wardrobes. Books were out of the question. Nobody in the country had any to sell, and nobody had money wherewith to buy. But things are better now. Bread and horses are plenty again. The fields are fenced. The men are supplied with tobacco and the women with tea. Now, if the Southern people will not have the Yankees to get two centuries ahead of them, they must read books, and new books. They must read newspapers; particularly we think it will do them good to read ours; but we do not insist upon that—some paper of high character they ought to read and provide for their children. The people who read will govern those that do not; and the Yankees read books and newspapers to an extent that the Southern people can hardly conceive to be possible. It is a positive fact, strange as it may appear, that no respectable Yankee thinks six cents a week too much to pay for the mental food of a whole family for a week. Yet among us we find parents who will cheerfully pay that much for seed to feed a canary bird, but who cannot afford so large a sum for a religious newspaper. We may make what laws we please and raise as much cotton as we please; but if we do not give our children the same amount of mind-food that the Yankees give theirs, our children will be hewers of wood and drawers of water for theirs. Schools are not enough. What is the use of sending girls to school to give them a taste of knowledge, and then bring them home to a house destitute of all modern information?—*Baltimore Christian Advocate.*

WINNING.—A curate who adopted a monotonous whine in his prayers, on being remonstrated with by his diocesan, pleaded that such a tone was very proper in acts of supplication, because beggars always assumed a whine when they asked for alms. The bishop replied: "Yes; but when they do I always know that they are impostors, and give them nothing."

A NEGRO boy in Columbus rashly went in bathing the other day and was drowned. His mother said it served him right for taking up unwarranted notions. He nobber was washed before.

THE STATE OF THE DEAD.

One of the heresies of the day, demanding more than ordinary notice, is that comfortable doctrine respecting the unconscious state of the soul in the interval between the death and resurrection of the body. This notion is rather an inference than the original premise. It is a result of the denial of the essential immortality of the soul and of the nature of spiritual death. The tendency is manifestly materialistic. Among the patrons who have given an appearance of respectability to the error, for such it unquestionably must be named in view of the positive teachings of Revelation, is Archbishop Whately. Others have carried his idea out to an extent far beyond the boundaries which he had marked. He never taught the annihilation of the wicked after the final judgment. In his view the death of the believer is not a more abundant entering into life, but a sleep resting upon both soul and body, and continuing until the general awakening on the resurrection day; but others who quote him as authority have stretched the doctrine until it is made to include eternity as well as time.

They deny that the punishment of the wicked shall be everlasting, so far as regards consciousness. They are to be for ever, as though they never had been. In support of this they quote some passages from the Old Testament. Their oracle, Hudson, makes large use of the book of Job in the citation of proof texts; but it is needless to quote them, in view of the utter refutation administered by several familiar passages from the words of Christ himself. If the truth were with them, our Lord would never have spoken of the various degrees of punishment to be inflicted in the eternal world on the children of wrath; and yet we read that he upbraided the cities in which his mighty works were wrought, because they repented not. "Woe unto thee, Chorazin; woe unto thee, Bethsaida; for if the mighty works which were wrought in you had been done in Tyre and Sidon, they would have repented long ago in sackcloth and ashes. Wherefore I say unto you, it shall be more tolerable for Sodom and Gomorrah in the day of judgment than for you."

How more tolerable, if all alike are to be plucked out of conscious existence?

To the same purport is the discrimination which our Lord establishes between the servant who knew not his Lord's will and prepared not himself, and that servant who knew and yet did not according to his will. The one shall be beaten with few stripes, the other with many. That this has reference to the awards of eternity is plain.

Manifestly, the doctrine of the annihilation of the wicked finds no support in the teachings of our Lord; but it is also absolutely contrary to reason, and is as philosophically as it is scripturally absurd. Among the established verities of science is the indestructibility of matter. Not a particle of the world's substance has been annihilated since the beginning of the creation. Matter may be dissolved or disintegrated, but it exists still in other combinations and forms. Not a drop of water has been lost since the Lord first watered the earth. And now shall we accept, as a doctrine of divine revelation, that spirit, which is more noble than matter, is subject to a law of annihilation absolute and eternal?

Like all error, it is comfortable. The wicked who hate God may, in their heart, prefer this idea to that of annihilation enough to make the soul shudder with affright? It does violence to the first instinct of the soul. The mind must be schooled into accepting it as a truth. The first effect of assent to the doctrine of the soul's unconsciousness is to rob the believer of the solace which takes away the bitterness of death. The most evangelical of the advocates of the sleep of the soul speak with horror of the approach of death. They tremble in its presence, as though it were still the king of terrors, whom Christ had never conquered and disarmed; though Paul had never written, by inspiration of the Holy Ghost, these precious words: "Forasmuch as the children are partakers of flesh and blood, he likewise himself took part of the same, that through death he might destroy him that had the power of death, even the devil, and deliver them who, through fear of death, were all their lifetime subject to bondage."

According to them, even they who are blessed and who have hope in their death, and whose latter end is peace, go away into the land of darkness and forgetfulness, and sleep both in soul and body until the Lord comes.

Not so does Paul teach, when he says: "I desire to depart and to be with Christ, which is far better." Not so does that voice from heaven bid us believe, when it calls to the sorrowing who mourn over the blessed ones whom God has taken: "Write: blessed are the dead who

die in the Lord from henceforth. Yea, saith the Spirit, that they may rest from their labors, and their works do follow them."—*Christian Intelligencer.*

A PLEA FOR LITTLE TOES.

We confess to being unable to understand why the Lord ever made a little toe on the human hip unless he made it for a perpetual punance, for it is purely a sacrificial little toe. But then we have often wondered why he made musquitos, fleas and snakes. The unavailing knowledge which the latter imparted to Eve, to the everlasting sorrow of her multitudinous daughters, to our mind was not cause sufficient for the making of the tempter. Thus through much tribulation we have come to the conclusion that the Lord made him and little toes also to torment us, of course because a little wholesome torment is good for us.

But it is not agreeable, and we would like to mitigate it. For we really think that even little toes have "rights" as well as men, babies and women, which all shoemakers are bound to respect. Why don't they, then? We devoutly believe that there is not a shoemaker in the universe who by any means pleasanter than the pillory could be brought to allow space in a boot to hold the helpless little toe. We speak with the sanction of experience. We have planted a foot on a piece of paper as wide as it would spread, and while the shoemaker followed the outline, have conjured him to leave room for that toe. He never did it. Numerous untarnished boots, hanging against a wall, bear expressive witness to the inhumanity and utter lack of anatomical knowledge in shoemaking men. No wonder a girl out West had her little toes chopped off. And no wonder the young lady in Hartford had such sore feet on her wedding day that she could not stand up to be married. The only wonder is that our women stand up at all, much more that they walk, which, by the way, they do more badly than any women under the sun except the Chinese. We used to pity the poor Chinese women, but have transferred our compassion to our country women. Look at them as they pass by your window some bright day! The wretched fiction of a "Grecian bend," the more wretched fact of laced up lungs, cannot account wholly for that feeble, teetering, gasping walk, a walk utterly devoid of vitality, elasticity or grace; but looking down, the wretched little boot with its French heel, bringing the whole weight of the body upon the toes, explains it all. And this creature with cramped nerves and muscles, partial and feeble circulation, is to be the mother of men! Whew!

The ungarnished fact is that American women are fast becoming a nation of cripples. Nothing can prevent their growing to be such, unless there is an entire and radical change in the shape of their shoes. Girls, respect the rights of your little toes. If you don't they will turn and rend you.—*Brooklyn Union.*

A SUNBEAM.—The greatest of physical paradoxes is the sunbeam. It is the most potent and versatile force we have, and yet it behaves itself like the gentlest and most accommodating. Nothing can fall more softly and more silently upon the earth than the rays of our great luminary—not even the feathery flakes of snow, which tread their way through the atmosphere as if they were too flimsy to yield to the demands of gravity like grosser things. The most delicate slip of gold leaf, exposed as a target to the sun's shaft, is not stirred to the extent of a hair, though an infant's faintest breath would set it into tremulous motion. The tenderest of human organs—the apple of the eye—though pierced and buffeted each day by thousands of sunbeams, suffers no pain during the process, but rejoices in their sweetness, and hesses the useful light. Yet a few of those rays, insinuating themselves into a mass of iron, like the Britannia Tubular Bridge, will compel the closely knit particles to separate, and will move the whole enormous fabric with as much ease as a giant would stir a straw. The play of those beams upon our sheet of water lifts up layer after layer into the atmosphere, and hoists whole rivers from their beds, only to drop them again in snows upon the hills, or in fattening showers upon the plains. Let but the air drink in a little more sunshine at one place than another, and out of it springs the tempest or the hurricane, which desolates a whole region in its lunatic wrath. The marvel is, that a power which is capable of assuming such a diversity of forms, and of producing such stupendous results, should come to us in so gentle, so peaceful and so unpretentious a guise!—*British Quarterly Review.*

They who are too poor to trade in the world may buy abundantly in God's market.

RELIGIOUS INTELLIGENCE.

MIDDLETOWN UNIVERSITY reports fifty-one new students; the Northwestern has sixty in the freshman class, the Boston Theological Seminary fifty-six, and Drew seventy.

BOWLING ALLEYS.—The action of the Young Men's Christian Association, in Washington, D. C., in providing two bowling allies to amuse visitors is being criticised. A correspondent in the Methodist Home Journal defends the idea.

IS SEVEN COUNTIES OF Pennsylvania, with a population of two hundred thousand, there is but one Baptist church in each county. In ten other counties, with an aggregate of nearly a third of a million people, there is no Baptist organization whatever.

A NATIVE CHINESE PREACHER.—Hu Sing Mi, a preacher and pastor in connection with our mission in Foochow, China, has been transferred by Bishop Ames to assist Rev. O. Gibson in our mission to the Chinese in San Francisco, California.—*Northwestern Christian Advocate.*

The Methodist Scandinavian churches in the Northwest have been mainly built up by missionary labors in Norway. As rapidly as the Norwegians are gained over to the denomination, the better portion begin to ask questions about America as well as about dogmas, and the next step is emigration.

The editor of the Liberal Christian publishes a curious letter from an indignant non-subscriber living in Concord, New Hampshire, which closes with the singular assertion that "liberal Christianity is nothing more than an astronomical rack work prism apparatus to show the system of pagan mythology under the cloak of sanctimonious hypocrisy."

The Western Catholic says that "for every Catholic child attending a Catholic school, there are nine attending a public school." It adds that with the exception of a letter from "the good priest at Teutopolis, Illinois," it has "received no evidence that any member of the denomination was interested on the question of paying taxes to make his children infidels."

BIBLE SOCIETY GROWING.—The American Bible Society received the largest amount during the last year ever received in one year—\$747,058.69. It issued 1,330,640 books, valued at \$513,578.90. Books have been issued in more than fifty languages. Within fifty years this society has sent out 26,572,371 volumes, embracing the whole or part of the sacred volume, without note or comment.

The "Mite-Chests System," which has lately been introduced by the Protestant Episcopal Church in this country, as a self-operating method for collecting funds in aid of mission work, is found to be a success. The Spirit of Missions says that twenty thousand of these chests have been sent out for re-delivery before the first of January. Less than six thousand gave return for the first half year of \$7,777.73. The total realizations, within one year from the day on which the first one was sent into the field, are estimated in advance at from \$25,000 to \$30,000.

The recent organic change in the Irish Episcopal Church has necessarily greatly diminished the revenues of the under clergy. Nevertheless we confess to surprise at the contents of a letter which a Rev. Mr. Scott has just put into print, as coming from a brother clergyman in Ireland. The letter says: "For want of a decent mud cabin to reside in, to add to all our other discomforts, we are obliged, seven of us in number, to live day and night in the vestry-room of the church, which is ten feet six inches long by nine feet broad, and, to crown all our miseries, we are in daily dread of being summoned by the bishop for taking up our temporary abode in the vestry-room, though the church was never consecrated."—*Christian Union.*

A GREAT obstacle to Christian missions in the towns of South Africa is found to be Mohammedanism, introduced there in the period of Dutch rule from their possessions in the Eastern Archipelago. One-fifth of the population of Cape Town is said to be of the "false prophet's" faith. Mosques are found here as in Mohammedan countries, and the interests of those worshipping in them are protected by Turkish consuls and others rendering service of this kind by authority of the Sultan. Islamism, wherever found, is a bitter foe to the gospel of Christ—a belief, as all missionaries to Mohammedan countries know, which is hard to shake, and harder to uproot. But the promise reaches to Africa not less than to other benighted peoples, and the truth that makes men free has the power which Christ will put forth in due time to vanquish all corrupting creeds, as well as all superstitions and idolatry.—*Interior.*

MISSIONARY INTELLIGENCE.—The progress of Protestantism in South

America is very interesting. During the past year churches have been organized under the auspices of the Southern Presbyterian Church, in Campinas, a large inland city of Brazil; Baranguilla, the largest seaport of the United States of Columbia; and Hanboun, Central China. The churches in Indian Territory have also received large accessions to their membership.

The new church in Santiago, Chili, is the first house erected for Protestant worship in the Spanish language on the west coast of South America. Its cost was \$12,000, and it will seat three hundred and fifty. A church, to seat six hundred, is being erected for Dr. Trumbull's congregation at Valparaiso. Two Protestant Spanish monthlies are issued—one in Valparaiso and one in Santiago. The Bible Society of the former city sustains two colporters and a depository. There are now in Chili ten Protestant ministers and fourteen congregations—a five-fold increase in the first case, and a seven-fold in the latter, since 1856.—*Methodist.*

The following is the circular from Cardinal Antonelli to the Papal Nuncio in Brussels, declaring the doctrine of infallibility to be of once of binding force:

"MOST ILLUSTRIOUS AND RIGHT REV. LORD: It has come to the knowledge of the Holy See that some Catholics, and perhaps even one or two bishops, imagine that the apostolic constitution proclaimed at the Ecumenical Council of the Vatican, in its session of July 18th, is not binding so long as it is not solemnly published by an additional act of the Holy See. No one can surely fail to understand how strange such a proposition as this is. The constitution in question was promulgated in the most solemn manner in which it could be, when the Holy Father solemnly confirmed it and promulgated it, in the Vatican Basilica, in the presence of more than five hundred bishops. Besides this, it was posted up with the usual formalities in the places where such publications are usually made at Rome, although that proceeding was not needed in a case like the present. Consequently, and in accordance with a well known rule, this constitution has become obligatory upon the entire Catholic world, and there is no need of its being notified by any other promulgation whatsoever."

"I have thought it my duty to address these brief observations to your lordship, in order that they may serve for your guidance in case of any doubt arising in any quarter upon this subject."

"J. CARDINAL ANTONELLI."

ONE of our Episcopal exchanges, says the Interior, tells the following amusing story, which reminds us of the effect of Whitfield's oratory in emptying, on a certain occasion, all Ben Franklin's ready cash into the contribution box:

A stungy churchman was listening to a missionary sermon. He was nearly deaf, and was accustomed to sit facing the congregation, right under the pulpit, with his ear-trumpet directed upward, toward the preacher. The sermon moved him considerably. At one time he said to himself: "I'll give ten dollars," and again he said: "I'll give fifteen." At the close of the appeal he was very much moved, and thought he would give fifty dollars. Now the boxes were passed. As they moved along his charity began to ooze out. He came down from fifty to twenty, to ten, to five, to zero. He concluded that he would not give anything. "Yet," said he, "this won't do—I am in a bad fix. My hopes of heaven may be in this question. This covetousness will be my ruin." The boxes were getting nearer and nearer. The crisis was upon him. What should he do? The box was now under his chin—all the congregation were looking. He had been holding his pocket book in his hand during this soliloquy, which was half audible, though in his deafness he did not know that he was heard. In the agony of the final moment he took his pocket book and laid it in the box, saying to himself as he did it: "Now squirm, old natur!" This was a victory beyond any that Alexander ever won—a victory over himself. Here is a key to the problem of covetousness. "Old natur" must go under. It will take great giving to put stinginess down. A few experiments of putting in the whole pocket book may, by and by, get the heart into the charity box, and then the cure is reached. All honor to the deaf old gentleman. He did a magnificent thing for himself, and gave an example worth imitating, beside pointing a paragraph for the students of human nature.

A REAL Christian loves close, pointed, searching preaching, and seeks not the ministry of those who speak with enticing words of man's wisdom.

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, NOVEMBER 5, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.

Three Dollars per Annum, in Advance.

Address—Rev. LINUS PARKER, 112 Camp street, New Orleans, La.

AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEES

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS.
REV. W. SHAPARD.
REV. J. B. COTTELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY.
V. WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To SUBSCRIBERS.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a POST OFFICE ORDER, DRAFT, or by EXPRESS. If this cannot be done, REGISTER the letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

A PRIVATE NOTE.

The following note we take the liberty of publishing, although we are sure to get a scolding from the writer for so doing. It is, however, due to the worthy agent, and also the people who have so handsomely responded to his efforts to furnish them with a religious newspaper. There was a pretty large list of subscribers at that office before Bro. Wilkinson began this last and successful canvass. Such a pastor and such a people are bound to prosper. We are also receiving some encouraging lists of new subscribers from other quarters. While the brethren are winding up and getting ready for Conference, they cannot crown their labors more gracefully in any other way than by sending us a large installment of new names for the mail-book of the NEW ORLEANS CHRISTIAN ADVOCATE.

SHREVEPORT, Oct. 25, 1870.

REV. L. PARKER, D. D.—My Dear Brother: Herewith I send you the third and last installment of my fifty new subscribers. Of course, as opportunities offer I will not fail to obtain more; but I feel pleasant for having succeeded up to the number I had fixed; and this not only that thereby I might give practical expression to my warm regard for the ADVOCATE and its editor, but also because of the new power for good thus introduced into so many families.

Your brother in Christ,
JNO. WILKINSON.

MANSFIELD FEMALE COLLEGE.

By a private note from Rev. C. B. Stuart we are glad to learn that this popular and excellent institution has opened with flattering prospects. Brother Stuart says:

We have now ninety-seven pupils—the largest number I have had thus early in the session since my connection with the institution. I feel very thankful for the generous support extended to me in this crisis of my affairs.

We cannot say too much for the worthy president. The death of his estimable wife is a sore bereavement to him and to the church, but her memory will long remain as a blessing to all.

Boots and Shoes.—See card of R. F. W. Bachman, which appears in our advertising columns this week. Mr. Bachman is the successor of Mr. Tillotson, and occupies that eligible stand, No. 18 Camp street, under the City Hotel. We have known Mr. Bachman a long time, and can heartily recommend him to the patronage of our friends.

Keep carefully out of a quarrelsome person's way, and still more carefully out of his ways.

IN ARKANSAS.

BY BISHOP KEENER.

EVANSVILLE, Oct. 22, 1870.

MR. EDITOR: You will remember that about a week before the White River Conference I landed at Helena. The meeting that I had expected to find there under way had not even begun. My letter had failed to reach the presiding elder. However, I found opportunity to preach to good audiences on Friday and Saturday nights, and on Sabbath morning and evening. Between war and flood, and various ecclesiastical mishaps, I know of no place where Methodism has had more to contend with during the last ten years. But by a good providence our church still lives. The house has been beautifully painted and repaired within, a new organ is in the gallery, and an excellent audience attends the word. Brother Denton commands the confidence and the love of the community and church, and, I doubt not, will do still greater things for the cause of the Master. From Helena I traveled in a two-horse carryall to Mt. Zion as the companion of Judge Hanks, the superintendent of the Sabbath school at Helena, and now the Conservative candidate for Congress. The sloping sides of Crowley's Ridge, and the bottoms for several miles in width, are among the finest lands that I have ever seen. Upon this soil we traveled for ten or twelve hours. The ridge itself is good medium land. The country is already pierced by the Memphis and Little Rock railroad. Some of the old and wise Tennessee preachers have felt their call leading out in this direction, and are following up the enterprise and population of the West.

About the Conference at Mt. Zion I have written somewhat. The Conference did good, but might have done more if it had had more room. There is a great need for preachers in the White River Conference. Many circuits are left to be supplied by local preachers.

After its adjournment I was kindly brought on my way by Brother Wickersham in a no-top buggy, driving two excellent ponies. We spent Monday night at Brother William McFerrin's. There I had the pleasure of seeing and talking with that mother in Israel who has given so many of her strong sons to the Methodist ministry. She is now a widow of fourscore, her intellect still clear, and her bold, fine features comporting with the place she holds, through her descendants, in the history of our church. She evidently liked to be in the company of preachers, and is hourly ready for the summons of her Lord. On Tuesday we passed over the region between the ridge and White river—say a day's drive over a flat country. The lands are very good, excepting in the center of the plat, a width of some sixteen miles. The difficulty of drainage will preclude this "wilderness," as they call it, from settlers.

Jacksonport is a thrifty place directly on the White river, and greatly in need of a good Methodist church. The friends there promise to have one built shortly. After preaching once, I was transported on Thursday, by the same team, to Batesville, and had the pleasure of seeing that beautiful village. There we have a good brick church greatly in need of modern furniture and furnishing; and there, too, I found some warm hearts ready to stand by our preacher and our Methodism. There was a good congregation in waiting. The Conference has already projected a high school at Batesville. A better location, for health, cheapness of living and beauty of scenery, could not have been selected. We should have there a substantial stone academy, and steps have been set on foot to secure it. With Brother Dye for company, I started on Friday for Searey; stopped all night on the top of the White River mountains, and reached Searey on Saturday; passed a healthy elevated region, no doubt abounding in deer. Preached in Searey on Saturday night and Sabbath morning. At Searey a fine courthouse is in process of erection and several excel-

lent dwellings. The congregation is the largest I have seen in the State. We were now one hundred and thirty miles from Clarksville, and two and a half days, to go on. The Rev. G. A. Dannelly now took me up and literally put me through. On Tuesday, at sunset, we were in sight of Clarksville. Preachers were already about. A large brick church, now building, attracted my attention, and I was glad to learn that it was for Southern Methodism. There are one or two liberal men in Clarksville who are determined to give the place the substantial basis of good schools and well-built churches. One of these was my host during Conference. May his heart be abundantly strengthened to accomplish all that it has designed!

The Arkansas Conference has a territory capable of supporting a thickly settled population of small farmers. The lands between Clarksville and Van Buren are, on the whole, the most desirable that I have seen for those who are in search of a white man's country. The climate is the just medium between North and South. Fine crops of corn and fair crops of cotton greet the eye at every clearing. Our preachers have pioneered the way, and through poverty and neglect have been steadily preaching the word. They have souls fully as large as their resources. Seven hundred and fifty dollars were raised at the missionary meeting for the old debt—the greater part of it from the preachers. The war forced many of them into a quasi location, and the utter destitution of parsonages in Arkansas seems to necessitate their still continuing in that condition. The annual collections were occasional—no uniformity of result. Some preachers have attended to this duty, but many have neglected it. Until the body of our church undergoes a tremendous revolution in regard to finance every one of her interests is destined to drag its length painfully along. We need the voice of another Baptist to prepare the way of the Lord and to call our members to repentance and to works meet for repentance.

The intercourse which I enjoyed with the preachers, both at the White River and the Arkansas Conference, was very delightful and refreshing to my spirit. They received me with every affection and thoughtful attention. I can never get tired serving such men.

A ride by the way of Cove creek and Lee's creek, and once a considerable rise (let him that readeth understand,) brought me to this place, on the line of the Indian Territory.

AMONG THE TOMBS.

The first of November has come to be a recognized holiday in New Orleans. The schools are closed, and business is in a great measure suspended. The living population throngs the last resting places of the dead. A tide of human life pours through the alleys and walks of the cemeteries, and the grounds and tombs are freshly dressed, and adorned with religious emblems and flowers. The festival of All Saints, we are told, has been observed in the Eastern churches since the fourth century. In the West it was instituted by Pope Boniface the Fourth in the early part of the seventh century. All Hallow's is the English and Scottish version of All Saints day. This festival is said to be in honor of all the angels and saints of heaven. Boniface instituted it on the occasion of dedicating the Pantheon, a temple built by Marcus Agrippa, before Christ 25, in honor of Jupiter the Avenger and all the gods, to the worship of the true God, under the invocation of the Virgin Mary and all the saints.

The institution and observance of the day are associated in the Catholic Church with serious superstitions and errors, and its recognition by Protestants is of doubtful utility. The only religious day divinely appointed under the gospel dispensation is the Sabbath. There is no express warrant for others, and their observance is of questionable expediency. They are more

in harmony with Judaism and paganism than with the simplicity and spirituality of Christianity, leading sooner or later to such errors and perversions as abound in the Latin and Greek Churches. The tone of Protestantism is sensibly affected in this community by the Romish festivals. We have found life-long members of our Protestant churches who have come to regard them as of divine appointment, and who have fallen into the practice of praying for the dead, and of invoking the saints. In proportion as these days, set apart by human authority, have become sacred, the Christian Sabbath has lost its sanctity, and is observed by many Protestants with no more strictness than they observe Good Friday or the first of November. These festival demonstrations appeal to the sensuous and the sentimental rather than to the spiritual, and are the means of entangling and perverting many.

Nothing, perhaps, can be reasonably said against the custom of devoting a day to the memory of our dead, and to the adornment of their tombs, only we could wish that the time were utterly separated from the remotest association with the institution of Boniface. It may be made an occasion of profitable meditation, and lead us for a season from the engrossing affairs of earth to think of our final lot. It may arrest the torrent of worldliness and gaiety for an hour or a day, and give momentary pause to the soul amidst the rush of business and pleasure. It may do this, and with a very few these benefits are probably realized. For the most part, however, we fear the perversion is greater than the profit, and that it is calculated to minister to social dissipation and religious error.

All Saints day is, however, an occasion of interest as a study to the looker-on who moves with the current of people as it surges around and among the dwelling places of the dead. The shrubbery, the emerald sward, the fragrant bouquets and wreaths of immortelles are surpassingly beautiful. The costly vases and urns, with their wealth of flowers, standing guard upon the thresholds of death, are in harmony with the general display. The strange contrasts and the most wonderful incongruities meet one at every turn—contrasts in the graves and tombs, in the manners of those who linger about them, and the most incongruous devices and expressions of sorrow and of love. The most striking of all is this sudden coming together of the world of the living and the dead—the living in their holiday attire, a throng of health and youth, of strength and beauty, brushing the mold almost from the unseen coffin, and leaving the echoes of their footfalls in the dark chambers where the worm and corruption are holding high carnival. Between the sunshine and flowers of the outer-breathing world, and the gloomy vaults of death and decay, how great is the contrast!

The overflowing life without, the brightness and sweetness of nature as it shines and blooms around, and the taste and wealth of architectural embellishment, cannot invest death with attractiveness, nor deprive the tomb of its awful and repulsive features. The only consolation, after all, is in the gospel. The assurance of life and immortality, as they have been brought to light through the gospel, is the only thing that beautifies the grave and abolishes death. Through him who is the resurrection and the life, we think of our loved ones as exalted and glorified in heaven, while their graves are marked and guarded by that infinite wisdom and power which shall at last change these vile bodies, and fashion them like unto the glorious body of Christ.

PLEASANT GROVE is a new church in the bounds of the Union circuit, about fifteen miles from Nashville, on the "Little Pike," Wilson county. It is a very neat, commodious and spacious house, situated in the center of a densely populated community. It was dedicated on Sunday, October 23, by Dr. McFerrin. The congregation was large and the occasion was one of interest. We hope that thousands will be born to glory there!—Nashville Christian Advocate.

DR. LEROY M. LEE.

It will be seen from the following statements, which we find in the Richmond Christian Advocate of the twenty-seventh of October, that Dr. Lee retires from the post of assistant editor. This step will be generally regretted by the readers of the paper, and by all the friends of Methodist journalism. Dr. Lee is one of our ablest and most experienced editors, and the columns of the "Old Richmond" bear witness to his taste, industry and great merit as a journalist.

"PERSONAL.—For reasons not necessary for me to mention, the position and relations heretofore held as associate editor of the Advocate will cease with the present issue of the paper.

"On many accounts I may regret the cessation of relations and labors that have been pleasant to my feelings and agreeable to my tastes. I shall bear with me to the retray and quietude of a less public position a grateful sense of the kindness and courtesies that greeted, ten months since, my return to editorial life, and cheered me in the anxieties and efforts 'to do good and to communicate' by this superaddition to duties sufficiently onerous in the management of a district of those connected with the press, which have occupied all my spare moments by day, and sent uneasiness into the hours usually allotted to rest by night.

"In closing my editorial relations I do not surrender my interest in the welfare of the 'Old Richmond'; nor are there any notes of discord between the editor and myself. We have labored in harmony, and we part in friendship. If any shall feel surprised or sorry at this announcement, the undersigned may accept either as a compliment to his labors; and can only say to any and all who may be moved in either direction—necessity, which knows no law, was laid upon me. LEROY M. LEE.

"NORFOLK, October 21, 1870."

The above note will convey to our readers the knowledge of a fact which they cannot regret more than we do. We have labored in unison with Dr. Lee for ten months, and without a word of disagreement. The delicacy of the doctor, which we most highly appreciate, prevents him from giving the reason of his retray from editorial duties in connection with this paper. We need be under no such restraint. The whole and sole reason is that the Methodist people of Virginia do not give the Advocate sufficient patronage to pay two editors. We make this statement with sincere mortification, but with the firm conviction that we have labored most earnestly and faithfully to give the church a sound and valuable religious journal. And we shall still endeavor to keep the "Old Richmond" in the field as a co-laborer in the great work of the church; and though Dr. Lee may not be fully engaged in active editorial duties with us, yet we hope our readers will enjoy many rich contributions from his pen, and from the pens of other brethren who feel a deep interest in the welfare of the church and the success of the Advocate.

The Nashville Publishing House.

The item in the report of the committee of the St. Louis Conference, referring to the Publishing House, has already appeared in our columns. In justice to the management of the Publishing House we give what is most material in the reply of Dr. Redford, as published in the Nashville Christian Advocate:

With the instructions of the General Conference before me, "to reduce the price of our books and publications, whenever in his (my) judgment the interests of the Publishing House will allow," I would have been untrue to the General Conference by whom I was instructed, and to the committee who offered the resolution of instruction, if I had still held up the price of the Advocate to three dollars, when "the interests of the Publishing House" allowed me to furnish it at two dollars to the people, and at one dollar to all preachers, traveling and local. My estimate of its cost, and my ability to send it out at this reduced price, was carefully made in the face of the instructions of the General Conference of 1866, which required it "to meet its expenses," and of the General Conference of 1870, which instructed me "to reduce the price" when "the interests of the Publishing House will allow."

I appeal to my brethren of the St. Louis Conference, to both "the ministers and laymen" in the bounds of that Conference, whose prejudices the report informs me are excited against the Advocate because of its reduction in price, and ask them, with these facts before me, whether I could have pursued a different course to that I adopted. The Nashville Christian Advocate be-

longs to the church, and through the General Conference the church had the right to instruct their publishing agent, and it was his duty to obey.

To me, however, it is exceedingly strange that brethren anywhere should complain at the first step I have taken in the direction of reduction in prices.

In the report under consideration our brethren of the St. Louis Conference do complain of "exorbitant prices" in other regards, and yet in my earliest effort to accommodate their views, and to conform to their wishes, they express "suspicious," which, however, they "sincerely hope are wholly without foundation," suspicions that the Advocate is being published at a loss to the Publishing House, and that "the deficit arising from its publication at these figures was to be made up, and the enterprise sustained, by the exorbitant prices of hymn books and Disciplines."

Nor are the books, published by us sold at "exorbitant prices." The Southern Methodist Publishing House is required to publish several books at a heavy loss. The General Minutes and the journal of the General Conference always fail to meet the expenses of publication, and yet, after carrying these and similar burdens, we cheerfully invite comparison between our prices and the prices of any house in St. Louis.

Our Sunday School Periodicals.

The following notice from the book agent will give our readers all needful information. We shall henceforth have no occasion to seek for Sunday school literature outside of our own Publishing House. We shall now have about what and about all we want, and let us begin to subscribe and send orders at once. The first of December is close at hand. We believe that the able book agent, Dr. Redford, and our competent Sunday school editor, Dr. Haygood, are about to give us just what we want, and that our own publications will supply our people and schools with all they need.

SUBSCRIBE AT ONCE FOR OUR SUNDAY SCHOOL PERIODICALS FOR 1871.

By December 1 we will be ready to deliver the January numbers of our Sunday school publications at the following rates:

Sunday School Magazine, thirty-two pages octavo, for teachers and Bible students, \$1 per annum. To clubs of ten or more, sent to one address, we will furnish six lessons papers, for the use of scholars, gratis, for each subscriber, monthly. Extra lesson papers, one cent each, or seventy-five cents per hundred, monthly, or \$8 per hundred, per annum.

Our Little People will be adapted to our uniform series for the use of infant classes, printed in bold type and suitably illustrated. It will be furnished in such form that two pages may be distributed weekly, at \$10 per hundred copies, per annum.

The Visitor will be furnished in three forms, for weekly, semi-monthly and monthly distribution, as follows: The weekly at the rate of \$50 per hundred copies, per annum; single copies, seventy-five cents. The semi-monthly at the rate of \$25 per hundred copies, per annum; single copies, forty cents. The monthly at the rate of \$12.50 per hundred copies, per annum; single copies, twenty cents. It will be printed on new type, on the best paper, and will be richly illustrated.

VISITOR GRATIS FOR TWO MONTHS.—We will send the November and December numbers, gratis, to new subscribers for 1871, with cash orders.

For full information about our Series of Uniform Lessons, see prospectus in November and December numbers of the Visitor. Send orders now.

A. H. REDFORD, Agent.

NEWS FROM THE CHURCHES.

DANVILLE, ALA., Oct. 27, 1870.

MR. EDITOR: We have just closed a series of revivals on the Danville circuit, resulting in eighty-four conversions to the church, making a total of one hundred and twelve received during the year. The church has been powerfully blessed, and by the aid of the local brethren and the active members of the church, prayer and class meetings have been established in various parts of the work. All praise be to God who hath done great things for us, whereof we are glad!

Yours fraternally,

G. R. LYNCH.

PROF. WATSON, of the Observatory at Ann Arbor, Michigan, has received the astronomical prize of the French Academie des Sciences, as a reward for having discovered nine new planets in a year.

Proud hearts and lofty mountains are always barren.

NEW PUBLICATIONS.

FIRST STEPS IN MUSIC. By George B. Loomis. Iveson, Blakeman, Taylor & Co., publishers, New York and Chicago. 1870.

We have received from Mr. Graham, No. 92 Camp street, two little paper-covered volumes, Nos. 1 and 2, bearing the above title. They appear to be well adapted to the purpose of teaching beginners the rudiments of vocal music.

THE AMERICAN SUNDAY SCHOOL WORKER.—This handsome magazine, published in St. Louis by J. W. McIntyre, is designed especially for parents and teachers; and is one of our best Sunday school periodicals. The October number contains lessons papers for the month, and also a list of lessons for 1871.

DR. DEEMS' SERMONS: A medium for the circulation of the gospel as preached from the pulpit of the Church of the Strangers, by the pastor. Terms in advance, \$4 per annum; to clergymen, \$2 per annum. Published by Little, Rennie & Co., New York. One sermon a week is to appear—something after the style of Mr. Beecher's Plymouth Pulpit. The friends and admirers of Dr. Deems will now have an opportunity of supplying themselves with his latest pulpit deliverances. The sermon for October 16 is on the text: "I am not mad, most noble Festus."

THE METHODIST QUARTERLY REVIEW FOR OCTOBER, 1870.—D. D. Whedon, LL. D., editor. New York: Carlton & Lanahan.

Contents: De Groot on Gnostic Testimonies to the New Testament; The Muscovite and the Teuton; Our Spoken English; Oriental Influence on Western Thought and Civilization; The Ethics of Latin Comedy; Wattle on Greek Ethics in their Golden Age. In addition to these articles is the usual amount of editorial matter, under the heads of Foreign Religious Intelligence, Synopsis of the Quarterlies and the Quarterly Book Table. The Book Table is able and scholarly, and the articles in the main are excellent. It does not look magnanimous in Dr. Whedon to exclude the Southern Review from his synopsis of the quarterlies.

SUNDAY SCHOOL VISITOR.—Nashville, Tennessee, November 1-16, 1870. The number for November is better than any of its predecessors. The pictures, selections and editorial matter please us better and better. We desire exceedingly to have a weekly paper of this size and style, eight pages, and larger, if anything, than this.

The GALEY for November has a number of valuable articles. Among others we have noted "The Reality of Medicine," "Reminiscences and Speculations Apropos of the Turning Point in the King of Prussia's Life." In the article on Fort Sumpter Gideon Wells has attempted to straighten out the record as it affects himself and the Lincoln administration. Mark Twain's incomparable map of Paris appears in this number, and his memoranda are as rich and rare as ever.

LIVINGSTON'S MAGAZINE for November, besides a good deal of fiction and romance, has several articles of great merit, as, for example, "A Polyglot Empire," and "The Stone Annals of the Past." The Monthly Gossip is varied and entertaining, as usual.

THE ATLANTIC MONTHLY.—The November number is filled with articles of high literary finish, but more in the nature of dissertations than a hearty and substantial meal for the hungry mind. "Joseph and his Friend" and "Old Town Fireside Stories" are continued. On the whole we think the present number of the Atlantic inferior to many that have preceded it.

APPLETON'S JOURNAL OF Literature, Science and Art is one of our most valuable weekly exchanges. The number for October 27 has a series of beautiful engravings representing some of the most striking and picturesque views of the Illaca Falls, New York.

THE HOUSEHOLD.—This valuable monthly is published at Brattleboro, Vermont, and is sent to subscribers at the low price of \$1 a year. It is one of the very best periodicals

for the domestic circle. It is for the household, and all housekeepers who have once examined it will not willingly do without it.

THE LITTLE COMPANION.—The November number has not been surpassed. The illustrations are very fine, and the contributions, in prose and poetry, are of the highest order of excellence. Published by Sowell & Miller, Chicago, Illinois, at \$1 per year.

THE CHILDREN'S HOUR.—T. S. Arthur & Sons have excelled themselves in the November number of this little monthly. The pictures are enough to set a group of children crazy with delight. Like all the publications of the Arthurs, the Children's Hour has something in favor of total abstinence in almost every number.

ARTHUR'S HOME MAGAZINE for this month has the usual excellent fashion plates and music, besides much useful information in the departments of "The Home Circle," "Gardening for Ladies," and "Our New Cook Book."

THE NEW ECLECTIC MAGAZINE.—The November number is at hand, and well filled with superior articles. We have often had occasion to recommend the New Eclectic as a Southern magazine of real merit, and deserving a large patronage. It is published in Baltimore by Turnbull & Murdock. Yearly subscription, \$4.

SCHINER'S MONTHLY.—An illustrated magazine for the people. Conducted by J. G. Holland, and published by Scribner & Co., New York. This magazine takes the place of Hours at Home and Patnam's Magazine, both of which are merged in the new magazine. The first number has a most attractive table of contents. Among several articles of peculiar interest we have noted in particular: "The Bottom of the Sea," "A Day with Dr. Brooks," and "The Bondage of the Pulpit." The magazine is published at \$3 per year, invariably in advance.

MRS. J. B. PRICE.

MARY MURPHY, wife of James B. Price, Esq., died in Lebanon, Tennessee, October 9, 1870. She was born February 22, 1834; married at the residence of her parents, in Parish of St. Mary, Louisiana, April 22, 1853. Her father, John Barrett Murphy, was a native of North Carolina; her mother, Lucy C. Brashers, a native of Kentucky—each alike remarkable for purity of character. Reared under their fostering care, she grew to womanhood, happily blending beauty of person with the rarest of graces—charity, love and unaffected sincerity. Her girlish purity and gentle elegance of manner won for her a warm place in all hearts. Yet beneath that gentleness of manner we found, a few years afterward, a strength and energy of character of which the casual acquaintance, in her maidenhood timidly, little dreamed. It was after her heart had felt the touch of those two forces which test and evolve the highest powers and beauties hidden in the nature of true woman—a mother's and a Christian's love—that we learned to know the wealth of her nature and the energy of her character. She became a member of the Methodist Episcopal Church South, the church of her parents, in 1855. At the time of her death she was the mother of five children. She had given the minute watchfulness and unflagging vigor of a Christian mother's love, and exalted purpose, to make these children, first trusting and afterward intelligent, Christians. In addition to her own painstaking teaching, she sought to make every ordinance of the church conduce to this end by giving them the most impressive surroundings. The three older—Andrew, Lucy and John Ewing—were given to the church in holy baptism, December, 1859, by Bishop Andrew, during the session of Conference at Franklin, Louisiana—using water from the River Jordan; the two younger—William Hoggatt and Waller Brashers—by Bishop McTear, during the District Conference in Lebanon, Tennessee, in 1868. And after a life spent in seeking to lead them into a spiritual recognition of their baptismal vows, her last act was to call them around her and ask that the Lord's Supper should, in this solemn moment, be administered to them all—husband, wife and children; sit close of a married life which had been one beautiful sacrament—well chosen type of the mother's true and loving devotion to her children's immortality. She has left on the hearts and lives of

husband and children lessons of Christian duty which were not only the fruits of her life, but around which her dying thoughts and prayer so tenderly and tenderly clung that they can but result in Christian love and usefulness here, and the blessedness of reunion hereafter. She ever spoke kindly of the absent, and was kind to those present, thus making and meriting friends everywhere. In the late war she not only fed, clothed and nursed the soldiers, but distributed hundreds of Bibles and tracts among Southern troops. One who knew her best says: "As daughter, sister, wife, mother, friend and neighbor she was faultless. I never knew her to say or do a foolish thing. Every act of her life reflected a heavenly-born purity of heart no immortal."

God gives us love. Something to love He lends us; but when love is given To ripeness, that on which it thrives Falls off, and love is left alone. *Teagarden, D. C. K.*

A French agriculturist estimates that the loss of farmers in the sections invaded by the Prussians amounts to \$800,000,000.

Nai Chu is the name of a Siamese youth who has lately been admitted to the freshman class of Lafayette College.

Married.

At the residence of the bride's father, in Holmes county, Mississippi, October 13, 1870, by Rev. W. P. Barton, Mr. W. H. Green to Miss Abigail E. Bailey, both of Holmes county, Mississippi.

October 16, 1870, at Molino, Florida, by Rev. J. A. Pace, Mr. John F. Murphy and Miss Sue A. Richardson, all of Molino.

At the residence of the Rev. G. W. Chatfield, near Newton Station, Newton county, Mississippi, on the morning of the twenty-fourth ultimo, at nine o'clock A. M., by the Rev. G. W. Boyle, Mr. S. W. Hodges to Miss S. A. Chatfield, both of Newton county, Mississippi.

At the same place and time, by the same, Mr. D. C. Durham, of Meridian, to Miss H. C. Chatfield.

On the evening of the eighteenth ultimo, by the Rev. John Pipes, Mr. J. L. McClanahan to Miss Hattie Peoties, both of Mansfield, Louisiana.

Obituaries.

Little Willie R., son of Brother and Sister Smith Franks, died in Sabine parish, September 12, 1870, aged eight years.

What comfort there is, dear parents, in the thought of life and immortality beyond the dark vaults of death. Be faithful, and together with your child you will one day mingle with shining seraphs around the throne of him who doubtless has saved your boy. *R. H. ADAMS.*

Sister Sarah McNeese was born in Mississippi; joined the church when sixteen years of age, and for thirty years lived in the enjoyment of our holy religion, dying in Sabine parish, Louisiana, at the age of forty-six years, in the triumph of a living faith.

The subject of this sketch was the daughter of a Methodist preacher. She removed to this State in December, 1867, and immediately presented her letter to the church. Since then she was married to Brother John Allen, who appreciated her worth, and who, more kindly than any one else, feels her loss. How sorrow-stricken we all felt when the news of her sudden death reached us! In her death we have lost a sister indeed; but reverting to her life, we mourn not as those who have no hope, so certain are we that our loss is her eternal gain. In the goods of this world Sister Allen was often very poor, but in the fullness of grace she was rich indeed. Though not present when the destroyer smote, we are confident she rests in peace. The twenty-fifth of September, a balmy day of rest, witnessed her entrance into the heavenly kingdom. Often have we conversed with her to meet in heaven. Her warfare is over and the victory is won. Brethren and sisters of the church, live faithfully, that you may be able, in Jesus' name, to enter in. May the Lord fill out of his unutterable fullness, the

void now left in her affectionate husband's heart; and when we all victoriously meet to partake of the heavenly communion we hope to meet Sister Allen, who, living, was faithful, and, dying, was triumphant. "She hath done what she could." "A woman that feared the Lord, she shall be praised." *R. H. ADAMS.*

Mr. EDITION: In accordance with request I send you a copy of some resolutions passed by our Sunday school on the occasion of the death of one of its members, JAMES BLAND PEALE, son of J. A. Peale, Esq. His age was scarcely twelve years, but in that brief time he had greatly endeared himself to all—officers, teachers and scholars. He was regularly found in his place on Sunday morning, ever prompt in his lessons, ever cheerful, kind and affectionate.

He died of congestive chill, on Monday, October 3, after a very short illness. The resolutions are no idle tribute to his memory, but the sincere expression of grief felt by all. They were passed in silence by a rising vote, on Sunday morning, October 16, 1870. The publication of them in your paper may be of service to the cause of Sunday schools, and will be a gratification to our whole school in this place, and in their behalf is respectfully requested. Yours, etc., *R. D. HOWE, Supt.*

WHEATON, it has pleased the Good Shepherd, in his wisdom, to call another of his lambs from the Sunday school flock of this church, to be forever cared for in heaven's great fold: Resolved, That in the death of this dear little one, Bland Peale, oldest son of our beloved librarian, John A. Peale, teachers and scholars alike feel the loss of his bright face from their ranks, and join in the sorrow of his bereaved parents.

Resolved, That we, the Sunday school, hereby tender our warmest sympathy to the family of our departed little brother; rejoicing, likewise, that he, not sorrow as those without hope, but have learned of Jesus to lift their eyes from the slumbering clay that remains on earth to the great family of saints in heaven, where the angels of these little ones do always behold the face of the loving and all-pitying Father.

Resolved, That we, the Sunday school, respectfully request our pastor to use the occasion of the death of this scholar, to exhort the teachers to greater diligence in their work, so that in the great day of judgment they may stand before the Son's all-piercing eyes clear from the blood of these children entrusted to their care.

Resolved, That a copy of these resolutions be furnished the New Orleans Christian Advocate, with a request to publish the same.

\$1,000 Reward is offered by the proprietor of Dr. Pierce's Alt. Ext. or Golden Medical Discovery for a medicine that will equal it in the cure of all severe lingering Coughs, Liver Complaint or Biliousness and all diseases arising from impurity of the blood, as Eruptions, Pimples, Blisters and Boils. Sold by druggists. Pamphlet sent free. Address Dr. R. V. Pierce, Buffalo, New York.

FIVE CENTS ADDITIONAL will buy shoes with Silver or Copper Tips, which will save the buyer the price of a new pair of shoes. Compared with ragged toes and dirty stockings, they are beautiful, to say the least. Parents, try it. *se17 3m*

NEW ADVERTISEMENTS.

SEASON OF 1870-71.

MASON & HAMLIN CABINET ORGANS.

IMPORTANT IMPROVEMENTS.

Patented June 31 and Aug. 23, 1870.

REDUCTION OF PRICES.

THE MASON & HAMLIN ORGAN CO. have the pleasure of announcing IMPORTANT IMPROVEMENTS in their Cabinet Organs for which patents were granted them in June and August last. These are not merely meretricious attachments, but enhance the substantial excellence of the instruments.

They are also enabled, by increased facilities for manufacturing, to make from this date a FURTHER REDUCTION OF PRICES on several leading styles.

Having completed and added to their former facilities a LARGE NEW MANUFACTORY, they hope hereafter to supply all orders promptly. The Cabinet Organs made by this Company are of such universal reputation, not only throughout America, but also in Europe, that few will need assurance of their superiority. For years the Company have been enabled to supply the constantly increasing demand for their instruments, being always largely behind orders, though producing about twice the amount of work of any other maker of instruments of the class. This extraordinary demand is evidence that they have been successful in carrying into effect two rules which it is their purpose to adhere to rigidly, so that they may be said to be principles of their business. These are:

1. To make the very best work, and only the best; availing themselves of the best results of inventive genius, every improvement wherever effected, and every facility which the highest skill, ample experience, and liberal use of modern means can command. 2. To sell at the lowest possible prices, reserving to themselves the least remunerative profit. As cost of production is diminished, prices are reduced, and they always *pay* *their* *prices*, which are not subject to discount. The extent of their business, and enormous number of Cabinet Organs which they now have on hand, enable them to employ various machinery, and a division of labor which would not be possible in a smaller business. They are thus enabled to make the present reduction in prices, and to sell their work at even less than the prices commonly demanded for inferior instruments, and less than the cost of production without such extraordinary facilities.

They now offer Four-octave Cabinet Organs, in quite plain cases, but equal according to their capacity to anything they make, for \$30 each. The same, Double Reed, \$35. Five-octave Double Reed Organs, Five Stops, with Knee-swell and Tremulant, in elegant case, with several of the Mason & Hamlin improvements, \$125. The same, extra, with new Vox Humana, Automatic Swell, etc., \$150. The same, Resonant Case, with new improvements, \$200. Five Octaves, Three Sets Reeds, Seven Stops, with Euphone, a splendid instrument, \$225. Two Manual Cabinet Organs, Four Full Sets of Reeds, Nine Stops, \$375. The same, Resonant Case, with the new five-octave, the finest instrument of the class made, \$425, etc. Many other styles in proportion.

A new Illustrated Catalogue, with full information and reduced prices, is now ready. It will be sent free, with Testimonial Circular, presenting a great mass of evidence as to the superiority of these instruments, to any one sending his address to the MASON & HAMLIN ORGAN CO., 154 Tremont st., Boston, or 596 Broadway, N. Y. *nos 22 3t*

BY THE DEATH OF MR. G. W. HUNTINGTON the firm of PAYNE, HUNTINGTON & CO. is dissolved, taking effect from and after the thirty-first ultimo. All their business was extended to and liquidated by their successors, **PAYNE, DAMERON & CO.**

The undersigned, surviving members of the late firm of PAYNE, HUNTINGTON & CO., will continue the Cotton Factors and Commission Business at the old office, Nos. 84 and 86 Baronne street, under the name and style of PAYNE, DAMERON & CO. *J. U. PAYNE, WILLIAM H. DAMERON, LEONARD M. PAYNE, NEW ORLEANS, Sept. 1, 1870. nos 15 1m*

SALESMEN Wanted For the beautiful Steel Engraving, "Christ Blessing Little Children." Taken from Eastlake's world-renowned painting. Sold only by subscription. This work has no equal for salubility. Salesmen are making from \$5 to \$15 per day. Send for descriptive circular, terms and testimonials. Address *C. T. MERRIMAN & CO., Publishers, se21 3m 64 Camp St., New Orleans.*

J. W. BLACKMAN'S COMMERCIAL COLLEGE. 61 CAMP STREET, Corner Commercial Place, N. O. Open day and evening the entire year. Penmanship, Book-keeping, Mathematics and Languages are practically taught, by experienced professors. Persons from fifteen to fifty years of age, and of any nationality, are admitted to each student, who has a separate desk to himself, and is put through a thorough and systematic course of study, so that he may be able to support himself as a qualified man for the situation he intends to fill. Persons who have neglected their education, or who are desirous of preparing for business, students from the country may obtain board in the family of the principal.

Terms: Twenty per cent. less than other Commercial Colleges in this city. Cost of full Commercial Course only \$100. Average time to complete four months. The principal has been a professional teacher in New Orleans since 1851. For circulars address *J. W. BLACKMAN, New Orleans. nos 1y*

SOUTHERN METHODIST Male High School, New Orleans. The exercises of the second session of this institution will commence on MONDAY, the 14th day of September proximo, in the basement of the German Methodist Church, Broadway, between Felicite and Enterprise. The Principal, encouraged by the gratifying success of the past session, will in no respect relax his energy in the effort to make the school all that could be desired by its patrons; and to accomplish this end neither pains nor expense will be spared.

To furnish to those who desire it an opportunity to obtain for their sons a systematic course of instruction from the beginning, upon which thorough education so much depends, Primary and Preparatory Departments have been established in connection with the High School.

In selecting professors and teachers the greatest care will be exercised in regard to not only their mental qualifications, but also their ability to impart instruction. The rates of tuition have been fixed as low as is consistent with thorough instruction, and a full board and rooming as to terms, etc., apply at the School. *D. I. RAST, Principal. nos 1y*

CHILDREN TEETHING.

MRS. WINSLOW'S SOOTHING SYRUP

FOR CHILDREN TEETHING.

greatly facilitates the process of teething by softening the gums, reducing all inflammation; will allay ALL PAIN and spasmodic action, and is SURE TO REGULATE THE BOWELS.

Depend upon it, mothers, it will give rest to yourselves, and Relief and Health to Your Infants.

We have put up and sold this article nearly thirty years, and can say in confidence and truth of it what we have never been able to say of any other medicine—NEVER HAS IT FAILED IN A SINGLE INSTANCE TO EFFECT A CURE, when timely used. Never did we know an instance of indisposition by any one who used it. On the contrary, all are delighted with its operations, and speak in terms of commendation of its magical effects and medicinal virtues. We speak in this matter "WHAT WE DO KNOW," after years of experience, and pledge our reputation for the fulfillment of what we here declare. In almost every instance where the infant is suffering from pain and exhaustion relief will be found in fifteen or twenty minutes after the Syrup is administered.

Full directions for using will accompany each bottle. Be sure to call for

"Mrs. Winslow's Soothing Syrup,"

having the fac-simile of "CURTIS & PERKINS" on the outside wrapper. All others are base imitations. Sold by Druggists throughout the world. *de18 6m*

ONE DOSE OF DR. SHALLENBERGER'S

FEVER AND AGUE ANTIDOTE.

ALWAYS STOPS THE CHILLS.

This medicine has been before the public fifteen years, and is still ahead of all other known remedies. It does not purge, does not sicken the stomach, is perfectly safe in any dose and under all circumstances, and is the only medicine that will

Cure Immediately and Permanently

every form of Fever and Ague, because it is a perfect Antidote to Malaria. Sold by all Druggists. *de1 1y*

AGENTS WANTED FOR

GOD IN HISTORY.

A grand theme, and the grandest book of modern times. All History analyzed from a new standpoint. God rules among the nations. AN OPEN BIBLE in every hand. No other book like it. Approved by over one hundred divines and all the leading papers. The best terms to Agents ever before given. Our new plan insures a sale in every family. Address, at once, *J. W. GOODSPEED & CO., 37 Park Row, New York, or 148 Lake St., Chicago. nos 6m*

PORT GIBSON ACADEMY.

A SCHOOL FOR YOUNG LADIES.

Rev. H. Jones, President.

Faculty full and efficient. Buildings commodious and comfortable. Boarding convenient home-like.

TERMS.

Board, lights, fuel, washing, English tuition, English text-books and school stationery, per term of 20 weeks.....\$130 00 Fall term opens SEPTEMBER 14, 1870. *nos 27 6m*

COLLEGIATE INSTITUTE.

BATON ROUGE, LOUISIANA.

The fourteenth annual session will begin OCTOBER 3, 1870. The best facilities are afforded for the acquisition of a first rate education, and at less expense than in any other school of high grade, North or South.

Board and tuition, per session, \$200. Payments: \$150 in advance, balance on fifteenth of February. For further information address *W. H. N. MACGRUDER, Principal. nos 27 3m*

CENTENARY COLLEGE OF LOUISIANA.

The session of this college will begin on the FIRST MONDAY in October next. The session embraces forty weeks.

EXPENSES.

Collegiate department, per session.....\$50 00 Preparatory department, per session.....40 00 Incidental expenses.....5 00 Tuition for five months payable in advance.

Boarding can be had in good families at from \$15 to \$20 per month. For further particulars address *PROF. A. R. HOLCOMBE, nos 1y Jackson, La.*

VINEGAR—HOW MADE FROM OLIVE

Wine, Molasses or Sorghum, in ten hours without using drugs. For circulars address *E. L. SAGE, nos 1y Vinegar Maker, Cranwell, Ct.*

The Child's Corner.

THE FIRST STEP.
BY GEORGE COOPER.

Mother is watching you, little pet;
Don't be afraid to stand alone!
You are the prettiest darling yet!
Come to me now, my own!

Only one tiny step to-day;
Know you can do it if you try;
Mother will lead you the nearest way
Over the mountain high!

Over play mountain, and over play hill,
All on the smooth, wide carpet here!
What is my darling child still?
Won't you come, baby dear?

Dimpled and white are the eager feet;
Father, O keep them from earthly harms!
A tottering step, and the traveler sweet
Hides in the mother's arms!

Father, O then in my heart I pray,
Though little feet are in danger east,
Lead them safe home, as I have to-day,
From the first step to the last!

Little Corporal.

ARY SCHEFFER'S FIRST ATTEMPT.

"On the wall of brick and plaster,
Running down the garden-walk,
Little Ary drew a picture
With a piece of pointed chalk.

"For a man it was intended,
But it looked—oh! such a sight!
On its left hand, but three fingers,
And but two upon its right.

"It had neither knees nor elbows,
And its body was so small;
Both its feet were bent and twisted,
And it had no mouth at all.

"As he drew, his cousin Gretchen,
With her doll, was standing by,
And she said: 'You'll be an artist,
My dear Ary, if you try.'

So begins a very long ballad by an English writer on Ary Scheffer's first attempt. Ary evidently did "try," for notwithstanding the quality of this early effort, he improved so fast that by the time he was twelve years old he painted an historical picture that astonished the good people of Amsterdam very much indeed. It was hung in a public gallery, and crowds who flocked to see it went away praising the skill of the young artist. "He will be the pride of Holland!" said one Dutchman. "He will be the wonder of the world," said another. "He will make a tremendous fortune," said those who knew the cost of a good picture. But his mother wrote to him: "Do not think of these things, dear Ary. Love the Lord, and thank him for your precious gift. Improve in your art as much as you can, but devote it all to him. I have not much money, but whatever I can spare shall be spent for your progress. You shall study in France. Then, Ary, if you are faithful, you will become a great painter, worthy to serve the mighty Master."

So the boy went to Paris, and though he was a Hollander by birth (having been born in Dordrecht in 1794), he was soon known as the great French painter, who, in many respects, excelled any man of his time. Although he produced a great variety of pictures, among them a portrait of Charles Dickens, his greatest pleasure was to represent scenes connected with the life and death of the Saviour. His sacred works are his best. He died in Paris in the summer of 1858, just as he was finishing his great picture of "The Angels rolling away the Stone from the Tomb."—*Hearth and Home.*

DIFFERENT WAYS OF EATING.

A distinguished physician of our acquaintance, who has occasion to examine the chests of many people, says that he gets a great deal of amusement in observing the different ways in which people put on a shirt. We find no little amusement in noticing the different ways in which people eat. Those of us who have business "down town" in the city, mostly eat at a restaurant where dozens, and sometimes hundreds, are taking their noon-day meal. It is curious to see the different ways in which people will go about the same operation. Some "gobble up" their food as if on a wager to see how soon they can dispose of it, and others pick it up as if looking for something disagreeable in it—and they find it too, sometimes, at restaurants. Some eat as if they were the only persons at the table, and reach directly across one's face for salt or pepper, while others will be careful not to intrude upon their neighbors in any manner. You can always pick out the gentlemen by the way in which they regard the comfort of others. It is bad enough to see one wipe his knife on his lips and then put it into the butter, but the greatest annoyance is the man who "eats with his elbows." We mean those chaps who keep their elbows working like a fiddler. It is a real discomfort to sit next to one of these, as the frequent nudges and knocks that one gets from the industrious elbow quite destroys the enjoyment of a meal. It is not in restaurants only that we have noticed this uncouth performance, but in hotels, private families. It is not likely that those who annoy others in this way are conscious of doing so, but it is the exercise of a bad habit formed when young. We would not like to think that any of our young

friends eat in this way, but if they find themselves doing so, let them try to cut the food and carry it to the mouth without spreading out the elbows; they will find it quite as easy, and they will not, in this respect at least, annoy others at the table.—*American Agriculturist.*

The Farm and Garden.

SAVING SEED CORN.

An Illinois correspondent of the Country Gentleman writes as follows:

As to saving seed corn, I intend to do it in the following manner, and recommend others to do the like: As soon as the outer husks of corn ears have attained a pale straw color I shall send or go myself through the field and select the largest and earliest ears in sufficient quantity for seed for my own use next year. These ears will be spread in the sun, say one or two days, until the husks are toughened so they will stick to the cob. The corn will then be husked, taking care to leave enough of the husks on each ear to handle and hang them up by. The ears will then be tied together, two and two, and strung over poles in a dry and hot loft or garret, where they will remain until the corn is thoroughly dry, and the cob seasoned through. Then, in course of the fall, the corn will be carried to the smoke-house and smoked as brown as a berry, and there be suffered to stay until wanted in the spring, and, of course, get a second smoking with the meat. Care must be taken that the temperature of the smoke-house never exceeds one hundred and fifty or one hundred and sixty degrees Fahrenheit, also the vitality of the germ will be endangered. Seed corn so gathered, saved and smoked may be planted in an ordinary soil, as soon as the frost is out, and, provided it is not wholly in the water, will retain its vitality up to the time the degree of heat has accumulated in the soil necessary to push the germ.

As for saving other seeds, it is an excellent plan to save everything, but the seeds of all kinds of vegetables which grow better farther north than in central Illinois, I would never recommend to save with the intention of planting. The truck-patch men of the South renew their vegetable seeds every year, and though the deterioration is not so swift in central Illinois as in Louisiana and Texas, it is so considerable that I believe nothing pays better than an annual renewal of seed from the North.

As to grains, oats and rye are Northern in their origin, and corn, wheat and barley Southern—that is, we conclude so, because better oats and rye are grown north of forty degrees than south of it; while south of that parallel the other grains named yield richer and stronger food, flour and malt. For the first we should improve our seed by going north for it; for the second we should go south, but not too far south, because there is more danger to the crop in taking seed of a long summer or a season's growth to a short one, than in the reversal of that method.

ERADICATING WEEDS.

FALLOW VERSUS NOED CROPS.

A fowler piece of land than that we took in hand in the spring of 1869 we do not wish to see. It was just what might be expected on a farm rented to a slack tenant for eight successive years; potatoes hoed once, and corn twice, and a glorious crop of weeds allowed to grow to seed every year. Charlock took the lead, and the only comforting thing about this was, that it was so thick that no other weed stood any sort of a chance. Ten days after stirring the soil the ground would be completely covered with this weed. Where oats were sown the charlock grew so stout that the bloom made an unbroken sheet of yellow. About seven acres were planted with potatoes. Two weeks after planting, a lovely crop of charlock was in sight. We went over the ground with a bush-harrow, making a clean sweep of the whole crop. A few days later the potatoes began to break ground. We went through them with Share's cultivator, throwing a very light covering over the tops, and completely scarifying the surface. The potatoes received three cultivations after this, and were dug partly with Al-

len's potato digger; making six crops of charlock and other weeds killed in one season by tillage. Another crop started vigorously, but was cut off by the frost while in blossom, and before the seeds had time to mature. This made seven crops, and it was thought some impression ought to have been made upon the stock of seed in the ground. The ground was manured liberally with yard manure and seaweed this spring, and planted with early rose potatoes. The weeds started as promptly as ever, but not quite so numerous. The spaces between the charlock seemed to widen a little. We pursued the same course with bush-harrow and cultivator, the charlock growing fainter-hearted with every crop destroyed. The potato crop came off in July, and the land was immediately dressed with slaughterhouse manure, and fish pomace, and sowed to turnips. This crop will smother the charlock, we think, if any remains. We know it to be practicable to destroy fourteen crops of weeds in two seasons without losing a crop. The cultivation was no more than the potatoes needed; and as the hoe was used but once in each season, and that very slightly, the cultivation was not very expensive, and that expense is not to be charged to the weed crop, but to the potatoes. Fourteen crops might have been destroyed in one season by a fallow, harrowing every two weeks, but then this expense would have to be charged wholly to the weed crop, or to the cleansing of the land. On the whole, we are very well satisfied that foul land can be more economically cleansed with cultivated crops than with a fallow.

In the fallow all our labor is a dead loss. If there is an ameliorating process in the stirring of the soil, we get that quite as well when crops are upon the ground. There is a choice of crops for this purpose, and there would be a great advantage in having a succession of crops so as to get ten or twelve scarifyings, instead of seven in a season. There is also an advantage in high manuring. The weeds start more rapidly, and we think a larger number of the foul seeds germinate and are destroyed every time the surface is disturbed. Potatoes are better than corn, because they can be planted earlier, and two crops of weeds can be destroyed before they are above ground. If these are early, and are removed by the middle of July, there is ample time for a crop of the sweet German turnip, or of common white turnips. The plowing that occurs between the crops of great advantage, especially if it be a little deeper than the spring plowing. It brings up a new stratum of soil to sprout its crop of weeds, and to be benefited by the atmosphere. The old adage, "One year's seedling makes seven year's weeding," is true enough, if you hoe but once or twice and let the weeds go to seed. But if you plan your crops so as to cultivate ten or twelve times, it puts another aspect upon the question. Every stock farmer, we believe, can raise potatoes and turnips at a profit, however distant he may be from market. If he is near, so much the better for him. We believe that clean land is a possible thing, and that it can be economically attained.—*American Agriculturist.*

"BY GOD'S HELP I WILL."

John Maynard was well known in the Lake district as a God-fearing, honest, intelligent pilot. He was pilot on a steamer from Detroit to Buffalo one summer afternoon. At that time those steamers seldom carried boats. Smoke was seen ascending from below, and the captain called out: "Simpson, go down and see what that smoke is." Simpson came up with his face pale as ashes, and said: "Captain, the ship is on fire!" Then, "Fire! fire! fire! fire on shipboard!" All hands were called up. Buckets of water were dashed upon the fire, but in vain. There were large quantities of resin and tar on board, and it was useless to attempt to save the ship. The passengers rushed aft and inquired of the pilot: "How far are we from Buffalo?" "Seven miles." "How long before we reach it?" "Three-quarters of an hour at our present rate of steam." "Is there any danger?" "Danger here! so the smoke bursting out! Go forward if you would save your lives!" Passengers and crew, men, women and children, crowded the forward part of the ship. John Maynard stood at the helm. The flames burst forth in a sheet of fire; clouds of smoke arose; the captain cried out through his trumpet: "John Maynard!" "Ay, ay, sir!" "Are you at the helm?" "Ay, ay, sir!" "How does she head?" "Southeast by east, sir!" "Head her southeast and run her on shore!" Nearer, nearer, yet nearer she approached the shore. Again the captain cried out: "John Maynard!" The response came feebly. "Ay, ay, sir!" "Can you hold on five minutes longer, John?" "By God's help I will!" The old man's hair was scorched from the scalp, one hand disabled, his knee upon the stanch-

ion, and his teeth set, with the other hand upon the wheel, he stood firm as a rock. He beached the ship—every man, woman and child were saved, as John Maynard dropped, and his spirit took its flight to his God.

He sacrificed his life to save the lives of others; it is worth a greater effort to save a man from moral ruin—to save a child from drunkenness than from fire.—*John B. Gough.*

VARIETY IN TEACHING.

A mistake sometimes made by teachers is that of proceeding exactly in the same way all the year round. I do not, by any means, count it as among the most common or the most serious of errors in teaching. Yet it is an error, and a serious one, and it is usually committed by teachers who in other respects are worthy of high commendation. They have in some way formed for themselves a model of the manner in which a lesson should be given, and they follow it with undeviating uniformity year after year.

Such a course is at war with the constitution of the human mind. If order is heaven's first law, variety is the second. The very best method of presenting truth, if followed constantly without change, becomes tiresome and loses its attraction. It is so with our food. The most wholesome and delicious articles of diet pall upon the appetite when long continued. We require change and variety in what we eat, whether we consult health or pleasure. The soil requires rotation of crops, else it becomes impoverished and barren. What a marvelous change God has ordained in the seasons, giving us endless alternations of summer and winter, heat and cold, darkness and light, moisture and drought! How the birds and the flowers, the grains, the fruits and the vegetables come and go in endless succession, and equally endless variety! All is change, yet all is order. Nature, in all her operations, seems equally to abhor confusion and monotony.

Let us learn a lesson from this in our teaching. Let us learn that the very best methods of teaching and training, of discipline and government, wear out. They lose after a while their effect. Modes of stimulating enthusiasm or of awakening attention, of securing punctuality or of enforcing order, which for a time seemed perfect, begin after a time to lose their power upon the youthful mind. Just as we think we have everything perfect, we are working after the latest and most approved pattern, our machinery is complete and moving without a flaw, just then somehow the propelling power gives way. The grooves and pulleys are all there, but the mind ceases to run in them. What a power in the Sunday school the little blue and red tickets once were! Yet they wore out. Merit marks and demerit marks, and averages for attendance, recitation or conduct, produce for a time prodigious effects, and an inexperienced teacher, seeing the effect in some particular case, jumps to the conclusion that he has found the universal remedy, and he settles down upon a system for life.

In so doing he forgets one essential condition of the material upon which he is acting. A worker in wood or metal or other material substance, having invented the best mode of fashioning it to suit his purpose, follows that mode with undeviating uniformity, or until some better mode is discovered. The more closely he sticks to his method and his pattern the more sure he is of success. But it is quite otherwise with the worker upon mind. Here the material upon which we work is sold out twice in the same condition. We influence and mold the mind of a child only by securing its own co-operative action. We cannot teach a child by merely pouring out knowledge before him. Teaching, in its very essence, and in every stage of it, is a co-operative process. And there is no fact more patent to the thoughtful observer than that with children methods wear out. They tire of the simple style of teaching and talking, no matter how good it may be, and when they tire of the method, and it ceases to interest them and to induce their active co-operation, the teacher's work is lost. He is working, but doing nothing. Hence the imperative necessity of his studying variety.—*The Sunday School Idea.*

A young rural lawyer in Illinois is going to take the stump during the fall campaign, and proposes to "grasp a ray of light from the great orb of day, spin it into threads of gold, and with them weave a shroud in which to wrap the whirlwind which dies upon the bosom of our Western prairies."

"I have lost my appetite," said a gigantic fellow, who was an eminent performer on the trencher, to a friend. "I hope," said his friend, "no poor man has found it for it would ruin him in a week."

To tell a Christian that he runs fast may soon make him stand still.

MUSICAL INSTRUMENTS.

PHILIP WERLEIN,

SOUTHERN MUSIC HOUSE,

50 & 52...BARONNE STREET...50 & 52

WHITWORTH FEMALE COLLEGE,

BROOKHAVEN, MISSISSIPPI.

On the New Orleans, Jackson and Great Northern Railroad, one hundred and twenty-eight miles north of New Orleans, and fifty-seven south of Jackson, will reopen on

The 21st of September, 1870.

Thorough instruction in all the branches given. Charge for board, tuition in English, English text books, school-room stationery, writing, fuel, lights, medicine and medical attendance, \$26 for the term of forty weeks. The languages and music, extra. A deduction of \$50 made for pastors of churches. Number of pupils last term, 165.

For catalogue address

H. F. JOHNSON,

Jy30 3m President.

EAST ALABAMA COLLEGE,

AUBURN, ALABAMA.

The next annual session will open on the FIRST WEDNESDAY in October, with a full faculty.

Boys and young men at every stage of advancement can be received either in the Preparatory, Junior or Senior Departments. Additional schools of Modern Languages, Civil Engineering, and Commercial Arithmetic and Book-keeping have been established.

Economy, health, efficient faculty, good society, thorough discipline and the best religious privileges are the peculiar advantages afforded.

It is just the place to train Methodist boys, and there is room for three hundred, if every preacher and layman will work for us to secure students who will open with two hundred.

For full information or catalogue address the Secretary of the Faculty.

DAVID CLOPTON,

President Board of Trustees.

MISCELLANEOUS.

THE ARROW TIE.

FOR BALING COTTON THE ARROW TIE is the most popular, being the best Cotton Tie in use.

Planters and Cotton Press men everywhere prefer it to all others.

THE ARROW TIE.

was used to cover MORE THAN HALF THE CROP OF 1869, giving entire satisfaction. The patentee and manufacturer of the celebrated ARROW TIE, J. J. McComb, formerly of New Orleans, now residing in Liverpool, having control of the best and most extensive Rolling Mills in Europe, is constantly importing large stocks of this popular Tie, manufactured of the very best quality of English Iron, to meet the increasing demand for it throughout all the Cotton States.

Planters can buy or order the ARROW TIE of all dealers in Iron Ties, and of country merchants generally, at the lowest market price; and we respectfully solicit the patronage of Planters and Factors everywhere.

H. T. BARTLETTE AND

R. W. HAYNE,

General Agents for the Arrow Tie,

Jels 1y 121 Canondele St., New Orleans.

BRACES AND TRUSSES.—DR. JOHN C.

DANIELL informs the medical profession and others that he has constantly on hand and for sale a complete assortment of BRACES AND TRUSSES, Spinal and Shoulder braces, and other appliances for the prevention, relief and cure of general debility, vocal weakness and derangements of the public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, spinal weakness and deformity, dyspepsia and nervous affections, constipation and chronic diarrhoea, female derangements and extreme displacements of the uterus, Irritability, Piles, prostrations, and weakness of the male and female system.

These light, cool and sprightly auxiliaries are the special favorites of the profession; are intensely common-sense and rational in their action; supply a missing link in treatment; place the above affections in a new and more hopeful light, and often complete cures where medicine can only mitigate, any more than it can cure a hernia or dislocated joint.

He specially desires an examination of these appliances by the professional and others. Where necessary the professional application of the above braces will be under his supervision or that of the family physician.

These valuable appliances are sanctioned by a large number of the medical profession in the United States and Europe as the best adapted to fulfill the purpose for which they are intended, and the Trusses and Braces are adapted by the United States Government for the use of the Army and Navy. Terms cash. Consultations free. Send for your pamphlet; it is better to call.

Office and residence, 152 JULIA STREET, near Camp, New Orleans. Jell 1y

NOTICE.—DR. IDAHOE'S

Rocky Mountain Indian Remedy,

FOR THE BLOOD.

This remedy will cure Rheumatism, Gout, and all kinds of diseases of the skin, and every variety of Cutaneous Eruption, from the simplest rash to the most inveterate superficial Leprosy. Boils, Piles, Pimples, Brown Discolorations, Scaly Rashes, Tetter, Ringworms, Itch, Liver Complaints, Kidney and Spinal Affections, Sore Throat and Croup, Sores, Ulcers, Scrofula and Cancers, all yield to its influence in a few applications.

PRICE, \$1 PER BOTTLE.

Within two months this remedy has created a sensation among the people afflicted with the above diseases, never fails to cure radically the very worst case, and the demand for the medicine is very great.

DR. IDAHOE'S

Rocky Mountain Indian Salve,

FOR COUGHS, BRUISES AND PILES.

This Indian Salve cures Coughs, Bruises and Piles, and all applications of the salve; the buyer will apply the Salve but two or three times, when the inflammation will be removed at once. It is never known to fail. Price, Fifty Cents a box.

For sale by all Druggists, and at FLEMING'S Patent Medicine Depot, corner of Natchez and Magazine streets.

General Office, 25 St. CHARLES STREET, at the office of A. Bonchard, New Orleans, La.

For testimonials refer to our pamphlet. Country orders promptly attended to. Jell 1y

RUPTURE CURED.

With an experience of more than twelve years' practice in the treatment and cure of RUPTURE and HERNIA, I will guarantee more perfect relief, comfort and security, and a more rapid improvement than can be obtained of any other person or appliance in the South, without regard to the age of the patient or length of time afflicted.

Also instruments for the cure of every species of human deformity on hand or made to order.

Call on or address, with stamp for circular, Dr. P. ST. C. FEHRLESS, office, 46 St. Charles street, my stairs. Hours, from 10 A. M. to 4 P. M. my21 ly

MADISON COLLEGE,

SHARON, MISSISSIPPI.

The nineteenth annual session of this institution will open on MONDAY, the third day of October next.

Terms.—Tuition, possession of ten months, \$30, \$40 and \$50. Contingents, \$5.

Board can be had in private families at \$15 per month, exclusive of washing.

For further information address Dr. M. J. McKie, president of the Board of Trustees, or myself.

I offer the tuition of young men preparing for the ministry, the sons of ministers in the regular pastorate, and the orphans of deceased Ministers, on application, free of charge.

J. M. PUGH,

President.

THE BOTTOMS HORSE POWER GIN

GEAR.

This Power is now put up in three different forms—stationary, movable and mounted on wheels, all having the same action and capacity, differing only in peculiar movements and arrangements, all of which are covered by patents and caveats. Models and Patents of the same may be seen by all interested by calling on me at the St. Charles Hotel; and to any one desiring to enter with a small capital, a new business, which will yield a sure fortune, I will give unbounded and unparalleled inducements, if immediate application is made.

Sponge.—According to Van Beneden the sponge is a polytropic animal; reduced to its most simple form; chemically akin in substance to silk; a nitrogenous, albuminous compound almost identical with the pound which makes up more than half of the whole substance of silk. Let us hope that this is an end of the great sponge question. It quite agrees with our experience that sponges (bipodal) are nitrogenous and albuminous compounds, only that the larger half is meanness.

In the ancient tombs and monuments of Egypt butchers are frequently represented sharpening their instruments on round pieces of metal of blue color, which, in ancient times, typified iron or steel, as red designed bronze. The ancient Arabs used iron in prehistoric times. In the ancient Scandinavian tombs in Denmark, swords and knives have been found with gold or copper blades and iron handles and edges, which demonstrate that those tombs belong to an extremely remote period, when iron was still the rarest and most precious metal.

A PECULIAR TREE, called the tallow-tree, grows in China, the fruit of which contains a seed covered with a white, solid, fatty matter, which the natives convert into candles. It is proposed to introduce this tree into South Carolina, the south of France and Algeria, where there is every prospect of its being successfully cultivated. In China it forms vast forests, and gives rise to a considerable branch of local commerce. The government of British India has introduced it throughout the different regions of the peninsula, it now being ascertained that it grows equally as well in the Punjab and the northwest provinces as in China. The fatty matter produced by the tree favorably compares with the finest tallow, and when manufactured into candles, burns with a clear, white flame of great brilliancy, and emits neither smoke nor disagreeable odor.

The Rev. Father Secchi has published a work entitled "The Sun," which contains the results of his most recent investigations concerning the compositions of that celestial body, in which he exhibits an exposure of the principal modern theories regarding its structure, and other numerous details regarding its influence on the universe, and the laws that regulate it, which are in the highest degree interesting to all lovers of science. The following are the heads of the different chapters into which this remarkable work is divided: General Aspect of the Sun, its Spots and their Principal Laws; New Method of Taking Observations; General Structure of Solar Spots; The Proper Movement of the Spots; The Rotation of the Sun; Solar Atmosphere; Phenomena Observed during Eclipses; Protuberances; Spectral Analysis of Solar Light; Solar Temperature; Solar Radiations; The Sun the Center of Force; The Sun and Stars.

Certain wasps are in the habit of providing their larvae with the bodies of other insects for food. But the genus *sphex* has a still more remarkable habit. If the larvae were fed with dead bodies, it would be necessary to procure them a daily supply, or their bodies would putrefy and be unfit for food. But the *sphex* has hit upon a plan of supplying its young with a store of fresh meat, preserved after a method of its own. It seizes on larvæ or perfect insects, and inserts its powerful sting into their thoracic ganglia; by this means it paralyzes without destroying them. It then places them, one by one, in holes in the earth, and there lays its eggs in the midst of them; then it shuts the door, and the larvæ, when they are hatched, feed on the living bodies of the creatures thus prepared for them. Supporting these insects to preserve their feeling and sense, this proceeding presents an ingenuity of torture worthy the imagination of a Dante.

COMMENSALISM.—The extent to which animals of various kinds board in common is quite extraordinary. Parasites are many of them, well known, who feed themselves at the expense of their victims, whether by living on the skin or penetrating to the interior tissues and vital organs; and yet the variety of these is scarcely credible, covering as they do almost every kind of animal even to parasitism, or parasitic in successive series. Leaving these aside, there are many species of animals whose habits of eating and locomotion keep them inseparable, though without any hostility between them. The old story of the bird harmlessly picking the crocodile's teeth, after he has dined, has its counterpart in a multitude of observed cases of commensalism. Something quite akin to it we see in domestic life, where fowls and birds make free to alight at the manger and share with the improvident horse his meal. M. van Beneden read a paper before the Belgian Association of Science,

which is full of interesting particulars in this line. There are two kinds, the free and the fixed. A *Holothuria*, in the waters of the Philippine Islands, rejoices in such a variety of boarders as to present no distant resemblance to a *table d'hôte*. The smaller fry, attendant in such cases, are dependent on the superior activity of the host in providing food for the rest as well as for itself. The star-fish is also in the habit of giving lodgings. A fish of Brazil carries in its mouth several little fish, which were formerly supposed to be its own young, thus tenderly nurtured and protected, but they prove to be of an entirely different species, who find it a hospitable home. Sea-anemones also belong to the race of publicans, though whether they take toll is not mentioned. Having ourselves seen them offer their hospitalities to unwary little fish who, once within doors, disappeared without ever finding the way out, we have just a suspicion that M. van Beneden did not in this case make strict enough inquiry as to who did the eating inside; but he speaks of one anemone found in the China sea, two feet in diameter, in the interior of which small fish disappeared themselves. Crabs, it seems, of various kinds, are very much in the habit of living out. The hermit crabs seize upon the houses of gastropods, as we see on all our coasts, but they still have to admit smaller boarders, of no kin with themselves, to live inside, and others plant themselves on the outside, thus shrewdly obliging the crab to carry them around when it travels in search of food. These last mentioned creatures belong to the fixed kind; and of like habit with them are a multitude of others, such as the *cirripedes*, who adhere to the backs of whales, dolphins and sharks, and are thus carried around to get their food, while they could not otherwise live. Such is commensalism.—*Christian Union*.

THE INNER LIFE.

In proportion as the inner life is vivid, the outer life will be effective. St. Paul was naturally a man of vigor. His very faults were those of energy. When he apprehended, or rather was apprehended by, Christ, he did not lose vigor, but became more intense, more earnest, more executive, than ever. The inward life does not distract, it concentrates—does not enervate, it emphasizes—the outward. While it calms, it stirs; while it gives repose, it also gives force.

You have seen the invigorating influence of a human passion. You have observed how love will make a timid woman courageous; how it gives rush and flow to a desultory, purposeless man, to have within himself the consciousness of a virtuous affection for the sake of which it is worth while to be brave, and necessary to be pure. You have said sometimes, of one and another among your friends, "I can scarcely recognize in him the same man," and you have found the explanation afterward in some secret kindling on the altar of his soul of a fire of human devotion. So it is in that one higher region still—that hidden life, that death to the world, of which St. Paul tells. If you wish to move hearts, if you wish to influence minds—if you wish to be a statesman where before you have been a politician, an orator where before you were a rhetorician—if you wish to warm where before you shone, to kindle where before you dazzled—learn to live the life unseen, to come forth from God's presence into the communion and contact of men. "The life hidden with Christ in God" will show itself in an elevation, a dignity, a nobleness of spirit, due to a presence inwardly felt, and manifested, without pretense or parade, in the words and in the actions of the possessor. "They are not able to resist the wisdom and the spirit by which he speaks." "They that sat in the council, looking steadfastly at him, saw his face as it had been the face of an angel."—*Good Words*.

THE VESSEL OF HONOR.—In the matter of pulpit spittoons, we trust to be pardoned for suggesting that it would be a great improvement to have them placed on or above the sacred desk rather than under it, as it would be a saving of time as well as of merriment conclusions if after the second hymn, when the sweet morsel must be removed preparatory to the heavier work of preaching, to have the receptacle near at hand, and within view. We have seen ministers at this critical moment go through the difficult maneuver of dropping the head behind the pulpit for the purpose of ejecting the quid, when if the spittoon had occupied its place of honor beside the Bible, no such miserable subterfuge would have been necessary. The pulpit spittoon might be made to conform in design to its architectural surroundings, and thus stand as a happy illustration of the *utile cum dule*.—*Packer's Monthly*.

The flower of youth never appears more beautiful than when it bends toward the Sun of Righteousness.

BOOKS AND STATIONERY.

STANDARD EDUCATIONAL WORKS
PUBLISHED BY
CHARLES SCRIBNER & COMPANY,
651 BROADWAY, NEW YORK.

Guyot's Geographical Text-Books.
"Incomparably superior to anything published."—*Apostle*.
Introduction to the Study of Geography.
Elementary Geography.
Intermediate Geography.
Common School Geography.

Guyot's System is approved and indorsed by the most distinguished literary and scientific men of our nation; such as Prof. Agassiz, Dana, Tenney, Huxley and others, celebrated in science throughout Europe as well as at home.
The fact that ONE MILLION (1,000,000) copies of the work are in use in the schools of our country, at the present time, is proof of the unparalleled success attending the New System, for no other series of books ever published in America have ever secured so rapid and extensive introduction. They are the text-books in nearly all the colleges, seminaries, normal schools, etc., in the United States; in the public schools of the cities of New York, Brooklyn, Rochester, and most of the cities and towns of the Eastern States; in Cincinnati, Cleveland, Columbus, Springfield, Toledo, Marietta, and most of the other important towns and cities, numbering nine thousand schools in Ohio, and hundreds of towns and cities in the other Western States, while in the Southern States and California they are being extensively adopted.

Believing that the publication of Professor Guyot's series has marked a new and better era in the presentation of geographical science, that by it the pupils of this generation will obtain a clearer, more definite and extended knowledge of the world on which they live, and that it is so systematized as to render that knowledge more valuable and permanent, we commend it to the attention of all interested in educational improvements and progress.

SCHOOLS AND COLLEGES.

FLORENCE WESLEYAN UNIVERSITY,
FLORENCE, ALABAMA.

W. H. ANDERSON, D. D., PRESIDENT.

This institution of learning, so widely known through the South, will begin its next session on WEDNESDAY, SEPTEMBER 14, 1870.

The Faculty is composed of men of experience and ability. The course of study is comprised in the Literary Department, Law Department, Department of Biblical Literature, and Commercial Department. The advantages of this University are seen in its healthful and attractive location, thorough course of study, excellent discipline, the character and success of its instructors, and the reasonable rates at which board and tuition are furnished.

Licentiate in the ministry and sons of ministers in the regular work are admitted to recitation on paying the incidental fees.

Tuition in the University classes.....\$30 00
Tuition in Law Department.....25 00
Tuition in Law Department.....40 00
Incidental fee.....2 00
(Tuition and incidental fee required in advance.)
Chemical fee, paid once.....5 00

Boarding can be had in the best families for \$16 to \$20 per month.

For particulars see circular, or apply to the president, Rev. Dr. Anderson, or to Hon. W. B. Wood. GEO. W. POSTER, Jy23 ly President Board of Trustees.

TUSKEGEE FEMALE COLLEGE,
TUSKEGEE, ALABAMA.

The Fifteenth Annual Session begins SEPTEMBER 15, 1870, and continues forty weeks; divided into two equal terms.

REV. GEO. W. F. PRICE, M. A., President.
REV. B. B. ROSS, M. A., Professor of Latin and Mathematics.

Dr. S. M. BARTLETT, Director of Music, with Nine Assistants in the various departments of instruction and discipline.

The president calls particular attention to the fact that Rev. B. B. Ross, of the Alabama Conference, has accepted the professorship of Latin and Mathematics in the institution. Brother Ross is a graduate of Lagrange College, Alabama. He was professor of Greek and Mathematics in that institution for two years. Subsequently he was president of Talladega Female Institute. His classical education, his experience in the practical business of teaching, his acceptable career of liberal service, his any excellent personal traits all entitle him to the unqualified confidence of our people.

The College has just closed a most successful year. Its prospects were never more flattering. The present organization of the institution combines all the best features for securing the thorough instruction and efficient discipline of its pupils. The Faculty contains none but tried and trained teachers, whose success has been tested by years of service. The boarding arrangements are under the immediate control of the president, who resides in the building, and supervises the social recreations and the professional duties of the pupils. The health of the girls is in charge of an experienced matron. The table, kitchen and laundry are in charge of a thoroughly trained housekeeper, Miss Shelley, of Talladega, is the governess, and brings to the office high social position, experience as a teacher, liberal education, and mature Christian character. The pupils are trained in gymnastic and calisthenic exercises, thereby developing their physical powers, strengthening their constitutions, and imparting grace and dignity to their movements. Religion is the basis of the system of education, and girls are taught that "the truth as it is in Jesus" is the highest attainable wisdom.

CHARGES FOR SCHOLASTIC YEAR OF FORTY WEEKS.
Tuition, according to grade, from \$25 to.....\$60 00
Tuition in music.....60 00
Tuition in art, from \$20 to.....40 00
Tuition in languages.....20 00
Board, washing and fuel.....220 00

Instruction in vocal music, free of charge. Instruction in callisthenics, free of charge. Use of models in art, free of charge. Use of instruments for practice, free of charge. Use of library of reference, free of charge. No incidental charges of any kind.

Tuition for each term payable in advance. Address REV. GEO. W. F. PRICE, Jy30 1m President.

WESLEYAN FEMALE INSTITUTE,
STANTON, VIRGINIA.

will begin its next session September 20, 1870, and close June 22, 1871.

REV. WILLIAM A. HARRIS, President.
With Thirteen Professors, Teachers, etc., etc.

Than this no College for Young Ladies ranks higher. System of teaching like that pursued in University of Virginia. French is taught by a native master of the language. Professor in Department of Music has no superior in any school; among others, is assisted by the distinguished vocalist, Madame Bernier. This is one of the best of the best in America, and young ladies who come here from the South with feeble constitutions are entirely restored to health. The grounds are large and beautiful; buildings stately and elegant, furnished by the purest and best of the country; and a complete and beautiful scenery for sightseeing, making it one of the most delightful college homes in the Union.

(From Judge John N. Hendren, M. A., University of Virginia.)

I regard the Wesleyan Female Institute in the State as one of the very best, and most attractive schools in the State. (From Hon. John H. Baldwin.)

The Wesleyan Female Institute is surrounded by difficulties which make it all respects a most desirable place for the care and education of the daughters of Christian parents.

(From Prof. William E. Peters, LL. D., University of Virginia.)

Young ladies committed to the care of Prof. Harris will enjoy advantages of an intellectual and moral training rarely found.

(From Rev. William E. Munsey, D. D.)

Love that as the president of a female college Rev. William A. Harris has no superior; indeed with the purview of any acquaintance he has no equal.

(From Bishop E. M. Marvin, D. D.)

The Wesleyan Female Institute is an honor to the church. Instruction is thorough. All classes stand high. In music and languages offered of a very high order. The most talented professors are employed, and neither pains nor expense are spared to make this department eminent. The school is very prosperous, and deserves to be so.

Terms for the Extra Summer Term: Board and tuition in the Collegiate Course, \$225. Music and other extra studies moderate.

For catalogues address
REV. WM. A. HARRIS,
Jy30 1m Stanton, Virginia.

EMORY AND HENRY COLLEGE, VIRGINIA.

The Fall session begins August 15, and closes January 1, 1871.

One Hundred and Fifteen Dollars will cover the necessary expenses of the session, including tuition, board, fuel, room rent, washing and contingent fee.

For catalogue or for other information address
E. E. WILEY, President,
Jy16 3m Emory Post Office, Va.

SCHOOLS AND COLLEGES.

LOUISIANA STATE UNIVERSITY,
(Name changed from Louisiana State Seminary.)

BATON ROUGE, LOUISIANA.
Founded and supported by the State of Louisiana.

The ninth session, now in progress, will close last Wednesday in June, 1870. The next session will begin first Monday in September next, and will continue ten months.

The Academic Board consists of a full corps of able instructors in all branches of literature and science, usually taught in the best Colleges and Universities.

The Course of Study embraces a Preparatory and an Academic Department, including Literary, Scientific and Optional Courses, a Special School of Civil Engineering and a Commercial School.

Library, Apparatus and Cabinets are well selected and valuable. The Geological and Mineralogical Cabinets, etc., the largest and most complete in the South, embracing the extensive collections of the late Col. Wallace, of Mississippi, and the Cabinets of the Topographical, Geological and Botanical Survey of Louisiana.

Admission granted to cadets not under fifteen years of age, who know arithmetic, English grammar and geography.

Expenses of every kind, except clothing, for ten months, \$350; \$200 payable in advance, balance February 1; or by accepted drafts, at eight per cent. for ninety days. Payments may be made through the Canal or Citizens' Bank.

Cadets received any time during the session and charged from date of entrance. Discipline, military, with daily drill. A battery of four guns will afford facilities for instruction in military. Uniform of cadet: Gray cloth, to be had at the institution at a cost of \$25 per suit.

For further information address
D. F. HOYD, Superintendent,
Baton Rouge, La.

Office of the University in New Orleans, at Swarbrick & Co.'s, 59 Camp street.

* Until the rebuilding of the College edifice, lately destroyed by fire, near Alexandria, the institution is temporarily located at Baton Rouge, in the Deaf and Dumb Asylum. Location very healthy, and accommodations ample for a large number of cadets. Number this session, 170. Jy11 4m

VIRGINIA FEMALE INSTITUTE,
STANTON, VIRGINIA.

REV. R. H. PHILLIPS, M. A., Principal.
With Nineteen Assistants.

The Twenty-sixth annual session will open SEPTEMBER 14, 1870.

From over a thousand testimonials from Southern patrons we select the following: from General Robert E. Lee, president of Washington College; General Francis H. Smith, president of the Virginia Military Institute; and General W. N. Pendleton, Lexington, Virginia.

"We, the undersigned, have had daughters educated at the Virginia Female Institute, in Stanton, under the care of Rev. R. H. Phillips. They therefore know it to be admirably conducted and superior institutions for young ladies, and they cordially recommend it to favor, even beyond its past extensive patronage." R. E. LEE.

FRANCIS H. SMITH,
WM. N. PENDLETON,
LEXINGTON, VA., March 14, 1870.

For circulars, with full information, address Rev. R. H. PHILLIPS, Principal, or Rev. J. C. WHEAT, Vice Principal, Stanton, Virginia. Jy11 3m

HOMER COLLEGE.

The scholastic exercises of the Fall Session of this College, located at Homer, Louisiana, under the care of the Methodist Episcopal Church South, will begin on the FIRST TUESDAY of September next.

FACULTY.
Rev. J. E. Cobb, President and Professor of Languages and Moral Science, Greek Language and Literature.
J. W. Nicholson, Professor of Pure and Mixed Mathematics, and Natural Science.
A. C. Calhoun, A. B., Adjunct Professor of Languages and English Literature.

The Preparatory Department is under the care of all the Faculty.

TERMS PER SESSION OF FIVE MONTHS.
Tuition in Collegiate Department.....\$25 00
Preparatory studies.....\$15 00 and 20 00
Contingent fee.....1 00

Board in private families

NEW ORLEANS MARKETS.

From the N. O. Price Current.

The general market continues to improve, but there is still but little doing compared with the usual volume of business at this period of the year. Country merchants are as yet reluctant to visit the city. All the freight room for Galveston has been taken up as fast as vessels have been placed on the berth, or in advance, to a great extent for the shipment of goods previously purchased for forwarding at the first opportunity. The indications are in favor of a marked improvement during the next fortnight. Sugar and molasses have come forward more freely, and met a fair demand, but at easier prices, especially for the latter. Western produce has been in only moderate request, without any material change in quotations. There are large foreign orders pending here for flour, which is held at about 50c. above their limits.

The weather has been clear and pleasant, and if it has been of the same character in the country, must have a material influence in enabling planters to save the open cotton. As a general thing the accounts from the uplands indicate a less fruitful crop than last year, but on the bottoms and the river lands the yield is exuberant, and apparently beyond the ability of the labor force to save. The crop question essentially depends upon the weather for this and the next month.

The river is eleven feet six inches below high water mark.

COTTON.—The following are the arrivals since the twenty-eighth ultimo: Louisiana and Mississippi bales, 21,588; Texas, 104; Florida, 19; Mobile, 1,971.

Total, 23,683.

On Saturday the movement commenced with considerable spirit, and during the morning factors were enabled to realize an advance of $\frac{1}{4}$ to $\frac{3}{8}$ c., but subsequently buyers evinced less eagerness and prices receded $\frac{1}{8}$ c., closing at a net improvement of $\frac{1}{8}$ to $\frac{1}{4}$ c., good ordinary being quoted at 14 $\frac{1}{2}$ to 15c., and low middling at 15 $\frac{1}{2}$ to 15 $\frac{3}{4}$ c. The sales embraced 4,150 bales. On Monday the demand continued fair, but prices showed more irregularity, opening in favor of buyers, with sales of good ordinary as low as 14 $\frac{1}{2}$ c., and low middling at 15 $\frac{1}{2}$ c., but subsequently advanced $\frac{1}{8}$ c., after which they lost their buoyancy and receded nearly to Saturday's figures, good ordinary closing at 14 $\frac{1}{2}$ to 15 $\frac{1}{4}$ c., and low middling at 15 $\frac{1}{2}$ to 15 $\frac{3}{4}$ c. The business amounted up 4,500 bales. On Tuesday the market opened with only a moderate inquiry, and although in the face of more liberal receipts factors were compelled to make some concessions, low middling selling down to 15 $\frac{1}{4}$ c., yet it failed to impart any active impulse to the demand. As the supply, however, was fair, 4,100 bales changed hands, mostly at about our subjoined quotations.

This makes an aggregate for the past three days of 12,750 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 132,126 bales, against 156,546 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 2,645 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 23,572 bales to Great Britain, and a decrease of 87,922 to France, and of 13,055 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary, 12 to 13
Good ordinary, 14 to 15
Low middling, 15 to 15 $\frac{1}{2}$
Middling, 15 $\frac{1}{2}$ to 15 $\frac{3}{4}$
Strict middling, 16 to 16 $\frac{1}{2}$

COTTON STATEMENT.

Stock on hand Sept. 1, 1870, bales, 20,696
Arrived past three days, 23,683
Arrived previously, 121,516—145,199

Exported past three days, 11,437
Exported previously, 73,128—84,565

Stock on hand and on shipboard, 81,330

Flour.—The market has continued dull since our last report.

Monetary.—Gold, 110 $\frac{1}{2}$ to 111 $\frac{1}{2}$.

American silver half dollars, 107 to 107 $\frac{1}{2}$; and Mexican dollars at 1 $\frac{1}{4}$ per cent. premium in gold.

In bonds we notice a fair demand for City, and at firmer rates, the sales including \$7,100 new seven per cents, on Saturday, at 73 $\frac{1}{2}$, and \$2,000 do. at 74; \$3,000 do., on Monday, at 73 $\frac{1}{2}$, \$15,000 at 74, and \$15,000 old at —; and \$2,000 new, on Tuesday, at 74 $\frac{1}{2}$.

City Treasury notes are quoted at 18 to 20 per cent. discount.

CATTLE MARKET.

NEW ORLEANS, Nov. 1, 1870.

Texas cattle, choice, per head, \$4 to 45
Texas cattle, second quality, per head 22 to 35

Special Notices.

ALABAMA CONFERENCE.

The members will call at the Methodist Episcopal Church South on their arrival in the city. Those who intend bringing their wives must give timely notice.

J. H. MATTHEWS.

MONTGOMERY, Alabama.

PENSACOLA DIST. CONFERENCE.

The Pensacola District Conference is postponed from September 28, as previously announced, to November 24. Programme as before announced. Postponement on account of sickness in Mobile and New Orleans.

My address, after October 10, will be Pollard, Alabama, to which point all communications will be addressed.

J. A. PARKER, P. E.

Pensacola District.

OCTOBER 3, 1870.

NOTICE.

The class of the first year, Alabama Conference, will meet the committee for examination on Monday, December 5, at ten o'clock A. M. Brother Cameron will examine the class on the Bible, historical and biographical parts; Wesley's Sermons, volume 1 of the four-volume edition. Brother Brown will examine on Clarke's Preachers' Manual, Theological Compend and English grammar. I will examine on Watson's Institutes, part 3, and Discipline and hymn book. We advise the class to study the new course also, if possible.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, NOVEMBER 12, 1870.

NO. 43.

NEWS OF THE WEEK.

DOMESTIC

RALEIGH, Nov. 4.—William Stinson, colored, convicted of rape, was hung to-day. He confessed the crime, and expressed a willingness to die.

PEARL ELTON, ONTARIO, Nov. 4.—A lumber vessel was towed in this morning. The crew were all lost. A man was found dead at the pumps, with his eyes picked out.

MEMPHIS, Nov. 4.—The Presbyterian synod of West Tennessee, North Mississippi and North Alabama assembled at the Second Presbyterian church to-day. Rev. Dr. Gray Carrington was elected moderator.

A dispatch from Albany, Georgia, announces the death of Colonel C. T. Ames, of the New Orleans Circus and Menagerie.

SAN FRANCISCO, Nov. 5.—The great overland eastern-bound express train was stopped, and the express car robbed, between Verdi and Reno, by highwaymen, who boarded the train at Verdi. Presenting pistols at the heads of the conductors and brakemen, they detached the express car and robbed it of \$40,000 in coin. The robbers escaped. A party has been organized to pursue them.

NEW YORK, Nov. 9.—Hall's majority for mayor is 25,000. Hoffman's majority for Governor is, in the city, 51,000, and in the State, 31,000.

The Democrats elect fifteen, perhaps sixteen, Congressmen. Grooley has been defeated. The Radicals carry the Assembly and the Democrats the Senate.

The presence of the military here reacted on the popular vote in favor of the Democracy.

Washington telegrams report President Grant as exceedingly disappointed at the result in New York.

In Michigan the Radical majority is 25,000. The Radicals also carry Wisconsin and Illinois. In Missouri, Brown, Liberal, is reported elected Governor.

NEW YORK, Nov. 9.—Brown, Democrat, has been elected Governor of Tennessee by a majority of 50,000.

Arkansas has elected the Conservative ticket.

Nevada and Kansas have gone Radical.

Afternoon advices from Liverpool report cotton declining. Uplands 9d. (sellers').

NEW YORK, Nov. 9.—Maryland and Delaware have been swept by the Democrats, in spite of the negro vote. They have elected all their Congressmen.

From Paris comes the intelligence that the wild beasts of the Jardin Plantes have been sold for food.

Cotton opens dull. Sales of December have been made at 15 1/2.

Sterling has advanced to 94.

Receipts of cotton for the week are estimated at 115,000 bales.

BARON ROGER, Nov. 9.—This city is in the hands of Federal troops, who are making arrests of many white citizens, in pursuance of affidavits of negro rioters.

On the night of the seventh, negroes with arms in their hands, uttering threats of violence, were quickly sent home, while whites, found without arms and inoffensive in all particulars, were arrested and placed in close confinement.

Yesterday and to-day further arrests of whites have been made, several of whom were absent in the country at the time of the riot.

Martial law is practically in operation.—*New Orleans Picayune.*

FOREIGN

MEXICO, Oct. 30.—President Juarez fell suddenly ill on the seventeenth instant, and his life was despaired of for two days. Congress adjourned its regular session and held an extraordinary secret one. The people are waiting for the result with consternation and fear of a revolution in case of the death of the President. He is now improving.

The amnesty bill has been passed, and all revolutionists and imperialists set free, including Negroté and Meyer, late of the American army. Marquez and La Bustida are among those excepted from the benefits of the bill, but a son of Santa Anna has been pardoned and permitted to return home.

The Tehuantepec bill was passed on the eighteenth, but has not yet been signed, owing to the illness of President Juarez.

The Cuba and Yucatan telegraph bill has also passed Congress.

Discussions on the free zone question are rife. Opponents of the abolition are active.

The Schmied expedition has not been heard from.

The State and Federal troops are fighting with each other at Guerrero.

BRUSSELS, Nov. 3.—The Independence Belge says: We daily receive visits from escaped officers of Bazaine's army. Their testimony is conclusive as to the treachery of their commander. The municipal officers of Metz have issued an address to the inhabitants, exhorting them to patience under the misfortunes for which they are not responsible. The country and history will exonerate the people of Metz from any share in the ignominy of her surrender.

LONDON, Nov. 3.—The evening journals print a supplementary agreement to the capitulation of Metz, which is as follows: The city officials to remove or remain, at their option, undisturbed in person or property.

None of the inhabitants either in civil or military capacity to be interfered with, or held responsible for any previous acts, or for political opinions. The sick and wounded are to have every care, and the families of officers and soldiers serving in the armies of France are not to be molested in any of their rights.

Public property, with the archives, moneys and papers, is to have protection. The mode of disposing of the wounded, prisoners is also prescribed.

LONDON, Nov. 3.—Earl Granville has received a dispatch announcing the acceptance by Trochu of an armistice upon the terms proposed by Bismarck.

The protocol of the armistice was signed by Trochu, Favre, Arago, Garnier, Ferry, Pages, Peleton, Picard and Simon on the part of the provisional government, and by Bismarck and Von Moltke on the part of the Germans.

The decree ordering elections will be issued to-morrow.

The Constituent Assembly meets on the fifteenth.

The conditions regarding the victualing of Paris have not been stated.

Count Bismarck told the World correspondent, on the thirtieth of October, that he was certain an armistice would lead to peace. The correspondent asked if any peace would be satisfactory without the cession of territory. Bismarck replied no. The correspondent then asked if the French people would support a government which consents to the cession of territory. Bismarck only replied by his peculiar smile.

It is reported that the army of the Loire would have attacked Orleans but for Thiers' mission to Versailles.

A dispatch from Marseilles announces all quiet there.

Chlusert has resigned his command.

The red flag was pulled down by the citizens at St. Etienne.

LONDON, Nov. 4.—The National Guards and Garde Mobile at Besencon refused to fight under Garibaldi.

Late Paris advices represent the riot in that city on the thirty-first as formidable. It was led by Ledru Rollin, Hugo, Gustave Flourens, and other well known names, adversaries of the armistice. Paris will vote on Thursday next, if the power of the government of National Defense is maintained. During the disturbance Trochu was threatened by the mob, and muskets and bayonets were pointed at him. Paris journals urge the government to take energetic measures. General Trochu issued a proclamation, showing the advantages of the armistice—this was on the thirty-first ultimo. On the first of November Paris was entirely tranquil.

TOULON, Nov. 7.—The Monitor says: As Prussia would consent neither to revictualing Paris nor allow Alsace and Lorraine to vote, Prussia assumes the responsibility for the continuance of the war. Prussia, not France, has refused an armistice.

All the journals denounce Bismarck, who, pretending to negotiate for peace, gained time and withheld offensive operations of the army of the Loire.

LONDON, Nov. 7.—The French government has ordered the arrest of Bazaine and staff wherever found.

MADRID, Nov. 7.—Nine thousand troops are preparing to leave for Cuba.

LONDON, Nov. 7.—A dispatch from Versailles this morning states that M. Thiers is still at Prussian headquarters. All hopes of an armistice have not yet been yielded. The correspondent adds: "I have good authority for stating that the bombardment of Paris will commence to-morrow. The Prussians are now resolved to push the war to its extremes without an instant's delay."

A general feeling is spreading all over France in favor of calling the Duke d'Annam to the presidency of the republic.

TOULON, Nov. 7.—A dispatch from Vendome says the propositions for an armistice have been unanimously refused by the leaders of the Paris government. The reason for this is found in the refusal on the part of Prussia of a project to revictual the city, and also because she rejects without reserve the scheme for allowing Alsace and Lorraine to vote for members of the Constituent Assembly. The Paris government is supported in its action by the people of all classes.

VERSAILLES, Nov. 7.—The Archbishop of Posen has arrived here, after an interchange of correspondence with Bismarck, on a mission concerning the interests of the papacy. The Archbishop comes in the capacity of negotiator between the Pope and the Court of Berlin.

NEW YORK, Nov. 8.—Herald special:

ROME, Nov. 4.—The grand festival of San Carlo, to-day, fell flat like that of All Saints' day last Tuesday. The splendid ceremonies customary on such days were omitted. The Pope celebrated mass and addressed a few words to the congregation, assuring them at the conclusion of his allocution that the present order of things will come to an end and the new year would be signalized by the triumph of the apostolic cause.

Very large amounts of money are reaching the Holy Father daily to prevent his acceptance of another monthly stipend of two hundred and fifty thousand francs, which has been offered to him by the Italian government for the civil list.

A foreign lady of distinction, who has just arrived at Rome, has brought a fortune as an offering to his holiness. Twenty thousand francs were received from an English Catholic committee.

Signor Lucchesi Pali and two thousand others have presented him with a large donation.

Another address, signed by a still larger number of ladies, accompanied by a princely gift, has been received. Its tenor is as follows:

Most Blessed Father: Now that your holiness is imitating the Son of God in his dolorous passion, allow us to imitate the pious women in presenting ourselves at your feet, and offering you what little support we can.

With our tears, prayers and our slender gifts, let us hope that as the same pious women were the first to rejoice of Jesus arisen, so we may soon be the first to show forth our joy on the day of your triumph. Let your apostolic benediction be the pledge of this hope.

HAVANA, Nov. 8.—Advices from the City of Mexico to the twentieth ultimo state that there is a terrible revolution in the State of Guerrero. The government troops had been defeated, but reinforcements were hurrying forward.

ROME, Nov. 9.—The Italians have closed the Jesuit colleges.

LONDON, Nov. 9.—The fog is intense here; it was dark as midnight at noon to-day.

The Prussians are training hawks to capture the carrier pigeons from Paris.

A correspondent of the Manchester Examiner says the Parliament of North Germany has been summoned to Strasburg.

A French fleet has been sighted off the Elbe and other ports.

The National Baptist says that Rev. John Chambers, of the Independent Presbyterian Church in Philadelphia, at the last communion gave the invitation to outsiders in the following comprehensive form:

"If there is any one in the galleries who is a member of another church; or if there is a man or woman, or boy or girl, who wishes to come down and commemorate the Lord's death, let them come, and come in welcome."

"THE CEMETERY TAVERN!"—Such is the name of a public house which I saw in Leeds. A good name, very. In London, I know a public house kept by "Death," and not far from it is a beer shop, and the landlord's name is "Grave!" "Birds of a feather flock together." I know another beer shop, and it is kept by a Mr. Badman. Good names, these, and they ought to be beacons to warn men!

The daughter of a wealthy citizen at Gosham, Michigan, recently died from the effects of a potato-bug bite. The bite was inflicted during the night, and she died within two days.

A DEER COUNTRY—A stag nation.

DONALDSONVILLE.

THE TOWN ON FIRE.—FIVE HUNDRED COLORED MILITIA IN POSSESSION.

From Mr. Leon Philipon, editor of the Donaldsonville Independent, who arrived this morning, we are put in possession of a few additional facts regarding the revolt of the negro militia and their devilish work. They marched into the town about eleven o'clock yesterday morning, about five hundred strong, and breaking into squads went in search of certain prominent citizens, obnoxious to them, with the declared intention of hanging them when found.

Fortunately these gentlemen had fled. Mr. Philipon, who is specially obnoxious, was still in the town, and had the narrowest conceivable escape, having been actually in the hands of some of the ruffians, who, with pistols to his head, demanded if he was not the editor of the Independent. With rare and fortunate presence of mind he very coolly denied being that personage, and thus saved his life. He succeeded in getting aboard the La Belle with his family.

About twelve o'clock last night, we are informed, the negroes fired the lower part of the town, commencing with the office of the Independent.

On the first appearance of trouble, Mayor Schomberg and Judge Laws (not Lawless, as given in the morning edition,) received assurances from General Hunsacker, general of militia and candidate for the State Senate, that the militia would not be allowed to enter the town. He even furnished them with a written order, to be exhibited to the leaders of the militia, forbidding them to enter the town. It was while parleying with the negroes on this matter that the mayor and Judge Laws lost their lives.

Mr. Philipon says that the citizens of Donaldsonville who succeeded in escaping are greatly indebted to the captain of the steamer La Belle. They owe their lives, many of them, to his having promptly placed his boat at their service.

It is reported to us, by officers of the steamer Governor Allen, arrived here at an early hour this morning, that when they passed Donaldsonville, at fifteen minutes to twelve o'clock last night, a great fire was raging there. It thus appears that the threats of the riotous negroes to burn the town had been put into execution.—*Picayune, October 10.*

Loss of the Steamship Varuna.

LIST OF PASSENGERS.

The hope for the safety of the steamship Varuna raised by the announcement of the Galveston Civilian is crushed forever by the sad story telegraphed from Lake City, Fla. There will be mourning in not a few Texas homes, and the shock to the relatives and friends of the lost will be all the more terrible on account of that very hope. It was shortlived, however, as we find by the Galveston News of the thirtieth ultimo, which says:

"It was with great regret that our citizens learned yesterday that the report of the safety of the Varuna was without foundation."

No explanation is given by the News as to how the Civilian was led into publishing the false report. A subsequent issue of the journal doubtless does this. The report was credited, if we remember aright, to the brig F. H. Jennings, from New York.

The following is a list of the Varuna's passengers, as given in a New York special of Nov. 1 to the Galveston News. The number amounts to thirty-two souls, exclusive of the steerage passengers. It will be seen that the name of Sir George Samuel Jenkinson, M. P., mentioned in the telegram from Lake City as among the list, is not given in this list:

F. Hitchcock and lady, G. Rutledge, J. L. Briggs, Allen Lewis, J. Blum, H. Blum, O. Blum, Stephen Southwick, A. Bohlen, Oppenheimer, Benhard, Alexander Hamilton, F. D. Johnson and lady, M. P. Jenkins, Charles Ames, James Quin, Wallace Blake, Burley and lady, H. A. Rowland and lady, Mrs. Von Harten, Mrs. R. Lyons and family, five in all, George W. Searo, James Leddy, James Hand; a few steerage, names unknown.

Books.—Many readers judge of the power of a book by the shock it gives their feelings—as some savage tribes determine the power of muskets by their recoil; that being considered the best which fairly prostitutes the purchaser.—*Longfellow.*

THE SUPREME COURT.

WASHINGTON, Nov. 4.—Three important cases are set for an early bearing at the December term of the Supreme Court.

The first involves the constitutionality of the cotton tax law, and will be argued by Judge Curtis and Mr. Everts against the government.

The second concerns the constitutionality of the confiscation acts. This case will be conducted by Messrs. Curtis and Cushing against the United States.

The third comes from Kentucky, and involves the civil rights bill; this special case being a white man tried in the United States Court for the murder of a negro.

Judge Black appears against the government, and will hold that it is unconstitutional to try in the United States Court a citizen of a State for murder, when the State courts are open.

The New Orleans Slaughter House case came up, on a motion to restrain the New Orleans courts from interfering with the rights of the New Orleans butchers, secured them under the constitution of the United States.

The Slaughter House Company ask two weeks to answer Judge Campbell's argument in support of the motion.

Judge Black will move a dismissal of the case for want of jurisdiction.

WASHINGTON, Nov. 4.—The following statement of the proceedings in the New Orleans Slaughter House case has been prepared by a lawyer:

The first case involving the fourteenth constitutional amendment came before the Supreme Court to-day, upon a motion of Judge Campbell to arrest the action of the State courts of Louisiana until a writ of error, in which there was a supersedeas, could be heard.

Jurisdiction was claimed upon the first section of the fourteenth amendment to the constitution. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States, nor shall any State deprive any person of life, liberty or property without due process of law, nor deny any person within its jurisdiction the equal protection of the laws.

The question arose on a law of Louisiana, which gave a monopoly of the whole cattle business in the municipalities in New Orleans, and deprived a thousand persons of their well established business and property in receiving and slaughtering cattle.

Judge Campbell ably argued that the inhibition was upon the States; hence the court has jurisdiction under the twenty-fifth section of the judiciary act.

The subject elicited profound attention.

Judge Black takes two weeks to answer the motion.

SCRIPTURE DICK.—The papers are telling a story of a poor and simple-hearted African who once came to Mr. Moffat, the missionary, and told him, with a lugubrious face, that his dog had torn his copy of the New Testament, and swallowed some leaves of it, and that he was grieved about it, for the dog was very valuable. "But," said the missionary, "why do you grieve so? You can get another Testament, and the leaves will not hurt the dog." "Ah," said the savage, "that's what I fear. He is a good hunter and a good watch-dog, and the New Testament is so full of gentleness and love that I am afraid he will never be of any service again!"

No doubt there are some nettles in the world. There are unpleasant things, sad, hard things, that tend to make life smart keenly. But we put far more nettles into the world than are there originally. The real nettles are ourselves, in our own uncomfortable, petulant, sour, selfish dispositions, and they spread their own character over nature.

WHITER THAN SNOW.—What could possibly be whiter than snow? We are almost ready to say there is nothing. Yet there is something that is whiter than snow. It is the heart that is washed in the blood of Jesus. Turn to Psal. li, 7: "Purge me with hyssop, and I shall be clean; wash me, and I shall be whiter than snow."

It is nobler to be sincere than to wear the escutcheon of knighthood or to boast the blood of a line of kings.

A STRANGE BOMBE-BOUCHE.—The mitrailleur, which, just now, is in everybody's mouth.

Preachers' Aid Society, Alabama Conf'ce.

Mr. Editor: At a meeting of the members of this society, held in Union Springs, Alabama, in December, 1869, notice was given, according to article fourteen of the constitution of the said society, that at the next annual meeting of the society the following change in the constitution would be proposed, viz:

"That article two of the constitution of the Preachers' Aid Society be amended by the addition of the following words, viz: 'Provided, That every member so paying shall, on the death of any other member of the society, pay to the treasurer thereof the sum of \$5, which sum or sums so paid shall be paid to the widow and orphan or orphans of the deceased member; and if there be no widow and orphan or orphans, then the amount so paid shall be subject to the order of the Board of Directors, as the other funds of the society. On the death of a member the treasurer shall notify each surviving member thereof by publication in the official organ of the Conference.'"

Respectfully submitted at the request of the society.

J. A. PARKER.

A COMPREHENSIVE PIE.—The greatest pie on record was made at Lowther Castle, in Westmoreland, in the year 1762, and was sent up as a present to the king. It contained two geese, four ducks, two turkeys, four wild fowls, one wild goose, six wild ducks, three teal, two starlings, twelve partridges, fifteen woodcocks, two guinea fowls, three snipes, six plovers, three water hens, six widgeons, one curlew, forty-six yellow-hammers, fifteen sparrows, two chaffinches, two larks, three thrushes, one fieldfare, six pigeons, four blackbirds, twenty rabbits, one leg of veal, half a ham, three bunches of flour, two stone of butter. The whole pie weighed twenty-two stone (three hundred and eight pounds.) This must have been the original pie commemorated in the nursery rhyme: "When the pie was opened, etc."—*Food Journal.*

How LONG?—"How long does it take to be converted?" said a young man to his father. "How long," asked his father, "does it take the judge to discharge the prisoner when the jury have brought him in 'Not guilty?'" "Only a minute." "When a sinner is convinced that he is a sinner, and is sorry for it; when he desires forgiveness and deliverance from sin, and believes that Christ is able and willing to save him, he can be converted as speedily as the prisoner can be discharged by the judge. It does not take God a long time to discharge a penitent soul from the condemnation and power of sin."

"AGAINST WILL."—Recently a thief of the Mawworm type said to an English judge confidently: "My lord, I really assure you I committed the theft in a weak moment; quite, indeed, against my own will, my lord, quite." "O, very well," said his lordship; "it is only right you should have no cause for complaint. The offense will be met in a proper spirit. As you committed the act against your own will you will be punished against your own will."

MANY Christians imagine that, now since they have believed, they must draw their comfort from some other source, or in a different way from what they did at first; they turn their whole attention to themselves, their experiences and their graces. Forgetting that the true way of nourishing these is by keeping their eye upon the cross, they turn it inward and try to nourish them by some process of their own devising.

ONE of the most ancient methods of representing the Deity by means of bioglyphics was an eye upon a scepter, indicating that God sees and rules over all things.

The Thracian symbol of Deity was a sun with three rays; one of them fell upon a sea of ice and melted it; another was directed to a rock, which it dissolved; the third shone upon a corpse, restoring it to life.

ILLINOIS has grown more rapidly in population during the past ten years than any other State in the Union.

The Christian Advocate.

SATURDAY, NOVEMBER 12, 1870.

"WHILE THE DAYS ARE GOING BY."

BY GEORGE COOPER.

There are lonely hearts to cherish
While the days are going by;
There are weary souls who perish
While the days are going by.
If a smile we can renew,
As our journey we pursue,
Oh! the good we all may do
While the days are going by!

There's no time for idle scolding
While the days are going by;
Let our face be like the morning
While the days are going by.
Oh! the world is full of sighs,
Full of sad and weeping eyes,
Help your fallen brother to rise
While the days are going by.

All the loving links that bind us
While the days are going by,
One by one we leave behind us
While the days are going by;
But the seeds of good we sow
Both in shade and shine will grow,
And will keep our hearts aglow
While the days are going by.

"WHO IMMERSED JOHN CLARKE?"

MR. EDITOR: This is now certainly a pertinent question, and one in which our Baptist friends are more deeply interested than any one else. It is certainly important to them if their doctrine that those religious societies which cannot prove a regular baptismal succession from the apostles, outside of the Church of Rome, are not the church of Jesus Christ, be true. To this doctrine I believe they hold, and for it contend.

It is certainly pertinent for us to ask the question, inasmuch as we are deliberately declared by Baptists to be "out of the church"—as "setting up a society in opposition to the church," etc.

In order properly to feel the force of the interrogatory which forms the caption of this article it will be necessary for the reader to bear in mind the fact that the well accredited piece of "Baptist history" with regard to the founding of the first Baptist church on this continent by Roger Williams and Ezekiel Holman is denied by Mr. Graves (see Dr. Skipworth's article in the Advocate of September 24) and others, and that it is as gravely declared by said parties that John Clarke was the founder of the said first church on the American continent, as though they believed it were true.

This denial of their own history, however, avails them nothing unless they are able to prove that Clarke's baptism was valid. I again repeat the question: "Who immersed John Clarke?" Was John Clarke a Baptist minister when he first came from England? Mr. S. Adams, of Newport, Rhode Island, in a letter addressed to Rev. J. R. Graves, May 4, 1857, and published by said Graves in "Trials and Sufferings for Religious Liberty," expresses the belief that he was. I say expresses the belief, and it is only the expression of belief, without any evidence whatever save that which is based upon supposition, and that, too, seemingly at variance with what Mr. Backus says of him in his work, "History of the Baptists in New England," and published in Baptist Library, vol. 1, page 103. He there says that "Mr. John Clarke was a preacher of the gospel at Newport until he formed a Baptist Church there."

Although there seems to be some ambiguity in the above quotation, I am satisfied that a fair and reasonable construction of the passage is that he was a preacher of the gospel in another church up to the organization of the Baptist Church at Newport, which organization, it is possible, may have been effected by the entire Congregational Church, of which he was pastor, adopting Baptist sentiments. If this is not our author's meaning, it is as reasonable to suppose that he meant to say that after the organization of the Baptist Church at Newport he (Clarke) ceased to preach the gospel, even though he was its pastor, as to suppose he meant to say that Mr. Clarke was a preacher of the gospel in the Baptist Church until he organized the Baptist Church at Newport.

The reader will remember that Mr. Clarke, according to Mr. Backus, left Massachusetts because of the

persecutions that were exercised there. He, his brother Joseph and many others, after leaving Massachusetts, went to Providence and were advised by Mr. Williams to go to the Island of Aquanet (Newport), whereupon Mr. Williams accompanied Mr. Clarke to Plymouth to inquire if the settlers there had any claims on said island; and finding they had not, Mr. Clarke and his company took immediate possession, and entered into a compact together. Afterward Mr. Williams had them included in his government.

I have been thus particular in order to show that Mr. Williams was well acquainted with Mr. Clarke; and if Mr. Clarke had been a Baptist preacher, would certainly have known it at that time, which was March, 1638. In March, 1639, one year after this compact was entered into by Mr. Clarke and his friends at Newport, Mr. Williams and eleven others, having probably changed their views on the subject of baptism, determined to organize a church on Baptist principles; whereupon Ezekiel Holman immersed Roger Williams, and he in turn immersed Mr. Holman and the other ten, forming thereby the first Baptist Church (if Baptist historians are to be accredited) ever organized on this continent. Now it is reasonable to suppose that Mr. Williams and company would have adopted the above expedient if a Baptist minister had been living within thirty miles of him—one, too, with whom he was intimately acquainted and on terms of friendship? Does any living man believe he would? Would any do so at the present time? Again I ask: "Who immersed John Clarke?"

Although it is hardly possible to determine with certainty that he ever was immersed, yet I think it probable and not unreasonable to suppose that he was. My reader is doubtless by this time anxious to know by whom. In answer to the question at the head of this article, I will say that I am inclined to think that it was done by Thomas Olney, the successor of Roger Williams in the pastorate of the church which Mr. Williams and his eleven confederates organized at Providence, in March, 1639.

The reader will please remember that Mr. Williams abandoned his pastorate of said church in the July following its organization, and that Mr. Olney was elected to the pastoral charge of said church in his stead, and continued in said relation to said church until his death, which occurred in 1682, embracing a period of about forty-three years.

It will also be remembered that Mr. Conner, of whom Mr. Adams says, "The first, and for the early history of our denomination the most reliable of writers," "was especially distinguished for the extreme accuracy of his dates;" "he was careful not to record as certain that on which any suspicion rested," "whose veracity has never been questioned," etc., does not deny that 1644 was the date of the founding of the first Baptist Church at Newport.

Mr. Benedict and Mr. Backus also agree in their statements that said church at Newport was founded in 1644. The reader will remember that Mr. Clarke went to Newport in 1638, that Mr. Williams' church was founded in March, 1639, and that Mr. Olney became its pastor shortly after (July of the same year,) about five years intervening between the beginning of Mr. Olney's pastoral relations with the Providence church and the founding of the Baptist Church at Newport—an ample amount of time to have gone a distance of about thirty miles, and to have been immersed!

Now, reader, pay special attention. If this supposition be true (and really it looks quite reasonable to my mind,) then Mr. John Clarke obtained his baptism from the pastor of a church whose very foundations were laid in baptism by a man who himself was not (if the Baptist theory of a church be true) a member of any church.

Remember, we are not arguing the invalidity of this baptism, no matter how much we may question it under ordinary circumstances;

but we are wanting to know how our Baptist friends will reconcile their bold and arrogant claims to being the only church of Christ on the ground of their baptismal succession with this piece of their own history.

If any one can tell when, where and by whom John Clarke was immersed, we hope he will do it. In case, however, it is not done, we will take it for granted that our Baptist friends acknowledge themselves unable to perform the task, and that those who proclaim to the world that John Clarke founded the first Baptist Church on this continent "are members of no church at all—themselves being judges."

We ask again, with emphasis, where, when and by whom was John Clarke immersed? We would be pleased especially to hear from the editors of the Louisiana department of the Baptist. Speak out, gentlemen! We want none of Mr. Adams' supposition, but a simple statement of time, place and name of administrator, supported by well authenticated testimony. THOS. J. UPROX.

MR. LEHMAN, LA., Oct. 25, 1870.

CAMDEN DISTRICT CONFERENCE.

MR. EDITOR: This conference convened at Bellville, Alabama, on Thursday, October 6, 1870. The introductory sermon, preached by Rev. M. J. Law, was practical and spiritual. The first hour's service was honored with the presence of the great Master of "assemblies." During the concluding prayer the Holy Ghost came upon nearly all in the house. This action from the Holy One encouraged us to wait on the Lord, and prepared us more fully for the successive duties of the occasion.

Prominence was given to religious services. Prayer meeting at half-past eight o'clock in the morning, preaching at eleven, and also at night, was the order of appointments until Sabbath. On Sunday morning, at nine o'clock, love-feast was held; preaching at eleven; Sabbath school addresses in the afternoon; preaching again at night, after which the sacrament of the Lord's Supper was administered. The meeting was unusually interesting, nearly every service being characterized by some manifest exhibition of the presence of the Holy Ghost. Many will bear with them, along their pilgrimage, the memory of those prayer meetings and the love-feast.

The conference was organized with Rev. D. M. Hudson, presiding elder, in the chair. T. K. Armstrong was elected secretary, and M. J. Law assistant.

The pastors of the several churches were all present except one. There was not as full a representation of the laity as was anticipated. The usual method of working through committees was adopted, and committees were appointed on Denominational Education, Books and Periodicals, Sunday Schools, Missions, Finance, Temperance, State of the Church, and Committee of the Whole.

The report of the Committee on Education shows the importance of religious culture, the tardiness of the Methodist Church in this district upon the subject, and the folly of parents in patronizing such schools as the Roman Catholic, where their children imbibe the most erroneous principles and doctrines. The report closed with the following resolutions:

1. Resolved, That we as members of this District Conference will in the future insist upon the people of our church to send their children to our own schools.

2. That we make an earnest effort to raise means for the purpose of educating some young man of this district for the ministry.

The report of the Committee on Books and Periodicals indicates a want of interest upon the part of the church in circulating and reading our religious literature. The NEW ORLEANS CHRISTIAN ADVOCATE, the organ of our Conference, was specially recommended to the people. A resolution was added to be more zealous in circulating the literature of the church.

The report on Sunday schools exhibits an increasing interest in that cause. The report, with the following resolutions, was adopted.

1. Resolved, That in view of the relation existing between the children of the present and the citizens of the future, moral and religious instruction has been too much neglected.

2. That we rejoice in the manifestations of an increasing interest in the religious instruction of the children of our country.

3. That we will continue to give to the Sabbath school cause our hearty co-operation.

4. That we will, as far as practicable, increase our efforts to introduce the Sunday School Visitor and other Sabbath literature of our church into the schools and congregations under our charge.

5. That the conference request the presiding elder of this district, for the next year, to call a Sunday school convention, said convention to meet at Pineville.

The report on missions represents a large portion of country in the bounds of the district as being greatly destitute of the preached gospel. A mission was formed embracing this territory, and the District Conference pledged itself to raise \$300 for the support of the missionary.

The finances of the district are greatly behind the demands of the church. It was devolved upon the presiding elder to preach on every charge in this district, at least once during the next year, on the support of the ministry.

Intemperance was represented by the report of the Committee on Temperance to be fearfully on the increase. It is the curse of this country—the great impediment in the progress of the church on a part of this district.

THE STATE OF THE CHURCH.

When this subject came up full reports were given of the spiritual state of the church by the pastors of the several churches. The subject was thoroughly sifted. Some things unfavorable to the prosperity and development of the church were brought to light; but upon the whole the church was reported as growing in spirituality, strength and influence. The Lord has greatly blessed the labors of his servants here. Scores have been added to the church during the year. How it encourages the hearts of the servants of Jesus Christ to see his pleasure prospering in their hands!

The following resolutions were offered, and adopted by a rising vote of the Committee of the Whole:

1. Resolved, That we as a District Conference are profoundly thankful to God for the gracious outpourings of his Spirit on many of our churches, the conversion of scores of souls, the general prosperity of Zion in the district, and the adding of about five hundred members to our church this year.

2. That the preachers in charge of the works in the district insist on heads of families holding prayers and reading the Bible in their families; and class leaders making more determined and persistent efforts to hold class meetings regularly in all our churches; and if the class leaders for any reason fail to hold them, then the preachers in charge shall hold them as often as practicable.

3. That all the preachers in charge of works in the district make stronger efforts than have been made heretofore to teach our people the distinctive doctrines of our church, and that they preach at every church, where it is needed, sermons especially on the possibility of apostasy, and on the subjects and mode of baptism.

4. That the preachers talk to those members of our church who sell intoxicating liquors, and try by every proper means to induce them to desist from selling soul and body-destroying drinks.

5. That we will, as preachers, read the Bishops' address on popular amusements in all our churches at least once a year.

The delegates elected to the Annual Conference are: Dr. Moses Padgett, John Sampey, A. D. Hart and D. T. Sirman. Alternates: J. A. C. Horn, John Dudley, Z. Watson and Samuel Tisdale.

Resolutions of thanks to the citizens of Bellville for their hospitable entertainment were adopted.

The next District Conference is to meet at Evergreen.

THOS. K. ARMSTRONG, Sec'y.

At the Mormon Conference recently held in Salt Lake City, Brigham Young offered to resign his trusteeship of the church and the presidency of the emigration fund. The latter was accepted in good faith, but he was continued in the former relation—very much, it is said, to his own satisfaction.

M. J. WHITWORTH.

IN MEMORIAM.

When a brother pre-eminent in piety is called from labor to rest it is very proper that there should be more than a mere passing notice of the event. When Abner was buried David lifted up his voice and wept, and refused to taste bread or ought else during the day, for said he unto his servants: "Know ye not that there is a prince and a great man fallen this day in Israel?" Doubtless all the brethren of the Mississippi Conference, and very many others, will be filled with sorrow when they learn that Rev. MILTON J. WHITWORTH is dead.

It is not often that any community is called upon to mourn the death of such a good and useful man. It may be well for us to pause awhile and gather lessons of wisdom from the record of his life and death.

He was born in Bedford county, Tennessee, on the sixteenth of December, 1811; removed to Mississippi in 1835, and died at his residence, near Brookhaven, on the twenty-fourth of October, 1870.

He was an active, industrious and economical man all through life. He never became immensely rich, yet he accumulated considerable property. From his example we may learn to be "not slothful in business, fervent in spirit, serving the Lord."

He did not possess very striking qualities of mind—he was no intellectual genius. He was plain and unassuming. God blessed him with a clear mind, an excellent judgment and a rare business capacity. Of these he made no display, but moved along as quietly as though his was an ordinary life.

He was not unmindful of the duties he owed his God. He sought and obtained religion at Otopasaw camp meeting in the year 1842. From then until his death he lived a Christian life. He was not religious from mere impulse, but from an abiding conviction that he owed service to God, and that he was under the highest religious obligation to pay it. His daily walk was conformed to God's law, and his worldly affairs were subordinated to the claims of the gospel.

His Christian life shone not so much in profession as in constant devotion and in the performance of the practical duties of Christianity. He was kind to the poor, a friend to the preacher, and benevolent to all. The Methodist church here was mainly built with his money, and Whitworth Female College stands as a witness of his enlightened liberality.

As a business man, a Mason and a Christian gentleman he had few equals.

His last sickness was long and painful, but he endured it with Christian resignation. He was first attacked with erysipelas, and afterward with tuberculosis, which was the immediate cause of his death. During his sickness he was entirely resigned to the will of God. Sometimes he appeared anxious to depart and to be with Christ. He said to the writer one Sabbath morning: "Bro. Johnson, I thought I would have been in the good world before this; but my friends give me stimulants, and will not let me get off." He joined most heartily in the sentiment: "To live is Christ and to die is gain." It seemed to fill his soul unutterably full of joy. Soon after the physician, seeing him place his hand on his head, asked him if he had any pain in his head, to which Bro. Whitworth replied: "No, doctor; when there is joy in my soul there is no pain in my head."

On the day before his death he partook of the Lord's Supper, and appeared to enjoy it very greatly, joining in as much of the service as his strength would allow.

He was buried by the church and the Masonic fraternity. The exercises of the college were suspended, the business houses of the town were closed, and all the people turned out en masse to do honor to the memory of him who had done honor to them. The church and the college chapel are now draped

in mourning in token of the great bereavement.

May God in his mercy raise up many such men to bless and honor the land. H. F. JOHNSON.

BROOKHAVEN, MISS., Oct. 24, 1870.

WHEREAS, Our friend and benefactor, M. J. Whitworth, the founder of Whitworth Female College, has been called from the scenes of his earthly labors, the faculty and pupils of Whitworth College, in mass meeting assembled, desire to give expression to our feelings of sorrow on this sad bereavement, and to show our respect and reverence for the memory of our departed friend:

We will not undertake to recount his many virtues, to praise him for his numerous acts of charity and benevolence. It is enough to say that he was a good man, honored and beloved most by those who knew him best.

To many of us he was personally a stranger, but to all of us he was a friend, and we therefore desire on this sad occasion to mingle our tears with those of his immediate family and neighbors.

We do not sorrow so much on his account, for we believe that he will receive the Christian's reward; but we sorrow on account of our loss. The college has lost its best friend, the church one of its brightest lights, and our community one of its best examples of godliness.

1. Resolved, That we tender our condolence to the family of the deceased.

2. That we will wear the usual badge of mourning for thirty days, and that the chapel be draped in mourning for the same time.

3. That the exercises of the college be suspended for the day.

4. That a copy of the foregoing preamble and resolutions be furnished the family of the deceased.

H. F. JOHNSON, Pres.

SHREVEPORT DIST. CONFERENCE.

MR. EDITOR: The fourth session of this conference was held in Greenwood, Louisiana, September 22, 23 and 24, 1870. All the traveling preachers on the district were present except one. Only three appointments, of eight in the district, were represented by laymen.

The presiding elder, Rev. John Pipes, occupied the chair. Committees were appointed to report on the following subjects: Spiritual Condition of the Church, Sunday Schools, Finance, Missions and Church Extension, Churches and Parsonages, Periodicals and Religious Literature, Education, Religious Interests of the Colored People, and Temperance.

The ministers gave to the conference a verbal account of their appointments. After hearing these the committees made their reports. These evinced that the district is numerically increasing; that Sunday schools are receiving a good share of attention; that the finances of the district are in a low condition; that there is room for church extension; that the district is poorly supplied with churches and parsonages, and that the securing of church property by deed is sadly neglected.

That the New Orleans Christian Advocate receives a liberal patronage; that Mansfield Female College is in a prosperous condition, although it lost, in the death of Mrs. Stuart, one of its principal teachers; that little is doing, and that but little can be done at present, for the colored people; and that some of the members drink drams. Alas!

Of course we resolved to do something. Besides other things, we resolved to keep the subject of temperance prominently before our people, and to aid temperance organizations. Our presiding elder is a zealous leader in the cause of temperance. He has some close followers. Others follow like Peter once followed the Savior.

We resolved to adopt the plan of individual assessment for the support of the ministry. May the Lord help us to carry out all our good resolves!

Brothers Wimberly, Freeman, Schumpert and Rev. C. B. Stuart were elected delegates to the Louisiana Annual Conference.

The next District Conference is to be held at Mansfield.

W. H. MOSS, Secretary.

The Pall Mall Gazette records it as a mark of progress in civilization (?) that "we read of the slaughter of seven thousand persons with far more calmness than we heard of the slaughter of the seven members of the Kinck family a year ago."

The Christian Advocate.

SATURDAY, NOVEMBER 12, 1870.

THE MUSIC OF THE SPHERES.

Hast thou not heard it, the universal music—
The throbbing harmony, the old, eternal
rhyme?

In the wild billows roaring,
In the mad torrents pouring,
And keeping with the stars its bent and
march sublime!

Hast thou not heard it when the night was
silent,
And nothing stirred but winds amid the
trees,

And the star orbits, strings of harps celestial,
Seemed quivering to the rush of melodies?

If in thy soul there pulse not some faint re-
sponsive echo
Of that eternal, everlasting hymn,
Thou'rt of the low earth lowly—
Or livest life unboldly.

Or dustiest spiritual sense by carnal gross-
ness dim,
Hear it, oh poet, hear it! Oh, precher,
Give it welcome!

Oh, loving heart, receive it deep in thine
inmost core,
The harmony of angels, glory, forever glory,
Glory, and peace, and joy, and love forever
more!

ILLINOIS CONFERENCE.

Mr. Editor: It seems that you
promised, in your last issue, that
I would furnish a communication
for your columns, growing out of
my visit to the Illinois Conference.
Well, I suppose the editor must be
verified, and so here you have what
I have penned.

Kimmunity is a new, handsome
and thriving town on the Central
railroad, about twenty miles north
of Odin, where the Ohio and Mis-
sissippi road crosses. It is located
in the heart of a beautiful and very
productive country, and bids fair to
become quite a city.

The Conference met on the twelfth
of October, and closed all of its busi-
ness on Saturday, P. M., except
reading the appointments, which
was done on Sunday night after
preaching. The attendance of preach-
ers, laymen and visitors was large,
and the proceedings were marked
by the very best spirit. Everybody
seemed to be pleased, and the re-
ligious enjoyments were delightful.

The preaching was attended by
large audiences of appreciative hear-
ers, and the Conference love-feast
was a "time of refreshing from the
presence of the Lord." The citizens
displayed much hospitality in the
entertainment of the body and visit-
ing friends. The collections for mis-
sions, and the liquidation of the re-
minder of the debt on the new
church were liberal and prompt.

The church was just completed, and
is a gem. Bishop McTear dedicated
it on Sunday in the presence
of a large congregation. I need not
say the sermon was appropriate and
able. Brother Rush, of the Missouri
Conference, delivered a fine dis-
course at three o'clock P. M., while
preaching by various brethren was
going on at different places, and a
Sunday school meeting at the Cum-
berland Presbyterian church. At
night there was preaching at all the
churches; the crowd at the Meth-
odist church was very large, and
the congregation was baptized by
the outpouring of the Spirit.

Our brethren in Illinois are mak-
ing steady progress, and their or-
ganization is a fixed fact. They are
forming new circuits and new dis-
tricts, and continually enlarging
their borders. Houses of worship
are being built in many places, and
the preachers and members are
firmly united in love and in action.
There is need of more laborers—in-
deed there are many points in the
State where there is an opening for
our brethren, and where the calls
are pressing. Mr. Editor, our breth-
ren in the older States, and further
East and South, are not aware of
the urgent demands for preachers in
the West and Southwest—for
preachers of the real, genuine Meth-
odistic stamp—preachers who know
who teach nothing but Christ and
him crucified; and the people are
willing to give them support. Not
one dime of missionary money has
ever been expended by the Church
South in sending the gospel to
Illinois; the people who call for the
services of the preachers give them
a generous support. Indiana, too,
is calling for preachers; there are
thousands in that State who are
anxious to unite with us, and thou-
sands more who will be lost to Meth-
odism unless they are taken into
our church—they never will go into
the Northern Methodist Church.

Away on the Western frontier there
are loud calls for help. The country
is filling up with an enterprising
population, and they must have the
gospel, and we must do our part to
send it. Who will go? Who will
contribute means to help others
to go? Sir, I hope the time is not
distant when our banner will wave
in every valley and upon every hill-
top toward the setting sun, and
when the East and West will meet
on the summit of the Rocky mount-
ains, and send back the notes of
peace and good will.

Brother Finney, of the St. Louis
Christian Advocate, was with us at
Kimmunity, looking after the inter-
ests of his paper. He is deeply inter-

ested in the missionary work in the
West. His sheet is a strong support
to our cause. May he have success!
J. B. McFERRIN.
Nashville Christian Advocate.

SET THY HOUSE IN ORDER.

"Died suddenly!" How often
these solemn words meet our gaze
in the newspapers! They suggest
most important inquiries to each one
of us. Reader:

1. Is your business in such shape
that if you should die to-night it
might be settled by your survivors
without unnecessary loss to your
estate? Immense sums are lost,
and vast trouble and expensive
litigation are involved by improp-
erly kept account books and the
neglecting of full memoranda of
unfinished business.

2. Is your will made? In the
event of your pulse ceasing to beat
before to-morrow morning, would
not injustice be done to your heirs,
and these objects of Christian
benevolence which it is your inten-
tion to promote after your death?
Died intestate! Is often the precu-
rator of jealousies, and heart-burn-
ings, and injustice, which might
have been prevented by a few
strokes of the pen.

3. Have you paid all your debts?
Or have you made arrangements
that your creditors shall not be
wronged?—There may be some
balances against you, which you
acknowledge yourself morally bound
to meet, but against which no legal
claim can be presented. You intend
to pay them after a while. You
have the ability now, but you are
neglecting them. Take heed lest
death, coming when you do not ex-
pect him, shall put it forever beyond
your power to do justly.

4. Are you on amicable terms, as
far as you can be, with everybody?
You spoke an unkind word, and
wounded a sensitive heart. Have
you tried to repair the damage?
That brother, that sister, that
neighbor, toward whom, in a mo-
ment of excitement, you acted an un-
christian part, deserves better treat-
ment. You are conscious of having
wronged them. Had you not better
ask their forgiveness, and gain
reconciliation now? To-morrow
there may be no opportunity. You
know not what shall be on the
morrow.

5. Have you made God your
friend? If not you have no time to
lose. He waits to be gracious now.
You will soon stand before him.
This night thy soul may be re-
quired of thee." Take Jesus at once
to be your Mediator and Saviour.
Set thy house in order.—*Christian
Intelligencer.*

IN THE YEAR 1456 the church bells
all over Europe were rung to keep
off the devil, the Turks and the
comet. Time has shown that the
fear of the comet was idle, the dread
of the Turks unnecessary, and the
terror of the devil unjustifiably
allayed by the ringing of bells to
which it is quite possible Satan did
not even listen. How much of
human life has been wasted in vain
fears and vain remedies! In in-
dividual history the things we most
fear rarely happen. Our real trou-
bles are from causes we do not con-
sider and sources we do not appre-
hend. Ignorance conjures up many
specters that haunt the imagination
and attract away into empty space
the energies of our life. Exaggera-
tion of real evils begets our power
of resistance and sets us to ringing
bells for superstitious aid, when
courage and hard knocks are all
that are required to settle the
Turks. Even the devil is not feared
aright. It is not his enmity but his
friendship, not his power to hurt
but his power to cheat, that ought
to be feared. The vulgar myth that
describes him with hoofs and horns
is so far accurate that it presents a
beast that bellows but does not bite
nor tear. "God is our refuge."
Help must come from intelligence
and power. If we do not find it in
ourselves, we must seek it from the
source of wisdom and strength.
Any other hope is superstition, all
other trust is non-resistance. Bells,
ceremonies, priest-machinery of all
kinds are too agreeable to the devil
to frighten him away. Ritualism
nauping the place of God is recog-
nized by Satan as his own flag flying
over a fortress that has surrendered.
Baltimore Christian Advocate.

A new definition of constitutional
laziness comes from Ohio. Stand-
ing on the steps of one of the
"single-ten taverns" of that State
was an unwashed Buckeye, whose
shabby exterior did not indicate an
industrious man. A gentleman on
the opposite side of the street re-
marked to his companion: "There
is old Tim again; wonder how he
got out this cold day. He is the
laziest man in town by all odds."
"Laziest?" replied his friend; "he
isn't lazy; the matter with him is,
he was born tired!"

Religion need not, should not
make me gloomy. What says the
Author of it to his disciples? "These
things I say unto you, that your joy
may be full."

THE BIBLE IN ROME.—The Bible is
circulated and read in Rome, an
event more important than the
Ecumenical Council, or the declara-
tion of papal infallibility. It is a
remarkable coincidence that such
a council, and such an impious dog-
ma, proclaimed by such an assembly,
should be immediately followed by
the signal overthrow of the Pope's
authority by the vote of his subjects
—fifty thousand against fifty! Who
will not recognize the Providence
of God in this event? Chance had
nothing to do with it; nor does
chance direct any event—even the
falling of a sparrow—in a world
under the eye and government of
God.

The word of God—the true infalli-
bility—the divine source of the
highest knowledge, has entered
Rome. We presume it will be fol-
lowed by freedom to worship God;
and that Protestants will no longer
be compelled to assemble—if they
hold any social meeting for religious
worship—outside of the walls of the
city. Emanuel, the King of Italy,
whose government now extends
over Rome and the Roman States,
is supposed to be nominally a Roman
Catholic. As freedom of religions
worship is established in other parts
of Italy, it is presumed that it will
be tolerated in Rome—although the
King secures to the Pope his spiri-
tual authority in the Roman Church.
Religious liberty is a civil as well
as a religious right. No prince or
parliament can rightly prohibit the
worship of God by any class of
persons residing under their gov-
ernment.

In a letter from Rome, dated
September 22, 1870, the writer says:
"It is with no small thankfulness
and gratitude to the good Lord that
I am able to announce to the Com-
mittee of the British and Foreign
Bible Society, that at last the Bible
is in Rome, and that fear, if not
six, of their corporealities are in this
city. Having marched with the
soldiers from beyond the frontier,
they entered with a portion of them
on Tuesday, soon after a breach had
been made in the walls by General
Cadorna. The first to get in—and
he was determined to be the first—
was Frandini, who was exiled in
1860, and who was keen to see his
parents once more, and to carry the
Bible back with him to his native
city. I have not seen all the men
yet, but expect to do so this even-
ing."—*Christian Observer.*

THE TRUE CHURCH.—The church
of Christ consists of all true believ-
ers of every land, age, complexion
and tribe. This structure is bounded
by no narrow ecclesiastical limits.
It is greater than any titled orga-
nization. It cannot be fully repre-
sented by theological views; nor
can its census be taken from de-
nominational statistics. No sect can
justly claim, however correct its
orthodoxy or high its standard of
spiritual prophecies, to be the only
church of Christ. The New Testa-
ment knows of no exclusive com-
munity organized as the alone visible
church. No society of kindred be-
lievers can arrogate to itself the
ministry, the means of grace and
the sacraments. The foundation is
Christ, the apostles and the proph-
ets; Jesus Christ being the chief,
the corner-stone, binding the old
and the new dispensations into
one. The church of God is the
purchase of his blood—not a com-
pany united under a human head
or by a human bond. The base
and boundary of all believers are
broad as the Bible, Christ, the
apostles and the prophets. The
Lamb's Book of Life is the only
correct register of believers. The
Church of the First Born is not
Roman nor Protestant, Greek nor
Anglican, Episcopal nor Presby-
terian, Baptist nor Methodist, al-
though it includes members in all
these branches. It is no national
church, for no nation under heaven
is big enough to give it name. It is
nothing less nor lower than the
great multitude which no man can
number, of all kindreds and peoples
and tongues. The foundation laid
in Zion is immensely broad—broader
than Plymouth Rock—broader than
the seven hills by the Tiber. The
corner-stone in Zion is firm enough
for an immortal super-structure that
shall rise above the sun.—*Workday
Christianity.*

TRUTH IS A CLAM SHELL.—A clam
dealer says he likes those doctrines
and that religion which will make
men count claims honestly! A re-
ligion that does not teach practical
honesty, that does not flourish on
the clam bank as in the church,
that is strong in the prayer meeting
and weak in the workshop, that is
rich in profession and poor in prac-
tice, loud in promise and weak in
performance, such religion is spiri-
tualism. The Bible says that "a false
balance is an abomination to the
Lord, but a just weight is his de-
light," and the verse sounds well,
but the Lord's views have a direct
bearing upon the scales and the
yard-stick; and a half ounce less on
the pound, and a half inch less on
the yard-stick will make the adjust-
ment of the moral balance-sheet a
troublesome matter.—*Watchman and
Reflector.*

RELIGIOUS INTELLIGENCE.

A REVIVAL of great power has been
experienced at Trinity College,
North Carolina.

The new Bishop of the Greek
Church has arrived at San Francisco
from St. Petersburg.

CARDINAL MATTEI, president of the
College of Cardinals, is dead. It is
said that Patrizzi succeeds him.

The Wesleyans of England have
just sent out four missionaries to
reinforce the work in New Zealand.

A GREAT REVIVAL has been expe-
rienced in the Baptist, Methodist
and Presbyterian churches of Tren-
ton, Tennessee.

INCLUDING the Congregational
church now building, Portland, Ore-
gon, has twelve meeting houses and
eleven schools and academies.

FROM 1863 to 1870 eighty-five
thousand copies of the New Testa-
ment have been circulated in Russia.
The National Church-interposes no
objection.

REV. J. W. DAVIS, of the Wesleyan
Missionary Society, has nearly com-
pleted a Kaffir-English Dictionary.
He has collected about five thousand
words, illustrated as to their use by
sentences in which they occur.

The Turkish government has given
permission for building a Bible
house in Constantinople. Already
\$63,000 is raised for the purpose,
and about \$15,000 is asked to put
up a fire-proof building.

ITALIAN HYMN BOOK.—The Execu-
tive Committee of the Wesleyan
Missionary Society had a new Italian
hymn book, embracing many of
Wesley's hymns, presented to them
at their September meeting.

COLEMAN says that the early Chris-
tians utterly discarded all the Jewish
sages and customs of mourning,
such as sackcloth and ashes and rent
garments; and severely censured the
Roman custom of their wearing
black.

ST. PETER'S CHURCH, Baltimore,
was opened for divine service on
Sunday, October 9, the Rev. Dr.
Tyring preaching both morning and
night. This is one of the largest
and finest Episcopal churches in the
country.

A MRS. PARSONS has made a dona-
tion of eighteen thousand francs to the
College of St. Francis Xavier, at
Bombay. Two-thirds of this sum
are to be expended on a tower to
bear the name of the benefactor.
The remainder is to be devoted to
the foundation of a purse for in-
digent students.

SIR FRANCIS LECHE, a distin-
guished layman in the Wesleyan
connection, proposes to give \$250,
000 for the purpose of erecting fifty
new chapels in London, provided
the church would give an equal
sum. The Methodist brethren of
London are confident that the
amount will be secured.

THE CHRISTIAN population of Tur-
key enjoys entire exemption from
military service. The Turkish army
numbers one hundred and twenty
thousand men. The soldiers are
excellent in point of physique and
adaptability for their profession, but
they are ill-trained, and little skilled
in the use of new-fashioned firearms.

The Christian World says that in
1856 there were but two Protestant
ministers with care of souls in Chili,
whereas now there are ten. At
that time there were only two con-
gregations; now there are fourteen
—four in Valparaiso, two in San-
tiago, one each in Talca, Talcahuano,
Osorno, Port Mont, Lota, Copiapo,
Carrizal and Guayaque.

The Lutheran Observer says that
the polity adopted by most of the
Lutheran churches in this country
combines the leading characteristics
of both Pre-baptism and Congrega-
tionalism. "In the earlier
history of the Lutheran Church in
this country the Congregational
element was the stronger; in her
later development the Presbyterian
element has made considerable pro-
gress."

SOCIABLE.—The students in Gar-
rett Biblical Institute at Evanston,
the Baptist Theological Seminary in
Chicago, Union Park Congrega-
tional Theological Seminary in
Chicago, and of the Presbyterian
Theological Seminary in Chicago,
are on good terms. They recently
had a meeting and supper together.
They aim to thus meet once a
quarter, each in turn serving as
hosts.

IN THE Missionary Herald we find
a very valuable table of missionary
statistics. From it we learn that
17 American societies collect \$1,669,-
685, and employ 463 male and 479
female missionaries. They have 223
ordained native preachers, 59,062
communicants, and 40,629 pupils in
schools. European societies have
1,841 male and 1,788 female mis-
sionaries. They report 242,020
communicants and 248,836 scholars.

A COMESENABLE EXAMPLE.—An ex-
change says that Ovid Butler, Esq.,
of Indiana, a large stockholder and
president of the board of trustees of
the Northwestern Christian Univer-
sity at Indianapolis, is paying the
tuition of twenty-seven young men

now preparing for the ministry at
that institution, and is able and
willing to pay for a still larger num-
ber who need such assistance; and
can give good evidence of their sin-
cerity and character.

SEAMONS FOR THE POOR.—The
Christian Union says that a gentle-
man who wishes his name to be un-
known has ordered the Plymouth
Pulpit to be sent at his expense to
every poor house and every jail in
the State of New York. The author
of the sermons, who is also editor
of the Union, says that he "would
rather go to the poor house and the
jail in that way than in any other!"
A like benefaction was made by
another gentleman last year to every
missionary in the employ of the
Home Missionary Society.

LORD SHAFTESBURY said some time
ago that not more than two per-
cent. of the workmen of London
attended any place of worship. The
statement excited doubt, but it is
said to be verified by wider inquiry
and observation. The Earl pro-
fesses himself to be overwhelmed by
the statistics. He urged the Church
of England to enlist a new order of
men and a new method of operation.
He wants workmen to preach;
and desires to see bishops in lawn
holding forth in the open air.—
Ellicott City Times.

A LONG STEP in the consolidation
of the several antagonistic Protest-
ant interests in Italy was taken
lately in Milan, where thirty-three
separate churches united to form
the Free Italian Church. Of these
churches twenty are aided by the
American and Foreign Christian
Union. A general assembly on the
Presbyterian basis was established,
and a committee of evangelization
appointed, of which Gavazzi is chair-
man. The training school at Milan
for preachers has been transferred
from the Union to this new body,
and will probably be removed to
Rome.

The New York Sun says: An im-
mense number of Episcopalians ap-
plied for tickets to witness the grand
ritualist service in the Saint Sacra-
ment Mission. It is understood that
the Scotch Office of the Holy Enchar-
ist, as embodied in the Book of Com-
mon Prayer, recently approved by
Bishop Doane, of Albany, is used by
Father Bradley, the officiating priest.
This office sets forth the "real pres-
ence" in the sacrament in a "heav-
enly manner," as it was set forth in
the liturgies used in the time of
Queen Elizabeth and Edward the
Sixth. Nearly all the High Church
clergy of this city have received
cards of admission.

BRIGHAM YOUNG has just gone
through the farce of tendering his
resignation as trustee in trust of the
Mormon Church. The question of
accepting the resignation was put to
the congregation assembled for the
purpose, and Brigham was of course
sustained unanimously. He also
resigned the presidency of the emi-
gration fund, and this was accepted,
and one of his tools appointed to
the place. The prophet gave as
reasons for resigning that he was
getting old and wanted to travel
among the saints, and did not wish
to be harassed with the vexatious
lawsuits now threatened by apos-
tates. In his speech on the occa-
sion he was furious against the civil
courts.

The Era, comparing Romanism
and Methodism, says: "In view of
the notion that the former is far the
stronger, facts show that one branch
of Methodism is one-third greater in
population than the Catholic Church,
and that the combined Methodism
of the nation is twice as large, nu-
merically, as Romanism."

It is equally true of the Baptist
body; while Protestantism, which
is a unit against the pretensions of
papacy, is manyfold larger. Pres-
byterians have as many ministers,
and far more wealth and influence;
Episcopalians and Congregational-
ists together as many. Let no one
fear for the church of America, if it
is only united, spiritual and earnest
for Christ.—*Zion's Herald.*

The Free Church of Scotland
Monthly Record says that in Scot-
land there is a growing tendency
among the young people to leave
the Presbyterian for the Episcopal
Church. This it accounts for mainly
because of the more fashionable
position of the latter. It adds that
it "would be comparatively easy to
reconcile ourselves" to their going
over to the Low Church; but that
"when Presbyterians go over the
border under a pressure of a love
for music and form, and a sym-
bolic worship," they are not con-
tent with anything less than an ex-
travagant ritual that is half way to
Rome. It insists that ministers
and parents should teach clearly the
difference between episcopacy and
presbytery; and that, while "we
have the best of reasons why we
may not use organs, flowers or
kirtles," they should yet make the
services attractive, whether of song,
prayer or preaching.

MISSION SCHOOLS IN LIBERIA.—
Bishop Roberts sends us the statis-
tics furnished him by the teacher,
J. B. Forbes, of our mission school in
Buchanan, for the quarters ending
March 31 and June 30. From these
statistics we learn that the school is
slowly advancing, and is in a healthy
condition.

We have also received from the
Bishop, as we suppose, a copy of the
Liberia Register of September 7, in
which is a list of common schools
now in operation in the Republic,
and under the care of the Liberian
government, the New York State
Colonization Society, and of the
different missions in Liberia sever-
ally. The names of the places, the
teacher, and the number of pupils
in each school are given. There
are thirty-six of these schools now
in operation, and we consider this
strong movement in favor of com-
mon schools the most hopeful sign
of the times for Liberia.—*Western
Christian Advocate.*

DEATH OF MRS. GEORGE MULLER.
The wife and right-hand helper for
forty years of the founder of the
world-famed orphanages at Bristol,
England, is dead. It was a sad but
notable procession of thirteen or
fourteen hundred orphans, besides
the multitude of friends and sad-
dened towns people, which followed
her remains to the grave. Her
husband conducted the funeral ser-
vices. Alluding to her love-labor
for others, he touchingly said:

"Cannot my heart rejoice when I
think of one whose life was like this
—one of whom there is not the
shadow of a question as to where
she is now? O, how could it be
otherwise but that my inmost soul
should be filled with unspeakable joy
and delight? To her, for many
reasons, to die was gain. For
months—I may say for nearly two
years—that loved one, when she
came home with me in the evenings
from the Orphans' House, weary
and worn to the utmost, I often
said to her: 'My darling, work less;
stop at home; but I never could
prevail on her to do so. Day after
day she loved to be at my side at the
work at the Orphan House. But
now all this weariness is gone, and
gone forever. I kiss the hand that
has laid me low. If you ask me as
man, 'How do you feel?' I reply, 'I
feel it keenly.' If you ask me as a
director of the Orphan House, I
feel it to the utmost, and I see no
prospect of how her loss can be
made up. But I kiss the hand that
has done this. I rejoice in the joy
of my departed one; and if this
moment I could alter it, I would not
wish to have that loved one back
again. And why? Because of the
depth of my affection for her, and
because she longed to be with Jesus.
It was the desire of her heart; and
therefore I say this is my joy."

THE "PRECIOUS BIBLE."—A Pleas-
ing Incident.—A friend has men-
tioned to us a beautiful incident re-
lating to Mrs. Elizabeth E. Paddock,
mother of our venerable friends
Rev. Benjamin G. Paddock, of the
Central New York Conference, and
Rev. Dr. Zechariah Paddock, of the
Wyoming Conference. She was
converted at the age of nine, during
a battle of the great American Revolu-
tion, and while the rear of the
booming cannon was distinctly
heard in her father's dwelling. She
died at the residence of her son,
Dr. Z. Paddock, in Binghamton,
New York, at the advanced age of
ninety-five. For eighty-six years
she had been a professor of religion
and an exemplary Christian. Her
distinguishing characteristic was her
love for the Holy Scriptures. Though
she had the care of a large family,
she regularly read the Bible through
once a year. She read it through
thirty times after she was seventy years
old. She always read the books
consecutively, and with pencil in
hand marking the passage of special
interest. Each reading increased
the notations in the margin, which
literally became filled in many of
the pages, indicating that each
reading developed new interest in
the sacred work. So precious was
the Bible to her that she left a writ-
ten request that her older copy, the
one she had used from early years,
should form the only pillow upon
which her head should rest in her coffin,
and that a more recent copy should
be placed upon the lid of the coffin
during the funeral service. These
requests were complied with. The
scene was affecting and precious.—
New York Christian Advocate.

READERS will remember the letter
of Rev. W. F. Folsom, Indian Mis-
sion Conference, published Septem-
ber 24, with an appeal for him Web-
ster's Unabridged Dictionary and
Watson's Biblical Dictionary. The
New York Methodist made a very
brief note of the case, and the editor
of that paper writes us that a friend,
after reading the item, sent a copy
of Webster, to be forwarded to the
missionary. That copy has been re-
ceived at this office, and is now on
the way to its destination. Another
friend, in Arkansas, has sent us by
mail the money to purchase a copy
of Watson for the missionary, and
we have ordered it from the Publish-
ing House at Nashville. We are
happy to record this union of North
and South in good works, and may
the Lord reward the donors.—*West-
ern Methodist.*

The Christian Advocate.

Official Organ of the Montgomery, Mobile, Mississippi and Louisiana Conferences of the M. E. Church South.

SATURDAY, NOVEMBER 12, 1870.

OFFICE—No. 112 CAMP STREET, NEW ORLEANS.
Three Dollars per Annum, in Advance.

Address—REV. JESUS PARKER, 112 Camp street, New Orleans, La.

AGENTS—All the members of the patronizing Conferences.

CONFERENCE PUBLISHING COMMITTEES.

FOR MOBILE CONFERENCE:

REV. J. HAMILTON, D. D.
REV. A. H. MITCHELL, D. D.
REV. A. S. ANDREWS, D. D.

FOR MONTGOMERY CONFERENCE:

REV. M. S. ANDREWS,
REV. W. SHAFER,
REV. J. R. COOTRELL.

FOR MISSISSIPPI CONFERENCE:

REV. W. H. WATKINS, D. D.
REV. JAMES A. GODFREY,
WILLIAM P. BARTON.

FOR LOUISIANA CONFERENCE:

REV. J. C. KEENER, D. D.
REV. J. B. WALKER, D. D.
REV. LINUS PARKER, D. D.

To Subscribers.—Any person wishing to subscribe for this paper can do so by paying the Methodist preacher in the circuit, and forwarding to us his receipt for \$3, with the address of the subscriber upon it, stating Post Office, State, Circuit and Conference. The receipt ought to be taken in duplicate.

N. B.—Agents are requested, wherever practicable, to invest and remit funds in a Post Office Order, Draft, or by Express. If this cannot be done, Remittance by letter at our expense.

When money is forwarded in either of the above methods we will be responsible for it, but not otherwise.

AMONG THE INDIANS.

BY BISHOP KEENER.

Fort Gibson, Oct. 30, 1870.

My Editor: You have herewith

the appointments of the Indian

Mission Conference. The Indians

have, for the most part, taken Eng-

lish names. So, one reading these

appointments would scarcely be able

to imagine what sort of "looking

preachers" they represent. Like the

Reformers in the days of Erasmus,

they rejoice in two names—one the

classical rendering of the other. I

was informed, when upon the edge

of the territory, that the brethren

had a name already selected for me.

The Cherokees were the only tribe

present. The Choctaws, Chickasaws

and Creeks would not travel so far

from home, with the prospect of

high waters and ferriages. Though

as a general thing they are fond of

attending Conference—go early and

stay patiently to the end—no fever-

ish inquiries as to the time of ad-

jourment. As the brother said at

the General Conference: "They are

preachers, and time is nothing with

them." All Indians take things

leisurely, and when they get hold of

a good thing have sense enough to

enjoy it. We have a fine work go-

ing on among the Chickasaws. Our

Mahul Labor School, in the Creek

nation, which was burnt a year

since, is being rapidly rebuilt. The

chief of that nation has, for the

past three years, been the presiding

elder of the Creek district. A good

increase was reported from each of

the districts, and the whole Confer-

ence has had an increase in mem-

bership of one thousand two hundred

and twenty-nine, of whom eight

hundred and forty-four were In-

dians. This speaks well for the men

of God who are laboring in this field;

it is an increase of thirty-three per

cent, upon last year. Probably no

mission field in the world has yielded

a better return for the labor and

money spent upon it. Dr. Green,

in one of his missionary speeches,

estimated that it cost the govern-

ment \$50,000 to kill one Indian,

and compared that with the ex-

penditure of converting an Indian;

which this year has not exceeded

\$10.

The minutes of this Conference

are: Thomas K. B. McSpadden, ad-

mitted on trial; Henry Butler, John

Sevier, C. C. Campbell (Cherokees),

remain on trial; Rope Cameron (local

preacher), ordained deacon;

Stephen P. Hicks, ordained elder.

Numbers in society, four thousand

six hundred and fifty-two; adults,

six hundred and thirty-one; infants,

baptized, four hundred and thirty-

one. Next Conference to be held at

Boggy Depot. Vote on the *provision*,

twelve years, no days. Amount raised

for old mission debt, \$100.

After the Sabbath morning serv-

ice a collection of \$530 was taken

up to pay a debt due on our mission

chapel at Fort Gibson. This re-

lieved the house and the audience.

The attendance on preaching was

good, and much good was done

during the session.

This is the most venerable body of men for its numbers that I have ever met with—men who, for forty or fifty years, it may be, have been preaching Christ, and are still taking an appointment. They are now rich in faith and experience. While many young men are fainting and looking about them for some soft place where they may nurse their "call" until it shall gradually expire, these hoary veterans are furnishing their armor and feeling the edge of their swords. It was refreshing to hear them in the love-feast. They still contemplated new conflicts and new victories. At the sacrament of the Lord's Supper it was a full recompense for a month's travel to see the Indian preachers standing with their brethren weeping in memory of the blessed Master. Surely "there are many tongues, but one language." The Holy Spirit had filled them with the knowledge of the Father and of his Son Jesus. One of them, a tall man, a full-blooded Cherokee, who is said to be a very eloquent preacher, but who understands but little English, stood immediately before me, dressed in a striped hunting shirt, his iron-gray hair falling over his forehead as he bent his head reverently; the tears were flowing from his eyes profusely; our hearts were in sympathy, and an image was left upon my mind which will recur upon every sacramental occasion at a Conference. Out here one feels as if he were well to the front in the great campaign.

The war did its mischief as fully among these missions as in the States. Our schools, churches and everything else were damaged, and the work of rehabilitation has been necessarily slow. But the returns of this year's labor demonstrate that we are now on the vantage ground. Our Indian schools, which have been so fruitful of good, must all be revived. The superintendent, the Rev. John Harrell, is now lending his energies to this great work among the Creeks, and will, by his success there, no doubt open the way to the gradual and full restoration of all these institutions.

The Indians are greatly excited just now at the prospect of the sectioning their lands by the United States. The railroad monopolists are moving Congress in order to build their Missouri and Texas railroad lines, which must take the Indian territory in their route. Already the rails are within forty hours' staging of Fort Gibson, and two lines are chartered, which are to pass through the heart of this fair land. Then it will be but three days to Washington—a fearful neighbor for a people who wish only to serve God and be let alone. The chief of the Cherokees has called for a day of fasting and prayer. His proclamation is in the Cherokee and English languages, published in the Cherokee Advocate, of Tahlequah. I send it to you as a paper having some historical interest. It depreciates the territorializing of the Indian lands by Congress. This document may not allay the excitement; but shows that the United States has been dealing with the Indian pretty much as with other "reconstructed" parties.

Every town in Arkansas and in this territory, that I have visited, expects a railroad within six months. The trade which was always tributary to New Orleans, upon the Arkansas and White rivers, is now diverted to St. Louis and Memphis. Surely the people of New Orleans are asleep to let so rich a harvest pass, without a struggle, into the coffers of other more enterprising and distant communities. At some day, not far in the future, this part of the valley of the Mississippi will support two such cities.

We have been considerably interested in the proceedings of the National Local Preachers' Association of the Methodist Episcopal Church, which met last month in Philadelphia. This association meets annually, and has in it representatives from the local preachers in the bounds of all the Conferences. The object, in the main, seems to be to promote efficiency and to elevate the standard of ministerial excellence. The local ministry has always been a great power in Methodism, and in all branches of our church it continues to hold an important place.

Our local brethren are sometimes unjustly censured for the amount and the quality of the work they do. That there are some delinquents, who are negligent and unworthy of their calling, we cannot doubt; but there are instances of imperfection elsewhere, quite as noticeable. Traveling preachers are not always capable of appreciating the peculiar embarrassments of their brethren in the local ranks. They cannot well understand the hindrances of those who are necessarily engrossed in the toil and perplexities of business, because their circumstances in a great measure exempt them from these secular cares. How some of them preach at all has often been a marvel to us; and we are frequently surprised at the amount and excellence of the preaching which many of them do in the midst of the worry and weariness of their daily pursuits.

They are a most numerous and valuable class in our church, and everything possible should be done to improve and encourage these men in their work. It is an arm of the service susceptible of a more perfect development, and that may be made of even greater utility than has been the case hitherto. The church is, perhaps, more in need of consecrated laymen, who are ready for every good work, than it is of separated ministers. The local preacher is to stand between, and to work in the pulpit, in the class room, in the Sunday school; and, in any and every capacity, to supplement the work of the regular ministry. He ought not to stand upon his dignity and wait to fill an occasional appointment in a pastoral charge, but he should seek for a new field, break ground in destitute places, organize schools and prayer meetings, and make appointments for preaching. Instead of waiting to be set to work, he should go to work; and instead of depending upon "a line of things made ready to his hand," he should seek "to preach the gospel in the regions beyond." Some of the noblest types of the ministerial character have been and are still in the local order; some of the most devoted and useful Christians have been local preachers.

The church is to-day more in need of working laymen than of any other class of instrumentalities—men who realize their call to live

into the Lord, even while they engage in the affairs of the world. The local preacher is layman and minister, and ought to combine and unite both in his religious activities. Everything which looks to the deeper consecration and more thorough development of the lay element should receive special encouragement, and we regard the improvement and increase of our local ministry as a step in this direction. We append extracts from an address of Bishop Simpson, delivered before the Local Preachers' Association to which we have alluded.

Men can sometimes be more easily and powerfully influenced by what appears to them a disinterested ministry. The regular ministry assumes, in the eyes of the world, sometimes a more professional aspect. The young man, they say, has selected his profession, follows his calling, is paid for his labor, and must preach as he does. However incorrect this position may be, it does affect to some extent the public mind. But against the local ministry no real objection can be made. The lay preacher works with his own hands, generally bears his own expenses, and adds to his duties as a citizen and his labors as a man of business the work of preaching Christ. He toils without reward, and frequently without honor from men. In this way, frequently, great strength is gained.

There is, however, and there will always be, work for the members of the church, apart from the local ministry and besides this work of preaching Jesus, which ought to be encouraged among our laymen more than it is. The ratio I have alluded to of the preachers in England, compared with the United States, shows us that they have succeeded in calling out this talent much more than we. I think a part of the prejudice against local preachers, if I may use the phrase, and I use it without intending anything severe, in some sections of the country, is because men licensed to preach do very little work. They get the honor of being ministers, and they do not work as ministers. They seldom preach Jesus. Now in assembling this association I think you will produce a public opinion among the local ministry that to maintain their position they must work. You are working; and I wish some method could be adopted by this association.

I should be glad to have at these associations a report from the bounds of every Conference of what the lay ministry have done during the year—(Voice, "Amen!")—how many sermons they have preached; into how many new neighborhoods they have penetrated; how many Sabbath schools they have established; how much work of every kind they have done for Jesus; and I think this record spread before the church would show that the local ministry, so far from being unnecessary, are a great arm of power. But if there be a local minister who will only preach on Sabbath when invited by the pastor of the church, and then lie back on his laurels to rest, he is of no use to your body; he does not meet the idea of a local minister. He is not supplementing the great work, and accomplishing but little for the salvation of sinners.

What we want is this supplemental, additional work. Occupy the pulpit when necessary, when it is a matter of propriety or necessity, but be working over and above what the regular ministry can do. That seems to me to be the grand call of the church. A fair report of such labor would give you credit for what you do, and stimulate those who are not active to greater exertion; and I would like to see every local minister lay down his papers and give up his license who will not work to the utmost of his ability. * * *

In passing to the station work each congregation has its own minister, and congregations not being very large the minister can do all that seems necessary to be done. Men ask, Why should there be any more local ministers? A local minister feels that he has no special field of labor. I think in cities we are changing from this position. The discovery that a large part of our population is not reached by the gospel is stirring the mind of the churches, and a fair field is opening for our local ministry. Other denominations may work temporarily, spasmodically; they will call out the whole church to-day, but they have no recognized band that will keep up this organization and this plan of working in destitute places; hence this class of work is liable to cease. What we want in our cities and villages is to occupy unoccupied ground, and while the chief church is a fort there should be outposts all around as suburban work.

Though there may not seem to be much honor in preaching to small congregations in dwelling houses and school houses, still the Master may put great glory on those who do this work.

Go talk of Jesus. I cannot tell

where the opportunity will be, but I know that if in the morning you sow your seed, and in the evening withhold not your hand, God will prosper you; I know that as the ruin and snow come down from heaven and return not thither, so God has promised that his word shall accomplish that whereunto it is sent. We want workers for Christ. Go on working; do not be anxious about large congregations. Content not for honors. Let there be no jealousies. Work, work; souls are perishing. Go, if need be, in the corners of the fields. You may bring the ripest wheat and the best grains to the Master. I hail you as engaged in this work. I pray God to increase your number greatly, to raise up promising young men to labor in this field, and that when you fail he may crown you all with glory.

Tertullus, the orator, who was employed by Ananias, the high priest, and the elders at Jerusalem, to represent them and prosecute St. Paul before the bar of Felix, the Roman governor, and who seemed not to be wanting in unscrupulous flattery to the infamous Felix, nor in equally unscrupulous abuse of Paul, said one good thing (and a good thing is good, no matter where it comes from,) to wit: "Notwithstanding, that I be not further tedious unto thee, I pray thee that thou wouldest hear us of thy clemency a few words."

Tediousness is a great evil, wherever it may have to be endured. So old Cotton Mather must have thought, for he wrote in large letters over his study door: "Be short." He had been bored, as every man has who has anything to do, and whose time is precious to him, by interminable visitors. Some good people do not seem to know when they are through their visit, nor when to go away. You get insufferably tired; you cease to ask questions, to make remarks, and only answer in monosyllables; but they hold on until your patience has oiled out almost its last reluctant drop.

Some talkers are afflicted with tediousness. They talk in such a circumlocutory and ambiguous strain, making so many digressions, that they make no progress. Their minds move on hinges rather than wheels. They never seem to reach a conclusion or make out a clear point, and yet talk on and on. A gentleman of my acquaintance was spending the night with an old gentleman whose powers of colloquial prolixity were unequalled by anybody in his circle, except his wife, who was equally gifted. They talked at the guest until late bed-time. When one would stop to clear up his or her throat the other would pitch in. So he was kept under steady fire until he could endure no more, and begged to retire. Dreading the result, he asked to take the candle and find his own way to his chamber. "No, no," said the host. So he went with the guest, and stationed his back against the door-post and continued. The guest got into bed, and, half asleep, grunted monosyllabic replies until the candle flickered in the socket and darkness forced the host to retire. No sooner had the guest appeared in the morning, than the host broke in: "General, as I was saying." The night was not a period, only a dash, and the stream flowed on in its devious way.

Preachers are sometimes tedious. Some are tedious in beginning. They take the Bible from the desk and commence a search for a suitable lesson; but they are hard to suit. Moses, the prophets and the Psalms are pretty generally overhauled, but with unsatisfactory results—nothing in them suitable. Then the Gospels, the Acts and Epistles are scrutinized. Finally but reluctantly something is decided on as approaching suitability. Then the hymn book is taken in hand. The preacher eyes it with curious interest, as if it were some strange book that might be filled with heresy; at least of such doubtful orthodoxy that it will not do to risk without the most careful scrutiny. After a long time he resolves to venture on some one or two hymns as the least perilous in the collection. Then he takes a drink of water,

clears up his throat, and at last begins.

Some make elaborate apologies; some seem to reconnoiter the subject some time before they will advance. But instead of driving on, they make detours, and deploy to the right and left. I knew a venerable brother who used to give an illustration, then a comparison to elucidate the illustration, then an explanation of the comparison, until, like the wind in more respects than one, the hearer could not tell whence the speaker came or whither he was going. So he rolled on his winding way for two mortal hours; then said "he had given but a mere shred and fragmentary outline, and hoped brethren would fill it out at their leisure."

A discourse may be long but not tedious. The speaker is clear; makes constant progress; the subject has been well matured; the preacher is earnest and instructive. Like the path of the just, the subject shines more and more, from the clear and pointed introduction to the luminous and glowing peroration. A discourse may be short but tedious. It has not been matured; the method of handling is involved; the speaker is slow and hesitating. The result is tediousness.

A young Irish preacher in Ireland, perhaps somewhat vain and anxious for a compliment, said to an eminent wit and orator who had just heard him: "How did you like my sermon to-day?" "It was short," replied the wit. "Yes," said the preacher, "I did not wish it to be tedious." "Then, sir," said the remorseless wit, "you did not succeed."

We feel, when we hear one of these rambling, tedious speakers, like the weary and exhausted old brother who had listened long with the hope—alas! vain—that the speaker would have done with his rambling and interminable harangue. The speaker, in something of a climax, exclaimed: "And, brethren, what shall I say more?" "Say amen," was the prompt reply of the weary hearer. But "lest I be further tedious," I lay down the pen.

TRINITY CONFERENCE.

APPOINTMENTS.

JEFFERSON DISTRICT.—Samuel J. Hawkins, P. E. Jefferson station, R. S. Finley; Kellyville circuit, R. P. Thompson, Charles E. Lamb; Linden circuit, Joseph M. Stevenson; Dugorfield circuit, Joseph Parker; Mount Vernon circuit, J. C. Smith; Winstonsboro circuit, Calvin J. Cook; Pittsburg circuit, Matthew T. Leach; Coffeyville circuit, James P. Rogers; Gilmer circuit, Thomas B. Norwood.

PARIS DISTRICT.—Lewis B. Ellis, P. E. Paris station, D. M. Proctor; Paris circuit, Thomas M. Smith; Henry Grove circuit, John W. Finer; Ladonia circuit, W. R. Davis; Charleston circuit, to be supplied; McAlister circuit, Joseph C. Weaver; Pine Creek mission, Littleton F. Palmer; Clarksville circuit, James Graham; Boston circuit, Archibald C. McDougal; Paris Female Institute, John H. McLean, principal.

APPOINTMENTS.

CHEROKEE DISTRICT.—Young Ewing, P. E. Tahlequah circuit, Thos. K. B. McSpadden; Fort Gibson, James Y. Bryce; Grand River, David B. Canning, Elijah Butler; Spring Creek, Isaac Sanders; Saleasaw, Charles C. Campbell, John Sevier; Canadiah, Henry Butler; Barren Fork, to be supplied by Flint; Flint circuit, Thomas B. Ruble, supply.

CHOCTAW DISTRICT.—Stephen B. Hicks, P. E. Skullyville, to be supplied; Mashlatnabee, to be supplied by Willis F. Falsom; Sinboy, to be supplied by Gibson Batters; Perryville, to be supplied by Robert Jackson.

CHICKASAW DISTRICT.—Jesse H. Walker, P. E. Tishamingo, John C. Robinson; Kiamichi, to be supplied by Bylinahia; Beggy circuit, to be supplied by Jefferson Long; Doakesville, Simon P. Willis; Chickasaw, to be supplied by Jesse J. Gardiner; Jack's Fork, to be supplied by Moses Perry.

CREEK DISTRICT.—Walter A. Duncan, P. E. Oakmidge, James McHenry; North Fork, to be supplied by Cesar; Creek Agency, to be supplied by Joshua Soule; Little River, to be supplied by Walker Collins; Asbury Manual Labor School, John Harrell, superintendent; John Harrell, superintendent Indian Mission Conference.

John H. Porter, transferred to White River Conference. Samuel Chicote, located at his own request.

LOCAL PREACHERS.

We have been considerably interested in the proceedings of the National Local Preachers' Association of the Methodist Episcopal Church, which met last month in Philadelphia. This association meets annually, and has in it representatives from the local preachers in the bounds of all the Conferences. The object, in the main, seems to be to promote efficiency and to elevate the standard of ministerial excellence. The local ministry has always been a great power in Methodism, and in all branches of our church it continues to hold an important place.

Our local brethren are sometimes unjustly censured for the amount and the quality of the work they do. That there are some delinquents, who are negligent and unworthy of their calling, we cannot doubt; but there are instances of imperfection elsewhere, quite as noticeable. Traveling preachers are not always capable of appreciating the peculiar embarrassments of their brethren in the local ranks. They cannot well understand the hindrances of those who are necessarily engrossed in the toil and perplexities of business, because their circumstances in a great measure exempt them from these secular cares. How some of them preach at all has often been a marvel to us; and we are frequently surprised at the amount and excellence of the preaching which many of them do in the midst of the worry and weariness of their daily pursuits.

They are a most numerous and valuable class in our church, and everything possible should be done to improve and encourage these men in their work. It is an arm of the service susceptible of a more perfect development, and that may be made of even greater utility than has been the case hitherto. The church is, perhaps, more in need of consecrated laymen, who are ready for every good work, than it is of separated ministers. The local preacher is to stand between, and to work in the pulpit, in the class room, in the Sunday school; and, in any and every capacity, to supplement the work of the regular ministry. He ought not to stand upon his dignity and wait to fill an occasional appointment in a pastoral charge, but he should seek for a new field, break ground in destitute places, organize schools and prayer meetings, and make appointments for preaching. Instead of waiting to be set to work, he should go to work; and instead of depending upon "a line of things made ready to his hand," he should seek "to preach the gospel in the regions beyond." Some of the noblest types of the ministerial character have been and are still in the local order; some of the most devoted and useful Christians have been local preachers.

The church is to-day more in need of working laymen than of any other class of instrumentalities—men who realize their call to live

into the Lord, even while they engage in the affairs of the world. The local preacher is layman and minister, and ought to combine and unite both in his religious activities. Everything which looks to the deeper consecration and more thorough development of the lay element should receive special encouragement, and we regard the improvement and increase of our local ministry as a step in this direction. We append extracts from an address of Bishop Simpson, delivered before the Local Preachers' Association to which we have alluded.

Men can sometimes be more easily and powerfully influenced by what appears to them a disinterested ministry. The regular ministry assumes, in the eyes of the world, sometimes a more professional aspect. The young man, they say, has selected his profession, follows his calling, is paid for his labor, and must preach as he does. However incorrect this position may be, it does affect to some extent the public mind. But against the local ministry no real objection can be made. The lay preacher works with his own hands, generally bears his own expenses, and adds to his duties as a citizen and his labors as a man of business the work of preaching Christ. He toils without reward, and frequently without honor from men. In this way, frequently, great strength is gained.

There is, however, and there will always be, work for the members of the church, apart from the local ministry and besides this work of preaching Jesus, which ought to be encouraged among our laymen more than it is. The ratio I have alluded to of the preachers in England, compared with the United States, shows us that they have succeeded in calling out this talent much more than we. I think a part of the prejudice against local preachers, if I may use the phrase, and I use it without intending anything severe, in some sections of the country, is because men licensed to preach do very little work. They get the honor of being ministers, and they do not work as ministers. They seldom preach Jesus. Now in assembling this association I think you will produce a public opinion among the local ministry that to maintain their position they must work. You are working; and I wish some method could be adopted by this association.

I should be glad to have at these associations a report from the bounds of every Conference of what the lay ministry have done during the year—(Voice, "Amen!")—how many sermons they have preached; into how many new neighborhoods they have penetrated; how many Sabbath schools they have established; how much work of every kind they have done for Jesus; and I think this record spread before the church would show that the local ministry, so far from being unnecessary, are a great arm of power. But if there be a local minister who will only preach on Sabbath when invited by the pastor of the church, and then lie back on his laurels to rest, he is of no use to your body; he does not meet the idea of a local minister. A fair report of such labor would give you credit for what you do, and stimulate those who are not active to greater exertion; and I would like to see every local minister lay down his papers and give up his license who will not work to the utmost of his ability. * * *

In passing to the station work each congregation has its own minister, and congregations not being very large the minister can do all that seems necessary to be done. Men ask, Why should there be any more local ministers? A local minister feels that he has no special field of labor. I think in cities we are changing from this position. The discovery that a large part of our population is not reached by the gospel is stirring the mind of the churches, and a fair field is opening for our local ministry. Other denominations may work temporarily, spasmodically; they will call out the whole church to-day, but they have no recognized band that will keep up this organization and this plan of working in destitute places; hence this class of work is liable to cease. What we want in our cities and villages is to occupy unoccupied ground, and while the chief church is a fort there should be outposts all around as suburban work.

Though there may not seem to be much honor in preaching to small congregations in dwelling houses and school houses, still the Master may put great glory on those who do this work.

Go talk of Jesus. I cannot tell

where the opportunity will be, but I know that if in the morning you sow your seed, and in the evening withhold not your hand, God will prosper you; I know that as the ruin and snow come down from heaven and return not thither, so God has promised that his word shall accomplish that whereunto it is sent. We want workers for Christ. Go on working; do not be anxious about large congregations. Content not for honors. Let there be no jealousies. Work, work; souls are perishing. Go, if need be, in the corners of the fields. You may bring

The Child's Corner.

THE BIRTHDAY.

My vanished darling—five years old in heaven—
To bridge the rift has yearning love no way,
That I may feel about my neck your clinging,
Or hear one little silver word to-day?

The summer sleeps and dreams on mountain
and meadow—
The vines are full of sweetest blossoming—
The sunlight through the reddening peach is
thrilling—
The birds that you loved piping and singing.

The world is all so full of light and beauty:
Oh! "run away," sweet darling, out of
heaven,
And smile and speak, though with the sudden
glory

My eyes be blinded and my wild heart riven,
Burst through the unseen walls that hide you
from me,
And let me see the same bright, beaming
face—

The same short, sun-lit curls—the cheeks
like roses—
The same fair dimpled form of restless
grace!

Send round me perfume of your lovely
heaven;
And though you fly away the instant seen,
There will be breath of jasmine and of lily—
Where your bright-glancing spirit steps
have been!

Five years in heaven—and older, larger,
taller;
The little curls must sweep the shoulder
now;

And wiser thought and deeper beauty lighten
The laughing eye and rounded baby-brow.

Yet, looking back across your fleeting sum-
mers,
Is mortal life and mortal pain forgot?
Kind angels ever near you—O my darling!—
Are earth and mother-love remembered
not?

One little silver word from out the silence—
One flash of shining hand to still my fear—
One breath of perfume, faint and sweet and
holy,
To tell me, angel-child, that you are near!

There is a sound—but 'tis the robin calling;
There is a light—a sunbeam's golden play;
There is a breath—from summer roses lifting
The chalice of their red hearts to the day.

There is a breath—'tis of jasmine, lily,
Or strange, sweet odor from beyond the
sea?

And light as air a footstep comes and passes—
O darling, darling! you have been with me!
Heaven and home.

WONDERS OF THE MICROSCOPE.

It had been raining steadily all day, and the children's resources for in-door amusement were nearly exhausted.

As a last resort Kitty was driven to the window in search of some sign of fair weather. No comfort to be found in that quarter, and Kitty turned around with a most dolorous countenance, sighing:

"O, dear, dear! Why can't it stop raining?"

No one replied; whether from not hearing or from having no answer, Kitty could not tell. Aunt Edith was reading, Belle was turning the leaves of an illustrated book, and Rob was trying to harness the cat.

Kitty gave an impatient shrug of her pretty shoulders, and wandered off to the other end of the parlor. She was soon back, however. Stopping before her aunt, she said:

"I don't like to disturb you, aunt, but what can we do?"

Aunt laid down her book with the slightest shadow of disturbance on her face. Only for an instant was it there, and no touch of it found a place in the pleasant voice which answered:

"Why, Kitty! what a disconsolate tone. Something surely must be done."

Just then Rob, turning a somersault, landed in front of his aunt, and holding up his hand, exclaimed:

"See, aunt, what that hateful old cat did!"

Aunt could not blame the cat for giving a scratch in self-defense, but she took the wounded hand, saying:

"Tired of the cat at last? Poor Rob! Well, you must find something else."

"Aunt Edith," called Belle from the lounge, "did your microscope come last night?"

"Yes, I had forgotten it, though. It is just the thing for us. Please run up stairs and bring down the box that stands on my table."

Belle ran out eagerly, while Rob inquired:

"What does microscope mean, aunt?"

"It means to examine a small object, and is the name given to an instrument used for magnifying. Here comes Belle. Now we shall see something wonderful."

Aunt Edith moved a small table near the window, opened her box and took out a slender looking instrument a few inches high. It was round and hollow, had a hole on one side in which was placed a little round mirror, capable of being moved by a small screw at the side. She took a small slip of glass and asked Kitty what she could see. Kitty looked closely.

"I see nothing but a square marked off in the center, and a speck of dust in the glass."

Aunt Edith set the microscope on the table, with the mirror facing the light, slipped the glass through a small aperture at the top, and after adjusting it properly asked her to look again.

Kitty came closer to the table and looked in at the top.

"It is Washington's picture," she cried, after looking a moment. "Why, aunt, it is just as plain."

Belle and Rob then came for a look, and "wondered" what there was about the bit of glass at the top that could turn a speck of dust into a beautiful picture of Washington.

Feeling unable to explain away their wonderment, Aunt Edith took out another bit of glass.

"Here is something for Belle." Belle gave a long look, then with a little sigh of satisfaction, exclaimed: "How beautiful!" adding with a shy smile, "but I don't quite know what it is."

"You remember helping me make Christmas wreaths?"

"Yes, and you pulled the moss apart and showed me what you called a leaf."

"Well, my dear, that is a leaflet from a leaf of moss like the one I showed you."

Belle opened her blue eyes wide as she said: "So beautiful! I thought it pretty, but nothing like this."

"Now, Rob, bring me a fly; there is a dead one on the window."

Rob brought the fly with pleasing haste. Aunt Edith cut off a foot and put it on a slip of glass. Rob looked in through the lens at the top a moment. Looking up and drawing a deep breath, he said:

"Well, I didn't know a fly's foot had a claw. How can it step so careful?"

This set them all laughing heartily. Rob was somewhat confused a few moments, not knowing whether he had said something quite witty or very absurd. But Aunt Edith put him at ease by saying it did look very much like a claw.

"Who was it I heard saying this noon, 'if there's anything I like it is grapes?'" asked Aunt Edith, looking among her pieces of glass.

"Was Kitty! Kitty!" cried Rob. "Well, Kitty, here is a section of a grapevine. That will interest you."

Kitty looked, and said she thought grapes must needs be delicious, growing upon anything so pretty.

An hour passed away pleasantly, and therefore quickly. The children had quite forgotten their weariness. After the light failed they sat talking over the wonderful instrument until the bell rang for tea.

"Have we seen it all?" asked Rob, as Aunt Edith was putting away the microscope after tea was over.

"No, indeed. I've beautiful things to show you, and much to tell you. Shall I save it for rainy days?"

"Yes, and then we won't get cross and tired," and Kitty gave her aunt a kiss.

Then the children went up stairs to bed, and dreamed, I dare say, of more wonderful things than I can write.—*The Household.*

INFLUENCE OF LABOR UPON THE MIND.—The man who works a little will certainly be able to study all the better for that work; the man who works very hard physically will probably not be able to study at all.

If the blacksmith, after a hard day's work, sits down to the study of Euclid, the probability is that he will fall asleep before he has worked out a single proposition, and the same is true of the farmer. Exceptional cases may be found, it is true, and Elihu Burritt may be cited as an illustrious instance in disproof of our position. But those who have conducted an evening school of young mechanics know how a hard day's work tells upon the ability to study closely and hard. It may not tell so much in cases where a lively interest is maintained, as in class competitions, etc., but it is easily seen whenever any really solid work is undertaken. So too with the farmer. He who works hard all day following the plow will find it difficult to fix his attention upon the more abstruse departments of chemistry and vegetable physiology in the evening. It is therefore obvious that the result of continuous hard labor must be to preclude all devotion to the higher studies, and the mind will consequently remain in a measure untrained. On the other hand, where the employment is such as to require moderate exercise and not hard physical exertion, the conditions for mental development will be most fully met. Hence, while the more laborer on the farm or in the workshop finds his employment detrimental to his intellectual progress, the foreman and overseer in the same departments of labor find no such difficulty.—*The Technologist.*

The following is a list of the titles of the Marquis of Bute: Earl of Windsor, Viscount Mountjoy, Baron Mountstuart, Baron Cardiff, Earl of Dumfriess, Viscount Air, Lord Crichton, Earl of Bute, Viscount Kintyre, Lord Mountstuart, Crichton, and Inchmarloch. He is also entitled to the earldom of Menck.

The Farm and Garden.

Hints and Notions About Poultry Raising.

Everybody in the country keeps chickens. There is a close picket fence around the garden, and the fowls have free range everywhere else, on nine-tenths of the farms.

The hens begin to lay in the spring when warm weather comes on, and as they find but few attractive places in the hedge-rows, they lay in boxes and barrels; in corners of the wood-sheds; in empty mangers and sundry nooks about the barns and out-buildings. When they want to sit they are not moved, but are set where they have laid, and no more is thought of them until one after another they come off with their broods. The hens are usually cooped, and the chicks run; the hen sharing the feed with the brood. The result is, that before the chicks are old enough to do well without maternal care, the hen begins to lay and deserts or drives away her young ones. Such chicks are checked in their growth, and are never so large and fine as when cared for, for a longer time, by the hen.

Later in the season the hens will "steal" their nests—that is, hide them away in the hedge-rows and bushes, under foundations and in out-of-the-way places. If one is missed at the morning feeding time, it is supposed she is sitting; and in due time she will probably bring out a brood, hatching every egg of the fifteen or eighteen which she can cover. She will be let alone in all probability, and rear a beautiful brood of chickens, losing but few, if any, and allow them to follow her until long after she has commenced laying again. When she finally drives them from her they will be either accustomed to roost with her, or well able to take care of themselves by night and by day. The second brood will probably be the larger and better at Christmas.

The first brood, or any early brood, cannot be given a free run with the hen, because the weather is too cold—the nights are severe, the mornings wet or frosty, and rains are frequent. The only way that we know to prevent hens deserting their chicks too soon, is to starve them; giving the chicks plenty and the hens little to eat. Thus giving them a run in the middle of the day, but no feed, they remain attentive, careful mothers a long time. It is clear that the hen's own hunger suggests the wants of her brood, and if she is "warmed and filled," the conclusion to her mind is that they are so too.

When one of our readers takes a fancy for chickens, and wants to raise some pure breed, we notice he begins with the idea that he must build a new poultry house, or in some way keep the whole of his flock of favorites shut up. Of course they will not be so healthy nor do so well as the dung-hill fowls, to which he gives the range of his farm. Why not change, and shut up the common fowls, and let the others run? Discouragement often comes from this cause. Another reason why young fanciers are discouraged is that they make a poor selection of the kind best for them to keep. They select a variety that will fly like pigeons, and so destroy the garden; or they try to make heavy fowls roost six or eight feet high, and they bruise themselves and "bumble" their feet in flying down, and so get sore and lame. Yet another cause for discouragement is in attempting to keep several kinds pure. The result is, almost invariably, unless poultry-breeding is entered upon as a business, or at least as an important part of farming, that before three years pass all are running together promiscuously.

We advise everybody that can do so to keep fowls, and to make a fancy of some particular breed. Nine out of ten ought to keep but one pure breed. All the cocks of the yard should be of this kind. When careful breeding is attempted the cocks should all be separated from the hens, and toward evening the hens driven into separate inclosures, that each cock may be placed with his own hens. When they have gone to roost they must again be separated. This course will be beneficial to the hens, because they will have a free run all the time, while it will be no less beneficial to their mates.

The breeds most likely to give satisfaction, where the winters are cold and the breeder is a novice, are Light Brahmas, Colored Dorkings, Cochins of any color except black, Houdans, and Guineas. To these we add, if ability to fly is no objection, Leghorns and Dominiques. After a few years' experience, breeds will commend themselves to the fancier, according to his facilities and the fashion of the time; for there are always prevailing fashions among poultry fanciers, and these govern the value of fowls and the estimation in which they are held. The following breeds, while they require careful breeding, may be highly recommended as always useful and valuable: Dark Brahmas, Games, Black Spanish,

all of the Hamburgs, all of the Poland, all of the French fowls, especially the La Fleche, and not omitting the Crevecoeur. To meet with success as a breeder of Bantams, one must be a first class fancier in the full meaning of that word—which, as we understand it, is one who brings to bear upon the rearing of breeds, which he fancies, all his skill and care, and all the knowledge he can gain, without regard to whether it pays or not.—*American Agriculturist.*

CHEAP DRAINING.

So many farmers are deterred from commencing to under-drain their land on account of the expense that any device which will render draining cheaper has at least one merit; namely, that of inducing experiments to be made. Many a farmer has labor which at certain seasons is not fully employed, and by which he could do a good deal of digging. Stones, perhaps, are scarce, or from all that has been said and read about the uncertainty of stone drains, perhaps he has a notion that they are really expensive to lay and not reliable. Tiles are only to be had at a great cost. The first cost is something; then to this must be added water carriage, railroad freight and cartage—all of which make a pretty big bill for a thousand feet of tiles. We alluded not long ago to the fact that hemlock boards sawed into strips three and four inches wide, and nailed together so as to form a gutter, furnished a cheap material for draining—a substitute for tiles, though not nearly so good. However, they will last long enough to pay the expense of draining many times over.

Mr. John S. Brover, of Keyport, Monmouth county, New Jersey, has brought to the office of the *American Agriculturist* a model of an improvement on the wooden drains.

In construction the trough is made first, then inverted upon the pieces of board, and the nails driven perpendicularly. This makes the channels or conduits easy to handle, and they may be made up in the winter for use in the spring in needed quantities. The board supporting one end is twice as wide as the others, and serves as a rest for the next channel. In use the earth soon fills up the bottom of the drain as high as the top of the cleats, and so a smooth flow is not interrupted, while in case of a violent rushing flow of water, which might wash the channel deeper, these have a tendency to prevent it, and to check any tendency to undermine the drain. Such drains have been laid in Monmouth county for many years, and have answered every purpose so far. If not submerged most of the time they are liable to rot, of course, but this will not usually occur for six to ten years. Even when the drains are so much decayed that they cannot be taken up, but would crumble at the slightest touch, the earth will be found to have so compacted itself around them that the flow of water will in many soils remain uninterrupted, and for aught one knows, in some it might be permanent. We advocate and fully believe in tile draining as cheapest and best in the long run, and as a rule, everywhere; but as before said, the first cost deters many who could cut the timber on their own place, and do all the work themselves except sawing the stuff.—*American Agriculturist.*

A DISCOVERY ABOUT CORN.—In this thinking and observant age new ideas and discoveries are constantly being made known, many of which it is true are never afterward heard of, while others pass into the treasury of established fact, when their merit has been proven. We have just met with the following paragraph in an exchange:

An intelligent and reliable farmer, who has for many years been making experiments with corn, has discovered an importance and value in replanted corn which is quite novel and worthy of publication. We have always thought replanted corn was of little consequence, but this gentleman says it is of so much consequence he replants whether it is needed or not—or rather, he plants two or three weeks after the crop is planted, about every fifteenth row each way. He says: If the weather becomes dry during the filling time the silk and tassel both become dry and dead. In this condition, if it should become seasonable, the silk revives and renews its growth, but the tassel does not recover. Then for want of pollen the new silk is unable to fill the office for which it was designed. The pollen from the replanted corn is then ready to supply the silk, and the filling is completed. He says nearly all the abortive ears, so common in the corn crops, is caused by the want of pollen, and that he has known ears to double their size in the second filling.

The Chinese government refuse to take any action providing against further outbreaks.

Work from life, not for life.

MUSICAL INSTRUMENTS.

PHILIP WERLEIN,

SOUTHERN MUSIC HOUSE,

80 & 82... BARONNE STREET... 80 & 82

New Orleans.

The house of WERLEIN is the oldest established Music House in the South. Its present reputation shall be sustained and increased by every effort.

The best PIANOS AND ORGANS that this country affords are being sold at from ten to twenty per cent. under current rates, in consequence of systematic management of business and low expenses.

PIANOS, ORGANS, MELODEONS,

HARPS, MUSIC, BRASS AND GERMAN SILVER INSTRUMENTS,

Strings, Violas, Guitars, Banjos, Flutinas, Accordions, Drums, Piano Stools and Covers, and

MUSICAL MERCHANDISE

OF EVERY DESCRIPTION.

P. S.—Persons not acquainted with me, favoring other houses, will please send for price lists before ordering. Our Pianos and Organs are imported to this market in sailing vessels, and special low freight contracts are made with the view of selling at the very lowest rates and competing with Northern markets. Every Piano and Organ fully warranted. Second-hand Pianos at very low prices. Pianos repaired at our factory.

Very respectfully,

PHILIP WERLEIN,

Southern Agent for Dunham & Sons, Marshall & Mitterer, and Hale Piano Manufacturers, New York; and Needham & Son, manufacturers of the celebrated Silver Tongue Organs and Melodeons.

Beautiful first class Pianos, seven octave, rich rosewood case, carved legs, front round corners, serpentine moldings, possessing sweet, powerful and deep tone, with perfect touch..... \$150 00

Style 6 Organ—Five stops, diapason, violin, octave, piano and tremolo, five octave, two sets reeds, with "on and off" tremolo and combination swell, oil-finished black walnut case, paneled all around, with moldings, brackets and engraved ornaments, music desk and carpeted double blowing pedals..... 150 00

WINTHROP FEMALE COLLEGE,

BROOKHAVEN, MISSISSIPPI.

On the New Orleans, Jackson and Great Northern Railroad, one hundred and twenty-eight miles north of New Orleans, and twenty-seven south of Jackson, will open on

The 21st of September, 1870.

Thorough instruction in all the branches given. Charge for board, tuition in English, English text books, school-room stationery, washing, fuel, lights, medicine and medical attendance, \$25 for the term of forty weeks. The languages and music, extra. A deduction of \$50 made for pastors of churches. Number of pupils last term, 165.

For catalogue address

J. H. JOHNSON, President.

EAST ALABAMA COLLEGE,

AUTUMN, ALABAMA.

The next annual session will open on the FIRST WEDNESDAY in October, with a full faculty. Boys and young men at every stage of advancement can be received either in the Preparatory, Junior or Senior Departments. Additional schools of Modern Languages, Civil Engineering, and Commercial Arithmetic and Book-keeping have been established.

Economy, health, efficient faculty, good society, thorough discipline and the best modern privileges are the peculiar advantages afforded.

It is just the place for Methodists boys, and there is room for three hundred. If every preacher and layman will work for us to secure students we will open with two hundred.

For full information or catalogue address the Secretary of the Faculty.

DAVID CLOPTON, President Board of Trustees.

MISCELLANEOUS.

THE ARROW TIE.

FOR BALING COTTON THE ARROW TIE

is the most popular, being the best Cotton Tie in use.

Planters and Cotton Press men everywhere prefer it to all others.

THE ARROW TIE

was used to cover MORE THAN HALF THE CROP OF 1869, giving entire satisfaction.

The patentee and manufacturer of the celebrated ARROW TIE, J. J. McComb, formerly of New Orleans, now residing in Liverpool, having control of the best and most extensive Rolling Mills in Europe, is constantly importing large stocks of this popular Tie, manufactured of the very best quality of English iron, to meet the increasing demand for it throughout all the Cotton States.

Planters can buy or order the ARROW TIE of all dealers in Iron Ties, and of country merchants generally, at the lowest market price; and we respectfully solicit the patronage of Planters and Factors everywhere.

H. T. BARTLETTE AND

R. W. RAYNE,

General Agents for the Arrow Tie,

121 1y 124 Carondelet St., New Orleans.

BRACES AND TRUSSES.—DR. JOHN C. BANGELL informs the medical profession and others that he has constantly on hand and for sale a complete assortment of BANGELL'S TRUSSES, Spinal and Shoulder Braces, and other appliances for the prevention, relief and cure of general debility, vocal weakness and derangements of public speakers and singers, palpitation of the heart, bronchitis and weakness of the lungs, spinal weakness and deformity, dyspepsia and nervous affections, constipation and chronic diarrhoea, female derangements and extreme displacements of the womb, RHEUMATISM, PAINS, sprains, and weakness of the male and female joints.

These light, cool and springy auxiliaries are the special favorites of the profession; are intensely common-sense and rational in their action; supply a missing link in treatment; place the above affections in a new and more hopeful light, and often complete cures where medicine can only mitigate any more than it can cure a hernia or a dislocated joint.

He specially desires an examination of these appliances by the profession and sufferers. Where necessary the professional application of the above braces will be under our supervision or that of the family physician.

These valuable appliances are sanctioned by a large number of the medical profession in the United States and Europe as the best adapted to fulfill the purpose for which they are intended, and the Trusses and Braces adopted by the United States government for the use of the army and navy. Terms cash. Consultations free. Send for their pamphlet: It is better to call.

Office and Residence, 152 JELLY STREET, near Camp, New Orleans. Jell 1y

NOTICE. NOTICE.

DR. IDAHO'S

Rocky Mountain Indian Remedy,

FOR THE BLOOD.

This remedy will cure Rheumatism, Gout, and all kinds of disease of the skin, and every variety of Cutaneous Eruption, from the simplest Itch to the most inveterate scurf, Leprosy, Boils, Piles, Ulcers, Brown Discolorations, Scaly Rash, Tetter, Ringworms, Itch, Liver Complaints, Kidney and Spinal Affections, Sore Throat and Croup, Sore, Ulcers, Scrofula and Cancers all yield to its influence in a few applications.

PRICE, \$1 PER BOTTLE.

Within two months this remedy has created a sensation among the people afflicted with the above diseases. It never fails to cure radically the very worst case; and the demand for the medicine is very great.

DR. IDAHO'S

Rocky Mountain Indian Salve,

FOR CORNS, BUNIONS AND PILES.

This Indian Salve cures Corns, Bunions and Piles in a few applications, radically; the buyer will apply the Salve but two or three times, and even the most inveterate will be removed at once. It is never known to fail. Price, Fifty Cents a box.

For sale by all Druggists, and at FLEMING'S Patent Medicine Depot, corner of Natchez and Magazine streets.

Office and Residence, 152 JELLY STREET, near the office of A. Bonchard, New Orleans, La. For testimonials for our pamphlet. Country orders promptly attended to.

RUPTURE CURED.

With an experience of more than twelve years' practice in the treatment and cure of RUPTURE and HERNIA, I will guarantee a permanent relief, comfort and security, and a more rapid improvement than can be obtained of any other person or appliance in the South, without regard to the age of the patient or length of time unhealed.

Also instruments for the cure of every species of human deformity or handicap or made to order.

SCHOOLS AND COLLEGES.

LOUISIANA STATE UNIVERSITY,

Name changed from Louisiana State Ser-
nary,)

Founded and supported by the State of Louisiana.

The last session, now in progress, will close next week in June, 1876. The regular sessions are held in September, January, May and September, and will continue ten months.

The Academic Board consists of a full complement of able instructors in all branches of literature and science usually taught in the best Colleges and Universities.

The Course of Study embraces a Preparatory and an Academic Department, including a Literary, Scientific and Optimal Course, a Special School of Civil Engineering and Commercial Science.

Appointments and Cadets are well selected, many valuable. The Geological and Mineralogical Cabinets, etc., the largest and most complete in the South, embracing extensive collections of the late Col. Walter H. Mitchell, and the Cabinets of the Zoological, Botanical and Geological Survey of Louisiana.

Admission granted to cadets not under twenty years of age, who know arithmetic, English grammar and geography.

Examinations every four weeks, closing for the month. Cash \$200 payable in advance, balance \$131 or by acceptance, at eight per cent., for ninety days. Cadets may be made through the Cavalry Cadets' School.

Students charged at any time during the session and expelled from date of entrance.

Discipline, military, with daily drill. A tery of four guns will afford facilities for

NEW ORLEANS MARKETS.

From the N. O. Price Current.

The general market has shown increased animation since our last report. More country merchants have come in, and have been busily engaged in laying in their winter supplies, and nearly every branch of trade has participated in the improvement. In Western produce, however, operations have been on a limited scale, the supplies being moderate and the sales confined to the local trade. Sugar and molasses have come forward more freely and met a fair demand, mostly local, at stiffer prices.

A heavy rain fell on Saturday, and continued, with frequent intermissions, until late at night. On Sunday it was again cloudy and threatening, and there was some apprehension that it would prove to be the commencement of a protracted wet spell, which could not fail to interrupt picking, and materially curtail the crop, but on Monday and Tuesday it was again clear and pleasant. The crop accounts from the country show no new feature, but we hear reiterated and general complaints of the inefficiency of the negro laborers. The sugar planters are suffering from this cause as much as the cotton planter.

The river is eleven feet below high water mark.

COTTON.—The following are the arrivals since the fourth instant:

Louisiana and Mississippi bales	20,832
Lake	77
Arkansas	1,082
Mobile	1,839
Texas	51
Total	23,881

On Saturday the movement commenced under the influence of the Liverpool telegrams of the previous evening, and a fair business was done during the morning, partly at a further improvement of $\frac{1}{2}$ to $\frac{1}{4}$ ¢, but on the receipt of telegrams reporting an unfavorable turn in the above market, prices receded, and closed even weaker than on Friday, low middling being quoted at 15 $\frac{1}{2}$ ¢ to 15 $\frac{3}{4}$ ¢, middling at 16¢, and strict middling at 16 $\frac{1}{2}$ ¢ to 16 $\frac{3}{4}$ ¢. The sales at the same time were of only moderate extent, embracing 3,800 bales. On Monday, under the influence of the war news and the decline at Liverpool and New York, especially at the latter, prices were completely unsettled, and factors were compelled to give way to the extent of the decline in the latter market. This reduction, however, enabled several parties to execute pending orders, which had not, like others, been countermanded, and an active business ensued at the decline, resulting in sales of 6,800 bales, which is the heaviest this season, and 350 bales in excess of the largest previously reported. On Tuesday the market opened with a fair inquiry, but only a moderate amount on sale, sampling having been interrupted by the election. The accounts, however, from both Liverpool and New York being unfavorable, factors were compelled to make further concessions, and the closing rates showed a partial decline of $\frac{1}{2}$ ¢ in the medium and better qualities. The sales embraced 4,000 bales.

This makes an aggregate for the past three days of 14,600 bales.

The receipts at this port since the first of September (exclusive of the arrivals from Mobile, Florida and Texas) are 162,630 bales, against 194,317 bales to the same date last year, and the increase in the receipts at all the ports, up to the latest dates, as compared with last year, is 1,402 bales. In the exports from the United States to foreign countries, as compared with the same dates last year, there is an increase of 55,096 bales to Great Britain, and a decrease of 41,618 to France, and of 8,544 to other foreign ports.

Referring to our remarks above, we quote as follows:

Ordinary	12 $\frac{1}{2}$ to 13 $\frac{1}{2}$
Good ordinary	14 $\frac{1}{2}$ to 15 $\frac{1}{2}$
Low middling	16 $\frac{1}{2}$ to 17 $\frac{1}{2}$
Middling	18 $\frac{1}{2}$ to 19 $\frac{1}{2}$
Strict middling	20 $\frac{1}{2}$ to 21 $\frac{1}{2}$

COTTON STATEMENT.

Stock on hand Sept. 1, 1870, bales	20,696
Arrived past three days	23,881
Arrived previously	155,538-179,719
Total	200,415
Exported past three days	6,364
Exported previously	108,900-115,264
Stock on hand and on shipboard	55,151

MONEY.—Gold, 110 $\frac{1}{2}$ to 110 $\frac{3}{4}$.

American silver half dollars, 107 to 107 $\frac{1}{2}$, and Mexican dollars at 1 $\frac{1}{2}$ per cent. premium in gold.

The sales of warrants have been confined to \$5,000 new State, on Saturday, at 74 $\frac{1}{2}$, and \$1,550 Carrollton old Metropolitan Police at 78. Dealers have bought State at 73 and 74 for new, and sold at 74 to 74 $\frac{1}{2}$.

City Treasury notes are quoted at 20 per cent. discount.

CATTLE MARKET.

NEW ORLEANS, Nov. 8, 1870.

Special Notices.

ALABAMA CONFERENCE.

The members will call at the Methodist Episcopal Church South on their arrival in the city. Those who intend bringing their wives must give timely notice.

JOHN MATHEWS,
MONTGOMERY, Alabama.

PENSACOLA DIST. CONFERENCE.

The Pensacola District Conference is postponed from September 28, as previously announced, to November 24. Programme as before announced. Postponement on account of sickness in Mobile and New Orleans.

My address, after October 10, will be Pollard, Alabama, to which point all communications will be addressed.

J. A. PARKER, P. E.,
Pensacola District.

NOTICE.

The class of the first year, Alabama Conference, will meet the committee for examination on Monday, December 5, at ten o'clock A. M. Brother Cameron will examine the class on the Bible, historical and biographical parts; Wesley's Sermons, volume 1 of the four-volume edition. Brother Brown will examine on Clarke's Preachers' Manual, Theological Compend and English grammar. I will examine on Watson's Institutes, part 3, and Discipline and hymn book. We advise the class to study the new course also, if possible.

D. M. HUDSON, Chairman.

New Orleans Dist., Louisiana Conference.

ORGAN OF THE M. E. CHURCH SOUTH FOR THE MOBILE, MONTGOMERY, MISSISSIPPI AND LOUISIANA CONFERENCES

VOL. XVI.

NEW ORLEANS, SATURDAY, NOVEMBER 19, 1870.

NO. 44.

NEWS OF THE WEEK.

DOMESTIC.

COLUMBIA, S. C., Nov. 11.—The passenger train due here from Greenville at a quarter to four, yesterday, fell through a trestle twelve miles above Columbia. One second and two first class passenger cars were precipitated twenty feet. Mrs. Philip Fogarty, of Charleston, Chas. Joy, of Newberry, and two colored persons, were killed. Colonel James Haygood, of Charleston, Stephen Smith, of Newberry, and Hattison Lomax, colored State Senator, fatally hurt.

MONTGOMERY, ALA., Nov. 11.—About fifty-one counties have been heard from, and the Democrats have fifteen hundred majority. The remaining fourteen counties will give about five thousand more Democratic majority. The Democrats certainly elect sixty members of the Legislature out of one hundred, and probably five more.

W. A. Handley, Democrat, is elected to Congress from the third district; Peter Dox, Democrat, in the fifth, and Jos. H. Sloss, Democrat, in the sixth district. Benj. S. Turner, colored, is elected to Congress in the first district; Charles W. Buckley, Republican, in the second, and Charles Hays in the fourth district.

SAN FRANCISCO, Nov. 12.—Advices from Arizona state that McCormick has been elected to Congress.

A Los Angeles telegram says, at that place, Sanbendies, a Chinese woman, who committed a petty robbery among her people, was seized by the Chinamen, tied to a stake, a fire built around her and burned to death. The perpetrators have been arrested and all the Chinese have been ordered to leave.

At San Bernardino, far off the railroad, robbers have been arrested and a portion of the money secured. Over \$40,000 of the Verdis robbery has been recovered.

Stage robberies are almost of daily occurrence in California and Nevada.

LOUISVILLE, Nov. 14.—Retrains show beyond a doubt an unbroken delegation from Kentucky to Congress, the Democratic candidates having been elected in every district.

ST. LOUIS, Nov. 14.—There are eight counties which have not been heard from yet. The Missouri Lower House will stand 78 Democrats, 14 Fusion, 21 Liberal and 17 regular Republicans.

In the Senate neither party has a majority, but the Democrats will have the control.

RICHMOND, Nov. 14.—The most reliable advices defeat Dr. Norton (colored) for Congress from the first district. The delegation will consist of five Conservatives and three Republicans—all white—making a Democratic gain of one.

FOREIGN.

TORONTO, Nov. 11.—The journals report that the number of Prussians killed and wounded around Orleans was over ten thousand, and eighteen hundred prisoners.

The Prussians are retreating toward Chartres and Etampes.

A large number of guns thrown away by the flying Prussians have been found.

The Italians continue to join Garibaldi in large numbers.

BERLIN, Nov. 11.—Deserters say Trochu will endeavor to regain prestige by another grand sortie.

TORONTO, Nov. 11.—The ministry publish the following from the commandant of the army of the Loire:

"We have taken Orleans after two days' fight; our killed and wounded number two thousand; the enemy's loss is much larger, including one thousand prisoners. The prisoners are constantly increasing, as we closely follow the fleeing enemy. Much material has been captured."

The hottest fight was around Coulmiers. The clan of the troops was extraordinary; De Paladines has issued a congratulatory address.

FLORENCE, Nov. 11.—The completion of Mont Cenis Tunnel is promised in December.

LONDON, Nov. 12.—A dispatch to the Tribune, from Blois, eleventh instant, says: Orleans has been taken by General Cathelines' troops, which first entered the town from the south, driving the Bavarians from the bridge which they defended, and which they lacked time to explode, as they intended to do at Bozorey. A determined fight occurred, with large losses on both sides. The Prussians were beaten, and their entrenchments stormed. They left one hundred

wagons of provisions and forage. Martineau's was the only French division engaged. Prisoners are constantly arriving. Two guns and a number of caissons also arrived. Vandertann's carriage is here. Tann himself was nearly captured.

The French in great force (thirty thousand,) from Bourges, attacked on the south or left flank, while the fifteenth and sixteenth corps attacked on the west side.

The Bavarians were everywhere outnumbered and lost their strongly fortified position.

LONDON, Nov. 12.—Bismarck has issued a circular to the representatives of North Germany in foreign states, giving his version of the late negotiations for an armistice. He says the appointment of such a man as Thiers by the French to conduct negotiations—a man of such wide experience—had excited hopes of propositions that might be successful. King William was even more eager for peace than Thiers. Bismarck proposed a truce for four weeks, the position of the respective armies in the meanwhile to be fixed, in order that elections might be had throughout France. The only effect of this truce on the French side would have been the stoppage of a waste of ammunition from their forts.

Thiers regretted that the revivification of Paris was not provided for, saying it was an indispensable condition of the proposed armistice. The absurd demand to go back two months in the prosecution of the war it was impossible to allow; subsequently an offer for a short time was made. Thiers reported this to the members of the provisional government, by whom it was rejected.

The inference is that the French government dared not consult the people, and made advances looking to peace only in order to satisfy and quiet the neutral powers.

TORONTO, Nov. 12.—Over seventeen hundred Prussian prisoners, captured at and near Orleans, passed through the city on their way to south France.

There was much excitement among the people, and it was with great difficulty that a riot was prevented, as there were hundreds of people along the line of march who recognized among the prisoners those who so outraged them at Chateau Dun, and other places.

The prisoners were hooted, but by the efforts of the greater part of the crowd violence was happily prevented.

Cheering reports are still being received from the army of the Loire, and there are rumors of a great advantage gained yesterday.

General Vandertann's army, notwithstanding it was reinforced by an entire army from Chartres, is in full retreat.

M. Gambetta has gone to Orleans.

VERSAILLES, Nov. 11, via Berlin and London, Nov. 12.—General Vandertann reports to headquarters here to-night that there has been no further advance of the enemy in his front.

BERLIN, Nov. 12.—Official reports of the capture of Verdun are published here to-day. Two generals, eleven staff officers and one hundred and fifty officers were captured; besides these, one hundred and thirty-six guns, twenty-three thousand rifles and a large amount of stores fell into the hands of the Prussians.

LONDON, Nov. 14.—The situation of the Prussian army is such that it requires additional reinforcements from Versailles.

Woodhouse, secretary of the English embassy, has arrived with a batch of Englishmen, who were allowed to leave Paris by the Germans. They report the stock of provisions in Paris as short. The weather is cold, with frequent snow.

General Von Moltke has issued stringent orders regarding the bearers of the Geneva Cross, whose safeguard is guaranteed by all the great powers represented in the Geneva Convention.

The opposition of the German liberal papers to a convention of the Federal Parliament at Versailles is based upon the ground that members would scarcely consent to go thither, where they would be compelled to legislate under the pressure of military influence.

BRUSSELS, Nov. 14.—Correspondents write hence that information has been received that Paris cannot hold out longer than three weeks. The Prussians, therefore, will trust to "hunger to compel a surrender, and no bombardment will occur."

LONDON, Nov. 14.—Much snow has fallen in northeastern France. The Prussians have captured the towns of Isle de Daubs and Clerval, in the Department of Danube. The Mobile Guards retreated

southward, and the franctireurs have disappeared from that section. One of the tunnels on the Strasburg railroad has fallen in, hopelessly interrupting communication by that line.

ST. PETERSBURG, Nov. 15.—Prince Gortschakoff's circular concerning the Paris treaty of 1856 is dated October 31. It recites successive alterations and violations of European treaties, among them that of 1856. He is unable to see why Russia should observe the latter when it has been disregarded by others; therefore Russia disavows its obligations to a limited enjoyment of the Enxine sea, and invites the Sultan to enjoy equal rights with her. She has no wish to rekindle the Eastern question, and only aims at increasing her defensive strength.

The government has prepared, as a compromise, a substitute which is an equitable and therefore a permanent basis.

NEW YORK, Nov. 15.—The World's special correspondent at Versailles, eleventh, says Von Moltke said yesterday: "Paris will be able to hold out about four weeks longer. I deplore the folly of the French in refusing to yield, and the necessity for devastating the country."

The opinion of the army concerning the entry of Paris coincides with that of Von Moltke. The men, however, are anxious to get home; they don't care about seeing Paris now. The belief prevails among the officers that as soon as Paris is occupied an inactivity of the troops will be quartered in the city, and there remain all the winter superintending the Constituent Assembly and keeping a wide circle of country under subjection, while the army of Frederick Charles pacifies the rest of the country until the army lately under Bazaine is brought back to France to be used in strengthening the hands of the new, strong government, with which peace will be made. At the head of this government will be Napoleon. This is the reason why Bazaine has been sent to Wilhelmshohe, and of the continual communication between Napoleon, the King, Bismarck and the Imperialists of England and Belgium.

NEW YORK, Nov. 15.—The World's correspondent in Paris, writing under date of the ninth instant, says General Trochu informed the troops, in a recent speech, that the whole force of Germans around Paris were two hundred thousand, spread around an investment of sixty miles, and that when the proper time arrived he would easily break this attenuated circle.

The official report shows that there are provisions sufficient to give fresh meat, bacon, bread and dried vegetables, in all two pounds of solid food per day, to each of the inhabitants, until the twenty-ninth day of January.

The World's special from Dale says: The French recaptured Dijon after a brilliant engagement, the Prussians retreating northeast.

A special of the same journal from London says that it is understood there that the reply of England to Russia's demand for the abolition of the treaty of 1856 is weak and depressing in tone.

NEW YORK, Nov. 15.—The Telegram has the following:

LONDON, Nov. 15.—Dispatches from Blois and Tours confirm the rumors that a battle has been fought near Arthenay. The extent of the Prussian loss has not been yet ascertained; but that another French victory has been obtained seems to be without doubt. The conflict originated in an attack upon Vandertann, along the road leading from Chevilly and Orleans, and the fight has evidently been very desperate. Indications of a hurried and complete retreat of the Germans are reported to be everywhere visible in the neighborhood of Orleans, and subsequent dispatches will no doubt confirm what at present seem to be indistinct rumors, furnished on the information of stragglers from the army and the villagers.

The French are following up their recent victories with considerable favor and dash, and the latest reports from the interior of Paris, where the news of the victories has been officially published, has given a silver lining to the cloud that seems to hang over the doomed city.

MADRID, Nov. 16.—One hundred and eighty-three Liberal deputies met yesterday, including Marshal Serrano, Lopez, Dominguez and Zygardeo. After a long consultation it was agreed that the first vote should be cast for Montpensier, when, if not chosen, they would vote for Aosta.

There is immense excitement here upon the throne question edict issued against public meetings, and a strong military force is under arms. A plot to murder Prim has been discovered. Five conspirators, with revolvers, hand grenades, poignards, telegrams and letters, have been seized. Others are implicated.

NEW YORK, Nov. 16.—The following dispatch has just been received per cable:

LONDON, Nov. 16.—Orders have been issued by the government to recall all men-of-war from every station, except where their presence is absolutely necessary.

There is a large concentration of ships of war at Portsmouth, and all the naval depots are active.

A strong fleet has been ordered to the Mediterranean.

It is feared that a general war is inevitable, and excitement runs high.

NEW YORK, Nov. 16.—By cable, from London, it is reported that Gladstone is willing to accept a modification of the treaty of Paris. The other members of the cabinet favor war.

Austria is urging England to war, and is displeased at the weakness of Gladstone's reply to the Russian note.

The London Times has a war article this morning, which is causing a renewed panic in the stock market. Consols rule at 92½ and bonds at 88.

Gold has advanced to 12.—Pica-yune.

LONDON, Nov. 16.—Vessels of war have been called from every foreign station, except such as are absolutely needed in foreign waters. A concentration of ships at Portsmouth is already apparent, and the greatest activity prevails in all the English naval depots. A powerful fleet will be immediately dispatched to the Mediterranean.

The best informed circles think the pretensions of Russia render a general European war inevitable.

It is also believed that Russia and Prussia are in close alliance against the rest of Europe.

NEW YORK, Nov. 17.—Despite the very threatening aspect of European affairs, it is still a strong, perhaps even a prevailing, impression in financial circles here that there will be no war.

Great activity, however, prevails in the shipping and military stores interests.

There are some apprehensions also of the administration forcing a rupture with England if the latter really becomes embroiled with Russia.—N. O. Times.

LONDON, Nov. 17.—Herald special. At a cabinet council yesterday it was resolved to act decisively in regard to the Russian complication.

War is imminent. Great and popular indignation exists against Russia. The Cologne Gazette of the fifteenth instant says: After an interview with the Russian minister at Vienna, Baron Von Bunsen informed Lord Bloomfield that Russia had one hundred thousand troops on the Turkish frontier, and that Austria was perfectly prepared to take the field if England would give her consent.

HE WAS NOT content with sending his disciples to do it, or doing it at a distance. Not he would walk to the spot himself; he delighted to do good. He would sacrifice needful rest or food to do it. He would go out of his road to do it. He would spend a whole day in doing it. He would do it for the worst. All of us might imitate him more in this. None are too young to help in comforting the poor and sick.

A POWERFUL SERMON.—A fashionable lady going out of church, remarked: "What a powerful sermon! I was never before so impressed with the duty and privilege of giving freely. I am determined to do better, and to send, this very week, another new silk dress to my daughter."

IT WERE well for multitudes to copy the example of the great Reformer, who used some mornings to say to himself: "Luther cannot get through to-day without as much as three hours' praying."

IF YOU wish success in life, make perseverance your bosom friend, experience your wise counselor, caution your elder brother, and hope your guardian genius.

IF PRAYER does not cause us to leave off sinning, sinning will soon make us leave off praying.

AN OBLIGING CLASS OF MEN.—Ancient, who attend to every one's bidding.—Punch.

THE OLD MISSIONARY DEBT.

AN EXPLANATION.

Worthy and intelligent persons have stated that many of our friends do not yet understand how it was that the old Missionary Society contracted so large a debt, and insist that I explain. Well, with your consent, Mr. Editor, I will address myself to the task.

Before the war we had one missionary society and one board; all the Bishops were members of the board. We had an annual meeting in April or May, at which the appropriations were made to all our missions, foreign and domestic, for the year following. The board inquired of the Bishops: "How much missionary money will be required to sustain all our missions at home and abroad?" The Bishops answered: "We want so much for China, so much for the Indian Mission Conference, so much for Kansas, so much for Texas and California, and Kentucky, and Tennessee, and the colored missions in the South, and domestic missions in all the Conferences—amounting to say one hundred and fifty thousand dollars." The board said to the Bishops: "You shall have the amount asked for; go to your Conferences and draw, in quarterly installments, for one hundred and fifty thousand dollars. True, we have but little money in the treasury at present, but it is now only April; the Conferences will not begin before September; it will be twelve months or more before the drafts all mature; by that time the collections will all be in, the Conference returns made, and we shall be able to honor all your drafts."

So it was in 1860 and 1861. The Bishops went to their Conferences, drew upon the treasurer for the amounts authorized. Before the drafts all fell due the war broke out and cut off many of the missionaries from all intercourse with Nashville. The war had not yet reached their fields of labor, but the main portions of the South were cut off; all business was suspended or interrupted; the Conferences were not held in some places; the General Conference could not meet in 1862, and in some of the Southern States sequestration acts were passed, so that the treasurer could pay no drafts coming from Cincinnati, Louisville, St. Louis, New York, or any place north of Tennessee or Virginia; the missionary collections in the South failed, or were made in Southern or Confederate money, which would not be received in the payment of drafts north of the line of the Confederate States. The result was that many of the drafts drawn in favor of parties in Kansas, Missouri, the Indian Mission Conference and northern Arkansas, never reached the treasurer till after the war closed. They had been sold to merchants, and the proceeds had been used by the missionaries and their families, and the purchasers left without reimbursement. Then letters of credit, sent to China, were indorsed by a gentleman in New York; bills were drawn, sent to China, cashed and came back to New York for payment; the treasurer at Nashville could not meet these bills, but they were paid by our New York friend, he stating that the Southern Church would never allow him to suffer if they had the ability to pay; he was willing to trust them. This manner of transacting the business is easily explained. Here, for instance, is a planter who cultivates five hundred acres in cotton or sugar. He needs supplies for his plantation; he must have mules, and wagons, and plows, and gins or mills, and corn and hay and provisions for his laborers. He draws a bill for ten thousand dollars, sends it to his merchant, who honors it, and waits for the crop to mature, when the cotton or sugar will be shipped to him to meet the claim. The purchases are made, all supplies laid in, and the crop planted; but here comes the war; the mules, wagons and provisions are all "pressed," the laborers are conscripted, the gins and mills burned, and the proprietor is in the army; the bill matures, but of course it is protested for non-payment. Your readers cannot fail to make the application. When the General Conference met in 1866, at New Orleans, according to the best estimates about sixty thousand dollars of unpaid drafts were on hand; twenty thousand, or more of this amount was due to our New York friend. Something like one-half of this amount had been paid at the meeting of the late General Conference at Memphis; in the meantime much had been done in four years to sustain domestic missions, and keep up the work among the Indians

and in China. After the close of the General Conference, in May last, the board determined to make a powerful effort to wipe out the last item of this old debt. Hence the amount has been divided again, and the Conferences are assuming each a portion of the remaining liabilities. Several Conferences have paid their full portions more than once, but still they are ready to pay again, so as to rid the church of this mountain pressure.

It is proper to say that not one dollar of this debt was created to sustain the cause of Methodism in the South during the war. None of these drafts came from the more Southern States in our boundaries. When the Federal army occupied Tennessee and northern Virginia the board had several annual meetings in Georgia and Alabama, and provided for the support of missionaries to the colored people of the South and in the Southern army. They also made provision for the payment of the drafts alluded to in this article; but when the surrender came their money proved worthless, and we are compelled to look to the liberality of an impoverished but noble people to pay, in good funds, what they had already provided in a now exploded currency.

J. B. McFERRIN, Secy.

TO THE PEOPLE OF ALABAMA.

The faculty of East Alabama College, in order to extend collegiate education to meritorious young men of limited means, and thus advance generally the cause of education in the State, offers free tuition to one student in each county of Alabama upon the following conditions:

1. The applicant must exhibit with his application proof of good moral character, and of limited means such as would otherwise exclude him from the advantages offered; that he has attained at least eighteen years of age, and possesses such mental capacity and attainments as will enable him profitably and successfully to pursue the course of instruction given in the college. (See catalogue, which can be had on application.)

2. He must bind himself on entrance to teach in some public or private school in Alabama at least as long as he receives free tuition in the college.

Preference will be given, other things being equal, to young men already engaged in teaching, or who intend to make teaching their profession.

Applications, accompanied by proper testimonials in reference to the conditions specified above, will be received (addressed to secretary of faculty, Auburn, Alabama) till the fifteenth of December, at which time the appointments will be made and announced, so that the appointees may enter the college in January, 1871.

The newspapers of the State are kindly requested to give this proposition a few insertions in their columns, and bring it favorably to the knowledge of the youth of the State, in whose interest the proposition is made.

We likewise respectfully ask the aid and co-operation of the various teachers and school officers of the State in making this proposition known in the different counties, and in carrying it out in its true spirit and intent.

REV. A. D. McVOR,
J. T. DUNKLIN,
ALEXANDER HOGG,
WM. C. STUBBS,
Faculty.

AUBURN, ALA., Nov. 1, 1870.

PRAY IN YOUR FAMILY.—Says Rev. Norman Macleod: "I shall never forget the impression made upon me during the first year of my ministry by a mechanic whom I had visited, and on whom I urged the paramount duty of family prayer. One day he entered my study, bursting into tears as he said: 'You remember that girl, sir; she was my only child. She died suddenly this morning; she has gone, I hope, to God. But if so, she can tell him what now breaks my heart—that she never heard a prayer in her father's house, or from her father's lips! O that she were with me but for one day again!'"

DEATH OF NILS ERICSSON.—The Swedish Aftonbladet, of the eighth ultimo, announces the death of Nils Ericsson, the greatest engineer Sweden ever possessed. Nils Ericsson, who was born in the year 1802, was the son of Olaf Ericsson, an ironmaster of Langbanahyttan, and he was the elder brother of Captain John Ericsson, the celebrated engineer, who has achieved so great a name on both sides of the Atlantic.

THE SOUL'S ESCAPE.

BY GRACE W. HICKS.

When death has loosed my weary wing,
Exultant shall my spirit sing
Of its escape at Jesus' call,
From bonds of sense and earthly thrall.

Rising aloft in cloudless sky,
To love's embrace my soul shall fly,
To its release from sin and tears,
To endless joys, through endless years.

When weak and worn on earth's kind breast,
My body sinks in silent rest,
Springing with joy through golden skies,
Unbound and free, my soul shall rise.

Admitted there where Jesus reigns,
In wedding robes and washed from stains,
I'll sit and taste the heavenly feast—
Though of God's saints I am the least!

Against all ill the door shall close—
Serene and safe in sweet repose
The weary flock shall gather here,
The face of Christ, their Lord, to see.

The lonely ones who wandered here,
In perils oft and desert drear,
Shall peaceful kneel on crystal floor,
And leave their Father's house no more.

But, Lord, I weary am, and now,
Weeping beneath my burden, bow,
Reveal thyself, oh! comfort me,
Support me till I fly to thee!

The Interior.

LETTER FROM CHINA.

SHANGHAI, CHINA, Sept. 11, 1870.

MR. EDITOR: Do Christian people fully understand the condition of the heathen of this great empire as to their prospects for a world to come? Do they fully understand that they are "sitting in darkness, and in the region and shadow of death?" They have never known, with all their earthly wisdom, from whence they came. They do not know where they are going. They have no just conceptions of God. They know nothing of the enormity and heinousness of sin in the sight of a holy God. Their ancient sages and philosophers have not been able to give them any light on these subjects. When questioned on these subjects they turn away as if offended, and as if the very thought was repulsive to their minds. "Thinking themselves wise, they have become fools." They have sought out, by the wicked imaginations of their own hearts, a way, and it has led them "into the shadow of death," and it has become to them a way of gross darkness. Their greatest man, Confucius, could teach them their duty to one another as a family, but he could not go beyond and teach them of their duty to God. He himself knew nothing of the relation of man to his God, or at least he did not teach it.

The people of the present day do not worship Confucius as a god; but they confer upon him honors which should not be conferred upon man. The influence of that great sage upon the people of China has been wonderful, and has extended through a longer space of time and reached to the minds of a greater number of people than any other man ever known in heathen lands. But he had no revelation, and without it he could not tell to those around him from whence he came and where he was going, and he could not tell them of a wise and just God, who ruled over all, and who would in the end bring all nations into judgment. When asked about them he refused to give a direct answer, and taught the people not to give themselves any trouble about a future life, but to attend to the things of this life. He did not teach the people any religion. He taught and enforced the maxims, which he contended were ever held and believed by the wise and good of every age, and which have had, to a certain extent, a very good influence in China.

Confucius, when he was not successful in his plans, would say: "Such is the will of heaven." But we have no certain knowledge that he knew of one great personal, living Being who ruled and governed all men. He may not have worshipped idols of wood and stone, but he certainly worshipped the creature and not the Creator. Confucius lived about 550 years before the Christian era, and Mencius about one hundred years after Confucius. He taught and enforced the doctrines of Confucius. About seven hundred years since the present, the great philosopher Chu-Hi wrote

a minute commentary of all of Confucius' doctrines and his disciples. Even in the early days of Confucius we can see that the Chinese had departed far from the truth, and had "corrupted their way upon the earth," for they then followed the evil imaginations of their own hearts and their minds were darkened. But they departed further from the truth since that time. Their most ancient book, called Shu-king or Book of Records, carries us back to the time when Noah was still living. Yaw and Sung, their first emperors, are spoken of as being very good men. There were no idols then, but it is more than likely they worshipped the works of nature's God. But at present all kinds of religions are tolerated, so long as they do not interfere with the civil government of the country.

There are altars to heaven, to earth, to the sun and to the moon, and to the north star. There are other altars to gods of the rivers, of the mountains and of the valleys, to the gods of lightning, of fire, and many more, too numerous to mention. To these the Chinese bow from day to day—images of wood and stone, made in the image of man. If asked why they bow to these senseless and inanimate images, they will laugh and say: "We do not worship this image, but what the image represents." The Roman Catholics will tell you the same thing. But the Bible does not allow this, and teaches us that it is idolatry, at which God is greatly displeased, and will punish all who continue to bow down to them.

So fixed and determined are these people in their notions of idolatry that they care but little for the glorious truth of the gospel of the Lord Jesus. They turn with utter indifference from it, and spurn the terms of offered mercy. The gospel is presented to them in the most simple way that it is possible to do so; and we are led to believe, from what we know and have seen, that the gospel is just as much adapted to the Chinese as it is to other nations. We need not, then, doubt of its ultimate result among the heathen. Let not our Christian friends, who feel that the cause of our Lord has failed in China, become discouraged; for if they withdraw their help and aid God will raise up others to take their places. No matter how much we may oppose the work, and refuse to help or give our earnest support, God will carry it on and cause his kingdom to triumph over all.

Some suppose the few who have been converted from among this heathen people is evidence sufficient to prove the failure of Christianity in China. Is there, let me ask, one Christian in America, or I would say in our own church, who truly believes in his heart that Christianity has failed in China? If there is, let me say this: I would not give much for that man's Christianity. I am sure he esteems something else more highly, and gives to the Christian religion a secondary place. Christianity has not failed in China. There are some men who only hope it would, so that they might not be called on to aid in sending the gospel to those who sit in darkness.

My dear friends, you may give up China, and say the heathen have no part nor lot with you; but God will not give up China. Hundreds of good and holy men are sent from year to year from Christian lands to preach Christ among the heathen, and no opposition can prevent it. The heathen may rage and the wicked may oppose, but God will establish his kingdom, and cause it to reign supreme over all.

There is much opposition in China, just now, to all foreigners and to all missionary operations. But God will cause the wrath of the heathen to praise him, and this great empire will be opened more widely and extensively to the spread of the gospel. China is now in almost a complete state of anarchy. Their high officials are being attacked and assassinated in many parts of the empire, and we seem to be on the eve of a dreadful revolution. Will not our Christian friends bear us up before the throne

of grace in earnest prayer? Have we not all reason to pray that God will revive his work in our hearts, that we may labor faithfully for the salvation of others? Do not think God has failed to establish his kingdom in China. He will do this in his own good time, and cause all those who put their trust in him to rejoice and give him all the glory. I will write in my next and give some of the difficulties to be eradicated ere the heathen can be converted to God.

Your brother in Christ,
J. W. LAMBETH.

HOMER MALE COLLEGE.

MR. EDITOR: Having seen favorable notices in the Advocate of other institutions of a similar character, and not one word (save the few lines from your own pen, which you seemed to try to hide) about the institution whose name stands at the head of this communication, and believing it to be equal to the best, I am induced to write a few things in its favor, especially to the people of north Louisiana and south Arkansas. And first, its faculty is unsurpassed by that of any college in the land. Its president, Rev. J. S. C. Cobb, is a ripe scholar, a good educator, a devoted Christian and an able minister of the gospel. Its professor of mathematics and natural science, Mr. J. W. Nicholson, is the right man in the right place, having few equals and probably no superiors in his department in all the land—is an affable gentleman and consistent Christian. Mr. A. C. Calhoun, A. B., the adjunct professor of languages and English literature, is an honored graduate of the institution, and in every respect well qualified for the position which he occupies; is also a member of the church and a devoted Christian.

The location of this institution is probably unsurpassed by any college in the State. The country around is fertile. The inhabitants are industrious and prosperous, and probably as sober as in any community in the State. The town has three organized churches—Methodist, Presbyterian and Baptist—all of which are regularly served by pastors of their own.

The friends of temperance have quite a large organization here, and all the merchants, save one Jew firm, have determined to abandon the traffic in ardent spirits, removing thereby that insidious temptation to evil—"the back-room barrel."

The responsibility of providing the means by which the young men in an area of territory two hundred miles square might procure a collegiate education having been imposed on the trustees of this institution, they are determined to put forth every effort in their power to meet it, and thereby to improve this talent committed to their keeping, so that at the coming of their Lord they may be able to present the original talent with accumulated interest. In order more effectually to accomplish this object, they are determined, if possible, to procure an endowment fund for one or more of the chairs.

But while the trustees acknowledge their responsibility in this matter, and are determined to discharge their duties, they would not exonerate others from part or lot in this responsibility, but would endeavor to impress upon them that there are duties which they are called upon to discharge. And in behalf of the Board of Trustees, let me beg you, brethren and friends, to send your sons and wards along to Homer College, thus contributing your mites to its support, and getting in return value received for every dollar expended.

This institution is now no experiment, having weathered through the storm of financial embarrassment, and bowed its head under other depressing circumstances. It now presents itself to you for your patronage in the fullness of the stature of a well organized college.

It was my privilege to attend the commencement exercises in June last, and I here record my testimony in favor of their having been in the highest degree satisfactory. Send your sons to Homer Male College if you live in north Louisiana or south Arkansas. Respectfully,
THOS. J. UPTON.

Reminiscences of the Old Alabama Conference.

MR. EDITOR: As the principal part of the territory included in the old Alabama Conference is about to be reunited in a new Conference of the same name, I propose to furnish a few sketches of the former body, which I hope will tend to revive pleasant memories on the part of the older, and to furnish incentives to effort on the part of the younger members of the new Conference.

I will begin my sketches with the session of 1850-51, held in Mobile. It was my first visit to an Annual Conference, and was a trial-trip—that is, I went to become acquainted with the members, with a view to joining the next year. My traveling companion was the Rev. John D. Worrell—since dead—from the Blount circuit. We rode to Selma and took steamer for Mobile. Rev. J. L. Cotton was pastor at the church in Selma—a small frame building, since replaced by an elegant brick, through the labors of Dr. Hamilton in 1854. Dr. Wightman, then editor of the Southern Christian Advocate, preached for Bishop Andrew at the church the night before taking the steamer. His subject was the journey of the children of Israel through the wilderness. His apology for preaching, instead of the Bishop, was elegant. "I sympathize with the congregation, and I know they will sympathize with me in the disappointment of hearing the Bishop." The venerable Bishop was accompanied on this trip by his wife—the lady on whose account (sub-slavery) the church was not long before divided. She was, of course, an object of interest with the preachers, and they generously paid her fare to Mobile. There were seventeen preachers on board, and the usual number of anecdotes and witty repartees were heard during the passage of two days. Rev. W. H. McDaniel got on at Cahaba, carrying an enormous walking cane. Being asked why he carried such a heavy cudgel, he said he had learned up in the mountains, where he had been traveling the year before, that an ounce of fear was worth a pound of love. He engaged in a controversy with Dr. Wightman on the subject of English poetry, in the course of which he denounced Shakespeare with savage ferocity, calling him a hog, etc.

At Mobile I was placed, with Rev. Josiah Barker, at the house of W. H. George, so long a pious and useful member of the Franklin Street church. Rev. William H. Milburn, the blind preacher, was in charge, that year, of the St. Francis Street church, and was arraigned at the Conference on several charges—one of preaching heretical doctrines, another of attending the Striker's ball, I remember. He had said that the preaching of theology was the bane of the pulpit and the curse of the church. To this he replied by defining what he meant by theological preaching—i. e., the preaching of scientific and doctrinal points as opposed to practical piety. As to his faith, he said he believed in Methodist doctrines, and in a most beautiful manner recited the Apostles' Creed as embracing the articles of his faith. He appealed to the Bishop's example of writing a work on family government rather than on questions of divinity abstractly considered. The good Bishop reminded him that in ordinary language theology was understood to include all religious doctrine, the practical as well as the scientific. Milburn afterward acknowledged, in his "Ten Years of Preacher Life," that about this period his mind was under the influence of German rationalism. The charge of attending the ball he met by saying that he went to see it that he might be the better prepared to preach against it, and that he had afterward, in the pulpit, denounced their extravagance, and had advised them to invest the money thus foolishly wasted in the establishment of a young men's library.

Bishop Paine was present and preached on Sunday, on John xiv, 1—the identical text that Bishop Andrew had used the Sunday previous at Summerfield. This afforded

ed some of us a fair opportunity of comparing the two sermons.

Dr. Wightman preached on Sunday night at Milburn's church, on Galatians i, 8: "But though we, or an angel from heaven, preach any other gospel unto you than that we have preached, let him be accursed."

The Conference appointed two days of fasting and prayer, for the following year, for an increase of laborers in the harvest. The number of preachers in the body did not at that time exceed one hundred and twenty. In the next ten years it was more than doubled.

I left Mobile under the conviction that the Alabama Conference was a much more able and devoted body of ministers than I had anticipated, and determined to apply for admission the next year.

F. M. GRACE.

OPELOUSAS DIST. CONFERENCE.

MR. EDITOR: This body met at New Iberia on Thursday, October 6, and adjourned on the morning of the eighth. The attendance was not large, on account of sickness in a portion of the district. The following charges were represented: New Iberia, Franklin, Plaquemine, Ruloe and Abbeville.

The usual committees were appointed, and appropriate reports were presented on the various interests referred to them.

The Committee on Education recommended the establishment of permanent schools in every pastoral charge, under the patronage and fostering care of our own church.

The Committee on Missions recommended that each minister devote one entire Sabbath of every quarter to the labor of informing the members of his charge relative to the influence and importance of missions, and that each church be organized into a missionary society.

It was resolved that the editor of the NEW ORLEANS CHRISTIAN ADVOCATE be requested to publish in full the report of the Committee on Sabbath Schools.

The several pastoral reports exhibited an increase in the numbers and zeal of the church.

Resolutions of condolence, expressive of the feelings of this Conference in regard to the death of Rev. Gilbert Guillett, a member of this body, were introduced by Rev. A. E. Goodwyn, and unanimously adopted by a rising vote.

Abbeville was selected as the place for the next District Conference.

R. S. ISBELL, Sec'y.

TRIBUTE OF RESPECT.

WHEREAS, It has pleased almighty God, in his wise providence, to remove from his field of labor and usefulness, in the morning of life, our beloved brother, Rev. Gilbert Guillett, preacher in charge of Washington circuit, and a member of this body; therefore, be it resolved by the Opelousas District Conference, in conference assembled:

1. That while we bow in humble submission to a Providence too wise to err and too good to be unkind, we feel deeply the loss which we and the whole Conference have sustained in the removal of our brother from among us.

2. That we profoundly sympathize with the aged father and the youthful wife of our deceased brother, and invoke upon them the all-sufficient grace of God.

3. That the secretary be requested to forward a copy of these resolutions to the family of Brother Guillett, and to the NEW ORLEANS CHRISTIAN ADVOCATE for publication.

A. E. GOODWYN.

J. V. POINTER.

CORRECTION.

GREENWOOD, FLA., Nov. 3, 1870.

MR. EDITOR: In my communication of September 16, giving an account of the China Grove camp meeting, a mistake occurs. Your types make me say that eighteen joined the church, whereas it was eighty that joined. Being absent from home on my district, I have just seen the copy of the Advocate containing the communication.

W. B. DENNIS.

A PARISIAN LADY called on her milliner the other day to "take up" the character of a servant. The morality of the latter was beyond questioning. "But is she honest," asked the lady. "I am not so certain about that," replied the milliner. "I have sent her to you with my bill a dozen times, and she has never yet given me the money."

GREENVILLE DIST. CONFERENCE.

GREENVILLE, MISS., Oct. 26, 1870.

MR. EDITOR: The Greenville District Conference of the North Mississippi Conference met in Greenville on Friday, October 21, but did not begin its session until Saturday, the twenty-second, on account of the delay of the anticipated Bishop (Doggett) to preside. Being disappointed by the non-attendance of the Bishop, and without a presiding elder, the Conference proceeded to elect its president. Rev. J. C. Carlyle, the only surviving traveling elder on the district, was elected president, and J. D. Murff secretary.

The Conference was slow to begin business. A veil of sorrow seemed to shroud the little assembly. There were vacant seats. Our dear, good president, whom our hearts loved, was not there. It was so long our custom to await his leadership that we could hardly realize our bereaved condition—bereaved indeed. Bro. Drake, though a brother in years, was a father in godly counsel and pious example. Also our beloved Brother R. H. Herbert, whose sound wisdom and many years' experience in his Master's work had constituted him our spokesman and instructor, was no more. He, too, had "entered upon his rest." Sickness had driven from us others of our fellow-laborers, and now the body, which was only a few weeks ago filled with God-loving and self-denying laborers for Christ, is represented by only two traveling ministers. Truly the hand of Providence has laid grievous afflictions upon the Greenville District during this year. "Mysterious are thy works, O God, and thy ways past finding out!" With sad hearts we proceeded to transact the indispensable business of the Conference.

Reports from three works only were received. From what could be deduced by recent conversations with our late presiding elder, and the reports of those present, the cause of Christ seems to be progressing slowly, but we trust surely. There were about fifty accessions on the district during the year; attendance upon public worship improving; Sabbath schools not prosperous, owing to almost insurmountable difficulties peculiar to the swamp. Financially the district is at present deficient; but we believe it will ere the meeting of Conference, manifest its wonted liberality. The interest of the church has been well cared for. Eight or nine thousand dollars' worth of property has been properly secured to her. "Truly the harvest is great; pray ye, therefore, the Lord of the harvest to send more laborers to the field."

The following persons were elected delegates to the ensuing Annual Conferences: Rev. William T. Ashford, William H. Worthington and N. T. Nelson to the North Mississippi Conference; D. N. Anderson to the South Mississippi. Alternates: Rev. W. D. Brown and G. W. Thomas.

The following resolution was adopted:

WHEREAS, It has pleased almighty God, in the dispensation of his wise providence, to take from us by death our worthy and much loved brother, presiding elder and fellow-laborer, the Revs. W. Winans Drake and R. H. Herbert; AND WHEREAS, We are now assembled for the first time, as a body, since their deaths, where we feel so much the loss of their brotherly love and Christian example; therefore, be it

Resolved, That we feel deeply the sore bereavement which our kind heavenly Father has sent upon us by smiting our noble and loved leader and our kind and fatherly brother. We recognize in their deaths a great and lamentable loss to this body, to the district, to the station and to the community at large, and that Israel has lost one of its fathers and one of its most valiant warriors. In meekness, though with sorrow, we submit. "Thy judgments," O God! "are true and righteous altogether."

The ministrations of the word were well attended, though somewhat discontinued on account of sickness in the community and among the ministry. We trust seed was sown for God's glory. May God bless with his Spirit constantly!

J. D. MURFF, Sec'y.

The Christian Advocate.

SATURDAY, NOVEMBER 19, 1870.

THE WANDERER'S RETURN.

Behold, what manner of love the Father
hath bestowed upon us, that we should be
called the sons of God; beloved, now are we
the sons of God.—1 John III, 1, 2.

The wanderer no more will roam,
The lost one to the fold hath come,
The prodigal is welcomed home,
O Lamb of God, in thee I

Though clad in rags, by sin defiled,
The Father hath embraced his child,
And I am pardoned, reconciled,
O Lamb of God, in thee I

It is the Father's joy to bless,
His love provides for me a dress,
A robe of spotless righteousness,
O Lamb of God, in thee I

Now shall my famished soul be fed,
A feast of love for me is spread,
I feed upon the children's bread,
O Lamb of God, in thee I

Yes, in the fullness of his grace,
He puts me in the children's place,
Where I may gaze upon his face,
O Lamb of God, in thee I

I cannot half his love express,
Yet, Lord, with joy my life confess
This blessed portion I possess,
O Lamb of God, in thee I

It is thy precious name I bear,
It is thy spotless robe I wear,
Therefore the Father's love I share,
O Lamb of God, in thee I

And when I in thy likeness shine,
The glory and the praise be thine,
That everlasting joy is mine,
O Lamb of God, in thee I

(The foregoing poem is by the author of
the well known hymn beginning, "Just as I
am, without one plea," and although not
now published for the first time, yet it is not
as well known as it deserves to be.)

Proclamation by the Principal Chief.

A DAY OF FASTING AND PRAYER.

TO THE PEOPLE OF THE CHEROKEE
NATION: It is proper and becoming
for all people, at all times, to
humble themselves before almighty
God, and to confess their sins, and
to implore his forgiveness, guidance
and protection through Jesus Christ.
But the necessity of so doing is es-
pecially apparent and urgent when
people and nations are in circum-
stances of distress and danger, and
when threatened with public cal-
amity.

As an encouragement to prayer
and supplication, under such cir-
cumstances, we have only to turn to
the promises of God, that when his
creatures cry to him for succor in
distress, or for protection in weak-
ness, that his ear will be ever open
to hear the prayer of sincere and
earnest men. We can turn also to
the repeated instances in which God
has heard the prayers of distressed
nations, and listened to their con-
fessions of sin, and protected them
by his power, and warded off cal-
amities.

Nineveh, when the edict of the
Almighty had been issued for her
destruction, proclaimed a fast, and
all the people, from the king to the
beggar, prostrated themselves in
humiliation, and lifted up to God
the cry for deliverance. The heart
of Jehovah was moved to pity, and
the decree was annulled, and he
repented him of the evil that he
had determined against that city.
Thus God, by both word and action,
has declared himself to be a prayer-
hearing God.

To-day the Cherokees and the
whole Indian race are in distress
and danger. Powerless we lie in
the hands of the government and
people of the United States, as did
the Jews in the hands of Ahasuerus
and the Persians. The United
States can bring the weight of forty
millions of people, and untold wealth,
power and skill to crush us in our
weakness.

Not only have they the power
thus to crush us, but with very
many the disposition is not wanting.
Already the cry for the extermina-
tion of Indians is heard from quar-
ters so high and influential as to
give alarm to the whole Indian
race. Especially are we alarmed
when we read in the short history
of the United States name after
name of mighty nations of red men
who once occupied this vast con-
tinent, but who are now swept from
the face of the earth before the
white man.

Amid the general decay of Indian
nations and the annihilation of the
vast majority, the five nations of the
Indian Territory have not only sur-
vived, but increased in number, ac-
cumulated property, advanced in
civilization, adopted the Christian
religion, and are now building
churches and school houses, estab-
lishing printing presses and agri-
cultural societies, and making more
rapid strides in civilization than
ever before.

All this prosperity under God
and his gospel we owe to our
separate national existence, and the
protection and security afforded by
our treaties with the United States.
Although their treaties have been
frequently violated, and their pro-
tection has been but partial, still
they have served to prevent the tide
of immigration from flooding our

country, and to thwart the rapacious
land grabbers and liquor sellers,
and to check injurious legislation
by Congress. But avaricious men,
and the enemies of the Indian, have
opened their batteries on Indian
treaties, and threaten their annihi-
lation. Efforts are being made to
annul and destroy all of our treaties,
and thus to tear away our only
human defense, and leave us to be
the sport of capricious legislation
and unjust administration, and the
victims of unscrupulous speculators.

Even now, before these treaties
are annulled, the sacred obligations
of the United States to protect us
are to a great extent rendered nug-
atory by unjust judicial decisions
and unwarranted official rulings.

Our adopted citizens have had
their business houses closed by
order of the United States officials,
to the great injury of our com-
munity, and are compelled to obtain in
Washington license to transact
business.

The tax gatherer stands ready to
enter our country, and wrench from
us our scanty earnings. Already
the manufactories of our citizens
have been seized and sold, under
the operation of tax laws, from
which the United States are sa-
credly pledged to exempt us.

Now the organization over us by
force of Territorial or State govern-
ment is urged. Our title to our
lands, and invested funds, has been
questioned. The very foundations
of our national and individual ex-
istence are threatened. The de-
mand is made in influential quar-
ters that the government of the
United States shall disregard its
sacred pledges, and raise the flood
gates, and let in upon us a stream
of immigration to overwhelm us.

Our rights and liberties are tram-
pled in the dust; our citizens are
arrested by United States marshals,
contrary to law, dragged to prison
in a foreign state, arraigned before
a foreign court, and acquitted or
condemned at the caprice of judges
and jurors of a strange tongue, in a
foreign land, who have no sym-
pathy with us, and no regard for our
rights or liberties.

Viewed in every light, and from
every standpoint, our situation is
alarming. The vortex of ruin,
which has swallowed hundreds of
Indian nations, now yawns for us.

In these circumstances of distress
where shall we go? Whither shall
we flee for help?

Our delegations, our lawyers and
friends have failed to stay the on-
ward progress of usurpations. Our
prayers, memorials and petitions
have fallen unheeded on the ears of
Congress and departmental officers.

To God then, the ruler of the
universe; to him who holds in his
own hands the destinies of nations,
great and small, and who disposes
of emperors and kings, together
with their empires and kingdoms,
according to his own good pleasure;
to the Lord our God, let us go with
our case, let us pour out our
prayers into the ear of the mer-
ciful Jehovah, who in the days of
old "hath scattered the proud in
the imagination of their hearts. He
hath put down the mighty from
their seats, and exalted them of low
degree." To him let us confess our
sins, and pray for national preserva-
tion, and for individual protection.
In this let us unite with one heart
and one voice, and with deep ear-
nestness of soul.

Now therefore in view of our
critical condition, I, Lewis Downing,
principal chief of the Cherokee Na-
tion, do hereby set apart and ap-
point Thursday, the seventeenth day
of November, A. D. 1870, as a day
of national humiliation, fasting and
prayer. And I do hereby call upon
all the people of the Cherokee Na-
tion to observe the same strictly,
earnestly and sincerely. Let Chris-
tians of every name, throughout the
whole nation, lay aside their ordi-
nary business engagements, and as-
semble at their various places of
worship, and unite in earnest prayer
and supplication to almighty God
for national preservation. Ask God
to incline the hearts of the rulers
and people of the United States to
observe strictly their solemn pledges
not to trample down our rights and
our liberties. Pray God to secure
to us our country and our homes,
to save us from usurpation, which
fills our land with foreign officers,
who drag us before foreign courts
and cast us into foreign prisons,
without color of law; which levy
unjust taxes and confiscate our
property to satisfy the same; which
lays unjust and oppressive restric-
tions on a portion of our citizens to
the injury of all. Let us beg of
God to save us from usurpation
which threatens to destroy the last
vestige of self-government that re-
mains to us, and to open our coun-
try to white immigration, and thus
take from us our homes, and destroy
us as a people. Let us humbly ask
God to save from these calamities,
and from all others, and give us
peace, to protect us by his own
power. And thus preserved, we
may become a nation devoted to
God, loving him with all our hearts,
and earnestly laboring in his service
—a nation redeemed by the blood of
Jesus Christ, his Son.

Given from under my hand, and
the seal of the Cherokee Nation, at
the Executive Department, Tah-le-
quah, C. N., on this the seventeenth
day of October, A. D. 1870.

LEWIS DOWNING,
Prin. Ch. of Cherokee Nation.
Cherokee Advocate.

BLINDNESS.

An important difference between
popery and Protestantism is in the
fact that while popery ignores the
authority of the word of God, and
denies its use by the people without
word or comment, the Bible, in the
language of Bishop Chillingworth,
"is the religion of Protestantism."
Rome is to-day waging a determined
crusade in all countries, where it has
power, against the general use of
the very book from which it derives
the doctrines of its faith, and which
it would seem it should be most
anxious to disseminate as widely as
possible. The Pope, however, has
repeatedly issued his bulls against
the Bible societies, and denounces
all institutions based upon this
corner-stone as pestilent and dan-
gerous, and his adherents implicitly
follow his unscriptural teaching.

After the anniversaries of the re-
ligious societies, last spring, the
Tablet, a Roman Catholic paper in
New York, commented on the work
of the American Bible and Tract
Societies for the year. The article
is full of significance as showing the
Catholic hostility to the Bible, and
the arrogant claims to the superi-
ority of their system of evangelization,
utterly ignoring or misrepresenting
facts which are apparent to the
whole Christian world. After refer-
ring to the large circulation of the
publications of these societies it
contemptuously asks:

"What fruits of holiness are visi-
ble in any country under heaven
from the mere reading of the Bible?
The fact is—and the Bible Society
and the Tract Society know it well
—that no permanent results are
effected in any country, or among
any people, by the enormous expend-
iture of their missions. The traces
of their missionary labors pass away
with the oceans of Bibles and tracts
wherever they inundate the world.
It is only the Catholic missionary,
with the cross of Christ in his hand,
and the word of Christ in his mouth,
that really converts nations and
tribes and peoples, and builds up
churches, and plants Christianity
deep in the soil. * * * Catholic
missions, with comparatively little
expenditure, are everywhere and
always successful, while Protestant
missions are a mere 'sham.' All
the pretentious doings and sayings
of the Bible and Tract 'agents,' all
the millions of dollars spent, all the
millions and billions of Bibles and
tracts poured from their presses
year after year, do little for the real
extension of Christ's kingdom on
earth."

The utter absurdity of these as-
sumptions might be shown by com-
paring the condition of those "na-
tions, tribes and peoples" where
popery has had full sway for years,
and where the Jesuits have bap-
tized "hundreds and thousands of
pagans," that are still sunk in igno-
rance and superstition, with the
elevating, civilizing and Christianiz-
ing influences of the unfettered
word of God in the lands where a
free gospel has been circulated and
taught.

The New York Observer per-
tinently exposes the inconsistency
of the assertion of the uselessness of
the "oceans of Bibles and tracts
wherever they inundate the world."
It asks the unanswerable question:
"If they are so useless and harm-
less, why is it that we are not al-
lowed to inundate Roman Catholic
countries until the people have
fought some successful battles for
freedom and progress, and opened
the way for the Bible by the spirit
of liberty? Why is it that South
America is lying in ignorance and
degradation, and mobs in her chief
cities welcome with stones and
curses the colporteur with Bibles
from North America, the free, pros-
perous and enlightened?"

The truth is, and the willful ig-
norance and blindness of Rome
cannot alter or conceal the fact, that
the "nations, tribes and peoples"
that have made most progress in
enlightenment, general education
and Christian civilization have been
those that have been permeated by
the great principles of the Protest-
ant Reformation, and that prominent
among the agencies for their ad-
vancement, as well as the elevation
of the dark and benighted, has been
the Christian press as conducted by
the Bible and Tract Societies.

The goldsmith, in setting the dia-
mond, places in the capulo a dark
leaf, and this gives beauty and bril-
liancy to the jewel; so the dark
leaves placed by the hand of God in
the book of our earthly history give
glory, brightness and preciousness
to the higher life above.

"HALF the sorrows of woman
would be averted," says George Eli-
ott, "if they could repress the
speech they know to be useless; nay,
the speech they have resolved not to
utter."

President Grant's Indian "Policy."

Our advices from Washington an-
nounce that Congress having pro-
hibited the employment of officers
of the army upon any civil duty, the
Interior Department has been for
some time engaged in relieving the
army officers who are doing duty
as Indian agents and putting civil-
ians in their places. The policy
directed by the President to be pur-
sued in the new appointments is
similar to the Friends' arrange-
ments. The different missionary
associations and religious denomina-
tions of the country have been
tendered the designation of persons
whom they are willing to indorse as
suitable for Indian agents, and for
whose good conduct and efficiency
they would be responsible. The
object to be attained by this policy
is to engage the religious sentiment
of the country in the civilizing efforts
now making for the benefit of the
Indians, by appointing agents who
will be in sympathy with any mis-
sionary and benevolent enterprises
which religious bodies may inau-
gurate among the Indians. Most
of the societies have responded
promptly to the proposition, and
heartily indorsed the plan; and
some have designated persons who
have been commissioned by the
President. No appointments of
Indian agents will be made unless
they are designated as above in-
dicated. Below is given the list of
agencies tendered to the various
missionary associations and reli-
gious bodies:

Methodists, seven, in Washing-
ton, Montana and Oregon; no ap-
pointments have been made as yet.
Presbyterians, six, in Arizona, Utah
and New Mexico; appointments—
D. N. Crothers, S. D. Williamson,
O. E. Piper and Isaac S. Warden.
Baptists, five, in Nevada, Idaho and
Indian Territory, no appointments.
Episcopalians, six, in Dakota; ap-
pointments—J. Lee Engelbert, H.
F. Livingston, J. M. Washburn,
Henry Gregory and Samuel D.
Webster. The sixth agency, when
established, will be in Spotted Tail
and Red Cloud's regions. American
Board of Foreign Missions, two, in
Indian Territory; appointments—
Henry Breiner and Theodore D.
Griffith. Reformed Church, two, in
Arizona, no appointments. Unitar-
ian, two, in Colorado; no ap-
pointments. American Missionary As-
sociation, four, in Minnesota, Wis-
consin and Michigan; appointments—
John P. Bardwell, Seldon
N. Clarke and M. T. Richardson.
Roman Catholic, four, in Dakota,
New Mexico, Montana and Idaho;
appointments—W. F. Cady and
Charles S. Jones. Unassigned, five,
in Montana, Washington Territory,
Oregon, Iowa and New York; ap-
pointments—F. D. Pease, C. S.
King, John Smith, Leander Clark
and Daniel Sherman.—New York
Christian Advocate.

THE SKEPTIC AND THE CHILD.—Mr.
Hone, the well known author of the
"Every-day Book," was in the days
of his infidelity traveling in Wales
on foot. Being tired and thirsty, he
stopped at the door of a cottage
where there was a little girl reading
a large Bible. He asked the child
if she would please to give him a
drink of water.

"O yes, sir," she said; "if you
will come in mother will give you
some milk."

Mr. Hone followed the little girl
into the cottage, where he partook
of the nutritious beverage, the little
girl again resuming her seat and
her book. After a short conversa-
tion with her mother, Mr. Hone
came out and accosted the child at
the door.

"Well, my little girl, are you get-
ting your task?"

"O no, sir," she replied, "I am
reading the Bible."

"But," said Mr. Hone, "you are
getting your task out of the Bible?"

"O no, sir; it is no task to me to
read the Bible; it is a pleasure."

These words of the child had such
an effect upon Mr. Hone that he
determined to read the Bible for
himself. By God's blessing this led
to the conversion of this skeptic,
and he became a champion in up-
holding and defending the great
truths contained in the blessed
book.

NOTHING LOST.—I called the other
day on my friend Mrs. T., who has
the finest collection of roses I ever
saw. She took me out to see them
—white roses, red roses, yellow
roses, climbing roses, and roses in
pots, the gay giant of battles and
the modest moss rose, every species
I had ever heard of, and a great
many I had never heard of, were
there in rich profusion. Mrs. T.
began plucking right and left. Some
bushes with but a single flower she
despoiled. I remonstrated. "You
are robbing yourself, Mrs. T.," said
I. "Ah," said she, "Mr. Laicus,
do you not know that the way to
make the rosebush bear is to pluck
its flowers freely? I lose nothing
by what I give away."

This is a universal law. We never
lose anything by what we give away.

Laicus in Christian Union.

RELIGIOUS INTELLIGENCE.

The Baptists of Missouri have
just held their annual association.
They report 51 local associations,
with 1,003 churches and 61,211
members, of whom 5,925 joined by
baptism during the year.

The Congregationalists of north-
ern and central Illinois, since 1862,
have organized sixty-four churches,
and built ninety-three houses of
worship, sixty-four of which were
for missionary churches.

BISHOP McFARLAND says that 50
years ago there were but 3 Catholic
families in Rhode Island and Con-
necticut. Now there are 100 churches
and 200,000 Catholics. The Catho-
lics in Rhode Island have one-third
of the population, and last year half
of the children born in the State.

THE "Flower Mission," which
provides bouquets for the sick poor
in Boston, reports 151 contributions
in flowers, 64 of plants, and 78 of
fruit; from which 348 distributions
of fruit have been made and 11,000
of bouquets. There were received
1,800 pounds of lilies from one friend.

DR. CHARLES CULLIS, so favorably
known for his labors for the Con-
sumptives' Home, in Boston, has
purchased for \$90,000 a fine estate
near the city, which will give abun-
dantly room for his home for the in-
curably sick. His work and success
bear a nearer resemblance to that
of George Muller than any other in
the country.

CONFESIONAL BOXES IN EPISCOPAL
CHURCHES.—Auricular confession is
urged as a sacred duty by the
Ritualists of England, and to re-
move the great opportunity for
scandal, supplied by females going
to the vestry with the priest, or to
his private house, confessional boxes
have been introduced in some of the
Episcopal churches in London.

GROWTH OF CHRISTIANITY AMONG
THE HEATHEN.—Christianity has had
wonderful success among the Sha-
nars, a large tribe of degraded devil
worshippers in Southern India, who,
when heathen, had scarcely any
idea of God. They have now over
five hundred native preachers, and a
hundred thousand nominal Chris-
tians, who have abandoned hea-
thenism, and formed themselves into
congregations for Christian worship.

The Cumberland Presbyterians
now report 24 synods, 99 presby-
teries and 1,113 ordained ministers.
This body was first separated from
the Presbyterians by a difference of
opinion on the matter of the ne-
gation of the call for less thoroughly
educated preachers in the frontier
territories, and on the freedom of the
will. They now claim 4 colleges, at
Lebanon, Tennessee; College Monnd,
Missouri; Lincoln, Illinois; and
Waynesburg, Pennsylvania; with a
total of 1,135 students.

The Seventh-day Baptists of this
country will perhaps be surprised to
hear that their denomination has
one endowed chapel in London,
which boasts of a weekly attendance
of five members. Mr. Ritchie, author
of a recent carefully written book
upon The Religious Life of London,
says of the Seventh-day commu-
nion: "Here in England they have
 dwindled down to two skeleton con-
gregations, an endowment, and a
Chancery suit. As there is money,
a form of worship is kept up, though
for all practical purposes the cause
is dead."

IN AN ADDRESS to the Baptists of
Wisconsin, at their State conven-
tion, the Rev. Dr. Baekus spoke of
the old difficulties of the denomina-
tion. "The first Baptists in Bos-
ton," said the speaker, "were ear-
ried there by the sheriff. The same
was true with reference to New
London, Connecticut. The first
Baptist preacher in New York was
imprisoned three months, and kept
on bread and water. The first
baptism in New York city was near
the present Fulton market, and in
the dead hour of night, for fear of
being molested."

DEATH OF A VENERABLE MAN.—The
Rev. Benjamin Chase, D. D., one of
the oldest ministers of the Presby-
terian Church in this country, died
at his residence near Natchez, Mis-
sissippi, on the eleventh ultimo, in
the eighty-second year of his age.
He was born in New Hampshire in
the year 1789, graduated at Middle-
bury College, and spent the whole
of his ministerial life in the South-
west. He was a cotemporary of
Sylvester Larned's in New Orleans.
Dr. Chase was a noble man, a true
minister of Christ, large in his bene-
dictions to the cause of Christ, and
kind and generous to his brethren
in the ministry. His ecclesiastical
connection was with the Southern
Presbyterian Church.—Phil. Pres-
byterianian.

The Moravian missions for this
year include 293 male and female
missionaries, with 35,099 baptized
adults and 23,288 baptized children.
There are 16 mission provinces and
97 stations and outstations. The
total of persons under instruction is
68,751, and the total of European
and native laborers is 3,290. The
largest number of adherents is in
Surinam, where there are 24,156.
In the West Indies and Barbadoes

there are nearly 35,000; 8,811 in
